PhD students shall have passed their Cumulative Exams and the Oral Comprehensive Examination before they may be admitted to candidacy for the PhD degree. Students should note that the approved research proposal must be filed in order for a student to be advanced to candidacy.

Research Requirements

The results of a completed research program are submitted as a thesis for the final examination described above. Some students may pursue their PhD research in a laboratory outside of the department (e.g., JILA, NOAA, etc.) with the approval of the graduate advisor. In this case, the student must find a surrogate advisor in the department who agrees to monitor the activity of the student. It is recommended that meetings between the surrogate advisor, student and day-to-day advisor be frequent, perhaps in the form of a group meeting.

Time Limit

Students should note the time limit specified in the Graduate School rules: "All doctoral students are expected to complete all degree requirements within six years from the date of the start of coursework in the program." Information on extensions is available in the Doctoral Degree Requirements (p. 1033) section.

Classics

The Department of Classics is home to one of the most vibrant programs at the University of Colorado Boulder. Students at every level in the department are challenged to acquire a set of skills in the analysis and presentation of diverse forms of evidence that stand to serve them in their daily, civic and professional lives.

The field of Classics is *multicultural*; it involves the study of the civilizations of ancient Greece and Rome, but also of the many peoples

with whom the Greeks and Romans interacted in central and eastern Europe, north Africa, Egypt and the Middle East.

The field of Classics is *interdisciplinary* because faculty and students in the department cross the boundaries of literature, philosophy, material and visual culture, history and religion to study the world of antiquity. Classics also covers *area studies* because of the broad sweep of the Mediterranean basin and the regions that border it that our field encompasses. The department offers courses in language and literature, ancient history, philosophy, and art and archaeology within several programs of study at the undergraduate and graduate levels.

Course codes for this program are CLAS, GREK and LATN.

Master's Degree

- Classics - Master of Arts (MA) (p. 1132)

Doctoral Degree

- Classics - Doctor of Philosophy (PhD) (p. 1134)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ambrose, Kirk T. (https://experts.colorado.edu/display/fisid_115914/)
Professor; PhD, University of Michigan Ann Arbor

Professor Emerita

Courses

CLAS 5021 (3) Athens and Greek Democracy

Studies Greek history from 800 B.C. (the rise of the city-state) to 323 B.C. (the death of Alexander the Great). Emphasizes the development of democracy in Athens. Readings are in the primary sources.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4021 and HIST 4021

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5031 (3) Alexander the Great and the Rise of Macedonia

Covers Macedonia's rise to dominance in Greece under Philip II and the reign and conquests of Alexander the Great.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4031 and HIST 4031

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5041 (3) Classical Greek Political Thought

Studies main representatives of political philosophy in antiquity (Plato, Aristotle, Cicero) and of the most important concepts and values of ancient political thought. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4041 and HIST 4041 and PHIL 4210

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4061 and HIST 4061 and HIST 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5071 (3) Seminar in Ancient Social History

Considers topics ranging from demography, disease, family structure, and the organization of daily life to ancient slavery, economics, and law. Focuses either on Persia, Greece, or Rome and includes a particular emphasis on the methodology required to reconstruct an ancient society, especially the interpretation of problematic literary and material evidence and the selective use of comparisons with better known societies. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4071 and HIST 4071

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5081 (3) The Roman Republic

Studies the Roman Republic from its foundation in 753 B.C. to its conclusion with the career of Augustus. Emphasizes the development of Roman Republican government. Readings are in the primary sources. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4081 and HIST 4081

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5091 (3) The Roman Empire

Intense survey of Imperial Rome from the Roman revolution to the passing of centralized political authority in the western Mediterranean. Emphasizes life, letters and personalities of the empire. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4091 and HIST 4091

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5099 (3) Ancient Greek Sculpture

Understanding that Greek sculpture, like all visual media, was part of the fabric of ancient Greek life and expressed the values of its creators and audience is a valuable way to gain insights into the social, economic, and political world of ancient Greece. This course will examine the work of Greek sculptors from the Archaic to the Hellenistic period. Key stylistic and technical developments, as well as significant works of art, sculptors and workshops will be discussed in detail. Some issues we will consider are the physical, religious and/or socio-historical context of individual freestanding sculptures and how specific sculptural programs illustrate aspects of Greek culture. Iconographic and narrative choices made by artists working in stone, compared to other material, will also be addressed.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4099, ARTH 4099 and ARTH 5099

Grading Basis: Letter Grade

CLAS 5101 (3) Greek and Roman Slavery

Surveys slavery in ancient Greece and Rome beginning with its growth, economics and political effects, moving to the life experiences of slaves, resistance and revolt, and finishing with the ideology of slavery. Focuses throughout on the challenge of understanding classical slavery on the basis of scattered and biased evidence and on the controversies that have surrounded this topic.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4101 and HIST 4101

CLAS 5109 (3) Ancient Italian Painting

Explores the problems, theories and methods for understanding the iconography, styles, topologies, contexts and techniques of fresco wall painting in ancient Italy from the 6th century B.C.E. to the 4th century C.E. Topics covered include Etruscan tomb paintings, late Republican and early imperial fresco paintings from Rome and Campania and later Roman wall paintings, including the painted images in ancient catacombs. Previous coursework on ancient Italy or the history of pre-modern art is highly recommended.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4109 and ARTH 4109 and ARTH 5109

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5110 (3) Greek and Roman Epic

Students read in English translation the major epics of Graeco-Roman antiquity such as the Iliad, Odyssey, Argonautica, Aeneid, and Metamorphoses. Topics discussed may include the nature of classical epic, its relation to the novel, and its legacy. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4110 and HUMN 4110

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5119 (3) Roman Sculpture

Examines ancient Roman sculpture, emphasizing the display, iconography, and production of private and public monuments in the Roman Empire. Explores sculpture as evidence for historical developments, societal and gender attitudes, and state ideologies in the ancient Roman world.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4119 and ARTH 4119 and ARTH 5119

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5120 (3) Greek and Roman Tragedy

Intensive study of selected tragedies of Aeschylus, Sophocles, Euripides and Seneca in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4120 and HUMN 4120

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5129 (3) Aegean Art and Archaeology

Detailed study of the cultures of prehistoric Greece, the Cycladic Islands and Crete, their art and archaeology and their history within the broader context of the eastern Mediterranean, from earliest human settlement to the collapse of the Bronze Age at about 1100 B.C.E. Emphasis is on palace states.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4129 and ANTH 4129 and ANTH 5129 and ARTH 4129

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5130 (3) Greek and Roman Comedy

Studies Aristophanes, Plautus, and Terence in English translation. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4130 and HUMN 4130

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5139 (3) Greek Vase Painting

A comprehensive overview of Greek vase painting, from prehistoric through the fourth century B.C.E. Emphasis is on learning the development of primary decorative styles and on refining skills of visual analysis, scholarly research, critical thinking, oral commentary and written presentation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4139 and ARTH 4139 and ARTH 5139

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5140 (3) The Greek and Roman Novel

Studies a number of complete Greek and Roman novels from Classical Antiquity and their predecessors and contemporary neighbors in the genres of Greek prose fiction. Ancient texts in English translation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4140 and HUMN 4131

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 5149 (3) Greek Cities and Sanctuaries

Examines Greek architecture in context, from the ninth century B.C.E. into the Hellenistic period, considering the use of space, both in religious and in civic settings and using texts as well as material culture. Emphasis is on developing analytical skills.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4149 and ARTH 4149

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5159 (3) Hellenistic Art and Archaeology

Examines art and archaeology from the period following the death of Alexander the Great (late fourth century B.C.E.) to the conquest of Greece by the Romans (middle second century B.C.E.).

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5159

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5169 (3) Topics in Ancient and Classical Art and Archaeology

In-depth consideration of an aspect of ancient Mediterranean culture. Topics vary and may include ancient wall painting, Greek sculpture, artists and patrons, the ancient Near East, Egyptian art and archaeology, or Etruscan art and archaeology.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4169 and ARTH 4169 and ARTH 5169

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5179 (3) City of Athens

Explores in detail the buildings, sculptures, pots, foreign imports and society of Athens, considering material culture of individuals as much as civic programs. Emphasis is on ways the textual and archaeological evidence complement and/or contradict one another. Focuses on the Periclean period, considering ways in which it developed from earlier times and influenced later ones in Athens.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5179

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5189 (3) City of Rome

Explores in detail the architecture, sculptures, coins, frescoes and other material evidence alongside the political and social history of Augustan Rome. Emphasis is on ways in which the textual and archaeological evidence complement and/or contradict one another. Explores the impact of the early imperial period on later Roman phases of urban design and image making in the capital city.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 5189

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5199 (3) Roman Architecture

Examines the designs, functions and construction methods of ancient Roman towns, temples, baths, houses and civic structures, as well as utilitarian structures including roads and aqueducts. Emphasizes Roman architectural forms and spaces as vehicles for political propaganda and empire consolidation.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4199 and ARTH 4199

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5209 (6) Classical Archaeological Field Methods

Offers experiential learning in theories and methods of archaeological fieldwork in the western Argolid in Greece. Applies methods for extensive survey, stratigraphic excavation, GIS modeling, ceramic analysis, numismatic analysis, architectural studies, artifact and data processing and documentation. Offered abroad only.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4209 and ARTH 4209

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite CLAS 1509 or ARTH 1509 or CLAS 2049 or ARTH 2049.

Additional Information: Departmental Category: Art and Archaeology

CLAS 5229 (3) Ancient Egyptian Art and Archaeology

Archaeology of ancient Egypt in light of recent excavations; the history of excavations of the different sites; and the art of ancient Egypt through time. Formerly ANTH 5420.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4229 and ARTH 4229 and ARTH 5229

Additional Information: Departmental Category: Art and Archaeology

CLAS 5269 (3) Art and Archaeology of the Ancient Near East

Examines civilizations of the Iran-Iraq region from the rise of urbanism in Mesopotamia through the era of the first 'world empire,' Achaemenid Persia. Emphasizes the material record of religious and state institutions of the ancient Near East, especially monuments that illustrate concepts of kingship. Explores notions of style, symbolism, visual rhetoric, text-image synthesis, patronage, creativity and roles of artists.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4269 and ARTH 4269 and ARTH 5269

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology
Departmental Category: Asia Content

CLAS 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: CLAS 4761 and HIST 4761 and HIST 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 5840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 6109 (3) Topics in Critical Theory and Ancient Art and Archaeology

Topics will vary and may focus on a particular approach to ancient material culture or on a particular time period or artifact category. Emphasis is placed on reading and using theory in considering the ancient world.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6119 (1-3) Graduate Independent Study in Classical Art and Archaeology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 6952 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7011 (3) Seminar in Ancient History

Examines topics in ancient Greek and Roman history at an advanced seminar level.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Ancient History

CLAS 7012 (3) Graduate Seminar

Topic specified in online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Classical Philology

CLAS 7109 (3) Graduate Seminar in Ancient and Classical Art and Archaeology

Topics vary. Emphasis is on gaining expertise in using archaeological reports in tandem with (or contradiction to) textual sources, on reading and using critical theory, on improving analytical skills and discussion, and on honing discussion leadership abilities.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Art and Archaeology

CLAS 7840 (1-3) Graduate Independent Study

No Greek or Latin required.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Literature, Culture, and Thought

CLAS 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Additional Information: Departmental Category: Classical Philology

GREK 5013 (3) Topics in Greek Prose

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Thucydides, Herodotus, Plato, Aristotle, Attic Orators).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4013

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5023 (3) Topics in Greek Poetry

Author or topic in ancient Greek specified in the online Schedule Planner (e.g., Homer, Hesiod, lyric poetry, tragedy, comedy).

Equivalent - Duplicate Degree Credit Not Granted: GREK 4023

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 5093 (3) Survey of Greek Literature

Greek literary history in ancient Greek from Homer to the Hellenistic age.

Equivalent - Duplicate Degree Credit Not Granted: GREK 4093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6003 (3) Graduate Reading

Author or topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 6843 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

GREK 7013 (3) Graduate Seminar in Greek Literature

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Greek

LATN 5014 (3) Topics in Latin Prose

Author or topic in Latin specified in the online Schedule Planner (e.g., Roman historians, Roman epistolography, Cicero, Roman novel).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4014

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5024 (3) Latin Prose Composition

Reviews grammar and syntax. Introduces Latin prose style and composition. Formerly CLAS 5024.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4024

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5044 (3) Topics in Latin Poetry

Author or topic specified in Latin specified in the online Schedule Planner (e.g., Roman elegy, Neronian poetry, Lucretius, Roman satire).

Equivalent - Duplicate Degree Credit Not Granted: LATN 4044

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5084 (3) Survey of Roman Literature Part 2: Imperial

Covers Imperial Roman literary history from the mid-late Augustan Period to the start of Late Antiquity. Students read principal surviving works of Imperial Roman poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4084

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5094 (3) Survey of Roman Literature Part 1: Republican to Augustan

Introduces Roman literary history from its origins to the 30s BCE. Students read principal surviving works of the Roman Republican poetry and prose in the original Latin.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4094

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5404 (3) Special Project: Teaching

Trains students to prepare classroom-ready materials, which are then tested in the students' own classroom. Required of master's candidates (teaching of Latin option). Formerly CLAS 5404.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 5824 (3) Latin Teaching Methods: Open Topics

Covers specialized topics in Latin pedagogy specified in the online Schedule Planner.

Equivalent - Duplicate Degree Credit Not Granted: LATN 4824

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6004 (3) Graduate Reading

Author or topic specified in the online Schedule Planner. Formerly CLAS 6004.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 6844 (1-3) Graduate Independent Study

Formerly CLAS 6844.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

LATN 7014 (3) Graduate Seminar in Latin Literature

Formerly CLAS 7014.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Latin

Classics - Master of Arts (MA)

Candidates will choose one of the following five concentrations: (1) Greek, (2) Latin, (3) Classical Art and Archaeology, (4) Classical Antiquity, or (5) Teaching of Latin.

It is expected that students opting for the teaching of Latin either have achieved accreditation at the secondary level or are planning to do so through the School of Education. The MA degree alone does not satisfy the state requirements for certification.

For more information, visit the department's Graduate Degrees in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Classics - Bachelor of Arts (BA) (p. 229).

Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in classics should visit the department

website (<https://www.colorado.edu/classics/graduate/>) for the most up-to-date degree requirements.

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, 6 hours of coursework may be taken in departments other than Classics. Students may earn the MA degree in classics through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/>) webpage).

Students will meet with the Associate Chair for Graduate Studies at least twice a year to guarantee that they are on track to meet these requirements.

Electives

The following is a comprehensive list of classics graduate courses, any of which can serve as electives depending on concentration.

Code	Title	Credit Hours
Greek Language and Literature Courses		
GREK 5013	Topics in Greek Prose	3
GREK 5023	Topics in Greek Poetry	3
GREK 5093	Survey of Greek Literature	3
GREK 6003	Graduate Reading	3
GREK 6843	Graduate Independent Study	1-3
GREK 7013	Graduate Seminar in Greek Literature	3
Latin Language and Literature Courses		
LATN 5014	Topics in Latin Prose	3
LATN 5024	Latin Prose Composition	3
LATN 5044	Topics in Latin Poetry	3
LATN 5084	Survey of Roman Literature Part 2: Imperial	3
LATN 5094	Survey of Roman Literature Part 1: Republican to Augustan	3
LATN 5824	Latin Teaching Methods: Open Topics	3
LATN 6004	Graduate Reading	3
LATN 6844	Graduate Independent Study	1-3
LATN 7014	Graduate Seminar in Latin Literature	3
Literature and History Courses		
CLAS 5110	Greek and Roman Epic	3
CLAS 5120	Greek and Roman Tragedy	3
CLAS 5130	Greek and Roman Comedy	3
CLAS 5140	The Greek and Roman Novel	3
CLAS 5840	Graduate Independent Study	1-3
CLAS 7840	Graduate Independent Study	1-3
CLAS 5021	Athens and Greek Democracy	3
CLAS 5031	Alexander the Great and the Rise of Macedonia	3
CLAS 5041	Classical Greek Political Thought	3
CLAS 5061	Twilight of Antiquity	3
CLAS 5071	Seminar in Ancient Social History	3
CLAS 5081	The Roman Republic	3

CLAS 5091	The Roman Empire	3
CLAS 5101	Greek and Roman Slavery	3
CLAS 5761	Roman Law	3
CLAS 7011	Seminar in Ancient History	3
CLAS 7012	Graduate Seminar	3
Archaeology Courses		
CLAS 5099	Ancient Greek Sculpture	3
CLAS 5109	Ancient Italian Painting	3
CLAS 5119	Roman Sculpture	3
CLAS 5129	Aegean Art and Archaeology	3
CLAS 5139	Greek Vase Painting	3
CLAS 5149	Greek Cities and Sanctuaries	3
CLAS 5159	Hellenistic Art and Archaeology	3
CLAS 5169	Topics in Ancient and Classical Art and Archaeology	3
CLAS 5179	City of Athens	3
CLAS 5189	City of Rome	3
CLAS 5199	Roman Architecture	3
CLAS 5209	Classical Archaeological Field Methods	6
CLAS 5229	Ancient Egyptian Art and Archaeology	3
CLAS 5269	Art and Archaeology of the Ancient Near East	3
CLAS 6109	Topics in Critical Theory and Ancient Art and Archaeology	3
CLAS 6119	Graduate Independent Study in Classical Art and Archaeology	1-3
CLAS 7109	Graduate Seminar in Ancient and Classical Art and Archaeology	3

Concentrations

Students may earn an MA in classics with a concentration in one of the following options below.

Greek or Latin

Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
 - 18 hours in Greek and/or Latin.
 - 6-9 hours of student's choice (including classes outside of the department, in consultation with the graduate advisor).
 - 4-6 hours of thesis credit.
- *Thesis* (to be completed during 4th semester of graduate study)
- *Comprehensive Examination* (upon submission of thesis): 4 hour written examination, consisting of translation and analysis of texts in the major language. This will be followed by a one-hour oral examination based upon the thesis. The translation examination will consist of two out of three prose passages and two out of three verse passages for a total of c. 100 lines. All passages will be drawn from the relevant (Greek or Latin) MA reading list. Students may fail the exam once.

Plan II

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in eliminating the 4-6 thesis hours and requiring instead 21 hours of Greek and/or Latin (5000-level or above) and 9 hours of the student's choice. The written portion of the Comprehensive

Examination is the same as in Plan I; the oral portion of the exam covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history.

Classical Antiquity

Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
 - 6 hours of Ancient History and/or Classical Archaeology
 - 6 hours of Greek and/or Latin
 - 12-15 hours of student's choice
 - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)
- *Comprehensive Examination* (upon submission of thesis): 3 hours of written examination on two of the following special fields: a) Greek history, b) Roman history, c) Roman art and archaeology, d) Greek art and archaeology, e) Greek religion and mythology, f) Roman religion and mythology, g) philosophy and political theory, h) Greek translation, or i) Latin translation, and one-hour oral examination based upon the thesis. The special field examinations of 90 minutes each are based on reading lists published in the Graduate Handbook and on the department's website. The examination committee serves in an advisory capacity, in addition to setting and grading the written examinations. Students electing Greek or Roman archaeology as a special field must pass a thirty-minute slide identification exam before taking the Comprehensive Examination.

Plan II

For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient history or classical archaeology for the 4-6 thesis hours of Plan I. The written portion of the Comprehensive Examination is the same as in Plan I (as above); the oral exam will focus on coursework and the reading lists. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

Classical Art and Archaeology

Plan I

- A minimum of 30 hours of 5000-level credit or above (including thesis), to be distributed as follows:
 - 6 hours of Greek and/or Latin
 - 15 credit hours of ancient, classical, and/or medieval art and archaeology.
 - 3-6 hours of student's choice
 - 4-6 hours of thesis credit
- *Thesis* (to be completed during 4th semester of graduate study)
- *Slide Identification Exam*: A one-hour slide identification exam must be passed in advance of the Comprehensive Examination.
- *Comprehensive Examination* (upon submission of thesis): Candidates must pass written and oral examinations in the fields of Greek art and archaeology and Roman art and archaeology. The three-hour written exam will be based on candidates' coursework and the reading lists. The oral exam will explore further aspects of candidates' understanding of theories, methods, and material culture, based primarily on the thesis.

Plan II

- For many students Plan II will be more in line with their educational goals. They are encouraged to discuss this option with the ACGS. The requirements differ from Plan I in substituting 3-6 additional hours of ancient, classical, and/or medieval art and archaeology or graduate-level language for the 4-6 thesis hours of Plan I. The Slide Identification Exam and the Comprehensive Examinations are the same as in Plan I (as above), except that the oral examination focuses on understanding of theories, methods, and material culture gained through coursework and the reading lists rather than a thesis.

The faculty strongly recommend that students planning to apply for PhD programs in classical archaeology attain graduate-level proficiency in both Greek and Latin. Language courses may, with the approval of the Associate Chair for Graduate Studies, be substituted for other courses in fulfilling the requirements for this degree.

Teaching of Latin

Plan II only

Note: Students entering the MA in classics with a concentration in the teaching of Latin program who have not yet received teaching certification at the secondary level are encouraged to do so through the School of Education (<https://www.colorado.edu/education/>). Classes in the program can be taken concurrently with classes in the School of Education. Generally, it takes three years to fulfill the requirements of both qualifications, if they are embarked upon concurrently. The MA in classics alone does not satisfy the state's requirements for certification. Many students elect to pursue certification after completing the degree. Students should contact the Office of Student Services in the School of Education for further information about teaching certification. For information about licensure through the School of Education, see the Secondary Latin Teacher Licensure Program Form (https://www.colorado.edu/classics/sites/default/files/attached-files/pba_edlt_9.27.2016.pdf).

- A minimum of 30 hours of 5000-level credit or above, to be distributed as follows:
 - 12 hours of Latin
 - 3 hours of workshop in Latin Teaching Methods.
 - 3 hours of Roman History
 - 9 hours of student's choice
 - 3 hours of Special Teaching Project covering the planning, teaching, and evaluation of a sequence of approximately 10 to 15 lessons.
- *Special Teaching Project* (to be completed during the 4th semester of graduate study). This may be extended if the student is pursuing teaching certification concurrently.
- *Comprehensive Examination* (upon submission of Special Project): A three hour written Latin translation examination, and a one-hour oral comprehensive examination on teaching methods and the special project.

Classics - Doctor of Philosophy (PhD)

The PhD in classical languages and literatures is founded on mastery of Greek and Latin, develops the student's ability to pursue independent scholarly research through seminars and advanced work on special topics, and culminates with the dissertation.

Students take courses and seminars on major ancient authors and genres, Greek and/or Latin prose composition, and such special topics as literary criticism, epigraphy, paleography and numismatics.

For more information, visit the department's Doctor of Philosophy in Classics (<http://www.colorado.edu/classics/graduate/graduate-degrees-classics/phd/>) webpage.

Requirements

Candidates for the PhD in classics must meet the following requirements:

1. A minimum of 42 credit hours of coursework at the 5000 level or above (excluding thesis and accelerated courses). Coursework completed in the MA program at the University of Colorado, or up to 21 credit hours of graduate credit transferred from another institution, may be applied toward this requirement. Courses should be distributed as follows:
 - a. Four 7000-level graduate seminars (at least one each in Greek and Latin).
 - b. Two courses in ancient history and/or classical archaeology.
 - c. One course in either Greek or Latin prose composition.
 - d. Two courses in special fields such as epigraphy, law, linguistics, literary theory, medieval studies, palaeography, papyrology, philosophy or religion, as approved by the associate chair for graduate studies.
2. A minimum of 30 credit hours of doctoral dissertation with no more than 10 of these credit hours in any one semester. No more than 10 dissertation credit hours may be taken preceding the semester of taking the oral comprehensive examination. Up to 10 credit hours may be taken during the semester in which the student passes the comprehensive examination.
3. A reading knowledge of German and one other modern foreign language (normally Italian or French). Proficiency is tested by a one-hour written translation test using a dictionary. Students may take a foreign language exam at any time by arrangement with the associate chair for graduate studies. Students are encouraged to pass both modern language exams before the end of the second semester in the PhD program.
4. **Preliminary Examinations in Greek and Latin.** Two written examinations of four hours each, each consisting of translation and analysis of texts. The translation portion of each exam will consist of two out of three prose passages and two out of three verse passages for a total of about 100 lines. All passages will be drawn from the PhD reading list. Each written examination will be followed by a one-hour oral examination that covers the range of Greek or Latin literature represented by the reading list and tests the candidate's general knowledge of the primary sources and literary history. There will be two administrations of each exam per year, in the fall and spring. Students are encouraged to pass both exams by the end of the second semester in the PhD program (or the second semester beyond the MA).
5. **Comprehensive Examination.** Two written examinations of three hours each on two topics or authors, chosen in consultation with faculty members selected by the student and approved by the graduate committee, to be chosen from the following broad areas: language and literature, ancient history, archaeology, philosophy or religion. In selecting the topics for these examinations, students are required to demonstrate balance in the fields of Greek and Roman culture, as determined by the graduate committee. The written comprehensive examinations will be administered twice

per year, typically during the last two weeks of the term. Successful completion of the written examination is followed by a two-hour oral exam on Greek and Roman culture within the area of the student's chosen specialization, which should coincide with the student's intended dissertation topic. Students are encouraged to complete these exams by the end of their fourth semester in the PhD program.

6. **Dissertation Prospectus.** To be approved as described in the PhD requirements, preferably by the end of the fifth semester in the PhD program.
7. **Dissertation.** To be completed by the end of the tenth semester in the PhD program.
8. **Final Examination (upon submission of dissertation).** Two hours of oral defense of the dissertation.

Classics Graduate Courses

The following is a comprehensive list of classics graduate courses which may be used to meet the requirements for the PhD in classics.

Code	Title	Credit Hours
Greek Language and Literature Courses		
GREK 5013	Topics in Greek Prose	3
GREK 5023	Topics in Greek Poetry	3
GREK 5093	Survey of Greek Literature	3
GREK 6003	Graduate Reading	3
GREK 6843	Graduate Independent Study	1-3
GREK 7013	Graduate Seminar in Greek Literature	3
Latin Language and Literature Courses		
LATN 5014	Topics in Latin Prose	3
LATN 5024	Latin Prose Composition	3
LATN 5044	Topics in Latin Poetry	3
LATN 5084	Survey of Roman Literature Part 2: Imperial	3
LATN 5094	Survey of Roman Literature Part 1: Republican to Augustan	3
LATN 5824	Latin Teaching Methods: Open Topics	3
LATN 6004	Graduate Reading	3
LATN 6844	Graduate Independent Study	1-3
LATN 7014	Graduate Seminar in Latin Literature	3
Literature and History Courses		
CLAS 5110	Greek and Roman Epic	3
CLAS 5120	Greek and Roman Tragedy	3
CLAS 5130	Greek and Roman Comedy	3
CLAS 5140	The Greek and Roman Novel	3
CLAS 5840	Graduate Independent Study	1-3
CLAS 7840	Graduate Independent Study	1-3
CLAS 5021	Athens and Greek Democracy	3
CLAS 5031	Alexander the Great and the Rise of Macedonia	3
CLAS 5041	Classical Greek Political Thought	3
CLAS 5061	Twilight of Antiquity	3
CLAS 5071	Seminar in Ancient Social History	3
CLAS 5081	The Roman Republic	3
CLAS 5091	The Roman Empire	3
CLAS 5101	Greek and Roman Slavery	3

CLAS 5761	Roman Law	3
CLAS 7011	Seminar in Ancient History	3
CLAS 7012	Graduate Seminar	3
Archaeology Courses		
CLAS 5099	Ancient Greek Sculpture	3
CLAS 5109	Ancient Italian Painting	3
CLAS 5119	Roman Sculpture	3
CLAS 5129	Aegean Art and Archaeology	3
CLAS 5139	Greek Vase Painting	3
CLAS 5149	Greek Cities and Sanctuaries	3
CLAS 5159	Hellenistic Art and Archaeology	3
CLAS 5169	Topics in Ancient and Classical Art and Archaeology	3
CLAS 5179	City of Athens	3
CLAS 5189	City of Rome	3
CLAS 5199	Roman Architecture	3
CLAS 5209	Classical Archaeological Field Methods	6
CLAS 5229	Ancient Egyptian Art and Archaeology	3
CLAS 5269	Art and Archaeology of the Ancient Near East	3
CLAS 6109	Topics in Critical Theory and Ancient Art and Archaeology	3
CLAS 6119	Graduate Independent Study in Classical Art and Archaeology	1-3
CLAS 7109	Graduate Seminar in Ancient and Classical Art and Archaeology	3

Cognitive Science

Cognitive Science is the study of human knowledge, of which one aspect is the study of how knowledge is acquired, stored, and represented in the mind, including the mind's underlying biological mechanisms. Another aspect of Cognitive Science concerns how knowledge is understood, remembered, communicated, and used in the performance of activities, including the acquisition and application of skills and information. This latter aspect provides the practical applications of cognitive science, and thereby ensures a demand for graduates in both academic and industrial markets. Training for graduates in cognitive science prepares students admirably for many of the fields that are targeted as the major growth fields of the 21st century: telecommunications, information processing, medical analysis, data retrieval, education, and multimedia services.

The Institute of Cognitive Science (ICS) currently offers two graduate certificate programs: one has a general science focus, the other focuses on human language technology. The cognitive science academic certificate programs are interdisciplinary programs for graduate students in the following departments (see the undergraduate Cognitive Science (p. 231) page for certification at the undergraduate level):

- Psychology & Neuroscience
- Philosophy
- Linguistics
- Education
- Speech, Language and Hearing Sciences
- Computer Science
- Architecture, Planning and Design (Denver Campus)

- Information Science
- Integrative Physiology

For more information, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs/>) website or call Donna Caccamise at 303-735-3602.

Doctoral Degree

- Cognitive Science - Doctor of Philosophy (PhD) (p. 1137)

Certificates

- Cognitive Science - Graduate Certificate (p. 1236)
- Human Language Technology - Graduate Certificate (p. 1238)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Assistant Professor; PhD, University of Colorado Boulder

Caccamise, Donna J. (https://experts.colorado.edu/display/fisid_115770/)
Lecturer, Associate Research Professor; MA, University of Denver

Carter Carston, Ronald McKell (https://experts.colorado.edu/display/fisid_154921/)
Assistant Professor; PhD, California Institute of Technology

Cordes, Dietmar
Associate Professor Adjunct

D'Mello, Sidney (https://experts.colorado.edu/display/fisid_159117/)
Professor; PhD, University of Memphis

Kim, Albert E. (https://experts.colorado.edu/display/fisid_143740/)
Associate Professor; PhD, University of Pennsylvania

Martin, James H. (https://experts.colorado.edu/display/fisid_100495/)
Professor; PhD, University of California, Berkeley

Mozer, Michael C. (https://experts.colorado.edu/display/fisid_105922/)
Professor; PhD, University of California, San Diego

Penuel, William Richard (https://experts.colorado.edu/display/fisid_149719/)
Distinguished Professor; PhD, Clark University

Sumner, Tamara (https://experts.colorado.edu/display/fisid_105742/)
Professor, Institute Director; PhD, University of Colorado Boulder

Van Vuuren, Sarel (https://experts.colorado.edu/display/fisid_124159/)
Associate Research Professor; PhD, Oregon Graduate Institute of Science Technology

Ward, Wayne Hinson (https://experts.colorado.edu/display/fisid_114680/)
Research Professor; PhD, University of Colorado Boulder

Yaeger, Barbara Jean (https://experts.colorado.edu/display/fisid_151792/)

Assistant Research Professor; PhD, Oakland University

Cognitive Science - Doctor of Philosophy (PhD)

The Institute of Cognitive Science Academic Program includes a combined PhD degree between cognitive science and a core discipline, as well as a combined PhD plan of study tailored for students interested in cognitive neuroscience. These programs are administered by CU Boulder's Institute of Cognitive Science (ICS).

Graduate students in cognitive science are admitted to graduate programs in participating departments that have ICS faculty, and must meet the requirements for admission and degree completion in their home department.

Students wishing to attain a degree or certificate in cognitive science must formally apply to the director of academic programs of ICS. To be admitted, they must be a student affiliate of ICS, which requires being a graduate student in good standing in a member department, and they must be sponsored by an ICS faculty fellow. Students who enter the Graduate School without a master's degree may be admitted to the program upon completion of their first year of study; students with a master's degree may be admitted during their first year.

The degree and certificate programs in cognitive science require students to demonstrate acceptable performance in interdisciplinary coursework and courses outside their home department. The courses must be offered by the following departments: Computer Science; Education; Integrative Physiology; Linguistics; Philosophy; Information Science; Psychology and Neuroscience; Speech, Language, Hearing Sciences; Architecture and Planning; or a department in which there is an ICS faculty fellow.

Details about requirements for the degree and certificate programs can be obtained through the director of academic programs for ICS or by contacting the ICS main office.

Requirements

Combined PhD Requirements

Students must complete 30 credit hours of cognitive science courses, including 9 credit hours of required core courses and 21 credit hours of elective courses.

For more program information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/>) webpage.

Required Courses and Credits

Code	Title	Credit Hours
Core Cognitive Science Courses		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3

PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (two semesters, 1 credit per semester)	2
--	--	---

PSYC 7415/ CSCI 7412/ EDUC 6506/ LING 7415/PHIL 7415	Cognitive Science Research Applications Seminar 1	2
--	---	---

PSYC 7425/ CSCI 7422/ EDUC 6516/ LING 7425/PHIL 7425	Cognitive Science Research Applications Seminar 2	2
--	---	---

Elective Cognitive Science Courses

Twelve credit hours of courses outside the home department, including courses in at least two different departments outside the home department. Each course must be at least 2 credits.	12
--	----

Two interdisciplinary courses from the list of ICS-approved interdisciplinary courses during the semester the course was taken.	6
---	---

Additional elective courses to complete the 30-credit-hour requirement.	3
---	---

Total Credit Hours	30
---------------------------	-----------

For a list of available elective courses, visit the institute's Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog/>) webpage.

Interdisciplinary Thesis

The original contributions of the dissertation research should exploit state-of-the-art methods from the perspective of at least two disciplines. Students are encouraged to have their doctoral research co-supervised by two ICS fellows representing different disciplines.

Dissertation

Students must complete 30 hours of dissertation research.

Triple PhD Requirements

Students must complete 28–34 credit hours, including 11–14 credit hours of required core courses, 6–9 credit hours of depth courses and at least 11 credit hours of courses in a related discipline specialization. For a list of specific available courses, visit the institute's Course Catalog (<http://www.colorado.edu/ics/graduate-programs/course-catalog/>) webpage.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/>) webpage.

Comprehensive Examination

In accordance with the graduate school requirements, students will be required to take a comprehensive exam, which they must pass in order to advance to doctoral candidacy status. Successful completion (grade of B- or better) of the Introduction to Neuroscience I (NRSC 5100) and Introduction to Neuroscience II (NRSC 5110) courses will fulfill the neuroscience component of the comprehensive exam.

In addition, the student must pass a comprehensive exam in their area of specialization. The format of this specialty comprehensive exam will be determined by the student's advisor and will be appropriate for the advisor's department/program of affiliation, but must also be

interdisciplinary in nature to fulfill the cognitive science component of the comprehensive exam.

Thesis

All cognitive neuroscience PhD students will be required to complete a doctoral thesis with a primary cognitive neuroscience focus. The thesis/dissertation will represent original state-of-the-art research of quality suitable for publication in a reputable scientific journal. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. In addition, the student's thesis committee must include at least one additional neuroscience faculty member and one cognitive science faculty member from outside the student's area of specialization. In accordance with the requirements of the Graduate School, the student's committee must be comprised of a minimum of five faculty members that have graduate faculty appointments. The committee will be formed by the student's advisor, upon approval of the slate of members by the academic directors of the neuroscience and cognitive science combined PhD programs.

Dual Degree Program Cognitive Science Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a degree can significantly enhance a student's academic knowledge and career choices. Review the course requirements, application for admission and program completion checklist for further information.

For more information, visit the institute's Cognitive Science Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-science-combined-phd/>) webpage.

Triple Degree Program Cognitive Neuroscience Combined PhD

Graduate students in good standing in one of the following participating academic units may apply to earn a combined PhD with cognitive science, neuroscience and their core discipline:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language and Hearing Sciences
- Education
- Architecture and Planning

Students interested in the combined PhD with cognitive science and neuroscience must meet course and thesis requirements. The student's thesis advisor must be a participating faculty member of the cognitive neuroscience faculty. To enroll in this triple degree, you must enroll in the neuroscience program and the cognitive science program.

For more information, visit the institute's Cognitive Neuroscience Combined PhD (<http://www.colorado.edu/ics/graduate-programs/cognitive-neuroscience-combined-phd/>) webpage.

Ecology and Evolutionary Biology

The EBIO graduate program provides advanced training in a wide variety of biological disciplines ranging from biogeochemistry to community ecology to evolutionary genetics. The goal of the EBIO graduate program is to produce scientists, educators and citizens who are equipped with skills to build careers that advance knowledge about life on Earth. Graduates of the EBIO program are well-positioned to pursue a wide range of careers that include academia, science education, wildlife biology, conservation biology, resource management, environmental consulting and environmental law.

Our disciplinary strengths include behavior, ecology, genetics, morphology and systematics. Roughly half of the faculty focus on the adaptation and functioning of organisms in the context of environment, while the other half study higher levels of organization, including populations, communities and ecosystems. Our research programs have relevance for global change, conservation biology, and revealing fundamental mechanisms underlying the structural and functional adaptations of organisms.

Please contact ebiograd@colorado.edu for additional information.

Course code for this program is EBIO.

Master's Degree

- Ecology and Evolutionary Biology - Master of Arts (MA) (p. 1143)

Doctoral Degree

- Ecology and Evolutionary Biology - Doctor of Philosophy (PhD) (p. 1144)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Turetsky, Merritt (https://experts.colorado.edu/display/fisid_165975/)
Professor; PhD, University of Alberta (Canada)

Wessman, Carol A. (https://experts.colorado.edu/display/fisid_100909/)
Professor; PhD, University of Wisconsin–Madison

Windell, John T.
Professor Emeritus

Winston, Paul W.
Professor Emeritus

Courses

EBIO 5000 (1) EBIO Colloquia

All first year EBIO graduate students are required to attend the EBIO Colloquia Series. Speakers from around the world and within the department cover topics in all areas of biology.

Repeatable: Repeatable for up to 2.00 total credit hours.

EBIO 5030 (3) Limnology

Examines the ecology of inland waters, including a detailed consideration of physical, chemical and biological properties of freshwater ecosystems: origins and major characteristics of lakes and streams, survey of chemical and nutrient cycles in freshwater habitats and survey of biotic composition of freshwater environments. Important themes in modern freshwater ecology are considered, including energy flow, trophic structure, eutrophication and management of freshwater ecosystems.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4030

Requisites: Restricted to graduate students only.

EBIO 5040 (3) Speciation

The process by which new species arise is fundamental to understanding life's diversity, with implications for how we define and protect species.

In this class, we will explore models of adaptive and non-adaptive speciation and how we test, find evidence for, and distinguish among these. Each class will include both a short lecture and discussion.

Students will be able to choose and work on independent projects on any area of speciation research.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4040

Requisites: Restricted to graduate students only.

Recommended: Prerequisites EBIO 1220 and EBIO 3080.

EBIO 5050 (4) Fish Biology

Explores the tremendous diversity of this group, which includes eyeless catfish named after Satan and cast out of underground aquifers by artesian wells, loaches that cling to rocks in mountain torrents with fin-derived suction cups, lungfish in mud cocoons that metabolize their own muscles while waiting for the rains to return, degenerate male anglerfish that parasitize their mates in the blackness of ocean depths, and flying fish that glide above the surface of the open sea to escape the slashing bills of sailfish below. Lectures will cover form and function, evolution, the fossil record, reproduction and development, genetics, behavior, ecology, distribution, and conservation of fishes. The laboratory will stress fish identification, anatomy, and development.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4050

Requisites: Restricted to graduate students only.

EBIO 5060 (3) Landscape Ecology

Studies distributional patterns of communities and ecosystems, ecological processes that affect those patterns, and changes in pattern and process over time. Consideration of spatial and temporal scales in ecological analyses is required to understand and predict response to broad-scale environmental change.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4060

Requisites: Restricted to graduate students only.

EBIO 5080 (4) Freshwater Phycology

Algae are a non-monophyletic group of organisms that play critical roles in ecosystem structure and function. They have a long history of being used in a variety of ways by the human species, but are increasingly being applied to modern issues of understanding water quality and climate change, engineering at the nano scale and in the production of renewable biofuels.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4080

Requisites: Restricted to graduate students only.

EBIO 5100 (3) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology, and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4100

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5120 (2-4) Advanced Ecology

Emphasizes specific aspects of ecology based on specialties of faculty. One or more courses are offered most semesters. Topics have included dynamics of mountain ecosystems, tundra ecology, ethnoecology, population dynamics, tropical and insular biology, ecology of fishes, quantitative plant ecology and arctic and alpine environments. May use animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5150 (1-2) Techniques in Ecology

Emphasizes application of modern ecological techniques, such as stream biology, aquatic biology, environmental measurement and control, and techniques in geoecology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4150

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 5155 (3) Ecosystem Ecology

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4155, ENVS 5155 and ENVS 4155

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5190 (1) Diversity and Inclusion

Topics have included: implicit bias, privilege, inclusive pedagogy, inclusive hiring practices, inclusive mentoring, barriers facing undergraduate students, barriers facing graduate students, fairness of the GRE.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

EBIO 5240 (3) Advanced Topics in Animal Behavior

Covers special areas of ethology such as sociobiology, animal communication, cognitive ethology, human ethology, moral and ethical issues.

Recommended: Prerequisite EBIO 3240.

EBIO 5270 (4) Population Genetics

Provides an in-depth applied introduction to population genetics. Lectures, discussions, and labs will focus on exploring how evolutionary processes shape genetic variation through time and space and how population-level evolutionary processes can be inferred from patterns of genetic variation. While learning basic population genetic theory we will investigate current topics in the field and work with simulated and real data.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4270

Grading Basis: Letter Grade

EBIO 5290 (4) Phylogenetics and Comparative Biology

Reviews the principles and methodology of phylogenetic inference using molecular data. Emphasizes the application of comparative approaches to hypothesis testing in evolution, ecology and medicine and provides a broad foundation in both theory and practice of phylogenetics.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4290

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5320 (3) Current Topics in Evolutionary Biology

Examines six major themes on contemporary evolutionary research: population genetics, natural selection and adaptation, molecular evolution, evolution and development, phylogenetic systematics, and macroevolution. Emphasizes recent primary literature and sophisticated mastery.

Requisites: Restricted to graduate students only.

EBIO 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4340 and ENVS 4340 and ENVS 5340

Recommended: Prerequisite EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

EBIO 5360 (3) Lifestyle Medicine

Student will self-select a semester-long personalized project for researching and learning about a topic they are passionate about in the context of the impact of environment and lifestyle on human health and wellbeing. Students will have continuous access to one-on-one instructor support and feedback, and credit will be given for completion of specific milestones throughout the semester.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4360

EBIO 5370 (3) Genetically Engineered Organisms

Explores the genetic engineering of microorganisms, fungi, plants, animals, coral reefs, and humans from the many demonstrated and anticipated benefits to the various concerns that have been raised by the explosive growth of research in this area. The course will be largely student-driven, in that each student will pursue different areas to research and present to the class. Students are encouraged to pursue a topic about which an interest and/or passion can be developed! Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4370

EBIO 5410 (4) Biological Statistics

Lect. and lab. Offers a demanding, problems-oriented methods course in statistical inference procedures, assumptions, limitations, and applications emphasizing techniques appropriate to realistic biological problems. Includes data file management using interactive computing techniques.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4410

Requisites: Restricted to graduate students only.

EBIO 5420 (3) Computational Biology

Covers a wide range of techniques for simulating biological systems, developing computer programs and scripts to interact with data and making research shareable and reproducible.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4420

Grading Basis: Letter Grade

EBIO 5440 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4440 and MCDB 4441 and MCDB 5441

Requisites: Restricted to graduate students only.

EBIO 5460 (1-5) Special Topics

Familiarizes students with specialized areas of biology.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4460

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 5500 (4) Plant Biodiversity and Evolution

Surveys plant types emphasizing diagnostic features of plants in general and major taxa in particular. Focuses on identity, morphology, anatomy, reproduction, ecology, geography, evolution, fossil record, and economic use of taxa.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4500

EBIO 5510 (4) Plant Anatomy and Development

Lect. and lab. Introduces structures of seed plants, especially angiosperms, and developmental history of these structures. Studies cell types, and their location and function in plant tissues and organs. The laboratory provides an opportunity to examine plant tissues and to prepare tissues for examination by the light microscope. Stresses role of plant structures in the living plant.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4510

EBIO 5511 (3) Microbial Ecology

Aims to gain an understanding of the critical roles that microbes play in the biosphere, and why they play those roles. We start with with fundamental concepts (e.g. microbial physiology and evolution) and build up to an understanding of how the biosphere functions (e.g. biogeochemistry and nutrient dynamics at the ocean-sediment interface) by reading both current and classical literature in the field.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4511

EBIO 5520 (4) Plant Systematics

Explores principles and techniques in modern plant systematics from lichens and non-vascular plants to lycophytes, ferns, gymnosperms and angiosperms. Framework is evolutionary and ecological, with emphasis on taxonomy of major lineages and families of plants. No prerequisites, but coursework in evolutionary biology, genetics, phylogenetics and/or other botany classes is strongly encouraged.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4520

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EBIO 5560 (4) The Lichen Biome

Focuses on lichens as biologically diverse hubs of interactions, and will cover numerous dimensions of diversity within the symbiosis (algae, bacteria, and ecological and evolutionary relationships therein) and beyond it (diversity of lichen symbioses in nature, their functions, and conservation).

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4560

Requisites: Restricted to graduate students only.

EBIO 5600 (4) Evolutionary Ecology

Evaluates how interactions within species, among species and between species and the environment evolve over time. Emphasizes the development of scientific skills, including ecological, genetic and statistical tools for testing hypotheses in evolutionary ecology. Lab activities include research projects that quantify natural selection, gene flow and phenotypic plasticity in natural systems, and a semester-long class experiment examining plant dispersal.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4600

Grading Basis: Letter Grade

EBIO 5660 (4) Insect Biology

Lect. and lab. Introduction to evolution, ecology, physiology, and behavior of insects. Emphasizes how insects have solved problems, such as maintaining water balance or finding food, that are shared by all animals but for which there may be unique solutions among the insects. Agricultural and human health problems relative to entomology are discussed. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4660

Requisites: Restricted to graduate students only.

EBIO 5700 (3) Quantitative Genetics

Explores how the differences at the DNA level impact variability within and among individuals, and how that variation is shaped by interactions with environments. Quantitative genetics covers a range of topics, but in this course we will focus on the methods and approaches to investigate complex traits, those influenced by many genes and environmental factors, emphasizing the evolutionary forces that shape variation. We will analyze real genetic data (human, plant, mouse, etc.), and prepare our findings as written manuscripts or oral presentations. Some familiarity with basic genetic principles is assumed. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4700

Requisites: Restricted to graduate students only.

EBIO 5740 (3) Biology of Amphibians and Reptiles

Comparative morphology, taxonomy, ecology, behavior and geographic distribution of amphibians and reptiles. Uses animals and animal tissue.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4740

EBIO 5750 (4) Ornithology

Lect., lab, and field trips. Presents origin, evolution, ecology, physical and behavioral characteristics and taxonomy of orders and families of birds of North America; field work with local species emphasizing avian ecology. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4750

EBIO 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and MUSM 5760

Requisites: Restricted to graduate students only.

EBIO 5800 (3) Critical Thinking in Biology

Lect. and discussion. Explores controversial issues, historical themes, or emerging developments in biology. Consult the EBIO Undergraduate Advising Center for current listings.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4800

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite minimum of 14 hours of EBIO course work.

EBIO 5820 (1) Graduate Writing Seminar

Enhances writing proficiency, using graduate writing projects to implement the course concepts. Offers understanding of conventions and strategies used in scientific writing to prepare students for academic and professional communication. Department enforced requisite, basic proficiency in English as a written language.

Requisites: Restricted to graduate students only.

EBIO 5840 (1-6) Independent Study (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6000 (1) Seminar: Introduction to Biological Research

Discusses areas of biological research represented in EBIO. Required of all first-year graduate students in EBIO.

Requisites: Restricted to graduate students only.

EBIO 6100 (1-3) Seminar in Environmental Biology

Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6120

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6120 (1-3) Seminar in Environmental Biology

Instructor consent required.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6100

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6200 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6210

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6210 (1-3) Seminar in Population Biology

Equivalent - Duplicate Degree Credit Not Granted: EBIO 6200

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

EBIO 6300 (1-3) Seminar in Organismic Biology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6840 (1-7) Independent Research (Master's Level)

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

EBIO 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 7840 (1-6) Independent Study (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8840 (1-6) Independent Research (Doctoral Level)

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

EBIO 8990 (1-10) Doctoral Dissertation

Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Ecology and Evolutionary Biology - Master of Arts (MA)

The EBIO department offers programs leading to the Master of Arts (MA) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others. Modern laboratory facilities for graduate study are located in the Ramaley building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the Departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Admission information is provided on the EBIO website (<http://www.colorado.edu/ebio/graduate/ma-phd-programs/#MASTERS>). International student applications are due by Dec. 1, and U.S. domestic applications by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test. Applicants are encouraged to communicate with potential faculty sponsors well before the application deadline. Applications for spring semester admission are not accepted. Students are required to have a bachelor's degree in biology or an equivalent.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ecology and Evolutionary Biology - Bachelor of Arts (BA) (p. 245).

Requirements

Degree Plans

Plan I: Thesis Option

The EBIO MA I program (with thesis) is intended to be a two year course of study that prepares students for admission to PhD programs, teaching positions or a variety of forms of employment as professional biologists. MA I students' studies are focused on a research project culminating in a thesis. Prospective students are urged to consult with faculty advisors to determine whether application for the MA I or PhD program is more appropriate. Applications for the MA I program are considered on a competitive basis; the department only admits students for whom financial support is available. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4–6 hours of thesis credit. The thesis topic is presented to the thesis committee as a written research proposal in the second semester of the program, and the committee administers in the third semester an examination on general knowledge in ecology and/or evolutionary biology. The final examination consists of the thesis defense, which should be scheduled during the second year for full-time students.

Plan II: Non-Thesis Option

A non-thesis master's degree is offered through the EBIO department's MA II program for students interested in furthering their knowledge of ecology and/or evolutionary biology but not in graduate training beyond the MA. This program is suitable for secondary school teachers and others whose career choices do not require a research thesis. Applicants are required to attain sponsorship from a faculty member prior to submitting application materials. Applicants are considered on a competitive basis; financial support is not guaranteed for MA II students. Thirty credit hours of coursework are required for the degree, at least 24 of which must be at the 5000 level or above, including 4 credit hours of independent research leading to a paper to be presented to the faculty sponsor. An examination on general knowledge in ecology and/or evolutionary biology is administered by the advisory committee in the third semester, and this committee may also require a final oral examination.

Ecology and Evolutionary Biology - Doctor of Philosophy (PhD)

The EBIO department offers a doctor of philosophy (PhD) degree in a wide variety of biological disciplines, ranging from biogeochemistry to community ecology to evolutionary genetics and others.

The PhD is a research degree, involving the production of a major piece of original research (the dissertation). The program is intended to be a five-year course of study that produces graduates who subsequently teach and conduct research at colleges or universities or hold research or leadership positions at other private or government institutions

Students are expected to form a dissertation committee of five faculty members (including one from outside EBIO) after beginning their studies. This committee aids the student in designing a research program and choosing relevant coursework. In addition to the final examination upon completion of the dissertation, the dissertation committee administers an examination (typically in the third semester) on general knowledge in ecology and/or evolutionary biology and a comprehensive examination (typically in the fifth semester) on a written research proposal submitted by the student.

Modern laboratory facilities for graduate study are located in the Ramaley Biology building. In addition, the department has strong ties with the University Museum, the Institute of Arctic and Alpine Research (INSTAAR), the Institute of Behavioral Genetics (IBG), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Environmental Studies Program (ENVS) and the departments of Integrative Physiology, Geology, Geography, Anthropology and Molecular, Cellular and Developmental Biology. INSTAAR operates the Mountain Research Station, an alpine field laboratory 25 miles from campus. Graduate student support is available in the form of fellowships, part-time instructorships, teaching assistantships, research assistantships and research grants.

Requirements

Admissions

International student applications are due by Dec. 1, and U.S. domestic applications are due by Dec. 31 for consideration for admission during the subsequent academic year. A completed domestic application includes a statement of intent, three letters of recommendation, official transcripts and scores on the GRE General Test.

Course Requirements

A total of 30 credit hours of coursework must be taken, although independent study credit may be included in this total. In addition, a total of 30 credit hours of dissertation must also be taken. PhD students are required to teach for at least one academic year, typically as a teaching assistant for one of the many laboratory courses offered by the department.

Economics

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Course code for this program is ECON.

Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Doctoral Degree

- Economics - Doctor of Philosophy (PhD) (p. 1148)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Antman, Francisca Marie (https://experts.colorado.edu/display/visid_144606/)

Associate Professor; PhD, Stanford University

Baranov, Oleg Valeryevich (https://experts.colorado.edu/display/visid_149617/)

Assistant Professor; PhD, University of Maryland, College Park

Barham, Tania C.J. (https://experts.colorado.edu/display/fisid_140077/)
Associate Professor; PhD, University of California, Berkeley

Boileau, Martin (https://experts.colorado.edu/display/fisid_113872/)
Professor; PhD, Queen's University (Canada)

Associate Professor; PhD, Cornell University

Courses

ECON 7010 (3) Microeconomic Theory 1

This course applies mathematical methods and optimization theory to study the foundation of modern microeconomic theory. The topics covered include theory of demand, theory of the firm, choice under uncertainty, equilibrium under alternative market structures, and welfare economics. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7020 (3) Macroeconomic Theory 1

This course applies the mathematical methods of continuous-time and discrete-time dynamic optimization theory and dynamical systems to study the foundation of modern macroeconomic theory. The topics covered include economic growth, the business cycle, and the determinants of consumption and investment. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7030 (3) Microeconomic Theory 2

Continuation of ECON 7010. Develops mathematical foundations of game theory and models of asymmetric information. Analyzes classical game-theoretic settings using analytical optimization techniques with emphasis on methodology, equilibrium concepts, theory of adverse selection and moral hazard, and principal-agent framework. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7040 (3) Macroeconomic Theory 2

Continuation of ECON 7020. Develops the mathematical foundations of dynamic optimization and applies numerical methods to study dynamic and stochastic general equilibrium macroeconomic models. Topics covered include the business cycle, real and nominal rigidities, search and matching frictions, and financial frictions. Instructor consent required.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7050 (3) Advanced Economic Theory

Discusses advanced topics in game theory and general equilibrium. Department enforced prerequisites: ECON 7010 and ECON 7030 and ECON 7818 and ECON 7828.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 7818 (3) Introduction to Probability and Asymptotic Theory

Introduces fundamental concepts and results from probability and asymptotic theory needed for a rigorous study of the limiting behavior of estimators and test statistics that emerge from the study of statistical/econometric models. Topics include the construction of probability measures, abstract integration, conditional expectation, stochastic convergence, laws of large numbers and central limit theorems. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 7828 (3) Econometrics

An introduction to estimation and inference for linear and nonlinear parametric models of regression, including least squares, method of moments and maximum likelihood estimation. Instructor consent required.

Additional Information: Departmental Category: Quantitative Economics

ECON 8010 (3) Economics of Risk and Time

Develops the mathematical tools necessary to analyze optimal decision-making by individual households and firms over time and in the face of risk. This is a building block for general equilibrium models, statistical models of behavior and theoretical analyses of economic policy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theory and History of Economic Thought

ECON 8020 (3) Business Cycle Theory and Monetary and Fiscal Policy

Develops key skills for understanding monetary, fiscal and financial stability policy: (a) deep mathematical analysis of business cycle models, including the mechanisms within models, their comparative statics and comparative dynamics, and the difference parameter values make to the behavior of business cycle models, (b) comparing model predictions to statistical data analyses, and (c) understanding real-world policy debates.

Requisites: Restricted to graduate students only.

ECON 8209 (3) Economics Research Methods Workshop 1

Assists students starting their doctoral thesis by discussing methodology and evaluation of economic research. Presents and discusses student research proposals.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8211 (3) Public Economics 1

This course studies the theory of public economics. It presents the fundamental principles of public goods, externalities, public choice, excess burden, optimal taxation, and tax incidence. Emphasis will be placed on optimization and the development of mathematical models required for public policy analysis. The course can be taken independently or in conjunction with 8221 to make a two-semester sequence in public economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8219 (3) Economics Research Methods Workshop 2

Continuation of ECON 8209. Assists students starting their doctoral thesis by discussing relevant economic research. Presents and discusses research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8221 (3) Public Economics 2

This course introduces the fundamental quantitative and econometric methods required for research in public economics. It explores advanced topics in public economics such as decentralization, state and local government, program analysis, cost/benefit analysis, taxation, international tax issues, political economy issues, and market failure. The course can be taken independently or in conjunction with 8211 to make a two-semester sequence in public economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Public Economics

ECON 8413 (3) International Economics 1

This course introduces students to the theories of international trade using an optimization approach. We discuss core trade theories and their empirical applications. We also explore recent advances that focus on the firm's decision to export and investigate the role of heterogeneity in firm productivity on patterns of trade. The course can be taken independently or in conjunction with 8433 to make a two-semester sequence in international economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8423 (3) International Macroeconomics

Explores recent advances in international macroeconomics and international finance. The course focuses on the application of the mathematical tools and quantitative analysis of dynamic macroeconomics to examine the role of international financial markets for the behavior of the current account, the international transmission of the business cycle, and the determination of exchange rates.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8433 (3) International Economics 2

Explores advanced quantitative topics in international economics. The course focuses on statistical analysis and structural estimation of several classes of models in international trade. The models are calibrated to the data and solutions are obtained using tools from optimization theory. The students are introduced to quantitative evaluation of trade policy instruments and welfare analysis. The course can be taken independently or in conjunction with 8413 to make a two-semester sequence in international economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: International Trade and Finance

ECON 8534 (3) History of Economic Growth - US

This course covers topics in the economic history of the United States. The course focuses on applying the tools of modern empirical economics to understand the growth of the American economy. This includes using applied econometrics and quantitative models to analyze income growth and inequality, demographic change, industrialization, international trade, capital and labor mobility, infrastructure, and technological change. The course can be taken independently or in conjunction with 8554 to make a two-semester sequence in economic history.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History

ECON 8535 (3) Environmental Economics 1

Considers the allocation of society's scarce environmental resources and government attempts to achieve more efficient and equitable allocations. It is a course in applied welfare economics with an emphasis on market failure and valuation. Incorporates static and dynamic optimization techniques to formally model environmental and resource outcomes and policy instrument choice. The course can be taken independently or in conjunction with 8545 to make a two-semester sequence in environmental economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8545 (3) Environmental Economics 2

Provides advanced study of current research in environmental economics and explores opportunities for new research. Instruction in empirical research including experimental design, numerical analysis, econometric and statistical approaches. Theoretical analysis of economic problems including optimization, cost/benefit analysis and economic modeling of current environmental policies. The course can be taken independently or in conjunction with 8535 to make a two-semester sequence in environmental economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Natural Resources and Environmental Economics

ECON 8676 (3) Labor Economics 1

This course focuses on 1) deriving testable and quantifiable hypotheses from mathematical economic models relating to prominent policy-relevant issues in the labor market; 2) ascertaining the statistical patterns that permit identification of the parameters that govern these models; and 3) forming estimators that permit statistical inference of these parameters. The models considered are drawn from a variety of labor market contexts: static and dynamic labor supply and demand decisions, human capital investment decisions, spatial equilibrium in labor markets, and worker-firm matching with heterogeneous workers and firms.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8686 (3) Labor Economics 2

This course focuses on using state-of-the-art econometric techniques, often identified by natural experiments, to 1) quantify causal effects predicted by economic models of the labor market and 2) evaluate the causal impact of labor market policies. Topics include the economics of immigration, the minimum wage, the economics of discrimination, and information constraints and bounded rationality in human capital investment. As a final project, students gather data and perform initial statistical analysis to determine whether a proposed data analysis strategy will successfully lead to a credible answer to a novel causal question in labor economics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Labor and Human Resources

ECON 8747 (3) Industrial Organization 1

This course studies the theory of industrial organization. Topics include research method in industrial organization, monopoly, oligopoly competition, vertical organization, markets with search and switching costs, online platforms, and innovation economics. Emphasis will be placed on the development of mathematical models for industry and policy analysis. The course can be taken independently or in conjunction with 8757 to make a two-semester sequence in industrial organization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8757 (3) Industrial Organization 2

This course introduces the fundamental quantitative and econometric methods required for empirical research in industrial organization. The emphasis is on using theory to construct testable hypotheses and specifying empirical models for estimating structural parameters. Topics include differentiated products, market power, collusion, merger analysis and regulation. The course can be taken independently or in conjunction with 8747 to make a two-semester sequence in industrial organization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Industrial Organization

ECON 8764 (3) History of Economic Development

Covers in historical perspective the causes of economic development including why some areas develop faster than others and why development occurs more rapidly in some eras than others.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic History
Departmental Category: Asia Content

ECON 8774 (3) Economic Development 1

Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, human capital development and long-run effects, environment and health, labor markets and migration, social capital and networks, micro-credit, and women's empowerment. The course can be taken independently or in conjunction with 8784 to make a two-semester sequence in economic development.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8784 (3) Economic Development 2

Focuses on microeconomic issues surrounding economic development from a largely empirical perspective, emphasizing applied econometric techniques. Topics covered in the two sections will vary to keep up with the current research but this course will cover a variety of papers covering different research design and program evaluation methods on topical areas including, but not limited to, distribution of resources within households, environmental and natural resources, as well as migration and gender issues relevant for developing countries. The course can be taken independently or in conjunction with 8774 to make a two-semester sequence in economic development.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Economic Development

ECON 8828 (3) Econometric Theory 1

Estimation and inference for micro-econometric models. Topics may include semi- and non-parametric econometric/statistical models; Bayesian estimation and inference; models for high dimensional data; simulation-based estimation methods. The course can be taken independently or in conjunction with 8838 to make a two-semester sequence in econometric theory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8838 (3) Econometric Theory 2

Estimation and inference for models for dependent data. Topics may include linear and non-linear time series, spatial and network models. The course can be taken independently or in conjunction with 8828 to make a two-semester sequence in econometric theory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8848 (3) Applied Microeconometrics

Presents a "user's guide" to conducting empirical research and program evaluation in applied microeconomics. Begins with a primer on an industry-standard econometric software package and a review of linear regression as a statistical technique for summarizing conditional mean relationships in data. Discusses multiple advanced econometric techniques as alternative research strategies including matching methods, difference-in-differences, panel data methods, IV, and regression discontinuity. Concludes with a research project requiring a replication and extension of an existing published paper that uses one or more of these statistical techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8858 (3) Computational and Structural Estimation Methods

Presents a user's guide to conducting quantitative research in computational economics. Teaches students to construct a variety of applied economic models, obtain parameter values through calibration or structural estimation techniques, and employs the resulting models to conduct policy simulations.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Quantitative Economics

ECON 8909 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Independent Study and Other Courses

ECON 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Independent Study and Other Courses

Economics - Doctor of Philosophy (PhD)

Our PhD program focuses on a solid core curriculum in economic theory and econometrics. Beyond this, we offer a number of specialized fields of study: econometrics, economic development, economic history, industrial

organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics.

Master's Degree in Economics

The Department of Economics does not currently offer a stand-alone MA degree program, although students enrolled in our PhD program will earn their MA degree as they progress toward their doctorate.

Requirements

Admission Requirements

An applicant for admission as a regular degree student must:

- Hold a baccalaureate degree from a college or university of recognized standing, or have done work equivalent to that required for such a degree and equivalent to the degree given at this university. The undergraduate GPA must be at least 2.75 (2.00=C).
- Have completed intermediate microeconomic and macroeconomic theory courses, 6 credit hours of calculus at the university level or equivalent, and statistics.
- Submit Graduate Record Examination (GRE) scores for aptitude (verbal and quantitative). International applicants whose native language is not English must also submit a TOEFL score with a speaking component, even if they have attended college in an English-speaking country.
- Arrange for the submission of three letters of recommendation.

Graduate study in economics is quantitative and analytical. Students should be comfortable with basic calculus (derivatives and integration), linear algebra, matrix algebra and basic statistics.

The university deadline for international applications is Dec. 1 for the following fall semester. The department encourages international applicants to comply with this deadline. Late applications may be considered; however, they may be at a disadvantage with respect to the award of financial aid. Domestic applicants who wish to be considered for financial assistance should apply by Jan. 15. Students must begin the program in a fall semester.

Degree Requirements

Students are expected to complete all requirements for the PhD degree within five years of entering the program (the maximum time allowed by the Graduate School is six years). The schedule of required courses is centered on this expectation. Failure to make timely and satisfactory progress toward the degree may result in loss of financial assistance or dismissal from the program.

Course Requirements

1. Prior to beginning the program, students must demonstrate an acceptable degree of competence in differential and integral calculus and optimization techniques. (This requirement is in addition to the six credit hours of calculus required to apply to the program.) Such competence is normally demonstrated by taking *ECON 7800* (an intensive, three-week preparatory course offered immediately prior to each fall semester) and passing its final examination with a grade of B- or better. Students who fail this examination must enter into extensive consultation with the director of graduate studies (DGS). Other methods by which the required competence may be demonstrated:
 - obtain written approval from the DGS to waive the requirement for *ECON 7800* due to sufficient mathematical preparation in prior studies, or

- pass the final examination in *ECON 7800* at a level of B- without taking the course.
2. There are seven core courses in the PhD program: ECON 7010, ECON 7020, ECON 7030, ECON 7040, ECON 7050, ECON 7818 and ECON 7828. Course requirements beyond the core courses include:
 - Six elective courses at the 8000 level. Basic fields are econometrics, economic development, economic history, industrial organization, international trade and finance, labor and human resources, natural resources and environmental economics and public economics. Ordinarily, a student would take two elective courses in a basic field of specialization in preparation for a dissertation.
 - 6 credit hours in a research colloquium.
 - At least 30 credit hours of dissertation.
 3. At least four of the core courses must be taken on the Boulder campus. Courses transferred for credit must be approved by the DGS. After entry into the PhD program, all remaining courses must be taken on the Boulder campus.
 4. All courses for PhD credit taken on the Boulder campus must be passed with a grade of B- or better. A student who receives a grade of C+ or lower in a core course must retake that course the following academic year.
 5. No more than 12 credit hours (exclusive of dissertation credit hours) from a single faculty member may be counted toward PhD requirements. Independent study is allowed only to satisfy elective requirements. No more than 6 credit hours of independent study may be applied to the PhD degree and no more than 3 credit hours of independent study may be taken from a single faculty member. In consultation with the DGS, students may choose to take up to two graduate offerings in other departments as elective courses.
 6. See the Plan of Study tab for course recommendations.

Preliminary Examinations

Written preliminary examinations in microeconomic theory, macroeconomic theory and econometrics must be taken in the examination period following the successful completion of core courses in these areas. Under most circumstances this period would be in August prior to the second year. An examination attempted and failed must be taken again and passed in the next examination period. A second failure results in dismissal from the program, subject to appeal to the GCRC under extraordinary circumstances. In no case are attempts beyond the third granted.

Students who have failed any of the core courses are ineligible to take the preliminary examination in the area of failure. These students must retake the failed course(s) in the following year and attempt the relevant preliminary examination in the first scheduled examination period after they pass.

Students who fail to pass all three preliminary examinations within two-and-one-half years of beginning the PhD program must exit the program.

MA Degree

An MA degree will be awarded to students who have successfully completed all core courses in the PhD program, completed 30 hours of graduate credit with a 3.00 GPA and performed satisfactorily within two attempts on at least two out of three preliminary examinations.

Third-Year Research Colloquium

Third-year students are expected to register for 3 credit hours per semester in the research colloquium, which will meet weekly under the direction of a faculty member. The purpose of the colloquium is to provide

students the opportunity and guidance to complete the required third-year paper and to facilitate progress toward the dissertation stage.

Comprehensive Examination

Students must take an oral comprehensive examination before admission to PhD candidacy. This examination may occur either at the time of the student's research presentation in ECON 8219 or at a later date, and will encompass the materials in the presentation and all relevant coursework completed by the candidate. Students who fail this comprehensive examination will be given a second chance during the following semester. For those students for whom the presentation in ECON 8219 does not serve as the oral comprehensive examination, a separate oral examination must be scheduled before admission to candidacy. Students who do not pass this exam by the end of their fifth year must exit the program.

Admission to Candidacy and Dissertation Requirements

Students are formally admitted to candidacy for the PhD degree after completing all course requirements and all preliminary and comprehensive examinations and after earning four semesters of residency (see the Doctoral Degree Requirements (p. 1031) section of this catalog for details). After admission to candidacy, students must register each fall and spring semester for dissertation credit (ECON 8999) until attaining the degree; the accumulated credit for the thesis must total at least 30 credit hours to attain the degree. A student must prepare a written dissertation and successfully pass an oral examination before a dissertation committee and other interested persons on its content before receiving the degree. The minimum residence requirement for the PhD degree is six semesters of scholarly work beyond the bachelor's degree.

Administration: Examining Committees for Examinations

Examining committees for preliminary examinations consist of three members of the economics department who teach in the relevant area. Examining committees for comprehensive examinations consist of at least three members of the economics department.

Preliminary Examinations

- Written examinations are numbered so that insofar as possible the identity of the student is unknown. Each faculty member grades independently and writes no comments in the examination booklet. A meeting of the graders is called by the chair of the examination committee and the committee grade is submitted to the graduate program manager. The possible grades include "High Pass," "Pass" and "Fail."
- In cases where there is a question of pass or fail on any exam, if two of the members of the examination committee vote affirmatively, a grade of pass will be recorded; if two of the members of the grading committee vote negatively, a grade of fail will be recorded. If the vote of the grading committee is tied and the third member is absent (but will be available within seven days), the decision to pass or to fail is to be made by the reconvened grading committee. If fewer than two members of the grading committee are present and voting, or if the vote of the grading committee is tied and the third member is not available within seven days, the decision to pass or fail will be made by the Graduate Curriculum and Review Committee; in such circumstances the grade is reported as pass or fail, based on a majority vote.
- When examination results are reported, a student who failed should have an opportunity to discuss their performance with a member of the examining committee.

Dissertation Guidelines

- In the spring term of the academic year following the research colloquium, each student must submit a written dissertation proposal and conduct an oral defense of that proposal before his or her basic committee. A dissertation proposal form must be signed by each member of the basic committee and submitted to the graduate program manager. The basic committee consists of the student's faculty supervisor and three other faculty members from the department. An acceptable proposal must include a statement of purpose and a justification for the importance of the work; a full literature review and a statement of how this research will contribute to the literature; and a detailed description of the methodologies to be used and of the data bases, if appropriate.
- Normally students are expected to complete their dissertation by the end of their fifth academic year. The graduate program manager provides details on submission of the dissertation and arrangements for the oral defense. The final defense is conducted before a basic committee of four faculty members from the department plus one outside member. After the defense, minor changes are agreed upon between candidate and supervisor before the final dissertation is submitted.

English

The English Department offers a Master of Arts degree (MA) in literature, a Master of Fine Arts degree (MFA) in creative writing and a Doctor of Philosophy degree (PhD) in literature.

For more information, visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage.

Course code for this program is ENGL.

Master's Degrees

- Creative Writing - Master of Fine Arts (MFA) (p. 1155)
- English - Master of Arts (MA) (p. 1157)

Doctoral Degree

- English - Doctor of Philosophy (PhD) (p. 1159)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ENGL 5000 (3) Introduction to Applied Shakespeare

Provides an introduction to the life, work and world of William Shakespeare to prepare students for the Applied Shakespeare Professional Masters Certificate two-week intensive. Students will gain a background in the social, cultural and political context of Renaissance theater, will be introduced to the conventions of Shakespearean drama and will explore key concerns impacting our understanding of Shakespeare's works. Department consent required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Courses

ENGL 5003 (3) Old English 1: Introduction to Old English

Introduces students to Old English, the ancient ancestor of Modern English (as Latin is the ancestor of Spanish and Italian, distinct from both). Course will focus on reading knowledge through grammar study and translation, and to a lesser extent on pronunciation. Provides basic parsing and translation skills and an introduction to the history, culture, and literature of early medieval Britain. Provides an introduction to grammar and to the history of the English language.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4003

ENGL 5013 (3) Old English 2: Intermediate Old English

Continues to develop skills in Old English reading and translation. Focuses on shorter canonical texts in verse and prose. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of verse in the original language. Graduate students will read and present on secondary scholarship and produce original research.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4013

ENGL 5019 (3) Survey of Contemporary Literary and Cultural Theory

Introduces a variety of critical and theoretical practices informing contemporary literary and cultural studies.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5023 (3) Old English 3: Beowulf

Continues to develop students' proficiency in Old English through the translation and literary study of the heroic poem *Beowulf*. Students will produce idiomatic translations for every class, write a midterm exam based on those translations, and write either a final exam or a final paper. Students will also memorize and present a short section of the poem. Graduate students will read and present on secondary scholarship and produce original research. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENGL 4023

ENGL 5029 (3) British Literature and Culture Before 1800

Introduces graduate level study of medieval and early modern writing through the long eighteenth century. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5059 (3) British Literature and Culture After 1800

Introduces graduate level study of Romantic, Victorian, Modern and Postmodern writing. Emphasizes a wide range of genres, forms, historical background and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5109 (3) Literature and Culture of the United States

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5139 (3) Global Literature and Culture

Introduces graduate level study of recent writing in English from around the world. Emphasizes a wide range of genres, forms, new media, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5169 (3) Multicultural/Postcolonial Studies

Introduces graduate level study of ethnic American and/or postcolonial writing in English, including relevant theoretical discourse. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Cultivates research skills necessary for advanced graduate study. Topics will vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5199 (3) Studies in Special Topics

Introduces graduate level study of writing of the United States from its inception to the present. Emphasizes a wide range of genres, forms, historical background, and secondary criticism. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5229 (3) Poetry Workshop

Designed to give students time and impetus to generate poetry and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5239 (3) Fiction Workshop

Designed to give students time and impetus to generate fiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to English Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5259 (3) Nonfiction Workshop

Designed to give students time and impetus to generate nonfiction and discussion of it in an atmosphere at once supportive and critically serious. Enrollment requires admission to the Creative Writing Graduate Program or the instructor's approval of an application manuscript.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5269 (3) Publishing Workshop

Provides practical experience in the editorial, design, and business procedures of desktop publishing.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5279 (3) Studies in Poetry

Addresses contemporary poetry, and/or literary works important for contemporary poetry.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5299 (3) Studies in Fiction

Addresses contemporary fiction, and/or literary works important for contemporary fiction. May be repeated for up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5309 (3) Playwriting

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5319 (3) Studies in Literary Movements

Studies styles, trends, innovations and major writers in significant literary movements, particularly those after 1900, such as modernism and postmodernism.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5459 (3) Introduction to the Profession

Introduces purposes, methods and techniques of professional scholarship in English. Provides an overview of the discipline, including traditional areas of research and recent developments. Teaches students how to use research, bibliographic, and reference tools to prepare papers for conferences and publication. Required of all MA students in English.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5529 (3) Studies in Special Topics 1

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5549 (3) Studies in Special Topics 2

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5559 (3) Studies in Special Topics 3

Studies special topics that focus on a theme, genre, or theoretical issue not limited to a specific period or national tradition. Topics vary each semester.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 5849 (1-6) Independent Study (Graduate Level 1)

Independent investigation of topics of specific interest to individual students. Students wishing to enroll in independent study must petition the Associate Chair for Graduate Studies prior to the beginning of the semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 6949 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 6959 (1-9) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7019 (3) Advanced British Literature and Culture Before 1800

Studies special topics in medieval and early modern writing through the long 18th Century. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7059 (3) Advanced British Literature and Culture After 1800

Studies special topics in romantic, Victorian, modern and postmodern writing. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7119 (3) Advanced Literature and Culture of the United States

Studies special topics in writing of the United States.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7149 (3) Advanced Global Literature and Culture

Studies special topics in recent writing in English from around the world.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7179 (3) Advanced Multicultural/Postcolonial Studies

Studies special topics in ethnic American and/or postcolonial writing in English, including relevant theoretical discourses. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7489 (3) Advanced Special Topics

Studies special topics in theory, culture, and literature of any period. Topics will vary.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to English (ENGL) and English Lit- Creative Writing (CRWR) graduate students only.

Additional Information: Departmental Category: Graduate Courses

ENGL 7849 (1-3) Independent Study (Graduate Level 2)

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

ENGL 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Courses

Creative Writing - Master of Fine Arts (MFA)

The MFA in creative writing is a three-year degree program that values literary study, innovation and writing that tests the limits of conventional forms.

The program challenges students to write in a variety of genres and to study literature from the point of view of a working writer. Recent graduates have become not only published authors of fiction, nonfiction, poetry, plays and screenplays, but also journalists, editors, publishers, and college-level and secondary-level teachers.

The degree program culminates in the submission and oral defense of a creative thesis in poetry or fiction. Students may develop custom programs in nonfiction and scriptwriting with available faculty with secondary interests in those genres.

¹ Each workshop is repeatable up to 12 credits.

Language Requirement

Students earning the creative writing MFA must complete a foreign language requirement, either before or after enrolling at CU Boulder, prior to the semester in which they intend to graduate. The language requirement can be met in one of the following ways:

- Complete a fourth-semester (second-semester sophomore) college language course with a grade of C or better. Completion of only freshman-level language courses does not qualify as evidence of competence.
- Take the foreign language proficiency exam administered each semester by the English department. In some cases, students may be asked to make independent arrangements for such an exam.
- Present other evidence of competency in a foreign language to the associate chair for graduate studies. In most cases, this evidence consists of native or near-native command of a language; a written exam may be administered to confirm such fluency.

Thesis

General Requirements

All students must complete a thesis as part of the degree requirements. The thesis should be a book of poetry, short stories, literary/creative nonfiction or a substantial portion of a novel, play or screenplay. It may also be a combination of these genres. The thesis should be at least 70 pages in length, though most students write between 70 and 150 pages. The bulk of work used in a thesis should have been written while the student was enrolled in the creative writing MFA program, and it should be in a form acceptable to the committee. The thesis must include an abstract (1 to 3 pages) that states the writer's aims and explains how the thesis reflects those aims.

Students take a total of 9 thesis hours in one or more semesters. The student should select a committee of three faculty (the advisor, who is a faculty member in the Creative Writing Department; one other creative

writing faculty member; and a faculty member in literary studies) during the semester prior to that in which they will defend the thesis. A rough draft of the thesis should be made available to the advisor prior to the thesis defense so that problems may be discussed at an early enough date to enable the student to work on them. The advisor will work with the student to advise them on manuscript length, suggestions for improvement and general compilation. The advisor and the student will also agree on a reading list about which the student may be questioned at the defense.

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the MFA-CRWR Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

A thesis defense must take place before the semester's deadline for completing defenses (see the Graduate School's website (<https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/>) for a list of semester deadlines). A student must give their completed thesis to their entire committee and file a Master's Examination Report at least two weeks in advance of the defense. The defense is an oral examination of the thesis that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once; the second exam covers the same material and includes the same committee members as the first.

Thesis Submission and Format

The final draft of the MFA thesis must be submitted to the Graduate School by the applicable deadline and must comply with the Graduate School's specifications for theses and dissertations as described on the Graduate School's Master Graduation Information - Thesis Plan (<http://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/master-graduation-information-thesis-plan/>) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

Candidacy and Diploma Applications for MFA

Students must submit their Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (p. 1034) section for more information.

Time Limit

MFA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, students must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must

first be submitted for endorsement to the English Department's associate chair for creative writing. Extensions may be granted for up to one year.

English - Master of Arts (MA)

The MA in Literature program is a two-year degree program focused on giving students a broad understanding of American and British Literature, and the current themes and methodologies in criticism and theory.

Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage for the most up-to-date degree requirements.

Program Requirements

Students must complete 30 credit hours of coursework (10 courses), at least 21 of which must be taken at CU Boulder. All courses must be at the 5000 level or above. Subject to approval by the Associate Chair for Graduate Studies, up to 6 hours of coursework may be taken in departments other than English. Students may earn the MA degree in literature through coursework alone; a thesis is optional.

All graduate students must follow the Graduate School's requirements for graduation (see the Graduation Requirements (<http://www.colorado.edu/graduateschool/academics/graduation-requirements/>) webpage).

Students will meet with the graduate program assistant at least once a year to guarantee that they are on track to meet these requirements. If a student is enrolled in a certificate program, some of these categories may be met by taking courses in other departments that are required for the certificate (with approval from the associate chair for graduate studies).

Distribution Requirement

The courses required for the MA should be distributed as follows:

- Two courses before 1800 (courses should survey a broad range of literature from two different periods prior to 1800).
- Two courses after 1800 (courses should survey a broad range of literature from two different periods after 1800).
- One multicultural and/or postcolonial course (may overlap with req. 1 or 2).
- One poetry intensive course (may overlap with req. 1 or 2).

Degree Plans

Plan I: Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

Code	Title	Credit Hours

WRTG 5050	Graduate Studies in Writing and Rhetoric	
Thesis		
ENGL 6959	Master's Thesis	6
Total Credit Hours		30

¹ Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

A master's thesis is 50–75 pages in length, and represents an original work of literary analysis that is supported by extensive research into primary and secondary sources. It includes an abstract of 250–350 words and a bibliography, exclusive of the page length for the body of the thesis.

A master's thesis is *optional* for the MA in literature; however, there are several benefits to writing a thesis:

- The student continues to develop their skills as a writer and take pleasure in literature.
- The student has have the opportunity to work directly with a faculty member of their choice in an area of the student's choosing.
- If the student plans to apply to doctoral programs in English, they can use part of their thesis as a writing sample. Since the student completes a thesis at the end of their degree program, this capstone project may reflect their current strengths as a writer better than their earlier seminar papers. Students who apply to PhD programs can also use a seminar paper or the paper revised in the professionalization seminar as their writing sample.

The decision to write a thesis must be made by the end of the student's first year of study. After deciding to write a thesis, the student will put together a three-person committee that includes: 1) their thesis director, who must be a member of the graduate faculty of the English Department, and 2) two other members of the graduate faculty, one of whom may be from another department. The student must establish their committee early in the thesis-writing process so committee members can work with the student to guide and develop their thesis.

It takes two semesters (each with three credits) to research and write an MA thesis. During each of these two semesters, the student's thesis hours replace elective courses necessary to complete the degree. At least two weeks before the thesis defense, the student must give their completed thesis to their committee members and file a Master's Examination Report with the Graduate School. See the graduate program assistant for help with this process.

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the MA-LIT Thesis Action Item Checklist, which includes deadlines and a suggested schedule.

The thesis defense is an oral examination that lasts about an hour. All committee members must be present in person or via teleconference. A positive vote from at least two of the committee members is required to pass. A student who fails the defense may not reattempt it for at least three months, and not until any work prescribed by the committee has been completed. The student may retake the examination only once, and the second exam must cover the same material and include the same committee members as the first.

Plan II: Non-Thesis Option

Courses in the following fields are required. A requirement may be waived if a student has taken an equivalent graduate course at another institution; waivers must be approved by the associate chair for graduate studies.

or ENGL 7179	Advanced Multicultural/Postcolonial Studies	
or ENGL 7489	Advanced Special Topics	
or GRMN 5030	Foundations of Critical Theory	
or IAWP 6100	Theory and Practice of Doing	
or WRTG 5050	Graduate Studies in Writing and Rhetoric	
Total Credit Hours		30

¹ Students must take one Poetry Intensive course. The course may overlap with ENGL 5029 or ENGL 5059. The course topic each semester will determine whether or not a course will be counted as a Poetry Intensive.

Language Requirement

Students earning the MA in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to the semester in which they intend to graduate. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:

- a. have been taken within the last three years,
- b. be equivalent to a 2000-level language course at CU Boulder, and
- c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

Advancement to Candidacy

Students must submit their Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the stipulated deadline, which is generally the third or fourth week of classes in the semester in which the student plans to graduate. The candidacy application confirms that all degree requirements will have been completed by the end of the semester. Return all forms to the graduate program assistant for signatures and submission to the Graduate School.

All students planning to graduate must apply online to graduate. This step must be completed regardless of whether the student plans to attend the commencement ceremony. See the Graduation (<https://www.colorado.edu/graduateschool/academic-resources/graduation-requirements/>) section for more information.

Time Limit

MA students have four years from the semester in which they are admitted and begin coursework to complete all degree requirements. To continue past four years, the student must file a petition for an extension of the time limit with the dean of the Graduate School. Such petitions must first be submitted for endorsement to the associate chair for graduate studies. Extensions may be granted for up to one year.

English - Doctor of Philosophy (PhD)

Students pursuing a PhD in Literature delve deeply into language and literature, exploring answers to important literary and cultural questions. Doctoral students may choose a concentration in any area of English-language literature and pursue focused study and original scholarship in their area of specialization.

The PhD program is a five-year curriculum, including five years of funding, that comprises a language requirement and three basic components:

- coursework
- a qualifying examination
- a dissertation

For more information, visit the English Department (<http://www.colorado.edu/english/>) website.

Requirements

Admission

The PhD program offers rigorous training in critical analysis and research for professional placement. Applicants must hold either an MA or BA degree. Those with a BA who apply directly to the PhD program may also be considered for the MA program.

Program Requirements

The degree requirements listed here are subject to change. Students wishing to pursue graduate work in English literature should visit the department's Graduate Studies (<https://www.colorado.edu/english/current-students/graduates/>) webpage for the most up-to-date degree requirements.

Years 1 & 2: Coursework

Coursework prepares PhD students to write a successful dissertation and to teach effectively in their area of specialty. Students should enroll in graduate seminars serving those ends in English or related fields. The sole requirement for coursework for the PhD is that students take a minimum of 30 credits of graduate study. All courses must be at the 5000 level or above. Students should plan their coursework in close consultation with their director, the graduate program assistant or the associate chair for graduate studies. The student's first and second years in the PhD program are usually dedicated to coursework.

Students with a master's degree can transfer up to 15 credit hours of coursework from their master's toward the 30 credit hours of coursework required for the PhD.

Sometime during the student's first year of study, they should identify a faculty member to become their director. The student and director should inform the graduate program assistant of their agreement to work together. By the student's third semester of study, they and their director should begin working on plans for the student's comprehensive exam (e.g., prospectus topics and possible texts for the reading lists).

See the index in the Graduate Student Handbook (<https://www.colorado.edu/english/current-students/graduates/forms-additional-information/>) for the PhD-Literature Action Item Checklist, which includes deadlines and a suggested schedule for years 1–5.

Language Requirement

Students earning the PhD in literature must complete a foreign language requirement demonstrating proficiency in one foreign language, prior to attempting the Comprehensive Examination. There are three options for fulfilling this requirement:

1. Take a language proficiency exam in the language of the student's choice.
2. Take two semesters of a 2000-level language course for credit and complete them with a grade of B or better (courses would be in excess of the 30 credit hours required for the degree). Summer language intensive programs at other universities can be substituted for the 2000-level course with the approval of the associate chair for graduate studies.
3. Transfer in two language courses taken at another college or university. In order to qualify, the courses must:
 - a. have been taken within the last three years,
 - b. be equivalent to a 2000-level language course at CU Boulder, and
 - c. be passed with a grade of B or better.

Language exams are administered at least once each semester by the English department. For uncommon languages, students may be asked to make independent arrangements for their exam. The language exam consists of translating a text written in a foreign language into written English using English-language sentence structure. The text is at the reading and comprehension level of a fourth-semester student of the chosen language. Students are given two hours to complete the translation, and the exam is open book, open computer.

Year 3: Comprehensive Examination

The comprehensive examination is a two-hour oral exam. The exam will be conducted by the student's director and the rest of the examining committee. The student will be tested on the reading lists and the dissertation prospectus. Typically, one hour of the exam is devoted to the prospectus and one to the reading lists. The order will be decided by the student's examining committee prior to the exam.

Examining Committee

With the support of their dissertation director, the student should ask faculty to be part of their examining committee no later than one semester in advance of the term in which they plan to take the examination. The student's examining committee will consist of five members: the student's director, two English faculty members, a faculty member from another department of the student's choice, and the associate chair for graduate studies. If the associate chair for graduate studies is already a regular member of the student's committee, another English faculty member will serve in their place. The director and examining committee will work with the student to finalize the reading lists and prospectus. Both the director and examining committee should play an active role in helping the student write the prospectus and prepare for the comprehensive exam.

If the student's area of interest benefits from working with a particular instructor who is rostered in the English department, the student can petition the Graduate Committee to authorize that instructor to substitute for a faculty member of the examining committee. The instructor must also be approved by the Graduate School (see the graduate program assistant for details).

Reading Lists

The two reading lists cover the following topics:

- **field**, or the broad context (e.g., historical, thematic, generic, technological) pertinent to the student's dissertation project; and
- **methods/texts**, literary and critical work germane to the project.

Each reading list should comprise between 25 and 40 titles and a paragraph (up to 300 words) providing a rationale for this content. The reading lists should be approved by the student's director and examining committee, and the PhD Reading List and Prospectus Approval Form should be submitted to the graduate program assistant at least one month before the exam.

Prospectus

The prospectus presents the student's proposed dissertation project in 25 pages or less, plus notes and bibliography. Twenty-five pages is the maximum length limit; anything longer will be returned for editing. The prospectus should consist of three parts:

1. the topic, argument and statement of scholarly contribution;
2. a description of the student's method and of existing relevant scholarship; and
3. a brief chapter-by-chapter summary.

The bibliography should contain full citations of all works referenced in the prospectus, and all of these titles should appear on one of the student's reading lists. The student must submit a final draft of their prospectus to all committee members two weeks prior to the date of the comprehensive exam.

Comprehensive Exam

The comprehensive exam will consist of a one-hour Q&A on the student's prospectus and a one-hour Q&A on the student's lists, knowledge of their

field and close-reading abilities. All committee members must be present in person or via teleconference for the comprehensive examination. A positive vote from at least three of the committee members is required to pass. Upon passing the comprehensive exam and pending approval by the Graduate School, the student will advance to PhD candidacy (D status). This will allow the student to apply for dissertation fellowships and other internal funding. An unsuccessful comprehensive exam may be retaken only once, and must be retaken within six months. The second exam must cover the same material and include the same committee members as the first.

Any grades of incomplete (I) must be completed before the student schedules the comprehensive exam.

At least two weeks before taking the exam, the student must submit the Candidacy Application for an Advanced Degree (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) and the Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf) to the graduate program assistant, who will submit them to the Graduate School for approval.

Years 4 & 5: Dissertation

The dissertation, which should be work of professionally viable scholarship, will typically take the form of a monograph. It may contain such elements as practice-based research, curatorial or internet exhibition, fieldwork, etc. In some instances, it can combine critical and creative elements. The dissertation is written in close consultation with the student's director and dissertation committee.

The dissertation committee consists of five members: the student's director, three English faculty members, and a faculty member from another department of the student's choice. This committee is often but not always drawn from members of the student's comprehensive examination committee.

The dissertation should be at least 150 pages long, the length of a scholarly monograph.

The first chapter of the dissertation project is due to the student's director and dissertation committee no later than one semester after passing the comprehensive exam. The candidate and full committee will then meet to discuss it and create a clear itinerary for completing the dissertation. Failure either to schedule and pass the comprehensive exam or to submit the first chapter of the dissertation within the semester following the exam will result in withdrawal of teaching support and suspension from the PhD program.

Dissertation Defense

The dissertation defense should take place in the spring semester of the fifth year. Before the start of the spring semester, the student should schedule a dissertation defense: an oral examination and discussion lasting about 90 minutes. The student should deliver copies of their dissertation to their committee members at least one month prior to the defense date. The student must also file a Doctoral Examination Report (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_examination_report.pdf) and a Doctoral Dissertation Defense Leaflet (https://www.colorado.edu/english/sites/default/files/attached-files/doctoral_defense_leaflet.pdf) with the Graduate School at least two weeks prior to the defense. All doctoral graduation requirements and forms, including deadlines, can be found on the Graduate School's Current Students (<http://www.colorado.edu/graduateschool/current-students/>) webpage.

A satisfactory vote from at least four committee members is required to pass the defense. If unsuccessful, the student may retake the defense once after completion of changes or additions determined by the committee. The second exam must cover the same material and include the same committee members as the first.

Dissertation Submission & Format

The student must submit a final copy of their dissertation to the Graduate School by the applicable deadline for that semester, and must comply with the Graduate School's specifications for dissertations. For detailed instructions and to download an example of a formatted dissertation, go to the Graduate School's Thesis and Dissertation Specifications (<http://www.colorado.edu/graduateschool/thesis-and-dissertation-specifications/>) webpage. Students must include all stipulated parts of the thesis (e.g., title page, signature page, abstract, table of contents, bibliography) and are encouraged to ask the Graduate School to check the format of the thesis before they submit the final copy (gradinfo@colorado.edu).

Dissertation Hours

A PhD student must complete at least 30 dissertation hours to receive the degree. Dissertation hours may be taken in any semester, including before the student passes the comprehensive examination (at least 1 dissertation hour must be taken prior to passing the comprehensive exam). However, no more than 10 dissertation hours taken before the semester in which the comprehensive examination is passed will count toward the 30 dissertation hours required for the degree.

Beginning the semester after the student passes the comprehensive examination and extending through the semester in which the dissertation is successfully defended, a PhD student is required to register continuously as a full-time student for a minimum of 5 dissertation hours in the spring and fall semester of each year. A PhD student must be registered for a minimum of 5 dissertation hours in the semester (including summer semester, if applicable) in which the dissertation defense is held. A PhD student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

A PhD student who does not have to maintain full-time status and does not have to use campus facilities may claim off-campus status, which allows for registration of 3 credits rather than the full-time 5 dissertation credits. Off-campus status is considered part-time. Students should check with the Office of Financial Aid to see how part-time status will impact them, including the ability to receive new student loans.

Annual Reports

PhD students in their second year or beyond are required to submit an annual report on the progress of their PhD work by Oct. 31 of each year. These reports should be no more than one page in length and should describe both the student's dissertation project and the steps taken to advance it (e.g., courses, research, prospectus). The report must be signed by the student's director (or by the associate chair for graduate studies if the student doesn't yet have a director) prior to its submission. Students who don't have a current report on file cannot be considered in good standing. Reports should be submitted via email to the graduate program assistant.

Time Limit

PhD students are expected to complete all degree requirements within five years from the semester in which they are admitted and begin coursework in the doctoral program. To continue beyond five years, the

student must file a petition for an extension of the time limit with the dean of the Graduate School. The dissertation director and the English department's associate chair for graduate studies must endorse such petitions. Extensions may be granted for up to one year. For additional time, the student must file another petition for extension. There is no guarantee of department funding after the fifth year.

Environmental Studies

Meeting the environmental challenges of the 21st century requires research, education and training that spans traditional disciplinary boundaries and emphasizes the interconnections of social and natural sciences, policy and the ethics and other social underpinnings of decision making. With numerous focal areas and connections to research centers both in and out of the academic world, ENVS provides the resources and experiences needed by students seeking to contribute to environmental research and problem solving.

The Department of Environmental Studies awards three graduate degrees: MS, MENV and PhD. In addition to research-based MS and PhD programs, we also offer three dual degrees: an MS/MBA in collaboration with the CU Business School, and an MS/Juris Doctor and PhD/Juris Doctor in collaboration with the CU Law School.

The program is flexibly structured, giving students the opportunity to pursue diverse areas of interest, especially those that do not fall neatly within disciplinary boundaries. Opportunities for interdisciplinary graduate studies and original research leading to the MS and PhD degrees are available with a variety of emphases, including sciences, policy and values, and theory. Particular programs of study are limited only by course offerings and faculty expertise.

For updated information, visit the department's Graduate Students (<https://www.colorado.edu/envs/graduate-studies-0/>) webpage.

Course codes for this program are ENVS and ENVM.

Master's Degrees

- Environmental Studies - Master of Science (MS) (p. 1167)
- Environmental Studies - Masters of the Environment (MENV) (p. 1165)

Doctoral Degree

- Environmental Studies - Doctor of Philosophy (PhD) (p. 1171)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Karen
Assistant Professor; PhD, University of Florida

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
Professor, Faculty Director; PhD, University of California, Santa Cruz

Brooks, Cassandra (https://experts.colorado.edu/display/fisid_159275/)
Assistant Professor; PhD, Stanford University

Professor; PhD, Columbia University

York, Jeffrey Glenn (https://experts.colorado.edu/display/fisid_148387/)
Associate Professor; PhD, University of Virginia

Courses

ENVS 5000 (3) Policy, Science, and the Environment

Introduction to methodologies of the policy sciences with emphasis on applications to environmental issues; role of science in decision making; professional roles and responsibilities as a policy analyst.

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5003 (3) The Theoretical Foundations of Environmental Methods

Addresses basic theoretical questions underlying common methods employed by those conducting research in environmental science, values, and policy. The course provides a broad overview of the conceptual background relevant to work and research in environmental studies, with an emphasis on understanding many debates that have informed and challenged disciplinary research and, in so doing, shaped the interdisciplinary field of environmental studies.

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

Grading Basis: Letter Grade

ENVS 5004 (3) Research Design in Environmental Studies

Offers a conceptual understanding of the diverse methodological traditions used in empirical environmental research, when and why methods are deployed, and their relative strengths and weaknesses. Designed for students pursuing interdisciplinary environmental careers or those looking for a broad foundation prior to specializing. Emphasizes foundational research skills of developing a research question, scientific writing, interdisciplinary collaborations, and science communication. Formerly offered as a special topics course.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 5050 (3) Theories of the Policy Process

Examines the public policy process, including the influences and actors that shape policy outcomes. Focuses on the major theories, frameworks, and models of policy change, along with emerging scholarship that challenges, refines, and advances the theory.

Requisites: Restricted to graduate students only.

ENVS 5100 (1-3) Special Topics in Environmental Studies

A variety of topics not currently offered in curriculum; offered depending on instructor availability and student demand.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

ENVS 5110 (1-3) Topics in Environmental Social Science and Humanities

Covers various topics in the social sciences and humanities in environmental studies.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5120 (1-3) Topics in Quantitative Methods

Covers a wide range of quantitative methods used in policy research and their applications. Topics may include decision-making under uncertainty, fundamentals of microeconomics, mathematics of economic efficiency, cost-benefit analysis, system optimization, budgeting, fundamentals or probability, risk assessment, risk perception, risk communication, and decision analysis. Includes practical exercises, as well as readings and discussion, of various strengths and weaknesses of the different methods.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

ENVS 5155 (3) Ecosystem Ecology

Integrates information from physics (energetics), chemistry (element properties) and biology (evolutionary traits, photosynthetic pathways) to understand the structure and functioning of ecosystems. Provides an analysis of biotic community responses and feedbacks to environmental change drivers. Strong focus on water, nutrient cycling and carbon dynamics of diverse terrestrial and aquatic landscapes.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4155, EBIO 5155 and ENVS 4155

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 5240 (3) Environmental Philosophy

A survey of the major philosophical issues in environmental studies, comprising key issues in environmental ethics, in environmental political philosophy and in the philosophy of biology and ecology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5240

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

ENVS 5340 (4) Conservation Biology and Practice in Brazil's Atlantic Forest

Field Studies. Examines the application of conservation principles in the Atlantic Forest of Brazil, a 'biodiversity-in-crisis' setting. Explores successful conservation strategies integrated with efforts to alleviate socioeconomic issues. Three-week Maymester, Study Abroad Global Seminar.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 4340, EBIO 4340 and EBIO 5340

Recommended: Prerequisites EBIO 2040 or ENVS 2000 or 2000/higher-level course in ANTH, EBIO, ENVS, EVEN, GEOG, IAFS or other discipline related to ecology or sustainability.

Grading Basis: Letter Grade

ENVS 5510 (1) Environmental Studies Colloquia Series

All first year ENVS graduate students are required to attend the ENVS Colloquia Series. Speakers from around the world and within the department cover topics in all areas of Environmental Studies.

Repeatable: Repeatable for up to 2.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Environmental Studies (ENVS) graduate students only.

Grading Basis: Pass/Fail

ENVS 5520 (1-3) Seminar in Environmental Studies

Addresses current topics in Environmental Studies. Provides forum for students to critically evaluate the primary literature on a particular theme.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 5701 (3) Policy, Politics and Management: Foundations

Examines concepts related to policy and regulatory processes, institutions and management of the environment and natural resources. Explores environmental laws at the international, national, state and local levels as well as how the processes and institutions at various levels of government help shape laws and their implementation. Focuses on policy tools including property rights, regulation, voluntary compliance and market-based mechanisms.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 5702 (3) Environmental Governance: Actors and Institutions

Provides an examination of environmental governance issues across scales, from local to global. Focuses on foundational theory while critically examining empirical case studies of success and failure in managing common pool resources. Emphasizes understanding the role of diverse actors and institutions in driving environmental outcomes. Students will obtain practical tools and skills towards facilitating environmental sustainability of natural resources across scales.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 5740 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: PSCI 7116

Requisites: Restricted to graduate students only.

ENVS 5750 (3) Climate Politics and Science-Policy

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, GEOG 5750 and SOCY 5750

Grading Basis: Letter Grade

ENVS 5810 (3) Water Resources and Environmental Sustainability

Assesses impacts of climate variability and regional growth on western U.S. water resources, and examines successes and failures of different management strategies, as well as ways that science is used and misused in support of water management.

Requisites: Restricted to Arts and Sciences, Journalism, Law or Business Graduate Students only.

ENVS 5820 (3) Energy Policy in the 21st Century

Examines energy policy and the problem of sustainability through a variety of disciplinary and topical perspectives: historical, political, behavioral, techno-economic and legal. A critical approach is applied to arguments about energy policy processes, systems and desired outcomes, with special emphasis on the role of renewable and sustainable energy in the changing global system.

Requisites: Restricted to graduate students only.

ENVS 5830 (3) Critical Issues in Climate and the Environment

Discusses current issues such as ozone depletion, global warming and air quality for graduate students in nonscientific fields. Provides the scientific background necessary to understand, follow scientific developments and critically evaluate these issues.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 4800 and ATOC 5000

ENVS 5840 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed, along with global-scale measurements of element fluxes from satellites, aircraft and measurement networks.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 5305

Requisites: Restricted to graduate students only.

Recommended: Prerequisite general chemistry, some organic chemistry.

ENVS 5909 (1-3) Independent Study

Only 3 hours of independent study can be used towards degree requirements.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

ENVS 5930 (2) Internship

Provides academically supervised opportunities for environmental studies majors to work in public and private organizations on projects related to the students' research and career goals, and to relate classroom theory to practice.

ENVS 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6007

ENVS 6201 (3) Qualitative Research Methods for Environmental Studies

Introduces students to research design, data collection and analysis methods. Exploration of the rationale underlying the use of various methods, the skills needed to employ qualitative method and the process of designing a research protocol will provide graduate students with a sound foundation to begin their own thesis research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6222 (2-3) Environmental Decision-Making

Explores the foundational issues that underlie agency decision-making, including environmental ethics, cost-benefit analysis, risk assessment, constitutional law and administrative law. Compares and contrasts National Environmental Policy Act and the National Historic Preservation Act and the Endangered Species Act.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7222

Grading Basis: Letter Grade

ENVS 6301 (3) Environmental and Energy Economics

Introduces non-economists to the study of energy markets, environmental externalities, economic regulation and public policy. This applied course uses examples from electricity generation, renewable energy, manufacturing, transportation and other energy intensive industries. A variety of policy instruments will be studied, including: technology standards, subsidies, environmental mandates, rate-based policies, emissions taxes and cap-and-trade systems.

Grading Basis: Letter Grade

ENVS 6302 (3) Sustainable Landscapes, Sustainable Livelihoods

Examines rural transformation and the adoption of recreation economies in communities across the U.S. West in response to burgeoning recreation industry and interest in public lands. Students will evaluate different approaches for developing and managing recreation economies in small towns that consider diverse social, cultural, economic, and environmental constraints as well as opportunities in a time of rapid change. Project-based course. Students learn techniques to gather and synthesize data that support solution development.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 6302

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6303 (3) Transportation and Sustainable Cities

Examines the problem of organizing transportation systems from a variety of perspectives and explores how transportation decisions get made at a variety of scales, from local to national. Covers some of the dramatic changes coming from technological innovation in arenas like vehicle electrification, autonomous vehicles and the potential shift from individual vehicle ownership to shared mobility.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6304 (3) Introduction to Food Systems Internationally

Introduces students to contemporary food system challenges at the global scale, the course will first identify key historic and projected trends, to set the scene for the remainder of this specialization. Second it will draw on international case studies to explore some of the institutional, technological and market responses to food system challenges across the globe.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6305 (3) Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions

Explores the evidence and ideas underlying some of the most important contemporary food system debates. We will ask: in enhancing the environmental sustainability of food systems, what do the data tell us about the roles that can be played by genetically engineered food, organic agriculture, local food systems, changes to animal agriculture, and reductions in food waste? Students will draw on peer-reviewed research to address the science, policy, and ethical dimensions of these topics.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

ENVS 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

ENVS 6950 (1-6) Master's Thesis**ENVS 7118 (3) Foundations of Environmental Justice**

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, COMM 7118 and PSCI 7118

Requisites: Restricted to graduate students only.

ENVS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Environment - Master of the Environment (MENV)

The Master of the Environment (MENV) Graduate Program at the University of Colorado Boulder is an innovative, interdisciplinary professional master's degree that equips students with the knowledge, skills and experience necessary to address the complex environmental challenges of the 21st Century. This 21-month, immersive, cohort-based graduate program transforms students into leaders in a wide range of careers in conservation, consulting, energy, natural resources, planning, policy, sustainability and more. The MENV program is administered by the Department of Environmental Studies (<https://www.colorado.edu/envs/>), and partners with units and disciplines across the Boulder campus, including the Environmental Design Program, the Law School, Leeds School of Business, among others.

The program focuses on applications and problem solving, and is comprised of the following parts:

- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

Throughout the program, students develop and hone their skills and leadership capacities through experiential learning, theory and foundational knowledge building, and application courses, professional development opportunities, career mentoring, and the capstone project in lieu of a thesis.

Students become conversant in the language, knowledge, theory, techniques, and methodologies of various disciplines while developing general analytical skills, problem-solving abilities, and the adaptability that is indispensable to professional and career success.

MENV provides a foundation of multidisciplinary knowledge and communication and analytical skills that enable students to address increasingly complex sustainability challenges in a wide range of professional careers.

In addition, the MENV program values a diversity of backgrounds, experiences, and perspectives and is deeply committed to diversifying our student body, faculty, and staff; improving the equity of our systems; and creating an inclusive culture in the program, on CU Boulder's campus, and in the environmental sector at-large.

For more information, visit the Master of the Environment (<http://www.colorado.edu/menv/>) website.

Requirements

Application Requirements

To be considered for the MENV program, students must have a four-year bachelor's degree from an accredited U.S. institution or the international equivalent. We recommend a minimum of one year of professional experience or applicable training prior to applying. The MENV program selects students who we believe will achieve academic and professional success while adding value to the graduate community. The MENV program selects talented and diverse candidates through a holistic review of the application materials. Decisions are based on academic and professional backgrounds, as well as individuals' potential to contribute both inside and outside of the classroom.

Program Requirements

Students must complete at least 48 credit hours of coursework during the 24-month program, to include:

- Core courses
- Required specialization courses in one of five specializations
- Electives
- Capstone project

Courses

Code	Title	Credit Hours
Core Courses		
ENVM 5002	Analyzing Socio-Environmental Systems	3
ENVM 5034	Leadership & Ethics for Environmental Professionals	3
ENVM 6003	Capstone Project	6
ENVM 5018	The Scientific Basis of Environmental Change	3
ENVM 6004	Capstone Leadership Lab	1
ENVM 6002	Capstone Innovation Lab 2	1
ENVM 6001	Capstone Innovation Lab 1	1
Specialization courses and electives		30
Total Credit Hours		48

Capstone Project

All MENV students complete a nine-month capstone project. These projects provide students with hands-on experiences embedded within an external sponsoring organization while also providing client organizations with specific solutions to identified environmental, sustainability, and business challenges. Deliverables might include management plans, models, analyses, prototypes, or proof-of-concept projects.

Program Tracks

Environmental & Natural Resources Policy (<https://www.colorado.edu/menv/academics/specializations/environmental-natural-resources-policy/>)

Students learn how to identify and apply the best processes and tools to solve environmental and natural resource problems using a combination of theory, case studies, and practice.

Code	Title	Credit Hours
ENVS 5100	Special Topics in Environmental Studies (Environmental Decision Making)	3
ENVS 5701	Policy, Politics and Management: Foundations	3
ENVS 5702	Environmental Governance: Actors and Institutions (Environmental Governance: Actors & Institutions)	3
ENVM 5004	Public Finance and the Environment	3

Renewable & Sustainable Energy (<https://www.colorado.edu/menv/academics/specializations/renewable-sustainable-energy/>)

This specialization track is intended for those interested in both conventional and renewable energy policy, business, consulting and management.

Code	Title	Credit Hours
ENVM 5006	Sustainable Energy Policy	3
ENVM 5007	Energy Systems and Technologies	3
ENVM 5042	Renewable and Sustainable Energy in Practice	3
ENVM 6100	Special Topics for Master of the Environment Program (Renewable Energy Development and Project Finance)	3
ENVM 6100	Special Topics for Master of the Environment Program (Zero Carbon Building and Cities)	3
ENVM 6100	Special Topics for Master of the Environment Program (Energy Markets, Regulation, and Transactions)	3
ENVM 6100	Special Topics for Master of the Environment Program (RSE Innovation Seminar)	3

Sustainable Food Systems (<https://www.colorado.edu/menv/academics/specializations/sustainable-food-systems/>)

The Sustainable Food Systems specialization track will train students to approach key food system challenges critically and innovatively.

Code	Title	Credit Hours
ENVM 5029	Food & Agriculture Policy in the United States	3
ENVM 5038	Nourishing Humanity within Planetary Boundaries - Intro to Food Systems	3
ENVM 5043	Benefit Cost Analysis	1
ENVM 5044	Life Cycle Assessment - Bringing Objectivity into Subjective Conversations	1
ENVM 5045	Introduction to Monitoring & Evaluation	1
ENVM 5063	Agroecology	3
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions	3

ENVM 6100	Special Topics for Master of the Environment Program (Humans, Environment, & Justice)	3
ENVM 6100	Special Topics for Master of the Environment Program (Qualitative Analysis in Food Systems)	3

Sustainability in the Outdoor Industry (<https://www.colorado.edu/menv/academics/specializations/sustainability-outdoor-industry/>)

Sustainability in the Outdoor Industry (SOI) specialization prepares its students to successfully engage with and be future leaders in the outdoor recreation economy.

Code	Title	Credit Hours
ENVM 5064	Introduction to the Outdoor Recreation Economy	3
ENVM 5065	Community Economic Development and the ORE	3
ENVM 5066	Environmental Stewardship: Practice and Law	3
ENVM 6100	Special Topics for Master of the Environment Program (Responsible Business: Theory & Practice)	3

Urban Resilience & Sustainability (<https://www.colorado.edu/menv/academics/specializations/urban-resilience-sustainability/>)

This specialization track prepares students for careers as resilience and sustainability leaders, designing, implementing and leading resilience and sustainability policies, programs and plans, and engaging and inspiring others to work toward a bold vision of what could be but isn't yet.

Students will choose four courses:

Code	Title	Credit Hours
ENVM 5012	Water, Climate, and Sustainable Cities	3
ENVM 5026	Sustainable Land Use and Development: Principles and Practices	3
ENVM 5041	Sustainability & Resilience in Practice	3
ENVM 5050	Social Innovation and Sustainable Cities	3
ENVM 5052	Transportation, Mobility & Sustainable Cities	3
ENVM 6100	Special Topics for Master of the Environment Program (Planning for Community Resilience and Climate Action)	3

Learning Outcomes

MENV students will develop an understanding of the interconnections and feedbacks within human and natural systems. Specific learning goals will be to:

- *Develop a place-based understanding.* Students will understand and apply different approaches to thinking about places and their identities, specifically considering how context affects thinking about environmental issues and creation of appropriate solutions.

- *Learn* and *practice* new methods and techniques in a wide array of environmental applications.
- *Apply* understanding of the dominant structures, processes, and dynamics within and between environmental, social and economic systems.
- *Analyze* contemporary concerns about the environment.
- *Create* and *evaluate* new ideas to promote their own or others' engagement in the environment and to find solutions to today's pressing problems.

Environmental Studies - Master of Science (MS)

The ENVS Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students gain specialized research skills by writing and defending an original master's thesis.

For additional information and resources for ENVS graduate students, visit the Environmental Studies Program website (<https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/>).

Requirements

To earn an MS in Environmental Studies, students must complete 36 hours of coursework and successfully defend an original master's thesis in front of a committee of three faculty members.

Guidance Committee Meeting

During the first six weeks of a student's first semester, a guidance committee of at least three faculty members will examine a student's past academic and professional record and recommend a program of coursework for that student.

Thesis Proposal Meeting

Students must assemble a thesis committee of three faculty members and propose an original research project that will form the basis of the student's thesis. The thesis proposal meeting is typically held at the end of the student's first academic year.

Thesis Defense Meeting

The student will present the findings from their thesis project and respond to questions from the committee. The thesis defense meeting is typically held at the end of the student's fourth semester.

Required Courses

In addition to the courses recommended by their guidance committee, students will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 The Theoretical Foundations of Environmental Methods

Plan(s) of Study

The Master of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges. MS students complete

coursework that spans the natural and social sciences, values and ethics, and policy. Students gain specialized research skills by writing and defending an original master's thesis.

To earn an MS in Environmental Studies, students must complete 36 hours of coursework and successfully defend an original master's thesis in front of a committee of three faculty members. The master's degree must be completed within four years. Most students complete the MS degree in two years. The major milestones are as follows.

1. **Guidance committee meeting** – During the first six weeks of a student's first semester, a guidance committee of at least three faculty members will examine a student's past academic and professional record and recommend a program of coursework for that student. In addition to the courses recommended by their guidance committee, students will complete the following required courses: ENVS 5000 Policy, Science, and the Environment and ENVS 5003 The Theoretical Foundations of Environmental Methods.
2. **Thesis proposal meeting** – Students must assemble a thesis committee of three faculty members and propose an original research project that will form the basis of the student's thesis. The thesis proposal meeting is typically held at the end of the student's first academic year.
3. **Thesis defense meeting** – The student will present the findings from their thesis project and respond to questions from the committee. The thesis defense meeting is typically held at the end of the student's fourth semester.

Dual Degree Programs

MS/MBA in Environmental Studies and Leeds School of Business

The ENVS Masters of Science program provides advanced training in a setting that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. Our goal is to deliver the knowledge and skills needed to confront 21st century environmental challenges, this includes skills in business management and entrepreneurship. For these reasons, the Leeds School of Business and the Environment Studies Program collaborate to offer a dual MS/MBA degree program.

This dual degree program requires 36 credit hours of graduate coursework in environmental studies and 43 credit hours of MBA coursework (with 12 credit hours of environmental studies coursework applying toward the required 55 credit hours for the MBA). The MBA program will be considered the student's primary program. For more information, visit the Business School's MS/MBA (<https://www.colorado.edu/business/mba/full-time-mba-program/curriculum/dual-degrees/>) webpage.

MS/JD or PhD/JD in Environmental Studies and Colorado Law

Those who wish to pursue advanced degrees across these fields have the option of two dual degree programs: MS/JD and PhD/JD. Students will complete coursework in the core areas of the law, the natural and social sciences, values and ethics, and policy. Graduates of the dual degree program in law and environmental studies have the skills to impact future policies in government, industry and nonprofits or to pursue research-focused careers.

This dual degree is offered in conjunction with the Law School. The Law School will grant credit for acceptable performance in graduate-level environmental studies courses toward the JD degree for up to 9 (for

MS students) or 12 (for PhD students) credit hours of the required 89 credit hours for the JD degree. Environmental studies will grant up to 9 (for MS students) or 12 (for PhD students) credit hours of acceptable performance in law courses. The JD program will be considered the student's primary program. For more information, visit the Law School's MS/Juris Doctor and PhD/Juris Doctor (<https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/>) webpage.

Internship Options for MS/MBA & MS/JD Students

Students pursuing one of the dual degree programs complete 36 graduate credit hours, including a 2-credit Internship for which a substantial internship report is written. A thesis is not required; however, dual degree students may opt to complete one.

Students who opt for this degree plan must complete the candidacy application (<https://www.colorado.edu/graduateschool/sites/default/files/attached-files/candidacyappadv-form2018-re.pdf>) by the posted Graduate School deadline. These forms require the signatures of the student's advisor and graduate director. Copies of the forms must be filed with the graduate coordinator. Both degrees must be completed simultaneously.

Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate environmental policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state and federal decision processes that shape environmental issues.
- Familiarity with international governance and decision-making frameworks.
- The ability to think critically, creatively and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

Outdoor Recreation Economy - Master of Science (MS)

The Master of Science in Outdoor Recreation Economy (MORE) is an interdisciplinary, applied master's degree that prepares professionals to become creative, thoughtful leaders across the outdoor recreation economy sector. The program leverages University of Colorado Boulder's academic excellence and experience in professional graduate education, as well as the State of Colorado's deep connection with the outdoor recreation economy. The program is industry responsive, creates widespread access, and provides innovative, fully online learning opportunities.

The program provides skills and knowledge to students and learners from a variety of backgrounds who are interested in the outdoor industry, community building, and the public lands and natural resources

policy sectors. The scope of the MORE curriculum addresses four key overlapping areas:

1. **Outdoor recreation industry:** Wholesalers, manufacturers, tour operators, and guides provide hardware and services for people to take advantage of open spaces and recreate. Increasingly, the outdoor industry can motivate consumer spending toward sustainability and public lands stewardship. Students who complete this focus will receive a background in sustainability, resilience, outdoor recreation, and business fundamentals.
2. **Public lands policy:** Policies and regulations that govern access and sustainable use are imperative for the appropriate use, conservation, and enjoyment of public lands. Students who complete this focus will emerge with knowledge and practical experience in these areas, ready to address the new policy challenges facing public lands.
3. **Community building through outdoor recreation:** Communities that leverage natural resources and amenities to enhance or create new recreation economies face new kinds of challenges. Recreation economies draw people, compete with places and resources, but also allow communities to diversify, showcase their culture, and grow. Students who complete this focus will receive the relevant professional skills needed to advance in recreation development, sustainability and resilience, and community engagement.
4. **Sustainable leadership:** Businesses in the outdoor recreation economy that develop sustainable, innovative products, services and inclusive practices are positioned to lead the next generation of leaders and enthusiasts in a dynamic and fast-growing sector in the economy. Students gain the knowledge and skills necessary to successfully integrate purpose-driven leadership, business acumen, inclusivity and sustainability into outdoor recreation industry operations and entrepreneurial ventures.

In addition to knowledge specific to outdoor recreation, public lands policy, and resilient communities, students will gain career-relevant skills in project management, communication, and systems thinking. The knowledge and skills gained in the MORE program will immediately prepare students to advance in their current careers or gain employment in the outdoor industry.

For more information, visit the Master of Science in Outdoor Recreation Economy (<https://www.colorado.edu/program/ore/>) website.

Requirements

Admissions Requirements

Admission to the Master of Outdoor Recreation Economy degree will conform to the requirements set by the Graduate School. No coursework may be transferred into this program.

Required Courses and Credits

The master's degree requires a minimum of 30 credits hours of graduate level coursework, with a minimum cumulative GPA of 3.0. Students must complete three certificates at 10 graduate level credit hours each. All students must complete the foundational (Introduction) certificate and two additional certificates to earn their degree.

Each certificate has a distinct curriculum, and courses may not be double counted toward more than one certificate. Students may take the certificates in any order. For students who are new to the outdoor recreation economy, it is recommended to start with the Introduction certificate, which provides foundational knowledge in the areas of policy, sustainability and community development.

For this degree, students are not required to complete a thesis, capstone project or final examination. A 2-credit, synchronous (remote, live) project course is required to complete each of the three certificates. This project course represents a culmination of the certificate where students apply the skills, tools and knowledge gained from certificate subject courses to address current policy, business or community development challenges in the outdoor recreation economy. The emphasis of each of the project classes is the development and implementation of innovative strategies, processes and solutions on an experiential outdoor recreation project. Once a student has completed three of the 10-credit online certificates, they will be awarded the master's degree.

Courses

Code	Title	Credit Hours
OREC 5000	Introduction to the Outdoor Recreation Economy	2
OREC 5001	Sustainability Practices within the Outdoor Recreation Economy	2
OREC 5002	Leading Sustainable Change in the ORE	2
OREC 5003	Outdoor Recreation Project Tools and Skills	2
OREC 5004	Environmental Justice and Stewardship	2
OREC 5005	Issues in Public Lands	2
OREC 5006	Issues in Natural Resources Management	2
OREC 5007	Public Lands and Natural Resources Policy Project	2
OREC 5008	Community Economic Development Strategies for the Outdoor Recreation Economy	2
OREC 5010	Community Economic Development Tools for the ORE	2
OREC 5011	Outdoor Recreation Economy Community Economic Development Project	2
OREC 5012	Strategic Leadership in the Outdoor Recreation Economy	2
OREC 5013	Circular Economy and Integration of Sustainable Business Practices	2
OREC 5014	Outdoor Recreation Business Project (C)	2
OREC 5015	Building an Outdoor Recreation Enterprise	2
OREC 5016	Foundations of Environmental Law and Culture	2
OREC 5017	Environmental Movements, Alliances, and Legal Change	2
OREC 5018	Community and Place Matters	2
OREC 5019	Building Community Capacity and Readiness for the Outdoor Recreation Economy	2
OREC 5020	The Business of Outdoor Recreation	2
OREC 6100	Special Topics for Outdoor Recreation Economy	2

Plan(s) of Study

The Master of Outdoor Recreation Economy (MORE) degree pathway offers flexibility to support working professionals. This degree program is offered entirely online and is composed of stackable certificates, each worth 10 credit hours. To earn the MORE degree, candidates complete three certificates, for a total of 30 credit hours.

The MORE degree offers a foundational (Introduction) certificate taken by all students, and a range of additional topic-focused certificates from which students must complete two. Each certificate consists of four asynchronous subject courses and one synchronous (live, remote) project course related to the relevant content areas, skills, tools, and leadership practices of the sector. Students may complete certificates in parallel or sequentially. In addition, students may finish certificates as they are able, and may stack the certificates to complete the degree. Students may also elect to continue and complete additional certificates.

Certificates

Introduction to the Outdoor Recreation Economy - Graduate Certificate

In the Master of Outdoor Recreation Economy (MORE) graduate degree program, the outdoor recreation economy is viewed holistically. It links public lands, the communities that sit alongside them, and the outdoor recreation industry. This certificate explores the interaction between these nodes of the outdoor recreation economy and lays the foundation for the MORE degree program. Courses in the certificate will provide an introduction to public lands and natural resources policy, challenges and opportunities for community economic development, and inclusive leadership skills for the outdoor recreation industry. This certificate is required for attainment of the MORE degree.

Code	Title	Credit Hours
Subject Courses (Asynchronous)		
OREC 5000	Introduction to the Outdoor Recreation Economy	2
OREC 5001	Sustainability Practices within the Outdoor Recreation Economy	2
OREC 5016	Foundations of Environmental Law and Culture	2
OREC 5002	Leading Sustainable Change in the ORE	2
Project Course (Synchronous)		
OREC 5003	Outdoor Recreation Project Tools and Skills	2

While students may take the Introduction certificate courses in any order, it is recommended to complete the four subject courses before enrolling in the project course.

Public Lands and Natural Resources Policy - Graduate Certificate

With over 640 million acres of land in the United States owned by the federal government, and significant holdings by both state and local governments, public lands are a venue ripe for opportunity and conflict. This certificate examines critical and emerging issues on public lands and natural resources management across the U.S. Following an overview of the structure of public lands management, including federal land management designations and agencies and major laws and policies relevant to public lands management, the certificate transitions into issue-based discussions of challenges facing public

lands management. The certificate also explores how stakeholders, such as interest groups, non-governmental organizations, and the general public, influence the policy process.

Code	Title	Credit Hours
Subject Courses (Asynchronous)		
OREC 5005	Issues in Public Lands	2
OREC 5004	Environmental Justice and Stewardship	2
OREC 5006	Issues in Natural Resources Management	2
OREC 5017	Environmental Movements, Alliances, and Legal Change	2
Project Course (Synchronous)		
OREC 5007	Public Lands and Natural Resources Policy Project	2

Students must complete the four subject courses before enrolling in the project course.

Community Economic Development and the Outdoor Recreation Economy - Graduate Certificate

Outdoor recreation spaces are central to the development of healthy, vibrant and socially viable communities. The mission of community-based outdoor recreation development and innovation is to strengthen the well-being of a community by improving access to outdoor recreation, increasing ownership of community assets and expanding the entrepreneurial base for the local population. This certificate explores the processes, tools and strategies that promote the growth of inclusive, sustainable and resilient outdoor recreation opportunities in the broader context of community economic development. Planning and land use policy for local, state and federal government and the protection of public and private lands is explored along with the sociology of communities and place; economic development theory; and community economic development financial tools and policies. Students acquire the cross-disciplinary skills needed to promote meaningful community engagement, identify funding sources and champion the outdoor recreation economy for all communities.

Code	Title	Credit Hours
Subject Courses (Asynchronous)		
OREC 5008	Community Economic Development Strategies for the Outdoor Recreation Economy	2
OREC 5010	Community Economic Development Tools for the ORE	2
OREC 5018	Community and Place Matters	2
OREC 5019	Building Community Capacity and Readiness for the Outdoor Recreation Economy	2
Project Course (Synchronous)		
OREC 5011	Outdoor Recreation Economy Community Economic Development Project	2

Students must complete the four subject courses before enrolling in the project course.

Leading a Sustainable Business in the Outdoor Recreation Economy - Graduate Certificate

The outdoor recreation industry sector includes outdoor recreation product manufacturers, supply chains, retailers, lodging and transportation services, guides, and resort operators, among a host of others. Demand for advanced outdoor technical apparel, footwear and equipment drives innovation and entrepreneurship. It creates jobs for highly skilled workers in diverse fields such as technology, product design, manufacturing, sustainability and global commerce. In addition to product and service innovation, the sector needs a talent pipeline that understands policy, community engagement, and sustainability. This sector is currently underperforming in these areas. In addition, some parts of the industry are committing more resources to social responsibility, community support, and environmental sustainability – but do not have the technical resources to effectively integrate these objectives. This certificate will provide the knowledge and tools to better integrate sustainability into outdoor recreation industry operations.

Code	Title	Credit Hours
Subject Courses (Asynchronous)		
OREC 5012	Strategic Leadership in the Outdoor Recreation Economy	2
OREC 5013	Circular Economy and Integration of Sustainable Business Practices	2
OREC 5015	Building an Outdoor Recreation Enterprise	2
OREC 5020	The Business of Outdoor Recreation	2
Project Course (Synchronous)		
OREC 5014	Outdoor Recreation Business Project	2

Students must complete the four subject courses before enrolling in the project course.

Inclusivity and Leadership in the Outdoor Industry - Graduate Certificate

Alongside the racial reckoning that has shaped American culture in recent years, the outdoor industry is making strides to welcome those from marginalized and underrepresented communities, particularly Black, Indigenous and people of color (BIPOC), to not only participate in outdoor activities but also to thrive in outdoor careers. The outdoor recreation economy has recognized the need to expand access to the outdoor industry to everyone, regardless of race, ethnicity, gender, gender identity, physical ability, neurodiversity, age or sexual orientation.

The Inclusivity and Leadership in the Outdoor Industry Certificate explores issues regarding DEI with a special focus on creating a natural environment where all people can not only feel welcome but encouraged to become active participants as outdoor enthusiasts, industry professionals, and stewards dedicated to the protection of the land. Coursework explores tools and strategies to effectively lead the transition to a more diverse and equitable outdoor industry.

Code	Title	Credit Hours
Subject Course (Asynchronous)		
OREC 5021		

Additional coursework for this certificate to be announced.

Introduction to the Outdoor Recreation Economy - Graduate Certificate

Knowledge & skill outcomes

- Be versed in major topics related to the outdoor recreation economy.
- Understand the importance of context and place-based, cultural, social, economic and ecological differences when looking for solutions.
- Understand the systems connections of the constituent elements of the outdoor recreation economy.

Public Lands and Natural Resources Policy - Graduate Certificate

Knowledge & skill outcomes:

- Understand contemporary issues in public lands and natural resources management.
- Understand the policy and statutory context in which debates regarding public lands policy are situated.
- Understand stakeholder dynamics and coalition building with regards to public lands and natural resources management.

Community Economic Development and the Outdoor Recreation Economy - Graduate Certificate

Knowledge & skill outcomes:

- Understand social, cultural, and economic foundations of outdoor recreation economy communities.
- Develop knowledge of the macro- and micro-economic factors behind economic transitions in communities.
- Learn about community economic and business development theory and practice.
- Develop an understanding of the strategies and tactics to successfully transition local economies, including the tools to do so.

Leading a Sustainable Business in the Outdoor Recreation Industry - Graduate Certificate

Knowledge & skill outcomes:

- Gain knowledge of leadership skills for the outdoor recreation industry sector.
- Gain an understanding of circular economy and sustainable business practices.
- Learn tools for tracking and measuring sustainability.

Inclusivity and Leadership in the Outdoor Industry - Graduate Certificate

Knowledge & skill outcomes:

- Communicate the importance of diversity, equity, inclusion and access to the Outdoor Recreation Economy.
- Identify opportunities for increasing access and inclusion to outdoor recreation for diverse and underrepresented participants.
- Lead outdoor industry organizations in developing diverse and inclusive recruiting and hiring practices.
- Recognize and champion the outdoor recreation economy's role in addressing issues of diversity, equity, inclusivity and outdoor access in all communities.

Environmental Studies - Doctor of Philosophy (PhD)

The doctoral program in ENVS gives students the opportunity to pursue a research-based degree situated in a program that prioritizes cross-disciplinary perspectives and problem-oriented scholarship. PhD students are trained to become independent researchers, usually working closely with one or more faculty advisors and committee members. PhD students complete coursework that spans the natural and social sciences, values and ethics, and policy. Students develop an independent line of research through their dissertation project and other collaborations over the course of their graduate career. Students within the program conduct research in a variety of environmental fields, usually working closely with one or more faculty advisors and committee members.

While a student's research project shapes much of their graduate career, coursework, colloquia and other activities are also key parts of the graduate experience. This is particularly important in ENVS as all these endeavors provide the breadth of knowledge that is key for those seeking to contribute to environmental research and management.

For more information, visit the program's PhD webpage. (<https://www.colorado.edu/envs/graduate-studies/graduate-programs/phd-program/>) View the department website for additional graduate student resources (<https://www.colorado.edu/envs/graduate-studies/policies-and-guidance-documents/>).

Requirements

Degree Requirements

To earn a PhD in Environmental Studies, students must complete 32 hours of coursework plus an additional 30 hours of dissertation credit hours. Major milestones are outlined below.

Guidance Committee Meeting

During the first six weeks of a new student's first semester, a guidance committee of at least three faculty members will examine a student's past course record (from undergraduate and past graduate work) and devise a program of coursework for that student.

Required Coursework

In addition to the courses recommended by their guidance committee, students will complete the following required courses:

- ENVS 5000 Policy, Science, and the Environment
- ENVS 5003 The Theoretical Foundations of Environmental Methods

Preliminary Examination

This written exam tests a student's understanding of material from the ENVS core classes, as well as the breadth and depth of their knowledge in their chosen fields of inquiry. The preliminary exam is typically taken in the student's fourth or fifth semester.

Prospectus Defense

The prospectus defense is designed to evaluate a student's dissertation research plan. At the prospectus defense meeting, the committee also will review the student's completion of coursework assigned in previous committee meetings. The prospectus defense should be scheduled in the student's fifth or sixth semester.

Dissertation Defense

A doctoral student writes a dissertation based upon original investigation and showing mature scholarship and critical judgment as well as familiarity with tools and methods of research. The defense consists of both a public presentation and a closed door meeting with the committee.

Learning Outcomes

Among the knowledge and skills that we seek to provide to every student are:

- The ability to evaluate policy goals in the context of competing societal objectives.
- Fundamental knowledge of the relevant environmental sciences to be intelligent users of scientific information.
- The ability to integrate knowledge from multiple disciplines in the context of complex environmental issues.
- An understanding of the local, state, and federal decision processes that shape environmental issues.
- The ability to think critically, creatively, and holistically about environmental issues.
- The ability to work in interdisciplinary teams.
- Skill in communication with diverse audiences.

Dual Degree Program

PhD/JD in Environmental Studies and Colorado Law

In today's politically influenced world, it is especially important to understand both the sciences necessary to protect and improve the environment as well as environmental laws and policies. This dual degree brings together the social, economic and political realities that will so dramatically affect the future of our natural world. This program seeks to ensure that environmental studies will have its due impact on the formation of future policies and will not remain on the sidelines as crucial new decisions are being made.

Graduates of the dual degree program in law and environmental studies are well prepared to work in government, in industry or with special programs. Students should review the requirements to complete a JD degree as outlined by the School of Law. (<https://www.colorado.edu/law/academics/degrees/dual-degrees-and-certifications/>)

For more information visit the Environmental Studies programs Dual Degree webpage. (<https://www.colorado.edu/envs/graduate-studies/graduate-programs/dual-degrees-msjd-and-phjd/>)

Degree Requirements

A student enrolled in the dual degree program may commence studies under the program in either school. However, a student is required by the Law School to take the first year of the JD curriculum as a unit exclusively in the Law School. To complete the PhD portion of the degree, students must complete 32 hours of coursework (including the required courses listed above) plus an additional 30 hours of dissertation credit hours. Students must complete both degrees simultaneously.

Ethnic Studies

The Department of Ethnic Studies at the University of Colorado Boulder is dedicated to centering the epistemologies, histories and lived experiences of marginalized communities of color and Indigenous nations in order to challenge and critique all forms of oppression and

to advance emancipatory, self-determining futures for all people. Ethnic Studies is an interdisciplinary field that is built upon four core disciplinary pillars of scholarship: Africana studies, Native American & Indigenous studies, Asian American studies, and Chicana/Latina studies. Our department stresses the unique contributions and perspectives of each pillar, while training our students to think and research across them in transdisciplinary and intersectional ways. We draw upon our strengths in engaged scholarship and culturally-sustaining pedagogy to examine how race and the interrelated categories of culture, ethnicity, indigeneity, gender, class, sexuality, religion, dis/ability and legal status impact the past and present lives of people locally, regionally and globally.

Course code for this program is ETHN.

Doctoral Degree

- Comparative Ethnic Studies - Doctor of Philosophy (PhD) (p. 1175)

Certificate

- Comparative Ethnic Studies - Graduate Certificate (p. 1176)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ETHN 5001 (3) Screening Race, Class & Gender in the U.S. and the Global Borderland

Engaging with the ways in which race, class, gender and sexual oppression intersect, this class examines several film productions by and about diasporic and subaltern subjects (especially children and women) in the U.S./Mexico borderlands, and the urban ethnic metropolises of the global borderlands.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4001 and CINE 4001

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5009 (3) Chicana/os and Education

Chicana/o and Mexican-origin communities make up the largest and oldest of U.S. Latinx peoples. In many urban school districts across the country they make up the majority of the school enrollment; yet they are grossly underrepresented in higher education. This course will examine the socio-historical, cultural, and political contexts that have shaped the educational experiences of Chicana/os in the U.S. including issues of race, language learning and identity formation as they intersect with nation building. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4009

ETHN 5102 (3) Special Topics in Africana Studies

Variable topic that allows intensive coverage of a subject, theme, or issue in African American studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4102

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5106 (3) Special Topics in Chicana and Chicano Studies

Examines a particular topic, theme, issue or problem concerning Chicana and Chicano studies.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4106

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5116 (3) Spoken Word Latinx Poetics and Poetry

This is a writing intensive workshop in contemporary poetry writing and Chicana/o and Latina/o poetics—specifically, Nuyorican and Afro-Latino (the Nuyorican Poets Cafe). The purpose of the course is dual-fold: 1) students will be encouraged and empowered to express and develop their poetic voice; 2) students will be challenged to develop and refine their poetic craft. Examines primarily Chicana and Latino specific poetic expression that reflects the cultural mestizaje of Chicano/a and Latina/o peoples.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4116

Recommended: Requisite 6 credits in any ETHN class.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5233 (3) Native American and Indigenous Environmental Issues

Explores the unique knowledges, practices and perspectives of Native American and Indigenous peoples with regard to environmental issues, and how they both contrast with and complement dominant ways of knowing. Views central themes of Land, Plants, Animals, and Air/Water through political-ecological lenses. Critically assesses historical and contemporary Indigenous environmental matters in the contexts of colonial histories and tribal sovereignty.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4233

Recommended: Prerequisite ETHN 1023 or ETHN 2013.

Additional Information: Departmental Category: American Indian Studies

ETHN 5272 (3) W.E.B. Du Bois Seminar

Analyzes the life and thought of W.E.B. Du Bois for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Du Bois's epistemology and research methodology, as well as his participation in radical political and social movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4272

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5306 (3) The Chicana and Chicano and U.S. Social Systems

Gives special attention to ways U.S. institutions (i.e., legal, economic, educational, governmental and social agencies) affect Chicanas and Chicanos. Discusses internal colonialism, institutional racism, assimilation and acculturation, and identity.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4306

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Chicana/o Studies

ETHN 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4353 and

RLST 4353 and RLST 5353

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5552 (3) The Harlem Renaissance: Fr Black Wmn's Club Mvmnt to Hip Hop

Offers an interdisciplinary and intersectional overview of the origins and evolution of the Harlem Renaissance. Explores classic texts, music and works of art emerging from the Harlem Renaissance and related events and movements of its epoch: the Black Women's Club Movement, New Negro Movement, Pan-African Movement, Lost Generation, Jazz Age, World War I and World War II.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4552 and HUMN 4552

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Africana Studies

ETHN 5553 (3) Indigenous Representations in the United States

Examines the relationship and negotiation of culture/status/place through representation(s) within and concerning Indigenous peoples/communities. Focuses on U.S. representational forms in popular experiences e.g., literature, film, media and the roots of those representations via legal and medical definitions. This investigation and analysis is supplemented with focus on gender as well as contextualization through global Indigenous portrayals.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4553

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 5632 (3) Frantz Fanon Seminar

Analyzes the life and thought of Frantz Fanon for its contributions to interdisciplinary and intersectional studies. Emphasis will be placed on the innovative interdisciplinary and intersectional nature of Fanon's psychology, sociology and philosophical anthropology, as well as his participation in African and Caribbean anti-colonial movements.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4632

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Africana Studies

ETHN 5714 (3) Sport for Social Justice

Takes a look at the nuanced and controversial relationship between sport and peace. Although sport is heralded as a powerful tool for social good, drawing attention to causes such as conflict resolution, HIV prevention, environmental initiatives and improved international relationships, it also continues to reflect and reproduce social inequalities in ways commonly overlooked.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 5951 (3) Senior/Graduate Seminar in Ethnic Studies

Capstone experience in Ethnic Studies. Includes an independent research project and public presentation.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 4951

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6000 (3) Foundations of Comparative Ethnic Studies

Examines theories of race, ethnicity, gender, sexuality, colonialism and globalization, especially from the perspectives of communities most impacted by these categories and processes. This is the introductory course for graduate work in Comparative Ethnic Studies.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6001 (3) Research Methods in Comparative Ethnic Studies

Examines various humanistic and social science research methodologies and applies critical frameworks (including feminist, queer, Indigenous and decolonial theories) to research through an intersectional lens committed to analyzing race, class, gender and sexuality as interconnected, knowledge-producing systems of power. Examines how Ethnic Studies scholars can engage with social justice projects by producing knowledge in cutting edge ways.

Requisites: Requires prerequisite course of ETHN 6000 (minimum grade C). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6002 (1) Professionalization Seminar in Comparative Ethnic Studies

Provides graduate students with professionalization skills, including how to prepare a national fellowship application, how to give a successful job talk, how to publish refereed journals and book volumes and how to approach the academic job market.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Ethnic Studies (ETHN) graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6011 (3) Race and Sexuality Studies

Examines primary texts in queer studies and queer theory while challenging colonial heteronormative and homonormative studies that exclude queers of color and their life experiences. Readings include works by Gloria Anzaldua, Jose Munoz, Audre Lorde, David Eng, Judith Butler, Judith Halberstam, and Michel Foucault. Topics such as queer borderlands, citizenship, racialized and transgender identities will be interrogated.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 7014

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6100 (3) Race and Citizenship in U.S. History and Culture

Examines how the cultural and legal bounds of U.S. citizenship have been linked to race, gender, labor, class, and sexuality. Analyzes the experiences of racialized and gendered groups to explore the racial formations, exclusions and contradictions inherent with the institution of citizenship.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6101 (1-6) Topics: Specialized Comparative Studies

Focuses on a variety of advanced interdisciplinary studies. Themes include: Race and Sports, Critical Whiteness Studies, Race and Masculinity, Applied Community Engagement, Black Women in the Diaspora, US/Mexico Border Cultures, Criminalization and Latinas/os, Race, Violence and Film, and Cuba and Tourism.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite ETHN coursework.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6103 (3) Indigenous Thought and Theory: Foundations in NAIS

Introduces the theoretical landscapes of Native American and Indigenous Studies. Explores debates, methodologies and concerns that ground the field and provides critical engagement with Indigenous communities and knowledges. Teaches standards for evaluating scholarly sources based on criteria derived from the most outstanding recent scholarship in the field. Requires writing and thinking critically about issues of concern for global indigenous communities.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: American Indian Studies

ETHN 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: RLST 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Chicana/o Studies

ETHN 6301 (3) Decolonial/Postcolonial Theory

Offers an overview of the origins and evolution of Decolonial/Postcolonial Theory. Critically compares and contrasts decolonial discourse with postcolonial theory. Exposes students to the ways in which decolonial and postcolonial theory conceptually interconnect via Cultural Studies, Critical Race Studies and Ethnic Studies-derived discourses such as racial colonialism, the critique of European imperialism, transnationalism feminism, Indigeneity/Indigenous Studies, Diaspora Studies and Subaltern Studies.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6501 (3) Critical Race Theory: Soc Scnc Explrtn/Intrvntn into Crit Race St

Offers an overview of the origins and evolution of Critical Race Theory (CRT). Critically compares and contrasts legal and extralegal social science approaches to CRT. Exposes students to the ways in which CRT and Critical Ethnic Studies conceptually interconnects via CRT-derived discourses such as Critical Race Feminism, Critical White Studies, TribalCrit, LatCrit, AsianCrit, DesiCriti, QueerCrit and Decolonial/Postcolonial Critical Race Theory.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 6841 (1-6) Advanced Directed Readings in Ethnic Studies

This is a graduate level directed readings course designed to expand student knowledge in a particular area of concentration with a broad interdisciplinary and comparative framework. These areas of concentration include work in Africana, American Indian, Asian American, Chicana and Chicano and Transnational/Hemispheric ethnic studies.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

ETHN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for a minimum of 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Crosscultural/Comparative Studies

Comparative Ethnic Studies - Doctor of Philosophy (PhD)

The PhD program in comparative ethnic studies offers an innovative path to provide students with broad training to enable them to research and analyze the intersectional and relational workings of race, ethnicity, culture, indigeneity, gender, class, sexuality, religion, dis/ability and legal status in local, regional and global contexts. It provides flexibility for students to pursue their individual research interests, while ensuring that they are grounded in both the foundational and cutting-edge theories in ethnic studies.

The department is dedicated to interrogating the relational nature of race and its attendant categories, particularly gender and sexuality, using frameworks that account for the increasingly global ways that these categories are constructed, resisted and inhabited. However, we believe that rigorous comparative and relational analyses can only grow out of deep groundings in the particular areas of Africana, Asian American, Chicana/Latinx, and Native American/Indigenous studies. Methodologically and theoretically, our faculty members possess training and expertise in interdisciplinary fields, including ethnic studies; women, gender and sexuality studies; environmental studies; critical sports studies; critical and intersectional criminology; cultural studies; literary and film studies; border studies; and American studies; as well as traditional disciplines, including anthropology, history, education, religious studies and sociology.

Requirements

Doctoral students are expected to demonstrate an ability to independently carry out original field research, acquire original data, make appropriate analyses and prepare reports of publishable caliber. Students must demonstrate proficiency in a broad subject of learning and the ability to critically evaluate work in ethnic studies. The PhD program is comprised of three basic components: coursework, a comprehensive examination and the dissertation.

A master's degree in ethnic studies or a cognate field (e.g., American studies, English, history, sociology, women's and gender studies, or other related disciplines and interdisciplinary fields) from an accredited university is required for admission into the PhD program.

Transfer of Credit

Students will be permitted to transfer a maximum of 9 credit hours. The Associate Chair of Graduate Studies (ACGS) will examine the academic transcripts of admitted students to determine transfer credits where appropriate. Students must submit a syllabus for each course to be considered for transfer, and follow the steps listed in the department's Graduate Student Handbook.

Required Courses and Credits

Students must complete 60 credit hours, with a minimum of 30 credit hours of graduate-level coursework (including any transferred graduate credit from the completed master's degree referenced above). At least 18 of the 30 credit hours of graduate-level coursework must come from the Department of Ethnic Studies.

All doctoral students are required to complete the fall and spring sequence, ETHN 6000/ETHN 6001: Foundations in Comparative Ethnic Studies and Methods in Comparative Ethnic Studies (6 credits total, 3 per semester). The introductory, two-semester course will prepare doctoral students for interdisciplinary studies on race, ethnicity, gender, class, indigeneity, sexuality, and culture. The first semester will be a theoretical introduction, and the second semester will examine research methodologies and application of theories to research.

In addition to the two introductory courses, students will be required to enroll in a 1-credit professionalization seminar (ETHN 6002), which is a two-semester course offered by the Ethnic Studies Department that meets once a month during the academic year.

The remaining required credit hours of graduate-level coursework will be selected in consultation with the student's advisor from among ETHN graduate offerings, graduate courses in other units, and approved transfer credit up to 9 credit hours.

Areas of Specialty

The department encourages, but does not require, that students complete a minimum of 9 credits of graduate-level coursework in an area of specialty. Depending on their research interests, students will create an area of study which may include, but is not limited to: Native American & Indigenous studies, Africana studies, Asian American studies, Chicana/Latina studies, and criminology. Thematic subfields allow students to develop a thematic framework (e.g. "Decolonial Theory," "Diaspora and Labor Migration," or "Borderlands") in which they will specialize. Students will work in consultation with their advisor to develop an area of specialty, which will be highly individualized to suit students' particular research interests.

Dissertation Credits

In addition to the 30 credit hours of graduate-level coursework, students must complete a minimum of 30 dissertation credits in total: 5–10 during comprehensive examination preparation and 5–10 per semester when defending the prospectus and writing the dissertation. Students must be registered for a minimum of five dissertation hours the semester (including summer semester) in which the comprehensive exam/dissertation defense is held. Students are not permitted to register for more than 10 credit hours of dissertation credit per semester, per Graduate School rules.

Language Requirement

The department encourages, but does not require, non-English language proficiency, especially for students conducting research in contexts that extend beyond their existing abilities. Proficiency will be demonstrated by passing (with a grade of C or better) the fourth semester of a non-English

language course, earning a passing score on the Graduate School Foreign Language Test (GSFLT), or by an alternative mode of assessment agreed to by the Graduate Committee. Credits earned for language proficiency will not apply toward the doctoral degree. The goals of the language requirement are to ensure that doctoral scholars can research materials in other languages besides English. The department will work with the Graduate School to ensure that the language requirements are in parity with other interdisciplinary doctoral programs at CU Boulder.

Continuous Registration

A PhD student is required to register continuously as a full-time, regular degree-seeking student at CU Boulder for a minimum of five credit hours in the fall and spring semesters of each year. Students must be registered for a minimum of 5 dissertation hours per semester beginning with the semester following the passing of the comprehensive examination and extending through the semester in which the dissertation is successfully defended (final examination). A student who fails to register continuously after passing the comprehensive examination must retake and pass the examination to regain status as a student in good standing in the Graduate School.

For additional details, visit the department's PhD Program (http://www.colorado.edu/ethnicstudies/grad/phd_program.html) webpage and download the Graduate Student Handbook.

Comparative Ethnic Studies - Graduate Certificate

The 12-credit graduate certificate in comparative ethnic studies is an interdisciplinary course of study designed to complement the MA or PhD curriculum required by the student's home department within CU Boulder. The Department of Ethnic Studies (DES) offers the certificate to provide specialized training in Africana studies, Chicana/Latina studies, Native American and Indigenous studies, decolonial feminist studies, comparative ethnic studies, race and sexuality studies, and transnational/hemispheric ethnic studies to students pursuing degrees in various disciplines on the CU Boulder campus.

Requirements

Application Requirements

Students must submit an unofficial transcript and a two-page statement of purpose describing how their graduate interests will be enhanced by our course offerings and mentoring (in the statement of purpose, please identify classes already taken in DES).

To participate in the ethnic studies certificate program, applicants must maintain good academic standing with their home unit within the Graduate School. Their home unit must also indicate its support for the student enrolling in the certificate program.

Materials should be sent to grad.ethnst@colorado.edu.

Program Requirements

A total of 12 credit hours of graduate-level coursework is required for this certificate, nine of which must be from courses in the Department of Ethnic Studies (ETHN 6000 and two electives). Certificate program students must maintain a minimum GPA of 3.3.

Required Courses and Credits

Code	Title	Credit Hours
Required Course		
ETHN 6000	Foundations of Comparative Ethnic Studies	3
Electives		
Choose three graduate-level electives, at least two of which are from the Department of Ethnic Studies. Approved elective courses include:		9

French and Italian

The Department of French and Italian at the University of Colorado Boulder enjoys a national reputation, and is the only PhD granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its MA and PhD recipients in desirable positions of employment. The graduate program typically counts an enrollment of 20 to 25 students, drawn from both the

U.S. and several foreign countries, pursuing interests from the Middle Ages to 20th c. and Francophone literatures.

Graduate Study in French

The Department of French and Italian at the University of Colorado Boulder offer master's and doctoral French graduate programs. Students wishing to pursue graduate work in French leading to candidacy for an advanced degree should read the Degree Requirements (p. 1030) sections carefully.

Master's Degree

- French - Master of Arts (MA) (p. 1179)

Doctoral Degree

- French - Doctor of Philosophy (PhD) (p. 1180)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5170 (3) Francophone African Literature

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5250 (3) Medieval and Renaissance Readings

Through close readings of masterpieces of French medieval and Renaissance literature in conjunction with contemporary criticism and theory, explores the contexts of medieval and Renaissance France. Readings in French. May be taught in English to accommodate students in other programs.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5310 (3) 17th Century French Tragedy and Poetry

Close readings of tragedies by (among others) Corneille and Racine, placed in the context of baroque and neoclassical political and artistic culture as illustrated by philosophy, painting, and science. Drawing on recent criticism and theory, explores heroic drama's role as a symptom and agent of early modern French social and intellectual history.

Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5320 (3) 17th Century French Prose

Close readings of major works by, e.g., Descartes, Pascal, La Fayette, La Rochefoucauld, and La Bruyere. Themes include 17th century theories of self, early modern epistemology, notions of honnetete and the critical analysis of human motives and behavior, the emerging novel, and the critique of heroic idealism and of the monarchic absolutism of the Sun King, Louis XIV. Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5330 (3) Moliere and 17th Century French Comedy

Close readings of the comedies in context with the works of, e.g., Corneille, Rotrou, Cyrano, Boileau, and La Fontaine. Themes include Moliere and the institution of literary authorship, comedy's role as social critique, the deconstruction of the early modern subject, and the cultural politics of the scandals surrounding L'ecole des femmes and Tartuffe.

Readings in French, but may be taught in English.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5350 (3) French Enlightenment

Focuses on the uses of literature to address the revolutionary philosophical, scientific, religious, and/or sociopolitical questions of the day. Explores Diderot and d'Alembert's Encyclopedie, Voltaire and Diderot's philosophical tales and dialogues, Rousseau's Discours, and other writings. Discusses the development of specific literary forms to promote the ideas and goals of the philosophers to reach a changing and diverse readership and to fight censorship.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5360 (3) 18th Century French Literature

Focuses on the study of a specific literary genre (e.g., theatre, the novel) or on the global production of a major author (e.g., Voltaire, Diderot, Rousseau). Discussion stresses both the uniqueness of the genre/writer and their significance as representatives of the century's changing society and culture.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5420 (3) 19th Century French Literature

A survey of principal works and movements, intended as an introductory course.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5430 (3) Topics in 19th Century French Prose, Poetry, and Theatre

Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5440 (3) Literary Ludics

Taught in French and English. Focuses on literary structures proposed by author to reader as games. Considers critical texts, both practical and theoretical, with a view toward defining the relation between criticism and its objects.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5445 (3) Literary Theory, Part I

Covers Western literary theory from Plato to Latour as the first part of a two-semester literary theory course investigating the Western tradition from the Greeks on to post-colonial and empire studies. This initial course follows the history of criticism and its philosophical underpinning up to 20th century trends but does not cover cultural and post-colonial studies.

Requisites: Restricted to graduate students only.

FREN 5450 (3) Proust and Modernity

Introduces Proust's masterwork "In Search of Lost Time" in its English translation. The class offers an overview of the work's structure, themes and context. Particular attention is given to Proust's role as a major theoretician of modernity in philosophy, literature and visual arts. Formerly offered as a special topics course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

FREN 5470 (3) 20th Century French Theatre and Poetry

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 5770 (2-3) Methods of Teaching French as a Foreign Language

Familiarizes students with current methodology and techniques in foreign language teaching.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6840 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

FREN 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Repeatable: Repeatable for up to 6.00 total credit hours.

FREN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: French

French - Master of Arts (MA)

The MA program in French offers students the opportunity to pursue their interest in literature and culture, working with faculty members who produce distinguished scholarship in a broad variety of fields. Students are encouraged to take courses in many of those fields and to become acquainted with a diversity of critical and theoretical approaches. The program consists of coursework and a comprehensive examination.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): French - Bachelor of Arts (BA) (p. 303).

Requirements

Admission Requirements

Prerequisites for admission to the French MA studies:

- An undergraduate major in French or its equivalent with a grade average of at least B in all French courses.
- Official GRE scores if the student would like to be considered for a fellowship nomination. GRE scores are not mandatory for admission.
- Good pronunciation in French as evidenced by a recording submitted with the application.
- Students are required to submit a statement of purpose and one paper of their choice done for an undergraduate French course.
- Recommendations from three professors with whom the student has worked.

Course Requirements

Degree requirements are subject to change. Students wishing to pursue graduate work in French should visit the department's MA Guidelines (<http://www.colorado.edu/frenchitalian/graduate/ma-guidelines/>) for the most up-to-date degree requirements.

The following summary of minimum requirements is expressed in terms of courses. Each course represents a graduate seminar carrying two or three credit hours. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate School. Every student should accordingly become thoroughly familiar with the Master's Degree Requirements (p. 1030) section of this catalog.

Master's students are not normally permitted to take independent study courses. However, in exceptional circumstances, and with the approval of the Associate Chair for Graduate Studies, they may register for one and at the very most two such courses.

Code	Title	Credit Hours
------	-------	--------------

Required Courses

French Literature and Culture Courses

At least eight courses (5000-level or above) in French literature and culture. Students must take at least one course in seven of the eight major historical fields of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature, and film. Options include:	24
---	----

FREN 5110	French Special Topics
FREN 5120	French Special Topics
FREN 5170	Francophone African Literature

FREN 5250	Medieval and Renaissance Readings	
FREN 5310	17th Century French Tragedy and Poetry	
FREN 5320	17th Century French Prose	
FREN 5330	Moliere and 17th Century French Comedy	
FREN 5350	French Enlightenment	
FREN 5360	18th Century French Literature	
FREN 5420	19th Century French Literature	
FREN 5430	Topics in 19th Century French Prose, Poetry, and Theatre	
FREN 5440	Literary Ludics	
FREN 5445	Literary Theory, Part I	
FREN 5470	20th Century French Theatre and Poetry	
<i>Related Field Courses</i>		
Up to two courses (4000-level or above) in a related field (e.g., English, Spanish, Classics, Linguistics, Film Studies, History, Fine Arts, Education) to be determined in consultation with the Associate Chair for Graduate Studies.	¹	6
<i>Additional Coursework</i>		
FREN 5770	Methods of Teaching French as a Foreign Language	3
Total Credit Hours		33

¹ Students planning to apply for the doctoral program should remember that PhD candidates are expected to take three courses in a related field at the 5000 level or above. Courses in a related field at the 4000 level will normally not count toward this total.

Language Requirement

All MA candidates must acquire a reading knowledge of a language other than French and English. The language should be related to the student's academic program. The requirement may be fulfilled by taking a translation exam offered by the department in the language in question or by passing coursework either at CU or prior to arrival on campus equivalent to a fourth semester (2120 at CU) college course.

Early in their first semester in the MA program, each student should meet individually with the Associate Chair for Graduate Studies to discuss their overall plan of study, including the ways in which they will satisfy the language requirement.

MA Comprehensive Examination

This examination will be based on a reading list in literature, culture, and theory prepared by the Graduate Faculty. It will be administered by an Examination Committee composed of the Associate Chair for Graduate Studies and two other members of the Graduate Faculty, appointed by the Chair. The examination will consist of three essays of three hours each, based on questions formulated by the Examination Committee, and a one-hour oral examination designed to test the student's overall knowledge of the reading list. Normally the three essays will be written within a six-day period, and the one-hour oral exam will normally follow within two weeks. Two of the three essays must be written in French, but should students decide to exercise the option of writing one in English, they are entirely free to choose which one it shall be. The Comprehensive Examination must be taken during the fourth semester of the MA program.

Two-Year Plan of Study

The MA degree is intended to be completed in two years. The normal pattern of courses would be as follows:

Year One

Fall Semester		Credit Hours
Two seminars		6
FREN 5770	Methods of Teaching French as a Foreign Language	3
Credit Hours		9

Spring Semester

Three seminars		9
Credit Hours		9

Year Two

Fall Semester		Credit Hours
Three seminars		9
Credit Hours		9

Spring Semester

Two seminars		6
Credit Hours		6
Total Credit Hours		33

French - Doctor of Philosophy (PhD)

The Department of French and Italian at CU Boulder enjoys a national reputation and is the only PhD-granting department in the Rocky Mountain region. The department offers comprehensive coverage of all areas of French and Francophone literature, and has an outstanding record of placing its PhD recipients in desirable positions of employment. Our students pursue interests from the Middle Ages to 21st-century and Francophone literatures.

Requirements

Prerequisites

Doctoral candidates should possess excellence in reading, speaking, writing and understanding spoken standard French; general knowledge of French literature and civilization; and knowledge of one language other than English and French.

Program Requirements

The PhD program in French literature consists of coursework, a comprehensive examination, a doctoral dissertation and an oral defense of the doctoral dissertation.

Degree requirements are subject to change. Students should visit the department's PhD Guidelines (<http://www.colorado.edu/frenchitalian/graduate/phd-guidelines/>) webpage for the most up-to-date degree requirements.

Required Courses and Credits

The following summary of minimum requirements is expressed in terms of courses. Additional coursework may be required by the Associate Chair for Graduate Studies.

Students and their administrators are equally responsible for making certain that their graduate curriculum satisfies all graduation requirements, both those of the department and those of the Graduate

School. Every student should accordingly become thoroughly familiar with the Doctoral Degree Requirements (p. 1031) section of this catalog.

Code	Title	Credit Hours
Required Courses		
	At least 12 courses (5000-level and above) in French literature and culture.	36
	Up to three courses (5000-level or above) in a related field (e.g., comparative literature, English, Spanish, classics, linguistics, philosophy, film studies, history, fine arts, education) to be determined in consultation with the Associate Chair for Graduate Studies.	6-9
Total Credit Hours		42-45

Students must also have 30 hours of Dissertation Guidance (Graduate School requirement) with no more than ten hours taken before the completion of the PhD Comprehensive Examination.

PhD students are normally allowed to take two independent studies courses, subject to the approval of the Associate Chair for Graduate Studies. However, they may not take more than two (including any taken at the master's level) except in exceptional circumstances and with the approval of the Associate Chair for Graduate Studies..

Students must also have taken at least one course (5000-level and above) in seven of the eight major periods of French literature: Middle Ages, 16th, 17th, 18th, 19th, 20th centuries, Francophone literature and film. Students continuing from the MA program at CU will normally have fulfilled this requirement as part of their MA degree.

Students entering the PhD program with an MA in French or equivalent from another university can count five of their previous MA courses toward the 15-course requirement; they must take 10 courses during the first two years of candidacy, up to two of which may be in a related field. Such students must take courses covering four of the eight fields of French literature. Previous coursework will be evaluated, and if at least seven of the fields were not covered at the MA level, courses will be required to attain this coverage.

In summary, for students entering from other MA programs, the requirements are: 1) at least four courses within the department to cover four fields, with these at the candidate's discretion except for the requirement to cover gaps from the MA program; 2) up to two courses in related fields; 3) four additional courses within the department at the discretion of the student.

Students entering the PhD program without an MA in French must consult with the Associate Chair for Graduate Studies.

Language Requirement

A sound reading knowledge of one modern language other than English and French is required. Such reading knowledge must be certified by the student passing a reading examination in the language. The examination normally consists of a timed translation of a literary text or a text dealing with literature (e.g., literary criticism). A dictionary is permitted. This language should be relevant to the student's academic program.

Examination/PhD Comprehensive Examination

As students are finishing their required coursework, they should have a good idea of the way their courses and ideas are coalescing around a given general field and a specific problem within that field. Courses taken outside the department, as well as work in the related field, should

fit into this pattern. As this specification of interest toward the area of the dissertation takes place, the student should constitute a Doctoral Committee consisting of five graduate faculty members (one of whom must come from outside the student's department) who will guide the student's work. One of these faculty members will serve as the Director and take responsibility for co-coordinating the work of this ad hoc Doctoral Committee. Once the Doctoral Committee is formed and approved by the Graduate School, the student will begin to prepare for the PhD Comprehensive Examination. Working in consultation with the Director and other members of the Doctoral Committee, the student will formulate a dissertation topic. He or she will prepare a list of primary texts pertaining to that topic, and a further list of secondary materials composed of critical and theoretical texts intended to inform the student's approach to the dissertation topic. Those two lists will be circulated to the Doctoral Committee before the Comprehensive Examination. The examination itself will consist of one substantial essay (the equivalent of a 30-page seminar paper) followed by an oral examination. The essay will focus on the dissertation topic. The student will have two weeks to write the essay. Once that essay is written, the Doctoral Committee will conduct the oral part of the examination as a discussion of material covered in the essay, material on the two reading lists, as well as matters pertaining to the general direction of the dissertation and the approach that the student propose to take therein. Normally the Comprehensive Examination should be taken at the end of the student's second year in the PhD program (for students continuing from CU's MA program) or at the end of the third year in the program (for students entering from other MA programs). In both cases, that allows the student a full year of independent study after the conclusion of course requirements. Upon successful completion of the PhD exams, students normally spend the next two years writing a dissertation.

PhD Dissertation

The PhD dissertation must be based upon original scholarship and demonstrate mature scholarship and critical judgment as well as familiarity with the tools and methods of research. It should make a worthwhile contribution to knowledge in the student's special field. Students are advised to familiarize themselves thoroughly with the various Graduate School rules governing the format and deadlines for the dissertation. The dissertation is normally written in English, and all departures from this norm must be approved by the student's committee.

Oral Defense of the Dissertation

After the dissertation has been accepted, a final oral examination on the dissertation and related topics will be held. The examination will be conducted by a five-member committee, appointed by the dean of the Graduate School, which will consist of representatives of areas in which the student has worked. At least one member of the committee will be from outside the student's field of study. The committee should be approved by the Graduate School at least two weeks prior to the oral defense. More than one negative vote will disqualify the candidate in the oral defense.

Plans of Study

Typical Six-Year Structure for Entering MA Students

The PhD degree is intended to be completed in six years. The MA would normally be awarded after two years in the program. The standard sequence of courses is as follows:

Year One	
Fall Semester	
Two seminars	6
Supervised teaching	
Credit Hours	6
Spring Semester	
Three seminars	9
Credit Hours	9
Year Two	
Fall Semester	
Three seminars	9
Credit Hours	9
Spring Semester	
Two seminars	6
MA comprehensive exam	
Credit Hours	6
Year Three	
Fall Semester	
Three seminars	9
Credit Hours	9
Spring Semester	
Two to three seminars	6-9
Credit Hours	6-9
Year Four	
Fall Semester	
Five hours of dissertation guidance	5
Credit Hours	5
Spring Semester	
Five hours of dissertation guidance	5
PhD comprehensive exam	
Credit Hours	5
Year Five	
Fall Semester	
At least five hours of dissertation guidance	5
Submission of dissertation prospectus	
Credit Hours	5
Spring Semester	
At least five hours of dissertation guidance	5
Credit Hours	5
Year Six	
Fall Semester	
At least five hours of dissertation guidance	5
Credit Hours	5
Spring Semester	
At least five hours of dissertation guidance	5
Submission and oral defense of dissertation	
Credit Hours	5
Total Credit Hours	75-78

Typical Five-Year Structure for Students Who Hold an MA in French from Another Institution

The standard sequence of courses is as follows:

Year One	
Fall Semester	
Two to three seminars	6-9
Credit Hours	6-9
Spring Semester	
Three seminars	9
Credit Hours	9
Year Two	
Fall Semester	
Three seminars	9
Credit Hours	9
Spring Semester	
Two to three seminars	6-9
Credit Hours	6-9
Year Three	
Fall Semester	
Five hours of dissertation guidance	5
Credit Hours	5
Spring Semester	
Five hours of dissertation guidance	5
PhD comprehensive exam	
Credit Hours	5
Year Four	
Fall Semester	
At least five hours of dissertation guidance	5
Submission of dissertation prospectus	
Credit Hours	5
Spring Semester	
At least five hours of dissertation guidance	5
Credit Hours	5
Year Five	
Fall Semester	
At least five hours of dissertation guidance	5
Submission and oral defense of dissertation	
Credit Hours	5
Total Credit Hours	60-66

Geography

The Geography Department offers theoretical and applied work in human geography, environment and society geography, physical geography, and geographic information science. Each subfield covers a broad range of topics. Human geography includes political, cultural, development, feminist, population, and urban geography. Environment and society geography includes political ecology, natural hazards, and conservation practice. Physical geography includes climatology, geomorphology,

hydrology, and biogeography. Geographic information science includes spatial analysis using GIS, remote sensing, and cartography. The Department also offers regionally focused courses on mountain geography and geographies of China, Latin America, Africa, Middle East and South Asia. To complement its curriculum, the Department also offers internship opportunities for geography majors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read carefully the requirements for advanced degrees in the Graduate School section. Additional information should be obtained from the Department of Geography.

The course code for this program is GEOG.

Master's Degree

- Geography - Master of Arts (MA) (p. 1188)

Doctoral Degree

- Geography - Doctor of Philosophy (PhD) (p. 1188)

Certificates

- Development Studies - Graduate Certificate (p. 1189)
- Hydrologic Sciences - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/>)
- Population Studies - Graduate Certificate (p. 1190)

Interdisciplinary Program

- Earth Data Analytics - Foundations - Graduate Certificate (p. 1603)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abdalati, Waleed (https://experts.colorado.edu/display/fisid_145800/)
Professor; PhD, University of Colorado Boulder

Balch, Jennifer Kakareka (https://experts.colorado.edu/display/fisid_154464/)
Associate Professor; PhD, Yale University

Barnard, Holly Rene (https://experts.colorado.edu/display/fisid_147417/)
Associate Professor, Associate Chair; PhD, Oregon State University

Blanken, Peter David (https://experts.colorado.edu/display/fisid_114026/)
Professor; PhD, University of British Columbia (Canada)

Boykoff, Maxwell Thomas (https://experts.colorado.edu/display/fisid_147562/)
Associate Professor Adjunct; PhD, University of California, Santa Cruz

Bruckner, Heide (https://experts.colorado.edu/display/fisid_166056/)
Instructor; PhD, University of Graz

Bryan, Joseph Henry (https://experts.colorado.edu/display/fisid_145802/)
Associate Chair, Associate Professor; PhD, University of California, Berkeley

Buttenfield, Barbara P. (https://experts.colorado.edu/display/fisid_107860/)
Professor Emerita; PhD, University of Washington

Caine, T. Nelson
Professor Emeritus

Cao, Guofeng (https://experts.colorado.edu/display/fisid_167522/)
Assistant Professor; PhD, University of California Santa Barbara

Distinguished Professor Emeritus; PhD, University of California, Berkeley

Williams, Mark W. (https://experts.colorado.edu/display/fisid_105438/)
Professor Emeritus

Yeh, Emily Ting (https://experts.colorado.edu/display/fisid_130119/)
Professor; PhD, University of California, Berkeley

Courses

GEOG 5003 (4) Elements of Geographic Information Systems

Discusses incorporating GIS methods into graduate thesis or dissertation research. Reviews basic mapping concepts (scale and projections), acquiring different types of spatial data (raster and vector), building an error-free database, making simple queries, overlays, charts, and maps. Intended for students who want to learn GIS but lack background skills in computing or cartography.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite some experience with Mac or Windows.

Additional Information: Departmental Category: GIScience

GEOG 5023 (4) Advanced Quantitative Methods for Spatial Data

Reviews fundamental statistical and quantitative modeling techniques and introduces more advanced statistical techniques widely used in geography today. Emphasizes geographic examples and spatial problems teaching hands-on skills in statistical programming. Topics covered include generalized linear models, spatial autocorrelation, spatial regression methods, and working with complex datasets.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4023

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5043 (4) Advanced Geovisualization and Web Mapping

Advanced technical course in web-based cartography and geovisualization stressing the important role digital cartography plays in cyberspace and society. Focuses on principles of effective cartographic design in multimedia and hypertext environments. Labs are organized around hands-on active learning projects demonstrating skills in geovisualization and cartographic practice.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4043

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4093 and GEOL 4093 and GEOL 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methods

GEOG 5100 (1-4) Special Topics: Geography

Covers various topics outside of the normal curriculum; offered intermittently depending on student demand and availability of faculty.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5103 (4) Geographic Information Science: Spatial Analytics

Explores advanced topics in geospatial databases, spatial analytics and geoprocessing in a Geographic Information System (GIS). Emphasizes how geographic concepts are linked to methodological frameworks for recording, transforming, storing/retrieving, analyzing, and processing geographic data as well as various forms of uncertainty. Exercises demonstrate the application of GIS-based methods to real world scenarios in interdisciplinary settings.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4103

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: GIScience

GEOG 5113 (3) Seminar: Geographic Information Systems

Focuses on the current research topics in geographical information systems and selected areas of application. Includes major journal articles related to each topic. Students complete and present a seminar paper.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or instructor consent required.

Additional Information: Departmental Category: GIScience

GEOG 5152 (3) History and Theory of Geography

History of ideas and institutions that have shaped contemporary geographic inquiry. Examines the evolving relations among human geography, physical geography, environment-society relations, and geographic information processing. Designed to situate graduate student research within major subfields and intellectual currents of geography.

Requisites: Restricted to Geography (GEOG) graduate students only.

GEOG 5161 (3) Research Design in Geography

The human section reads and discusses contemporary research philosophies and methodologies in human geography. Practices the development of research proposals and presentation of research ideas and results. The physical section reads and discusses contemporary research philosophies and methodologies in physical geography (climatology, geomorphology, biogeography, and soils geography). Practices the development of research proposals and presentation of research ideas.

Requisites: Restricted to Geography (GEOG) graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5203 (4) Geographic Information Science: Spatial Modeling

Focuses on the use and development of advanced models for human and environmental applications in a geospatial environment integrating raster and vector data models. Covers terrain and hydrologic modeling, geostatistical modeling, dasymmetric modeling, as well as multi-criteria modeling. Group projects critically design, implement and test spatial models to develop independent skillsets in a chosen problem setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4203

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4103 or GEOG 5103 or working knowledge of GIS software or instructor consent required.

Additional Information: Departmental Category: Methods

GEOG 5211 (3) Seminar: Physical Climatology

Involves a research seminar concerned with problems of mass and energy exchange in the Earth-atmosphere system. Selects topics from such areas as air quality, bioclimatology, hydrology, climate change, and the climates of urban, agricultural, and natural environments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5221 (3) Synoptic and Dynamic Climatology

Examines global climates from the standpoint of synoptic and dynamic climatology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5241 (1-3) Topics in Physical Geography

Presents recent research topics that vary from year to year. Consult the online Schedule Planner for specific topics.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5251 (4) Fluvial Geomorphology

Emphasizes landscapes formed by running water. Includes basic fluid mechanics, sediment transport, hillslope and channel erosion, and sediment yield.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4251

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5271 (3) The Arctic Climate System

Understanding the climate of the Arctic requires a synthetic, system oriented approach. The course focuses on the intimate linkages between the atmosphere, ocean and land that give the Arctic region its unique character, link the Arctic to the larger global climate system, and promote understanding the rapid changes occurring in the Arctic.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4271

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5292 (3) Migration, Immigrant Adaptation, and Development

historical and current patterns of migration with an emphasis in international movement. Looks at leading migration theories related to both origin- and destination-based explanations while critically looking at the role of development as a potential cause and consequence of population movement. Finally, covers some aspects of immigrants' social and economic adaptation to their host society.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4292

Requisites: Restricted to graduate students only.

GEOG 5303 (4) Geographic Information Science: Spatial Programming

Focuses on the extension of geographic information systems (GIS) through programming as well as on the development of algorithms for spatial analysis and information extraction in vector and raster data using open source tools. Covers concepts, principles and techniques of programming and solving spatial problems in natural and social science settings. Group projects will foster skillsets in implementing solutions to complex spatial problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4303

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 4203/5203.

Additional Information: Departmental Category: GIScience

GEOG 5321 (3-4) Snow Hydrology

Offers a multidisciplinary and quantitative analysis of physico-chemical processes that operate in seasonally snow-covered areas, from the micro- to global-scale: snow accumulation, metamorphism, ablation, chemical properties, biological aspects, electromagnetic properties, remote sensing, GIS and quantitative methods.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4321

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5331 (3-4) Mountain Climatology

Surveys and analyzes climatic characteristics of mountain environments worldwide.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4331

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5371 (3) Forest Geography: Principles and Dynamics

Surveys principles of forest geography and ecology. Includes both individual tree responses to environmental factors and species interactions within communities. Emphasizes forest dynamics and their relation to management problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4371

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5391 (3) Seminar: Biogeography

Considers in detail current research themes in biogeography. Includes intensive reading of current research literature and preparation of research papers. Topics vary.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5401 (3) Soils Geography

Discusses chemical and physical properties of soils, soil development, distributions and management relevant to understanding plant-soil relationships in natural and human-altered landscapes.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4401

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 5403 (3) Geographic Information Science: Space Time Analytics

Focuses on understanding processes (human, natural, social or physical) through data driven analysis of patterns in spatio-temporal data. Covers a wide range of topics relevant to space time data, including pattern analysis, modeling and visualization as well as time geography and various contemporary issues in space time analytics. Utilizes a hands-on, flipped classroom approach with in-class development of technical skills.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4403

Requisites: Restricted to graduate students only.

GEOG 5463 (3) Earth Analytics Data Science Bootcamp

Learn key skills to automate data processing and visualization workflows that support both repeatable analysis and collaborative project approaches using scientific programming, version control and project management tools. Covers working with heterogeneous, large spatio-temporal data derived from space, airborne and ground based sensors and other sources. Gain applied experience through group projects that address real world problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4463

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5501 (3) Water Resources and Water Management of Western United States

Interprets and analyzes hydroclimatic data, surface and groundwater. Critically evaluates water use, emphasizing problems associated with geographic maldistribution, appropriations, irrigation, industry, pollution and regional development.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4501

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment-Society Geography

GEOG 5503 (3) Geographic Information Science: Project Management

Managing a geospatial project encompasses problem identification, project design, analysis and supporting team dynamics. The class mixes lectures and class exercises with student-selected projects and works through all stages of a project from articulating an initial idea to project planning and scoping, building a work plan, timeline and budget, executing the work plan and evaluating a project's progress.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4503

Requisites: Requires prerequisite course of GEOG 5103 (minimum grade C-).

GEOG 5563 (3) Earth Analytics

Introduce students to major unanswered questions in Earth science and to the analytical tools, including data management, analysis and visualization, necessary to explore 'big data' from a suite of sensors. Aligns with Earth Lab, a new initiative of the University's Grand Challenge (<http://www.colorado.edu/grandchallenges/>) to use our expertise in space-based observation to address our world's most pressing problem. Comparable programming course work may be substituted for GEOG 5463 with instructor approval.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4563

Requisites: Requires prerequisite course of GEOG 5463 (min grade B-) Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5603 (3) GIS in the Social and Natural Sciences

Introduces Geographic Information Systems and their underlying principles through interactive lectures and lab exercises. Students get basic skills for working in a GIS environment and learn how to handle and manage geospatial data, create maps and conduct geospatial analysis focusing on project tasks typically encountered in the social and natural sciences.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4603

GEOG 5622 (3) City Life

Analyzes social, behavioral, political and demographic factors that influence development and maintenance of communities in contemporary urban environments, with primary emphasis on U.S. cities.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4622

Requisites: Restricted to graduate students only.

GEOG 5632 (3) Development Geography

Provides an overview of development policy and practice, surveying foundational works in Development Studies as well as critical interventions. Required for Graduate Certificate in Development Studies.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4632

Requisites: Restricted to graduate students only.

GEOG 5642 (3) Seminar: Urban Geography

Surveys current research topics in urban geography. Emphasizes definition of possible student thesis topics.

Requisites: Restricted to graduate students only.

GEOG 5652 (3) Introduction to Social Theory

Surveys theoretical paradigms in the social sciences. Includes canonical works from the history of the social sciences as well as contemporary theorists. Appropriate for beginning to advanced graduate students doing qualitative research.

Requisites: Restricted to graduate students only.

GEOG 5662 (3) Seminar: Topics in Economic Geography

Covers selected topics emphasizing faculty specialties. Topics vary with instructor. Check with department for semester offerings.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 5663 (1-3) Earth Analytics Applications

Develop expertise in finding, organizing, managing and processing large, heterogeneous, spatio-temporal data to address a real-world problem. Students will work collaboratively on semi-guided science project.

Students gain critical skills required to understand data structures, utilize APIs, extract insight from data and understand how uncertainty propagates. Culminates with a formal presentation of project results.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires prerequisite course of GEOG 5463 and GEOG 5563 (min grade B-) Restricted to graduate students only.

Grading Basis: Letter Grade

GEOG 5712 (3) Political Geography

Systematic study of relations between geography and politics, especially as background for better understanding of international affairs. Includes topics such as frontiers and boundaries, power analysis, geopolitics, international political economy, and strategic concepts.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4712

Requisites: Restricted to graduate students only.

GEOG 5722 (3) Field Methods in Human Geography

Examines research methods associated with field work in human geography. Prepares students for fieldwork by focusing on geographic and interdisciplinary field work techniques; interpretation of field data; discussion of the politics, ethics and gender, race, class and cross-cultural issues related to field work.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4722

Requisites: Restricted to graduate students only.

GEOG 5732 (3) Population Geography

Emphasizes spatial aspects of population characteristics including fertility, mortality, migration, distribution and composition. Includes both theoretical and empirical considerations, in addition to field work and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4732

Requisites: Restricted to graduate students only.

GEOG 5750 (3) Climate Politics and Science-Policy

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, ENVS 5750 and SOCY 5750

Grading Basis: Letter Grade

GEOG 5782 (3) Sustainable Development: Critique

Investigates historical and contemporary theories and critiques of development and their implications for geographic theory and method. Focuses on the role of representation in evaluating case studies and examining the potential for a sustainable development.

Requisites: Restricted to graduate students only.

GEOG 5832 (3) Geography of Tibet

Rigorously examines contemporary Tibetan society, culture and nature from a geographical perspective. Uses readings on contemporary Tibet as an entry point into scholarly research about nationalism, representation, diaspora, landscape and place, sustainable development, natural resource management, identity and environmentalism.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4832

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

GEOG 5840 (1-3) Graduate Independent Study

Offers independent research for master's students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5842 (3) Global Frontiers in Southeast Asia

Uses the theme of the global frontier to examine and compare three key moments in the modern history of Southeast Asia: the colonial encounter, the rise of the modern territorial state, and the age of contemporary globalization. Examines case studies from earlier eras to analyze emerging global frontiers at the junction of state territoriality and transnational economic expansion.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4842 and ASIA 4842

Requisites: Restricted to graduate students only.

GEOG 5852 (3) Health and Medical Geography

Examines geographical patterns of health and disease with an emphasis on global health issues. Focuses on three major approaches to medical geographic research: ecological approaches, which systematically analyze relationships between people and their environments; social approaches, including political economy and socio-behavioral approaches; and spatial approaches, which employ maps and spatial analysis to identify patterns of health and disease. Elective course for Public Health Certificate.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 4852

Requisites: Restricted to graduate students only.

GEOG 5930 (3) Advanced Internship

Provides an academically supervised opportunity for graduate-level geography majors to work in public and private organizations on advanced projects related to geographic theory and their career goals. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 5961 (3) Theories of Climate and Climate Variability

Critically reviews current theories of climatic variability based on analysis of the different physical processes affecting climate.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6180 (1-3) Seminar: Geographic Problems

Applies research methods to selected problems. Topics vary with instructor.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6211 (1-3) Readings in Climatology

Discusses selected topics in current climatological literature. Specific themes vary.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Physical Geography

GEOG 6402 (3) Seminar: Political Ecology

Critically examines the politics of human-environment relationships across cultures and societies. Focuses on environmental degradation, change and management from the perspectives including political economy, cultural politics, STS and post structural theory.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6712 (3) Seminar: Political Geography

Considers in detail history and methodology of the field, including an analysis of selected systematic topics such as frontiers and boundaries, international rivers, conflicting claims to territory, and electoral geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6732 (3) Formal Population Geography: Analysis and Forecasting

In-depth introduction to formal demography. In addition to learning the basic demographic tools used nowadays in fertility, marriage, mortality, migration and forecasting/projections, it also looks at some potential links between formal and statistical demographic work that would enable the student to apply some of the methods learnt in an econometric or multivariate setting.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite GEOG 5023.

GEOG 6742 (3) Seminar: Cultural Geography

Explores various geographic topics emphasizing the concept of culture. Emergence of several points of view in the development of cultural geography.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

GEOG 6950 (1-6) Master's Thesis

Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

GEOG 7118 (3) Foundations of Environmental Justice

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it.

Equivalent - Duplicate Degree Credit Not Granted: COMM 7118, ENVS 7118 and PSCI 7118

Requisites: Restricted to graduate students only.

GEOG 7840 (1-3) Graduate Independent Study

Offers independent research for doctoral students only. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

GEOG 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section. Instructor consent required.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Geography - Master of Arts (MA)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Master's Degree Requirements (p. 1030) section carefully.

Requirements

Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

General Requirements

The minimum requirements for an MA in geography may be fulfilled by completing 30 credit hours of graduate work (5000 level or above), including 4 to 6 credit hours of thesis work. Master's students may, with the written approval of their advisor, use a maximum of 6 hours of 3000- or 4000-level coursework to reach the required 30 hours.

Students are encouraged to have some background in college math and computer skills. Students are also required to have proficiency in basic statistics. This requirement may be met by having taken an undergraduate course in statistics.

Code	Title	Credit Hours
Required Courses		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3

GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	
GEOG 6950	Master's Thesis	4-6
Electives		
Select at least 14 additional hours of coursework at the 5000 level or above to meet the 30-credit minimum.		16-14
Total Credit Hours		30

Geography - Doctor of Philosophy (PhD)

The basic purpose of the graduate program in the Department of Geography is to train scholars and professionals to produce and disseminate knowledge and to make outstanding contributions in the public and private sectors.

Students wishing to pursue graduate work in geography leading to candidacy for advanced degrees should read the Doctoral Degree Requirements (p. 1031) section carefully.

Requirements

Prerequisites

For admission without deficiency and to meet the department mandatory requirements for a knowledge of basic geography, all entering graduate students are required to possess the knowledge presented in freshman-level introductory courses in physical and human geography.

Students may acquire this knowledge in any way they choose: by formally taking the introductory courses, by auditing the courses, by reading the textbooks themselves or by other means. This knowledge will enable the student to perform at the level expected in the PhD program's required core classes.

General Requirements

The PhD degree is not conferred merely upon the satisfactory completion of a course of study. The candidate must also demonstrate proficiency in some broad subject of learning, and be able to critically evaluate work in the field, show the ability to work independently in the chosen field and make an original contribution of significance to the advancement of knowledge.

The minimum requirements are 30 credit hours of coursework numbered 5000 or above and 30 credit hours of dissertation. Ordinarily the number of coursework hours and dissertation hours will be greater than 30 each. At least 20 of these hours must be taken at the University of Colorado; up to 10 credit hours from another institution may be transferred upon approval.

A 3.00 (B) average or higher must be maintained in all coursework.

Six semesters of residence are required, of which four must be at the University of Colorado. With department approval, students with a University of Colorado master's degree in geography may apply all credit hours from 5000-level courses or above (except thesis credits) to the PhD requirements.

Language Requirement

The department's minimum language requirement is a demonstration of proficiency in one foreign language. Ways in which this requirement

may be satisfied are determined by the student's Advisory Committee and may include timed translation, publication in the language and/or coursework. If more than the minimum proficiency is needed for library and/or field research, the choice and number of languages, as well as the required level of skill and methods of testing these skills, are determined and approved by the student's Advisory Committee. The language requirement must be satisfied before the comprehensive exam is taken.

Preliminary Exam

The Graduate School requires that all students in the doctoral program successfully pass a preliminary exam. In geography, this requirement is met by obtaining a grade of B or better in each of the three required courses:

Code	Title	Credit Hours
Required Courses		
GEOG 5152	History and Theory of Geography	3
GEOG 5161	Research Design in Geography	3
GEOG 5023	Advanced Quantitative Methods for Spatial Data	4
or GEOG 5722	Field Methods in Human Geography	

Following completion of the preliminary exam requirement, students undertake preparation for comprehensive exams.

Comprehensive Exams

Following successful completion of the preliminary exam, doctoral students must pass a comprehensive exam for advancement to candidacy for the doctoral degree. The comprehensive exam consists of two parts, including an exam on three subfields of geography with written and oral components, and completion of a written dissertation proposal and oral defense. Working together, the student and an Advisory Committee of three to five faculty set the subfield topics. The student creates a reading list for each subfield, and usually spends a semester reading and preparing for the subfields exam. The Advisory Committee sets the subfields exam questions and evaluates the written and oral responses, as well as the proposal defense. Upon successful completion of the comprehensive exam, a student can turn full attention to dissertation research and writing.

Dissertation

In addition to the minimum of 30 hours of coursework required for the doctorate, a student must register for a total of at least 30 hours of dissertation credit, with a maximum of 10 hours in any one semester. Coursework and work on the dissertation may proceed concurrently throughout the PhD program, but at no time shall a doctoral student register for more than 15 hours of 5000-level courses and above.

Following successful completion of comprehensives and admission to candidacy, students must register continuously. Students admitted to candidacy for degree will register for and be charged for a minimum of five dissertation hours each semester. Students may also register for classes in addition to the five dissertation hours.

After admission to candidacy, those not making use of campus facilities may register for three dissertation hours (part-time status). Continuous registration during the academic year will be required until completion of the dissertation defense. It is expected that the student and advisor will

consult each semester as to the number of hours for which the student will register, consistent with the classifications described above.

Development Studies - Graduate Certificate

The Department of Geography offers a graduate certificate in development studies. Development studies is a well-established, interdisciplinary field of research with institutional centers at a number of major universities and several scholarly journals dedicated to its study. The certificate provides training in development studies to graduate students through a structured yet flexible program built around courses taught by CU faculty in a number of social science departments.

Because development issues such as agrarian change, labor migration, new social movements, industrial growth, urban planning and natural resource use cut across disciplinary divides, the study of development demands interdisciplinary approaches.

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

Requirements

Admission Requirements

Currently enrolled graduate students at CU and nondegree ACCESS students with bachelor's degrees may pursue the development studies certificate by completing the four required courses with a grade of B or higher.

For more information, please contact the certificate director, Jennifer Fluri (Jennifer.Fluri@colorado.edu) or visit the department website (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>).

Required Courses and Credits

The certificate requires the completion of 12 credits (four courses), at least two but not more than three of which should be taken in the Department of Geography.

Code	Title	Credit Hours
Core Requirement		
All students must take the core Geography class in development:		
GEOG 5632	Development Geography	3
Geography Seminar Requirement		
All students must take one additional Geography seminar from among the following:		
GEOG 5662	Seminar: Topics in Economic Geography	
GEOG 6402	Seminar: Political Ecology	
GEOG 5732	Population Geography	
GEOG 5292	Migration, Immigrant Adaptation, and Development	
Additional Seminar Requirements		6
In addition, students should complete 2 additional seminars from the following list, at least one of which should be outside of Geography:		
GEOG 5662	Seminar: Topics in Economic Geography	

GEOG 6402	Seminar: Political Ecology
GEOG 5732	Population Geography
GEOG 5292	Migration, Immigrant Adaptation, and Development
GEOG 5100	Special Topics: Geography (with approval from the certificate program director)
HIST 6019	Readings in World History
HIST 5628	Modern China: Collapse of Imperial Brilliance, 1644-1949
HIST 5129	Colloquium in Modern Asian History
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology ¹
ANTH 7600	Human Ecology: Cultural Aspects
ANTH 5020	Explorations in Anthropology (Conservation and Indigenous Peoples)
ANTH 5500	Cross-Cultural Aspects of Socioeconomic Development
MDST 6211	Communication and International Development
SOCY 6016	Topics in Sex and Gender (Gender in Globalization)
SOCY 6007	Foundations of Environmental Sociology
SOCY 6017	Inequality, Democracy, and the Environment
SOCY 7017	Population and Environment
SOCY 6012	Population Issues, Problems, and Policies
ENVS 6305	Reducing the Environmental Impact of Food Systems: Evidence-Based Solutions
ENVS 6304	Introduction to Food Systems Internationally
PSCI 7132	Comparative Political Economy
PSCI 7073	Seminar: Global Political Economy
PSCI 7032	Seminar: Latin American Politics
PSCI 7022	Seminar in Political and Economic Development
PSCI 7206	Public Policy and the Governance of Natural Resources
WGST 6090	Feminist Theories
WGST 6190	Feminist Methodology
WGST 6290	Special Topics in Gender and Sexuality Studies (only certain topics apply) ²

Total Credit Hours**12**

¹ One of the following sections: Section 2 Human Ecology; Section 3 Space, Place and Capitalism; Section 5 National and Cultural Citizenship; Section 9 Ethnographies of Globalization or Ethnographies of Latin America; Section 12 Modernity; Section 13 Anthropology of Neoliberalism

² One of the following sections: Gender – Global Perspective; Global Gender Issues; Gender and Global Human Rights

Plan(s) of Study

For more information, visit the department's Graduate Certificate in Development Studies (<https://www.colorado.edu/geography/graduate-certificate-development-studies/>) webpage.

Population Studies - Graduate Certificate

Offered through the Population Program of the Institute of Behavioral Science (IBS), the graduate certificate in population studies recognizes master's and doctoral degree students for interdisciplinary work in issues related to population dynamics and its components, composition, distribution and change. The population program, which is international in scope and has an applied and policy-oriented focus, fosters research on population trends and patterns and provides training in population analysis. Students who are earning graduate degrees through the departments of geography, sociology or economics and are interested in majoring in population studies are eligible to petition for admission to the program.

Questions about the certificate program in population studies should be directed to cupc@colorado.edu

Requirements

Admission Requirements

All graduate degrees are awarded through departments and, therefore, graduate students wishing to pursue the Graduate Certificate in Population Studies must be first admitted into a departmental program. As certificates are only conferred with a degree, students must also make sure they satisfy all departmental degree requirements. For more information, please consult departmental staff.

Course Requirements

In addition, the graduate certificate in population studies requires 9-12 credits, dependent upon status as MA, MS or PhD student. The required courses include:

- Two required core courses that focus on population studies theory, methods and issues.
- *For MA or MS students:* an additional two courses with substantial population studies content (list below). One course must be outside the student's home discipline.
- *For PhD students:* an additional three courses with substantial population studies content (list below). Two courses must be outside the student's home discipline.

Code	Title	Credit Hours
Required Courses		
SOCY 6012	Population Issues, Problems, and Policies	3
GEOG 6732	Formal Population Geography: Analysis and Forecasting	3
Other Potential Courses ¹		6-9
ECON 8686	Labor Economics 2	
ECON 8784	Economic Development 2	
ECON 8764	History of Economic Development	

GEOG 5292	Migration, Immigrant Adaptation, and Development
GEOG 5622	City Life
GEOG 5642	Seminar: Urban Geography
GEOG 5662	Seminar: Topics in Economic Geography
GEOG 5852	Health and Medical Geography
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology
PSCI 7021	Latinos and U.S. Politics
PSCI 7022	Seminar in Political and Economic Development
PSCI 7062	The Politics of Ethnicity
PSCI 7181	Immigration Law and Immigrants' Rights
PSCI 7203	Political Economy of International Migration and Policy
SOCY 7002	Social Disparities in Health
SOCY 7006	Sociology of Sex and Gender
SOCY 7012	The Social Demography of Race
SOCY 7014	Gender, Race, Class, and Crime
SOCY 7017	Population and Environment

¹ For courses not included in this list, please check with the Director of the certificate program to assure sufficient demographic content.

Extracurricular Requirements

In addition to coursework, the graduate certificate on population studies requires participation in extracurricular offerings relevant to population studies. For MA or MS students, 10 hours of participation in extracurricular activities are required. For PhD students, 15 hours of participation in extracurricular activities are required. Such offerings can include:

- Attendance at the bi-weekly Population & Health workshop in IBS.
- Attendance at CUPC research presentations in IBS, typically one-hour sessions; check IBS website for schedule.
- Participation in methodological short courses and workshops, typically ranging from 4–40 hours.
- ICPSR offers summer workshops in Boulder each year; check their schedule.
- IBS Center for Research and Computing Services offers these on occasion; check IBS events.
- Annual conference on "Integrating Genetics and Social Sciences" (IGSS) typically held in the Fall; check IBS events or contact Jason.Boardman@colorado.edu.
- Annual Migration-Climate-Health workshops typically held in May; check IBS events or contact Lori.Hunter@colorado.edu.
- IBS' graduate student Professionalization Seminars ("ProSem"); check IBS events or contact Stefanie.Mollborn@colorado.edu.
- CARTSS dissertation writing workshop; check IBS events or contact Carew.Boulding@colorado.edu.
- Many institutions outside of CU offer workshops as well. For example, check websites for Stanford, Berkeley.

Students should alert the Certificate Director (Lori.Hunter@colorado.edu) of their intention to participate in such events for certificate credit. For more information, see the center's Graduate Certificate Program

in Population Studies (<https://behavioralscience.colorado.edu/unit/population/graduate-certificate-in-population-studies/>) webpage.

Plan(s) of Study

For more information, see the center's Graduate Certificate Program in Population Studies (https://www.colorado.edu/ibs/cupc/grad_cert.html) webpage.

Geological Sciences

With one of the most successful graduate programs in the nation, the Department of Geological Sciences has enjoyed a reputation of excellence for more than 100 years. Our doctoral program is ranked among the top 10 percent of U.S. geology programs by the National Research Council, and CU Boulder is ranked as one of the top two universities in the world for geosciences by *U.S. News and World Report*.

Graduate students have an opportunity to work with over 35 tenured and tenure-track faculty who support a wide range of interdisciplinary research programs in such areas as: cosmochemistry and planetary geology; Earth science education; economic and energy resources; geobiology and astrobiology; geochemistry; geochronology and thermochronology; geodynamics, geophysics, and remote sensing; geomorphology and cryosphere; global change; hydrology; natural hazards; paleoclimate and paleoceanography; paleontology and paleobiology; petrology and mineralogy; sedimentology and stratigraphy; and structure and tectonics.

The graduate degrees offered include Master of Science (MS) and Doctor of Philosophy (PhD).

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the Geological Sciences (<http://www.cugeology.org/>) website.

Professional Licensure

The State of Colorado does not require individuals working in Geology or the Geological Sciences to obtain Professional Geology Licensure, however many states require professional geologists to pass the ASBOG Fundamentals of Geology (FG) and/or Practice of Geology (PG) examinations. Information regarding ASBOG examination specifications can be found on the ASBOG (<https://www.asbog.org/>) website.

Students planning to seek professional licensure or certification for employment in a state other than Colorado, are strongly recommended to contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how the education received at CU Boulder may assist the student in their efforts to gain licensure in that state.

Course code for this program is GEOL.

Master's Degree

- Geology - Master of Science (MS) (p. 1199)

Doctoral Degrees

- Geology - Doctor of Philosophy (PhD) (p. 1200)
- Geophysics - Doctor of Philosophy (PhD) (p. 1200)

Certificates

- Geophysics - Graduate Certificate (p. 1201)
- Hydrologic Sciences - Graduate Certificate (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/geological-sciences/hydrologic-sciences-graduate-certificate/>)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Abbott, Lon D. (https://experts.colorado.edu/display/fisid_145044/)
Senior Instructor; PhD, University of California, Santa Cruz

Anderson, Robert S. (https://experts.colorado.edu/display/fisid_130117/)
Chair, Distinguished Professor; PhD, University of Washington

Anderson, Suzanne Prestrud (https://experts.colorado.edu/display/fisid_131099/)
Professor; PhD, University of California, Berkeley

Arthurs, Leilani A. (https://experts.colorado.edu/display/fisid_145087/)
Assistant Professor; PhD, University of Notre Dame

Budd, David A. (https://experts.colorado.edu/display/fisid_101963/)
Professor; PhD, University of Texas at Austin

Chin, Karen (https://experts.colorado.edu/display/fisid_122666/)
Professor; PhD, University of California, Santa Barbara

Clark, Alisha (https://experts.colorado.edu/display/fisid_164457/)
Assistant Professor

Crow, Carolyn Alicia (https://experts.colorado.edu/display/fisid_163334/)
Assistant Professor; PhD, University of California-Los Angeles

Eberle, Jaelyn J. (https://experts.colorado.edu/display/fisid_126544/)
Professor; PhD, University of Wyoming

Farmer, G. Lang (https://experts.colorado.edu/display/fisid_100498/)
Professor; PhD, University of California, Los Angeles

Flowers, Rebecca M. (https://experts.colorado.edu/display/fisid_144054/)
Professor; PhD, Massachusetts Institute of Technology

Ge, Shemin (https://experts.colorado.edu/display/fisid_101387/)
Professor, Chair; PhD, Johns Hopkins University

Hynek, Brian Michael (https://experts.colorado.edu/display/fisid_130622/)
Professor; PhD, Washington University

Jakosky, Bruce M. (https://experts.colorado.edu/display/fisid_105845/)
Professor; PhD, California Institute of Technology

Jones, Craig H. (https://experts.colorado.edu/display/fisid_105590/)
Professor; PhD, Massachusetts Institute of Technology

Kopf, Sebastian H. (https://experts.colorado.edu/display/fisid_155295/)
Assistant Professor; PhD, California Institute of Technology

Mahan, Kevin H. (https://experts.colorado.edu/display/fisid_143975/)
Associate Professor; PhD, University of Massachusetts at Amherst

Marchitto, Thomas (https://experts.colorado.edu/display/fisid_128241/)
Professor, Associate Chair; PhD, Massachusetts Institute of Technology

Markle, Bradley R. (https://experts.colorado.edu/individual/fisid_167413/)
Assistant Professor; PhD, The University of Washington

Miller, Gifford Hubbs (https://experts.colorado.edu/display/fisid_102374/)
Professor; PhD, University of Colorado Boulder

Mojzsis, Stephen J. (https://experts.colorado.edu/display/fisid_118484/)
Professor; PhD, University of California, San Diego

Molnar, Peter Hale (https://experts.colorado.edu/display/fisid_114528/)
Distinguished Professor; PhD, Columbia University

Mueller, Karl Jules (https://experts.colorado.edu/display/fisid_107629/)
Professor; PhD, University of Wyoming

Overeem, Irina (https://experts.colorado.edu/display/fisid_125258/)
Associate Professor; PhD, Delft University of Technology (Netherlands)

Schulte-Pelkum, Vera (https://experts.colorado.edu/display/fisid_126623/)
Associate Research Professor, Lecturer; PhD, University of California-San Diego

Sepulveda Arellano, Julio Cesar (https://experts.colorado.edu/display/fisid_154923/)
Assistant Professor; PhD, University of Bremen (Germany)

Sheehan, Anne (https://experts.colorado.edu/display/fisid_103645/)
Professor; PhD, Massachusetts Institute of Technology

Simpson, Carl (https://experts.colorado.edu/display/fisid_159652/)
Assistant Professor; PhD, University of Chicago

Smyth, Joseph R.
Professor; PhD, University of Chicago

Snell, Kathryn Elaine (https://experts.colorado.edu/display/fisid_155298/)
Assistant Professor; PhD, University of California, Santa Cruz

Stempien, Jennifer (https://experts.colorado.edu/individual/fisid_143751/)
Instructor; PhD, Virginia Polytechnic Institute and State University

Stern, Charles R. (https://experts.colorado.edu/display/fisid_100941/)
Professor; PhD, University of Chicago

Templeton, Alexis S. (https://experts.colorado.edu/display/fisid_141202/)
Professor; PhD, Stanford University

Tiampo, Kristy F. (https://experts.colorado.edu/display/fisid_155908/)
Professor; PhD, University of Colorado Boulder

Tilton, Eric Small (https://experts.colorado.edu/display/fisid_126548/)
Professor, Associate Chair; PhD, University of California, Santa Cruz

Trower, Lizzy (https://experts.colorado.edu/display/fisid_159463/)
Assistant Professor; PhD, Stanford University

Tucker, Gregory E. (https://experts.colorado.edu/display/fisid_130605/)
Professor; PhD, Pennsylvania State University

Weimer, Paul (https://experts.colorado.edu/display/fisid_104630/)
Professor, Endowed Chair; PhD, University of Texas at Austin

White, James (https://experts.colorado.edu/display/fisid_102726/)
Professor; PhD, Columbia University

Willis, Michael John (https://experts.colorado.edu/display/fisid_158345/)
Assistant Professor; PhD, The Ohio State University

Wing, Boswell A. (https://experts.colorado.edu/display/fisid_158302/)
Associate Professor; PhD, Johns Hopkins University

Courses

GEOL 5001 (3) Physics and Chemistry of the Solid Earth

Reviews the physical and chemical characteristics of the solid earth, from the core to the crust, and the processes that govern behavior through the earth. Lectures are supplemented with readings from the recent literature. Topics include convection, phase transitions, melt generation, forces of plate tectonics, origin of continents and lithosphere, continental tectonics, and earthquakes.

Requisites: Restricted to graduate students only.

Recommended: Requisite a course in basic chemistry and a course in physics.

Additional Information: Departmental Category: Graduate Course

GEOL 5002 (3) Physics, Chemistry, and Biology of Sedimentary Systems

Reading and discussion of current issues and themes in the stratigraphic sciences, including stratigraphic and facies analysis, spatial heterogeneity and self-organization, numerical modeling; origin, evolution, mass extinctions, and megatrajectories of life; and paleoceanographic and paleoclimatic signals in sedimentary rocks. Goal is to diversify students' understanding of the role of physics, chemistry, and biology in attacking research problems in sedimentary systems.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5003 (2) Graduate Writing Seminar

Aims at improving graduate student writing, editing, and reviewing skills, while meeting student writing goals. Includes discussion of materials about effective writing, and peer-editing of text that students are producing for their graduate research endeavors.

GEOL 5021 (4) Petrology: Evolution of Crustal and Mantle Rocks

Origin, physical, and chemical properties of igneous and metamorphic rocks. This course develops a thermodynamic framework for the interpretation of geologic processes from observed mineral assemblages and rock textures. Laboratory component emphasizes the study of rocks in thin section and hand samples to understand earth processes in the mantle and crust. Requires prerequisite courses of CHEM 1113 and CHEM 1114 and GEOL 2005 and (MATH 1300 or APPM 1350) (all minimum grade C-) or equivalents during undergraduate degree.

Requisites: Restricted to graduate students only.

GEOL 5042 (3) Computational Tools in Geosciences

Scientific research and teaching in geological sciences and related disciplines relies increasingly on computational tools. This class aims to introduce graduate students in the geological, geophysical and biogeochemical sciences to a wide range of commonly used concepts and open source data tools to empower them to find the right tool for their computational needs in research and teaching. Previously offered as a special topics course.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite Prior experience with at least one programming language is recommended.

GEOL 5060 (4) Oceanography

Examines the ocean as a system influencing the Earth's surficial processes and climate. Composition and properties of seawater, ocean circulation, waves, tides, coastal-, shallow-, and deep-water processes, biogeochemical cycles, deep sea sediments. Laboratory emphasizes the use of oceanographic data.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4060

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5080 (1-3) Advanced Hydrogeology and Modeling Concepts

Introduces advanced groundwater flow and modeling concepts, equations for steady state and transient flow, saturated and unsaturated flow, finite difference method, application of modeling in geologic processes, radial flow and aquifer parameters, infiltration and groundwater recharge, model calibration, verification and prediction. Department enforced prerequisite: MATH 2300 or Fortran.

Additional Information: Departmental Category: Graduate Course

GEOL 5093 (4) Remote Sensing of the Environment

Covers acquisition and interpretation of environmental data by remote sensing. Discusses theory and sensors as well as manual and computerized interpretation methods. Stresses infrared and microwave portions of the spectrum.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4093 and GEOG 4093 and GEOG 5093

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5101 (1) Introduction to Geological Sciences Faculty I

Welcomes and introduces all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. Tutorials from staff introduce how the university works, what funding opportunities exist, and how and when to apply for such funding.

Grading Basis: Letter Grade

GEOL 5102 (1) Introduction to Geological Sciences Faculty II

Continues to introduce all new graduate students to the Department of Geological Sciences. Faculty discuss their research and their academic trajectories. The week's geology colloquium is discussed. In addition, students craft reports on their intended research.

Grading Basis: Letter Grade

GEOL 5110 (3) Geomechanics

Introduces fundamental physical processes important to the transport of heat and mass in the Earth and on Earth's surface. Provides practice with quantitative treatment of geological problems. Solutions for each problem are derived from first principles, including conservation and flux laws. Emphasizes heat conduction and viscous fluid flow. Department enforced prerequisite: restricted to graduate students only and a course in calculus.

Additional Information: Departmental Category: Graduate Course

GEOL 5111 (3) Rheology: Fracture and Flow of Rocks

Focuses on the elastic and plastic deformation of planetary materials (e.g. rocks and minerals, melts, tectonic plates, etc.). Topics include stress and strain, failure criterion, fracture propagation, creep (dislocation and diffusion), and deformation of multiphase materials. Prior coursework in basic chemistry, physics, mineralogy/petrology, and structure/geology is recommended.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOL 5120 (3) Advanced Structural Geology and Tectonics

Provides valuable exposure to theory and applications related to deformation (rheology) of solid Earth materials as well as the structural and geophysical characteristics of the world's major orogenic belts.

The processes that will be covered span a wide range of Earth's depths, from compaction in sedimentary rocks and flow of ice/salt near Earth's surface to cataclastic mechanisms in fault rocks to plastic flow of deep crust and mantle rock. The course will involve lectures, some in-class and take home problem sets, some local field exercises and field data analysis, classic and modern paper discussions, and a research term project (written and oral presentation).

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4120

Recommended: Prerequisite GEOL 3120.

Grading Basis: Letter Grade

GEOL 5123 (3) Teaching and Learning in Post-Secondary Science Education

Introduces the science of learning and research-based instructional strategies. Open to students in any STEM discipline considering a career that involves college-level teaching. Students apply research on learning and teaching to the development of instructional materials for a target course they envision teaching at the college level in the future.

Recommended: Prerequisite at least one semester teaching/TAing undergraduate courses (waived with instructor approval).

GEOL 5125 (3) Communicating Earth Science with the Public

Introduces research on science communication and discusses examples drawn from geoscience. Students apply research on science communication to conceptualizing how to communicate about their specific geoscience research to the public in different contexts. Students should be familiar enough with their area of graduate research in geoscience to apply different models of science communication to it.

Requisites: Restricted to graduate students only.

GEOL 5150 (2) Planetary Field Geology

Provides an overview of the geology, age and origins of the solid (rocky) planets, dwarf planets and moons of our solar system and the processes that form them from comparative studies from comparative geology. Includes modules on volcanism, rifting, aeolian processes, fluvial erosion, impacts, climate change and paleontology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4150

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5185 (3) Geomicrobiology

Examines how microbial and chemical processes interact on the Earth's surface today and have shaped the planet throughout its history.

Emphasis will be placed on how the life styles and chemical ingenuity of microorganisms drive key biogeochemical processes including weathering and transformations of carbon, oxygen, sulfur, iron and nitrogen. Towards this goal, major geologic and evolutionary events will be examined through the lens of microbial diversity, metabolic energetics, microbe-mineral interactions, and molecular biomarkers.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4185, ENVS 4185, and MCDB 4185

Grading Basis: Letter Grade

GEOL 5215 (2) Geochronology and Thermochronology

Constraining the timing of events and rates of processes is fundamental to earth science research. The field of geochronology and thermochronology is rapidly evolving. Cutting-edge aspects of geochronologic methods and emerging techniques will be especially emphasized. Lectures will emphasize the principles and assumptions of each technique. Seminar discussions will focus on recent papers that demonstrate state-of-the-art applications to diverse problems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4215

Additional Information: Departmental Category: Graduate Course

GEOL 5216 (1) Geochronology Reading and Discussion Seminar

The goals of this reading and discussion seminar are to: 1) learn key aspects of a selected geochronology topic, 2) read, critically evaluate, and discuss peer-reviewed scientific papers that include geochronology data, methods, and interpretations, and 3) set up a framework and appropriate environment in which participants will discuss the next steps to address the big problems associated with each theme. This course will focus on a different geochronology theme each time that it is offered. A theme will be selected based on conversations among interested participants. At the beginning of the semester, weekly discussion topics and associated papers will be chosen to systematically work through concepts associated with that theme. Previously offered as a special topics course.

Repeatable: Repeatable for up to 5.00 total credit hours.

GEOL 5253 (3) Stable Isotope Fractionation in Biogeochemical Processes

Investigates the origins of stable isotope fractionation in geochemical systems with special emphasis on the role of biological catalysts as key drivers of isotopic effects during biogeochemical transformations. The class will cover a wide range of topics relevant to isotope fractionation including partition functions, diffusional, enzymatic and equilibrium isotope effects, open and closed system behavior, Rayleigh distillation, reservoir effects, enzymatic catalysis, physiological drivers and signal preservation.

Recommended: Prerequisites MATH 1300 or APPM 1350.

GEOL 5270 (3) Marine Chemistry and Geochemistry

Examines the chemical, biological, geological and physical processes affecting (and affected by) the chemistry of the oceans. Topics include: chemical separation in seawater; the marine carbon cycle and its long-term control on atmospheric CO₂; the large-scale interdependence of nutrient distributions and biological productivity, chemical tracers of ocean circulation; the chemistry of marine sediments, including early diagenesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4270

Recommended: Prerequisites introductory chemistry, introductory geology, introductory oceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5280 (3) Aqueous and Environmental Geochemistry

Explores the fundamentals of low-temperature geochemistry to investigate element speciation and chemical behavior in waters, soils and sediments. Topics include water-rock interaction and weathering, mineral dissolution and precipitation reactions, aqueous complexation, mineral surface chemistry, kinetics, element cycles, and redox biogeochemistry. Includes exposure to spectroscopic tools, computer simulations and microbial geochemistry. Department enforced prerequisite: GEOL 3320 or 2 year of college chemistry.

Additional Information: Departmental Category: Graduate Course

GEOL 5305 (3) Global Biogeochemical Cycles

Focuses on the cycling of elements at the global scale with a particular emphasis on human modification of biogeochemical cycles. Major biogeochemical cycles, their past dynamics, present changes and potential future scenarios will be addressed. Ecosystem to global-scale model of the earth system will be discussed along with global scale measurements of element fluxes from satellites, aircraft and measurement networks. Department enforced prerequisite: restricted to graduate students only, general chemistry and some organic chemistry.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5840

Additional Information: Departmental Category: Graduate Course

GEOL 5330 (3) Cosmochemistry

Investigates chemical and isotopic data to understand the composition of the solar system: emphasis on the physical conditions in various objects, time scales for change, chemical and nuclear processes leading to change, observational constraints, and various models that attempt to describe the chemical state and history of cosmological objects in general and the early solar system in particular. Department enforced prerequisite: graduate standing in physical science and graduate chemistry or physics or math courses.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4330 and ASTR 4330 and ASTR 5330

Additional Information: Departmental Category: Graduate Course

GEOL 5341 (3) The Cryosphere: Earth's Icy Environments

Serves as an advanced introductory course in to the cryosphere. The course covers the nature of ice and the icy component of the Earth System, and how changing ice affects society. The course will not cover sea ice.

Requisites: Restricted to graduate students only.

GEOL 5380 (3) Fundamentals of Stable Isotope Geochemistry

This course teaches students the fundamental principles of stable isotope fractionation during physical and biological processes, and the application of these behaviors to a wide range of important geologic questions. The course will use classic case studies from the geologic record to illustrate these principles.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4380

Requisites: Restricted to graduate students only.

GEOL 5420 (3) Quaternary Dating Methods

Features in-depth survey of standard and experimental dating methods that provide absolute ages for events of the last two million years of Earth history. Includes theory and application of radiocarbon, uranium series, amino acid, thermo-luminescence, fission track, potassium/argon, hydration, light stable isotopes, and other radioactive techniques.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5430 (3) Paleooceanography and Paleoclimatology

Examines scientific tools, data, and theories related to the dramatically varied past climate of the Earth. Focus will be on marine records of climate change and ocean circulation, but ice cores and other continental archives will also be discussed. Course covers the Cenozoic Era (66 Ma to present), but with particular emphasis on the Quaternary ice age cycles.

Recommended: Prerequisites Introductory geology and introductory oceanography or atmospheric science.

Additional Information: Departmental Category: Graduate Course

GEOL 5432 (3) Active Tectonics

Considers the physical processes that drive coseismic and interseismic strain in the upper crust on Earth. It is focused on recognition and interpretation of surface strain produced by active faulting, folding and flexure at a range of timescales. This includes defining how coseismic strain cycles act to build geologic structures while considering methods of analysis with rapidly emerging remotely sensed and geochronologic datasets to quantify strain rates for seismic hazard assessment. Previous coursework in structural geology, geomorphology and remote sensing is recommended.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

GEOL 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and MUSM 5474

Additional Information: Departmental Category: Graduate Course

GEOL 5555 (3) Topics in Macroevolution

Macroevolution extends beyond the limits of microevolution by including processes that encompass many species, in both recent and fossils organisms. Some of the topics include evolutionary novelty and innovation, developmental evolution, disparity and diversity dynamics, and extinction. We will survey case studies, methods, and the current literature.

Repeatable: Repeatable for up to 9.00 total credit hours.

GEOL 5611 (3) Organic Geochemistry

Explores the δ biomarker concept δ as a tool to elucidate microbial, biogeochemical, and climatic processes in natural systems through three fundamental goals: a) characterization and classification of organic molecules in complex, natural mixtures; b) biosynthesis, transport, transformation, preservation and destruction of organic matter in nature; c) application of lipid biomarkers and their stable isotope composition to study biological, biogeochemical, and climatic processes in modern and ancient systems.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4611

Recommended: Prerequisites CHEM 1113 or equivalent from undergraduate degree and GEOL 5270 or GEOL 5280 or GEOL 5305 or GEOL 5675.

GEOL 5612 (3) Techniques in Organic Geochemistry

Explores the techniques in analytical chemistry and organic geochemistry for the study of lipid biomarkers in the environment, which include the following topics: a) Extraction of environmental samples and separation of lipid classes; b) Analysis of apolar lipids using gas chromatography-mass spectrometry (GC-MS); c) Determine the stable isotope composition of lipids using GC-isotope ratio-MS (GC-IR-MS); d) Analysis of polar lipids using high performance liquid chromatography-MS (HPLC-MS). Requires previous coursework in general chemistry and Organic Geochemistry.

Recommended: Prerequisites Introductory or advanced courses in organic chemistry, biochemistry, biogeochemistry, geochemistry, geomicrobiology, paleoclimate, or geology.

GEOL 5660 (3) Sedimentology & Geobiology of Carbonates

Carbonate sedimentary rocks are a significant component of the geobiological rock record, capturing a history of organisms and the environments they inhabit. This course will focus on how carbonate sediments are formed, deposited, and lithified and what influences the preservation and alteration of textural and geochemical signals. We will cover facies identification, interpreting depositional environment, and carbonate geochemistry, with a particular emphasis on recent advances and unanswered questions at the intersection of carbonates and geobiology, including the role of microbial carbonate precipitation and/or dissolution in the formation and degradation of stromatolites, carbonate mud, ooids, etc.

Recommended: Prerequisite prior coursework in Sedimentology.

GEOL 5670 (3) Isotope Geology

Introduces principles of stable and radiogenic isotope systematics in inorganic and organic geochemistry. Emphasizes application of isotope data to problems in igneous, metamorphic and sedimentary petrology, geobiochemistry, and petroleum genesis.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4670

Additional Information: Departmental Category: Graduate Course

GEOL 5675 (3) Stable Isotopes in Paleoclimate and Paleoecology

Explores the use of stable isotope geochemistry for research questions in paleoclimatology and paleoecology. Covers physical and biological drivers of isotopic fractionation, systematics and applications of light elements such as carbon, nitrogen, oxygen, hydrogen, sulfur and boron and some less traditional isotopic systems. Applications include marine and terrestrial paleoclimate proxies and some uses for ecology and paleoecology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4675

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5690 (3) Tectonic History of the Western United States

Provides students with the practical tools needed to make tectonic interpretations through study of the geologic history of the western United States and the geodynamic models used in interpreting that history. Paleomagnetism, geobarometry, geothermometry, geodynamic modeling, and elements of structural geology and stratigraphy are topics considered in this class.

Requisites: Requires prerequisite courses of GEOL 3120 and PHYS 1110 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Course

GEOL 5700 (1-4) Geological Topics Seminar

Offers seminar studies in geological subjects of special current interest. Primarily for graduate students, as departmental staff and facilities permit.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5701 (2) Super-Problems in Quaternary Climate

Investigates major problems in the study and understanding of Quaternary climate variation, in seminar format. Each year one major topic will be addressed, such as: the physics and chemistry of the Ice Age ocean circulation; the theory and mechanics of glacial/interglacial atmospheric CO₂ change; the origins of the 20, 40, and 100 kyr orbital (Milankovitch) climate cycles.

Recommended: Prerequisites Introductory geology and climatology, oceanography, paleoclimatology, or paleoceanography.

Additional Information: Departmental Category: Graduate Course

GEOL 5702 (1-3) Geomorphology Seminar

Explores the dynamics and forms of the earth's surface through critical reading and discussion of both classical and modern literature.

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5703 (1) Seminar in Tectonics

Focuses on a wide variety of topics related to crust, mantle and whole earth tectonics. Published papers from recent peer-reviewed literature are read and discussed. The format and specific topics will vary each semester (e.g., a relatively focused theme or open format) and will in part be determined by the makeup of enrolled students. Department enforced prerequisite: restricted to graduate students only.

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5704 (1) Carbonates Seminar

Focuses broadly on the topic of carbonates, including sedimentology, geochemistry, and geobiology of carbonates. Each semester will have a distinct theme under these sub-topics. Students will be responsible for leading discussion on individual readings and will be able to provide input on both the theme and the individual reading selections. Upper-level GEOL majors can register with instructor approval.

Repeatable: Repeatable for up to 10.00 total credit hours.

GEOL 5705 (1-3) Seminar in Paleoclimate

Investigates major problems in the study and understanding of past climate variations as preserved in the geologic record. Course format is a seminar-style critical reading and discussion of journal articles in paleoclimatology and paleoceanography. Topical focus varies from year to year. Prior coursework in geology, climate science, and/or paleoclimate is recommended.

Repeatable: Repeatable for up to 9.00 total credit hours.

GEOL 5711 (1-3) Igneous and Metamorphic Field Geology

Applies field techniques to interpretation of igneous and metamorphic rocks. Field exercises and lectures focus on collecting data required to map igneous and metamorphic rock units. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5712 (1-3) Structural Field Geology

Methods of field study of structure of rocks, including observations, data collection and interpretation to understand geometry of deformation and causative processes and kinematics. Field projects are mapped using different scales, air photos, topographic maps and compass and tape. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and GEOL 3020.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5714 (2) Field Geophysics

Applies geophysical field techniques and data interpretation to studying geological and engineering problems. Fieldwork includes seismic, gravity, magnetic and electrical measurements. Department enforced prerequisite: restricted to graduate students only and GEOL 2001 or GEOL 2700 and MATH 1300 and PHYS 1110.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5715 (1-3) Field Techniques in Surficial Geology and Geohydrology

Introduces various field techniques and data analysis methods in hydrogeologic studies for students in geology, environmental studies, geography and civil engineering. Exercises include mapping ground water levels, conducting slug and pumping tests, measuring steam flows, interpreting aquifer parameters from geophysical measurements and using field data for water budget analysis. Department prerequisite: GEOL 2001 or GEOL 2700.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5716 (1-3) Environmental Field Geochemistry

Develops basic field skills in the most commonly performed tasks required for the environmental characterization of solid and aqueous wastes. Media of study include soils, stream sediments, surface waters, ground waters and atmospheric particulates. Department enforced prerequisites: GEOL 2001 or GEOL 2700 and CHEM 1011 and CHEM 1031 or CHEM 1113 or CHEM 1133 and GEOL 3320.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5717 (2) Field Seminar in Geology and Tectonics

Studies geologic features in and around Colorado to gain an overview of the geologic and tectonic evolution of the western U.S. Department enforced prerequisites: restricted to graduate students only and GEOL 2001 or GEOL 2700 and at least one of the following: GEOL 3120 or GEOL 3320 or GEOL 3430.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 5719 (2) Field Analysis and Tectonics of Crystalline Rocks

Introduces basic and advanced mapping tools and concepts for structural and tectonic analysis of solid-state and magmatic deformation, metamorphism, and fluid flow in igneous and metamorphic rocks. Includes some digital mapping concepts using smartpad and smartphone applications, and computer-based analysis of structure data. Includes multi-day mapping projects in the Front Range, and in western Colorado, southern Wyoming, or northern New Mexico. Also includes introductions to Precambrian tectonic history of western North America and mineral resources of Colorado.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4719

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

GEOL 5725 (1-4) Field Based Special Topics in Geoscience

Explores selected geological subjects of special interest in a field setting.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4725

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 5755 (2) Field Geobiology

Provides students technical fieldwork skills in the interdisciplinary field of geobiology, spanning modern environments and to ancient environments in preserved in rock record, and spanning techniques from geochemistry, environmental microbiology, and sedimentology.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4755

Repeatable: Repeatable for up to 8.00 total credit hours.

GEOL 5775 (3) Introduction to Numerical Modeling in Geoscience

Numerical models play an essential role across the geosciences, with applications that include hypothesis exploration, data interpretation, and prediction. This course provides a hands-on introduction to numerical modeling. Students learn scientific programming and modeling concepts by iterating through a series of model-development assignments in Python and Matlab. Applications span a range of topics in the geosciences, with emphasis on physical processes that involve mass, energy, and/or momentum transport.

GEOL 5800 (3) Planetary Surfaces and Interiors

Examines processes operating on the surfaces of solid planets and in their interiors. Emphasizes spacecraft observations, their interpretation, the relationship to similar processes on Earth, the relationship between planetary surfaces and interiors and the integrated geologic histories of the terrestrial planets and satellites.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5800

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5810 (3) Planetary Atmospheres

Covers the structure, composition, and dynamics of planetary atmospheres. Includes the origin of planetary atmospheres, chemistry and cloud physics, greenhouse effects, climate, and the evolution of planetary atmospheres - past and future.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5810 and ASTR 5810

Additional Information: Departmental Category: Graduate Course

GEOL 5820 (3) Origin and Evolution of Planetary Systems

Considers the origin and evolution of planetary systems, including protoplanetary disks, condensation in the solar nebula, composition of meteorites, planetary accretion, comets, asteroids, planetary rings and extrasolar planets. Applies celestial mechanics to the dynamical evolution of solar system bodies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5820 and ATOC 5820

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5830 (3) Topics in Planetary Science

Examines current topics in planetary science, based on recent discoveries, spacecraft observations and other developments. Focuses on a specific topic each time the course is offered, such as Mars, Venus, Galilean satellites, exobiology, comets or extrasolar planets. Department enforced prerequisite: restricted to graduate students in the physical sciences.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5830 and ASTR 5830

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5835 (1) Seminar in Planetary Science

Studies current research on a topic in planetary science. Students and faculty give presentations. Subjects may vary each semester. Department enforced prerequisite: senior level undergraduate physics.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5835 and ASTR 5835

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5840 (1-3) Independent Study-Quaternary Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5841 (1-3) Independent Study-Economic Geology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5842 (1-3) Independent Study-Petrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5843 (1-3) Independent Study-Sedimentology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5844 (1-3) Independent Study-Structure/Tectonics

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5845 (1-3) Independent Study-Geochemistry

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5846 (1-3) Independent Study-Geophysics

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5847 (1-3) Independent Study-Hydrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 5849 (1-3) Independent Study-Paleontology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5851 (1-3) Independent Study-Sediment Petrology

Repeatable: Repeatable for up to 7.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 5852 (1-3) Independent Study--GIS Applications in Quaternary Geosciences

Leads students through quantitative spatial analysis of environmental and paleoclimatic problems. Each student will develop a project from start to finish, with emphasis on raster GIS for building large empirical databases that bear on process and variability.

Additional Information: Departmental Category: Graduate Course

GEOL 5862 (1-4) Geology Independent Study

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4862

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

GEOL 5910 (3) Geothermodynamics

Provides a solid foundation in chemical thermodynamic concepts and calculations as applied to geochemistry and geobiology.

GEOL 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and ASEN 6050

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Course

GEOL 6060 (4) Petroleum Geology of Turbidite Systems

Covers the exploration and production aspects of petroleum submarine fans and turbidite systems.

Requisites: Requires prerequisite course of GEOL 6330 (minimum grade B).

Additional Information: Departmental Category: Graduate Course

GEOL 6310 (3) Sedimentary Petrology

Covers interpretation of depositional and diagenetic history of sedimentary rocks as determined from thin-section studies. Department enforced prerequisites: GEOL 3010 and GEOL 3020 and GEOL 3430 or equivalents.

Additional Information: Departmental Category: Graduate Course

GEOL 6330 (4) Applied Sequence Stratigraphy and Basin Analysis

Develops skills in the stratigraphic interpretation of seismic reflection data, recognition of sequence stratigraphy in well logs and outcrop and their applications to basin analysis in petroleum exploration.

Department enforced prerequisite: restricted to graduate students only and introductory undergraduate physics and sedimentology/stratigraphy.

Additional Information: Departmental Category: Graduate Course

GEOL 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6610 and PHYS 6610

Additional Information: Departmental Category: Graduate Course

GEOL 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6620 and PHYS 6620

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6630 and PHYS 6630

Additional Information: Departmental Category: Graduate Course

GEOL 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6650 and PHYS 6650

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Course

GEOL 6655 (3) InSAR Processing and Interpretation

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6655

Grading Basis: Letter Grade

GEOL 6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations. Department enforced prerequisites: a course in calculus and a course in computer programming (any language).

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6670

Additional Information: Departmental Category: Graduate Course

GEOL 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Course

GEOL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

GEOL 6960 (1-3) Plan II Master's Research

The Plan II program requires at least 3 credit hours of GEOL 6960 (Plan II Master's Research) under the supervision of the advisory committee.

Additional Information: Departmental Category: Graduate Course

GEOL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Graduate Course

Geology - Master of Science (MS)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (<https://www.colorado.edu/geophysics/geophysics-graduate-certificate/>), oceanography (<https://www.colorado.edu/atoc/certificate/>), and hydrological sciences (<https://www.colorado.edu/program/hydrosciences/>). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the Geological Sciences website (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>).

Requirements

Admission Requirements

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Prerequisites

Program Requirements

Candidates for the master's degree in geological sciences must complete at least 30 hours of graduate credits either with a thesis (Plan I) or without a thesis (Plan II). The only specifically required classroom courses are GEOL 5101 Introduction to Geological Sciences Faculty I and GEOL 5102 Introduction to Geological Sciences Faculty II (1 credit each).

A maximum of 6 credit hours may be completed at the 3000- or 4000-level to count toward the 30 hours. A maximum of 9 graduate-level credits may be transferred from another university. Both types of substitution are at the discretion of the student's principal advisor and the department's Associate Chair for graduate studies

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

Plan I: Thesis Option

Students must complete a minimum of 4, but no more than 6, credit hours of Master's Thesis (GEOL 6950) as part of the 30 credit hour requirement.

Plan II: Non-thesis Option

The Department of Geological Sciences typically does not admit students into a Plan II (non-thesis) master's program, but Plan I or PhD candidates occasionally transfer into this option. Students must complete 3 credit hours of Plan II Master's Research (GEOL 6960) under the supervision of the student's advisory committee, as part of the 30 credit hour requirement.

Geology - Doctor of Philosophy (PhD)

Geological Sciences is a research-oriented department affiliated with a number of research institutes and research centers, including the Cooperative Institute for Research in Environmental Sciences (CIRES), the Institute of Arctic and Alpine Research (INSTAAR), the Laboratory for Atmospheric and Space Physics (LASP), the Museum of Natural History, the Center for Astrobiology, and the Energy and Minerals Applied Research Center (EMARC). Related areas of study include geography, astrophysical and planetary sciences, atmospheric and oceanic sciences, chemistry, physics, geophysics, microbiology, ecology, and evolutionary biology. The GEOL program also participates in certificate programs in geophysics (<https://www.colorado.edu/geophysics/geophysics-graduate-certificate/>) and oceanography (<https://www.colorado.edu/atoc/certificate/>), and a subplan in hydrological sciences (<https://www.colorado.edu/program/hydrosciences/>). Degree programs for incoming graduate students are individually designed according to research efforts of the faculty. It is highly recommended that students locate a faculty member whose research interests most closely match their own.

For additional details, visit the department's Graduate Degree Programs (<https://www.colorado.edu/geologicalsciences/academic/graduate-degree-programs/>) webpage.

Requirements**Admission & Prerequisites**

Students applying for admission are evaluated holistically, including their undergraduate preparation, personal statement, research interests, and letters of recommendation. The Graduate Record Examination is not required. Each student acquires a primary advisor and an advisory committee that provides guidance throughout the degree program.

Entering students normally have completed at least 24 credit hours of basic courses in geological sciences and two semesters each of chemistry, physics and calculus. In some cases, undergraduate preparation in other fields of science, mathematics or engineering may substitute for part of the 24 hours in geological sciences.

Program Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder. The only specifically required courses are GEOL 5101 and GEOL 5102, Introduction to Geological Sciences Faculty (1 credit each). In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation (GEOL 8990), with not more than 10 of these taken before the semester during which the

comprehensive examination is passed, and not more than 10 taken in any one semester.

Students interested in graduate work in the geological sciences should carefully read the detailed information regarding admission, registration, and degree requirements on the department's Information for Prospective Graduate Students (<https://www.colorado.edu/geologicalsciences/academic/prospective-graduate-students/>) webpage.

Geophysics - Doctor of Philosophy (PhD)

The interdisciplinary doctoral program in geophysics encourages students with a variety of undergraduate backgrounds to pursue graduate study in the physics of the Earth, with special emphasis on the interior of the planet. Students specialize in one of the subfields of geophysics while gaining a broad, general background in the discipline and in-depth education in the relevant aspects of the parent fields of geology, physics and engineering.

Students enter the program by applying for admission to one of the following departments:

- aerospace engineering sciences
- astrophysical and planetary sciences
- civil, environmental and architectural engineering
- electrical and computer engineering
- geography
- geological sciences
- mechanical engineering
- physics

Upon satisfactory performance on the doctoral preliminary examination given by the home department, the student may formally apply for admission to the geophysics doctoral program.

The program is administered by the geophysics graduate program committee, which includes representatives from each of the participating departments. The comprehensive examination and the dissertation defense are directed by this committee, with a faculty member of the home department normally chairing these procedures.

For more information, visit the Geophysics Studies Program (<http://www.colorado.edu/geophysics/>) website.

Requirements

Candidates for the doctoral degree must complete at least 30 credit hours in coursework numbered 5000 or above, of which at least 20 must be taken at CU Boulder.

In addition to coursework, candidates must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed.

Required Courses and Credits

ASTR/GEOL/PHYS 6610	Earth and Planetary Physics 1 (Seismology)	3
ASTR/GEOL/PHYS 6620	Earth and Planetary Physics 2 (Geodesy)	3
ASTR/GEOL/PHYS 6630	Earth and Planetary Physics 3 (Geodynamics)	3
ASTR/GEOL/PHYS 6650	Seminar in Geophysics	1-3
One semester of graduate-level applied mathematics from the following:		3
PHYS/MATH 5030	Intermediate Mathematical Physics 1	
APPM 5350	Methods in Applied Mathematics: Fourier Series and Boundary Value Problems	
ASTR 5540	Mathematical Methods	
MCEN 5020	Methods of Engineering Analysis 1	
Dissertation		
GEOL 8990	Doctoral Dissertation ¹	30
Electives		
Additional courses compatible with the student's research interests to complete the 60-credit minimum.		17-15
Total Credit Hours		60

¹ Or equivalent in home department.

For a list of approved elective courses, visit the Geophysics PhD Program (<https://www.colorado.edu/geophysics/academics/geophysics-phd-program/>) webpage.

Geophysics - Graduate Certificate

The geophysics graduate certificate offers a coherent curriculum in geophysics that can complement and supplement a student's regular degree program and encourages multi-disciplinary education in the area of geophysics. The geophysics certificate program allows students to obtain recognition for their accomplishments in geophysics without having to switch into the geophysics degree program.

Requirements

Admission Requirements

A student wishing to be considered for a certificate in geophysics must be pursuing a graduate degree in one of the participating graduate departments (ASEN, APS, CEAE, ECEN, GEOG, GEOL, MCEN, PHYS). Students from outside the participating departments can apply for entry to the geophysics certificate program by submitting a letter addressed to the Geophysics Graduate Program Committee.

A student must have a course background that includes mathematics through three semesters of calculus and four undergraduate science or engineering courses.

Program Requirements

All students must take at least three geophysics core courses and the Seminar in Geophysics. At least one of the three geophysics core courses must be from the earth and planetary physics (EPP) series, and another

must be from outside the student's home department. Most geophysics core courses are offered once every two years.

Completion with a grade of B or better of a total of three geophysics core courses (at least one from the EPP sequence) and one credit hour for the Seminar in Geophysics.

A certificate in geophysics will be awarded upon the student's completion of degree requirements in their home department. Upon request from a student, the program director and the student's advisor will determine whether a student has met the requirements for the certificate and will generate a letter to the appropriate department head and dean. The certificate is not intended as a substitute for a degree and will be awarded only upon completion of a graduate degree.

Germanic and Slavic Languages and Literatures

As a department of foreign languages, literatures and cultural studies, the Department of Germanic and Slavic Languages and Literatures prepares students for life and careers in an increasingly global world. Our programs in German, Russian and Nordic Studies enable students to combine their language training with interdisciplinary study of the regions where their language is spoken. The cultural legacies of the Germanic and Slavic countries continue to shape fields such as literature, art, music, film, philosophy and political science.

Course codes for these programs are GRMN, GSLL and RUSS.

Master's Degrees

- German Studies - Master of Arts (MA) (p. 1207)
- Russian Studies - Master of Arts (MA) (p. 1209)

Doctoral Degree

- German Studies - Doctor of Philosophy (PhD) (p. 1210)

Certificate

- Critical Theory - Graduate Certificate (p. 1212)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

GRMN 5010 (3) Theory and Practice of German Studies

Provides a graduate-level introduction to German Studies, with emphasis on theoretical approaches and current trends in German Studies. Special attention will be given to developing the tools necessary for advanced criticism: close-reading skills, mastery of critical terminology, and training in a range of theoretical approaches. The main goals of this course are (1) to introduce students to critical approaches to literature/art/film and recent theoretical trends in German literary and cultural studies, (2) to give students the opportunity to deepen interpretive skills through close reading and discussion of representative texts, and (3) to encourage students to explore theoretical approaches to literary and cultural material.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5020 (3) Applied Linguistics and Foreign Language Teaching Methodology

Required of all graduate teaching assistants, this course provides a knowledge of the aspects of German linguistics that are important for teaching German and a survey of foreign language teaching methods and second language acquisition research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5030 (3) Foundations of Critical Theory

An introductory study of nineteenth-century German philosophy (especially Kant, Hegel, and Marx). Required course for the graduate certificate in Critical Theory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5051 (3) Critical Theory of the Frankfurt School

Serves as an introduction to the "Frankfurt School" and Critical Theory with particular emphasis upon rationality, social psychology, cultural criticism, and aesthetics. Through close readings of key texts by members of the school (Horkheimer, Benjamin, Adorno, Habermas) we will work toward a critical understanding of the analytical tools they developed and consider their validity. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4051

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Courses Taught in English

Departmental Category: German Graduate Courses

GRMN 5210 (3) Seminar: The Age of Enlightenment

Examines the influence of the emerging middle class on the transformation of aesthetic and societal values. Major works of theory, philosophy, literature, and criticism by Lessing, Herder, Kant, J. E. Schlegel, and others. Examines major literary and cultural influences from France and Great Britain.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5220 (3) Seminar: Topics in the Age of Goethe

Examines various aspects of German-speaking society from the 1770s to 1830s. Topics may include Sturm und Drang as social commentary; romantic theory in the wake of the French Revolution; romantic nationalism; the Faust theme; Weimar as a cultural center; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5231 (3) Sex, Love and Marriage in Literature and Philosophy

Traces notions of love, sex and marriage in 19th-20th century philosophy and literature. Considered will be whether/how these representations reflect or challenge ideas of human agency, dignity and happiness.

Examined will be shifting views of gender and other social configurations (e.g., friendship, adultery, same-sex desire) to understand their influence on modern attitudes towards sexuality and fidelity.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4231

Additional Information: Departmental Category: German Graduate Courses

GRMN 5301 (3) Gender, Race, and Immigration in Germany and Europe

Introduces students to debates surrounding migration and race in contemporary Germany. Emphasis on reading texts in context using tools of cultural studies, integrating analyses of gender, race, nation, and sexuality. Texts may include film, literature, television, magazine images, etc. Topics include: questioning multiculturalism, self-representation, integration, Islam, citizenship, violence, public space, youth culture, racism and nationalism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4301 and WGST 4301

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5310 (3) Seminar: Topics in the 19th Century

Examines the transformation of realism from Buechner to Gerhart Hauptmann. Topics may include literary responses to the Restoration; intellectuals and the Revolution of 1848; philosophy and literature; theatrical representations of woman, family, and gender; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5320 (3) Seminar: The German Novel from 1901--1956

Beginning with T. Mann's *Buddenbrooks*, charts the rise of the German novel in the early 20th century and examines such topics as Wilhelminian society; intellectuals and World War I; dehumanization and alienation; national socialism and literary exile; and others. Authors include T. Mann, H. Hesse, R. Rilke, F. Kafka, A. Seghers, and A. Zweig.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5330 (3) Seminar: German Intellectuals and Society Between the Wars

Examines the period of social crisis and the intellectual responses to the collapse of the prewar order. Gives attention to the antidemocratic thought of Spengler, Juenger, Stefan George and his circle, to the emergence of existentialism with Scheler and Heidegger, and to the search for a new political humanism as evidenced by the work of Thomas Mann.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5410 (3) Seminar: Topics in Early 20th Century German Society

Focuses on major issues, events, movements, and figures prior to World War II. Topics may include the ontology of lyric poetry; Berlin in the 1920s; exiles, their communities, and their writings; women writers from Andreas-Salome to Anna Seghers; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5420 (3) Seminar: Topics in Contemporary German-speaking Societies

Analyzes artistic and literary engagement with major discussions and debates in contemporary German-speaking societies. Course also provides an introduction to theoretical approaches relevant to the topic. See specific topic description for more details.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5504 (3) Goethe's Faust

Systematic study of the Faust motif in Western literature, with major emphasis on Faust I and II by Goethe and Thomas Mann's Doctor Faustus. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: GRMN 4504 and HUMN 4504

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5510 (3) Seminar: Open Topics in German Civilization

Focuses on cultural issues that cross lines of literary periodization. Topics may include the theater as social criticism from Lessing to Handke; forms of German protest from Luther to Thomas Mann; nihilism from Bonaventura to Thomas Bernhard; topics in German film; and others.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5520 (3) Seminar: Current Issues in German Literature and Media

Examines issues pervading contemporary German literature and media, such as concerns of youth, xenophobia, stereotyping as it affects women and men in their relations, work experience, feminism, problems connected with the reunification, and other issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6900 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 7010 (1-3) Writing Colloquium

Prepares students for the qualifying examination paper and dissertation, and equips students with the skills needed to transform seminar papers into publishable work. Includes sessions on dissertation writing, publishing journal articles, preparing a reading list, and conducting archival research. Required for students in the German Studies PhD program. Cannot be satisfied through transfer credit.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to German Studies PhD students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German

GRMN 7900 (1-6) Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: German Graduate Courses

GRMN 7930 (1-6) Internship

Provides an academically supervised opportunity for doctoral students to earn credit while working for public or private organizations. Students supplement their work experience through directed readings and assignments. Students interested in applying for an internship must complete the Arts & Sciences Internship Application at <http://advising.colorado.edu/sites/default/files/Internshipcredit.pdf>. 1-6 hours;

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to German Studies graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GRMN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements of the degree. For detailed information regarding doctoral dissertation credit, refer to Graduate School rules.

Repeatable: Repeatable for up to 100.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: German Graduate Courses

GSSL 5900 (1-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Germanic and Slavic Courses

RUSS 5010 (4) Advanced Russian Seminar

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4010

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5020 (4) Advanced Russian Seminar 2

Review of all aspects of Russian grammar, with a focus on difficulties, vocabulary for communication at an advanced level and contextual usage. Includes intensive writing and editing of compositions on a variety of topics, reading of authentic Russian texts, interactive work with Russian media and fluent conversation in Russian that moves beyond functional proficiency.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4020

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5050 (4) Professional Russian

Introduces graduate and advanced undergraduate students to various stylistic registers of Russian (business, politics, the Internet, TV, etc.). Develops new vocabulary and idiomatics, with a special focus on fluency of speech and written communication skills. Along with language training, the course offers an immersion into the world of contemporary Russian media, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4050

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Russian

RUSS 5110 (3) Slavic Culture and Society

Examines important ideologies and myths in Slavic societies, with emphasis on contemporary movements and their reinterpretation of history. Acquaints students with major tools for study of cultures of Eastern Europe and the post-Soviet states: research methods, bibliography, transliteration, critical thinking and writing skills. Required for Russian MA. Taught in English.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5120 (3) Russia after Communism: Post-Soviet Politics and Culture

Explores the process of the re-invention and re-shaping of Russian national identity after the collapse of Communism. Topics will include the formation of a neoconservative and neo-imperialist agenda (as demonstrated by the Ukraine crisis), the growth of anti-Western attitudes, and the anti-Putin protest movement. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4120

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5210 (3) Topics in Russian Culture

Selected topics in Russian literature, film, art and music. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4210

Repeatable: Repeatable for up to 9.00 total credit hours.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5220 (3) Open Topics: Russian Culture in Russian

Selected topics in Russian culture and society. Taught all or partly in Russian.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4220

Repeatable: Repeatable for up to 6.00 total credit hours.

RUSS 5221 (3) Stalinism: Culture and Society

Examines Soviet society and culture of the Stalin period (1929-1953). The Great Terror, Communist ideology, commercial practices, political intrigues and show trials, as well as many other aspects of Stalinism will be discussed. Course materials include historical studies, documents, memoirs, diaries, novels and films of or about the period. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4221

RUSS 5230 (3) Russian Cultural Idioms

Analyzes Russian cultural discourse through Russian idioms. Taught in Russian. Formerly GSSL 5230.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4230

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 5251 (3) Russian Queer Culture

Explores the contributions to Russian/Soviet literature, film, and the performing arts by such LGBTQ cultural icons as Nikolai Gogol, Marina Tsvetaeva, Sergei Eisenstein, and Pyotr Tchaikovsky. The course also surveys the history of social and legal restrictions on non-heteronormative behaviors in Russia from the medieval period to the present, with an emphasis on the emergence of LGBT rights activism and the reactionary rise of homophobia as a tool of nationalist politics in Putin's Russia. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4251

RUSS 5301 (3) American-Russian Cultural Relations

Surveys the development of American-Russian cultural relations from the second half of the 18th century to the present. Examines the character and significance of Russian-American relations in social, intellectual, artistic, and other spheres from a comparative perspective. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4301

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5321 (3) Mythological Russia

Examines folklore, popular culture, and everyday life in contemporary Russia to reveal beliefs, ideals, and ideologies. Subjects include witchcraft, shamanism, healing, death, remembrance, nostalgia, collective memory, obscenity. Students will learn to analyze artifacts, photographs, interviews, memoirs, songs, stories, and rituals. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4321

Recommended: Prerequisite prior experience with folklore or Russian studies.

RUSS 5352 (3) Russian Novel: Theory and Practice

Examines the Russian novel and its evolution as well as Western and Russian theories of the novel as they engage and reflect upon the claims of modernity. Taught in English. Formerly GSSL 5352.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5401 (3) The Russian Jewish Experience

Examines the experience of Russian Jews from the late 19th century to the present through fiction and films dealing with the Bolshevik Revolution, Stalinism, Holocaust, and post-Stalin period; the place of Jews as individuals and a minority within Russian and Soviet society; challenges of co-existence of Jews and their neighbors; and emigration to America and elsewhere in the late 20th and early 21st centuries. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4401 and JWST 4401

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5431 (3) Dostoevsky

Focuses on close reading of major novels and other works by Dostoevsky, one of the most important psychological novelists in modern literature, a profound religious thinker and the greatest crime novelist in the world. Taught in English. Formerly GSSL 5431.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4431

RUSS 5441 (3) Tolstoy

Examines the development of Tolstoy's thought and literary style through study of one of his novels and short works from different periods of Tolstoy's writing. Taught in English. Formerly GSSL 5441.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4441

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5451 (3) Chekhov

Analyzes the life and creative works of the author of some of the funniest and some of the gloomiest stories in Russian literature. Examines Chekhov's major plays that laid the foundation for modernist theatre. Taught in English. Formerly GSSL 5451.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4451

RUSS 5471 (3) Women in 20th-21st Century Russian Culture

Examines issues facing women in 20th-21st century Russia, based on study of current events, history, literature, posters and film. Studies images of women as Amazons and rebels, salon hostesses and poets, New Soviet Women and women in combat, prostitutes and mothers. Taught in English. Formerly GSSL 5471.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4471 and WGST 4471

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5481 (3) Rogues to Revolutionaries: Russian Rebels, Past and Present

Explores the tradition of dissent and opposition in Russian culture, from the medieval period to present, approaching forms of rebellion (religious, political, social, aesthetic) in historical context. This survey in intellectual history will trace this phenomenon across historical documents, literary texts, film, and the fine and performing arts, pairing these primary materials with readings in Russian history. Taught in English. Formerly GSSL 5481.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4481 IAFS 3621

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5821 (3) 20th Century Russian Literature and Art

Interdisciplinary course emphasizing the influence of literature and art in 20th century Russian literature. Follows the changing cultural landscape from the time when Russia was in the vanguard of modern European literature to the period of Stalinism. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: HUMN 4821

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5830 (3) Topics in Literature and History

Taught in English. Formerly GSSL 5830.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5831 (3) Contemporary Russian Literature

Acquaints students with the most representative works of Russian writers after the collapse of the Soviet regime. Examines the relationships between ideological concepts and aesthetics, and the treatment of moral and social issues in recent literary works. All readings are in English. Taught in English.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4831

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5841 (3) History of Modern Russian Drama

Examines Russian plays of the 20th and 21st centuries (from Chekhov to contemporary authors) in the context of the Western dramatic theory. Surveys most influential directorial styles from Stanislavsky's "method" to contemporary verbatim theatre. All readings are in English. Taught in English. Formerly GSSL 5841.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4841

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5850 (4) Russian Film and Society (taught in Russian)

Examines topics in Russian film and TV series from sociohistorical and cultural perspectives, while simultaneously developing students' auditing, comprehension, and speaking skills in Russian language. Critical thinking and analytical approaches will be key to working through the course's material. Screenings, discussions, and written assignments are in Russian. Taught in Russian.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4850

Repeatable: Repeatable for up to 8.00 total credit hours.

Recommended: Prerequisites RUSS 2020 or equivalent.

Additional Information: Departmental Category: Russian

RUSS 5851 (3) Critical Thinking: Russian Film and Society (taught in English)

Through structured discussions, selected readings and written assignments, examines topics in Russian film from socio-historical and cultural studies perspectives. Taught in English. Formerly GSLL 5851.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4851

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5861 (3) Absurd and Supernatural in Russian Literature

Studies themes of grotesque, bizarre, surreal, absurd, supernatural and fantastic in Russian short stories and novels of the 19th and 20th centuries. Discusses works by Pushkin, Gogol, Dostoevsky, Kharmis, Bulgakov, Sinyavsky, Petrushevskaya and Pelevin within the contexts of Russian folklore, Freud and Jung's interpretations of jokes and dreams, and Romanticism. Taught in English. Formerly GSLL 5861.

Equivalent - Duplicate Degree Credit Not Granted: RUSS 4861

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian Courses Taught in English

RUSS 5900 (1-6) Independent Study

See department for registration information. Department enforced requisite: graduate standing. Department Consent Required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Russian

RUSS 6940 (1-3) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

RUSS 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Russian

German Studies - Master of Arts (MA)

The department offers an interdisciplinary MA in German studies, focusing on German-speaking central European society from the Enlightenment to the present. In addition to expertise in German literature, the faculty's interdisciplinary strengths include comparative literature, philosophy, social and political theory, film, cultural studies, intellectual history, art history, gender studies, Jewish studies and translation. To get a better idea of the department's areas of specialization, prospective students are encouraged to consult the list of recent graduate seminars and the profiles of the graduate faculty and expanded graduate faculty. The faculty works closely with students to design their own course of study. Most German MA students receive a teaching assistantship and tuition waiver. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the MA in German studies, please visit the program's website (<https://www.colorado.edu/gssl/german-program/>).

Students wishing to pursue the interdisciplinary master's in German studies should read the requirements tab (p. 1207) of this catalog carefully.

Education Abroad

Universities of Göttingen and Regensburg

One year (10 months) of study, from mid-October to the end of July.

- Number of positions: One at each university.
- Benefits: Matriculation plus a monthly stipend for living expenses, and housing in a dorm.
- Note: German citizens are not eligible for the Regensburg exchange program, but are eligible for the Göttingen exchange program.

For more information on graduate exchange programs in Germany, visit the department webpage (<https://www.colorado.edu/gssl/cu-graduate-exchange-programs-germany/>).

For more information on any Education Abroad programs, scholarships and application information, contact Education Abroad, UCB 123, Boulder, CO 80309, (303) 492-7741 or visit the Education Abroad (http://abroad.colorado.edu/?FuseAction=Abroad.ViewLink&Parent_ID=0&Link_ID=6E1E909F-9011-F4D1-DA01962CC1E53067) website.

Requirements

Program Requirements

Students applying to the MA degree are expected to have a BA or equivalent in German or BA-level proficiency in German with a BA in a related field, and should have a general knowledge of the German-speaking countries' literature, history and culture.

The master's degree requires either 24 credit hours of approved coursework and a master's thesis (6 credit hours) or 30 credit hours of coursework without thesis, and reading knowledge of one foreign language in addition to German and English.

All German MA students must take Theory and Practice of German Studies (GRMN 5010). All German teaching assistants must also take Applied Linguistics and Foreign Language Teaching Methodology (GRMN 5020). For specific requirements, visit the department's German MA (<http://www.colorado.edu/gssl/german/graduate/ma/>) webpage.

Degree Plans

Plan I: Thesis Option (Standard Option)

The thesis option requires 30 credit hours, including 24 hours of coursework and 6 thesis hours. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the associate chair of graduate studies. A maximum of 6 hours of independent study coursework may be taken with the approval of the associate chair of graduate studies.

Code	Title	Credit Hours
Core/Required Courses		
GRMN 5010	Theory and Practice of German Studies	3
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	3
GRMN 6900	Master's Thesis	6
Elective Courses		

GRMN 5030	Foundations of Critical Theory
GRMN 5051	Critical Theory of the Frankfurt School
GRMN 5210	Seminar: The Age of Enlightenment
GRMN 5220	Seminar: Topics in the Age of Goethe
GRMN 5231	The Invention of Sexuality
GRMN 5301	Gender, Race, and Immigration in Germany and Europe

Dual Degree Program

MBA/MA in German Studies

To support the university's mission of advancing knowledge across disciplines, the Leeds School of Business and the Department of Germanic and Slavic Languages and Literatures offer a dual degree, Master of Business Administration and Master of Arts in German studies. In most cases, students should be able to complete the dual degree in three years with a total of 70 credit hours.

Prospective students must apply to and meet the application and admission requirements for each program separately. See the Department of Germanic and Slavic Languages and Literatures (<http://www.colorado.edu/gsl/german/graduate/>) website to apply to the German studies MA program, and the Leeds School of Business (<http://www.colorado.edu/business/mba/>) website to apply to the MBA program.

Russian Studies - Master of Arts (MA)

The department offers an interdisciplinary professional MA in Russian studies focusing on Russian language proficiency, Russian culture and interrelations between Russian history, politics and culture from the 19th through the 21st centuries. The faculty's interdisciplinary strengths include literature, cinema, folklore, literary/cultural theory, cultural studies, gender studies, minority studies, nationalism, sociolinguistics and pedagogy.

The faculty works closely with students to design their own course of study. Some Russian MA students receive a teaching assistantship and tuition waiver.

For contact information and more general information on the MA in Russian studies, visit the Russian Program (<http://www.colorado.edu/gsl/russian-program/>) website or email gsl@colorado.edu.

Requirements

Course Requirements

Russian MA students may take up to 12 credit hours in an outside area. Students frequently choose business, political science, geography, women and gender studies, education, history, linguistics, film studies, Jewish studies, religious studies, fine arts, and theater and dance, but students may pursue other options. All outside area courses must be approved by the Director of Russian Graduate Studies.

Upon approval of the Director of Russian Graduate Studies, students may take up to six credit hours of 3000- or 4000-level courses toward their MA degree.

Students interested in independent study should obtain an informational sheet and an Independent Study Contract from the department. Once the contract is approved by the chair, a staff member will enroll the student in the course. MA students may not take more than a total of 7 hours of independent study.

Transfer credit from accredited institutions is accepted by CU Boulder only after approval by the Director of Russian Graduate Studies and the Graduate School. Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. MA students are allowed a maximum of 9 hours of transfer credit.

All students must pass the Russian language proficiency exam, consisting of written and oral components, during their final semester. Educated native Russian speakers are exempt from the language proficiency exam.

Degree Plans

Plan I: Thesis Option

Students must complete at least 30 credit hours, including 24 hours of coursework and 6 thesis hours. Students must submit a thesis and pass a one-hour oral defense.

Total Credit Hours **30**

- ¹ Native speakers are exempt from RUSS 5010 and RUSS 5020, and should contact the Director of Russian Graduate Studies for alternate coursework. For details, please see Russian MA Handbook (<https://www.colorado.edu/gslr/russian/graduate/russian-ma-handbook/>).
- ² These courses are strongly recommended for non-native speakers.

German Studies - Doctor of Philosophy (PhD)

The German PhD offers close mentorship and a vibrant intellectual exchange between students and faculty. Graduate students work closely with leading scholars of modern literature, culture, philosophy, and the arts from the Enlightenment to the present. PhD students are encouraged to conduct interdisciplinary research in German studies and a secondary concentration (i.e. classics, environmental science, art history, Jewish studies). To see the wide range of subjects covered in the German program, consult the research and publication profiles of the faculty and graduate students.

PhD students work and study with established scholars of German studies whose fields of expertise include aesthetics, literary criticism and theory, history of science and technology, critical theory, cultural studies and contemporary art. In combination with advising in literature, students might seek advising in law, popular culture, media and other fields. Students participate in student-centered colloquia, workshops, and the annual Graduate Summer School in German Studies, which brings to Boulder graduate students and scholars from leading German programs. The graduate associate chair of German welcomes email inquiries about the program. For contact information and more general information on the PhD in German studies, please visit the program's website (<https://www.colorado.edu/gslr/german-program/>). A timeline for the German Studies PhD (<https://www.colorado.edu/gslr/timeline-german-studies-phd/>) can be found on our German Program webpage.

Requirements

Academic Preparation

If a student has gaps in their academic preparation, the department may require them to take additional courses.

Course Requirements

The PhD program requires 30 hours of coursework at the 5000 level or above. Students who have completed an MA degree may be able to apply up to 21 hours toward this requirement.

In addition to coursework, students must take a total of at least 30 credit hours of doctoral dissertation, with not more than 10 of these taken in any one semester and not more than 10 dissertation credit hours taken before the semester during which the comprehensive examination is passed. Students must be enrolled in a minimum of 5 dissertation hours during the semester in which they defend their dissertation (including summer session, if the defense is held over the summer).

Transfer credit from accredited institutions may be accepted by CU Boulder after approval by the graduate associate chair and the graduate school. PhD students are allowed a maximum of 21 hours of transfer credit. Thesis hours may not be transferred. All courses accepted for transfer credit must be graduate-level courses and must have a grade of B or above. Coursework completed more than five years prior to acceptance to the PhD program will be evaluated by the department with regard to current relevance and applicability to the degree requirements. Credit may not be transferred until the student has completed at least six credits of CU graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Thesis hours do not count toward the required 30 hours and cannot be used as transfer credit.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		6
GRMN 5010	Theory and Practice of German Studies	
GRMN 5020	Applied Linguistics and Foreign Language Teaching Methodology	
Two pre-20th century content courses such as:		6
GRMN 5030	Foundations of Critical Theory	
GRMN 5210	Seminar: The Age of Enlightenment	
GRMN 5220	Seminar: Topics in the Age of Goethe	
GRMN 5310	Seminar: Topics in the 19th Century	
GRMN 5504	Goethe's Faust	
GRMN 5510	Seminar: Open Topics in German Civilization	
Electives		
At least 6 credit hours in an interdisciplinary area of concentration. ¹		6
Additional courses to meet 30-credit minimum.		12
Total Credit Hours		30

¹ Students design this concentration in close consultation with their faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Examples of interdisciplinary concentrations include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics and international affairs.

Secondary concentration

As a German studies PhD student, you will develop an interdisciplinary area of concentration. This secondary field will consist of at least 6 credit hours. You will design this concentration in close consultation with your faculty mentor and comprehensive examination and dissertation advisor, and with the approval of the graduate associate chair. Some examples of interdisciplinary concentrations might include (but are not limited to): critical thought, political science, philosophy, history, comparative literature, gender studies, film studies, Russian studies, Jewish studies, women's studies, geography, environmental studies, economics, international affairs.

Language Requirement

In addition to demonstrating a high level of proficiency in German, you must demonstrate moderate proficiency in an additional foreign language. You can do this by fulfilling one of the following requirements either before or after enrolling at CU Boulder:

- completing a fourth-semester (second-semester sophomore) college language course with a grade of "pass,"
- completing a proficiency exam administered at CU, or
- presenting other evidence of moderate proficiency to the graduate associate chair.

Students should consult with the graduate associate chair at the beginning of their first semester to discuss procedures. This requirement must be fulfilled before or during the semester in which the student advances to candidacy.

Comprehensive PhD Examination

The comprehensive exam tests a student's knowledge in areas of specialization appropriate for their anticipated dissertation topic. The exam takes place in the second or third year, depending on whether the student entered the program with a BA or MA and, if the latter, how many coursework credits were applied from the MA. Students take the exam in the spring semester. The exam is based on a reading list the student assembles in close consultation with the members of their committee. It consists of a take-home written exam followed by a two-hour-long oral examination that concentrates on the written exam, but may also address texts and topics on the reading list that are not covered in the written exam. The composition of the comprehensive exam committee follows the guidelines of the prospectus & dissertation committee composition below.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gsl/comprehensive-examination-and-dissertation/>) webpage.

Prospectus & Dissertation Committee

After successful completion of the comprehensive examinations, the student forms a dissertation committee and prepares a dissertation prospectus, to be followed by its defense a week later. The dissertation committee should be finalized and a dissertation prospectus submitted

no later than the end of the fifth week of the semester following the successful completion of the comprehensive examination.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gssl/comprehensive-examination-and-dissertation/>) webpage.

Dissertation

The student formally begins to write their dissertation after successfully completing the comprehensive exam and defending the dissertation prospectus. The student should work closely with their dissertation advisor and committee members while writing the dissertation. In particular, students are advised to submit draft copies of each chapter to all members of their committee. Any subsequent changes to the student's "timeline for completion" need to be circulated to the committee for approval. A final draft must be submitted to the committee members at least three weeks before the defense.

Students are required to register continuously for a minimum of five dissertation hours in the fall and spring semesters of each year, beginning with the semester following the passing of the comprehensive exam and extending through the semester in which the student successfully defends their dissertation.

A student who fails to register continuously for dissertation credit hours after passing the comprehensive exam must retake and pass the exam, and validate any coursework more than five years old, to regain status as a student in good standing with the graduate school.

For more information, visit the department's Comprehensive Examination, Prospectus & Dissertation (<http://www.colorado.edu/gssl/comprehensive-examination-and-dissertation/>) webpage.

Recommended Coursework

Internships

Students are strongly encouraged to complete at least one internship during their doctoral studies. Three hours of internship credit can count toward the 30 required hours of coursework for the PhD. GSSL graduate students have completed internships with businesses, nonprofit agencies and schools, and at locations including Colorado, Germany and Washington, DC. Internship offerings vary by semester. To enroll in a graduate internship, see the associate chair for graduate studies.

Graduate Exchange Opportunities

Students are recommended to spend one academic year abroad during their doctoral studies, on either a CU graduate exchange or an exchange funded by an agency such as the German Academic Exchange Service (DAAD) or the Fulbright Commission. For more information concerning DAAD, Fulbright and other grants, see the department's Scholarships & Awards (<http://www.colorado.edu/gssl/scholarships-awards/>) webpage.

In partnership with CU's Office of International Education, GSSL offers funded graduate exchanges at the University of Göttingen and the University of Regensburg. These exchanges offer matriculation at the host institution for one academic year (10 months), plus a monthly stipend for living expenses. One position is offered per year at each institution. To qualify for an exchange, the student must demonstrate fluency in German and evidence of superior academic work.

Students interested in either program should notify the graduate associate chair by December 1 for study abroad the following academic year and formally apply by February 15.

Graduate Certificate Programs

Students are also encouraged to consider completing a graduate certificate program at CU. GSSL offers a critical theory graduate certificate (p. 1212). Other graduate certificates include the women and gender studies graduate certificate (p. 1339) and the comparative ethnic studies graduate certificate (p. 1176).

Critical Theory - Graduate Certificate

This certificate offers students a background in philosophical foundations of critical theory. Drawing on disciplines such as philosophy, psychoanalysis, Marxism, literary criticism and sociology, critical theory develops analytical tools for describing and evaluating modern society and cultural production.

Requirements

Procedures

To complete the certificate program a student must:

1. Enroll in the certificate program by emailing the Certificate Director (<https://www.colorado.edu/gssl/contact-us/>) of the program.
2. Once a student has completed the requirements for the certificate, they should complete the Certificate Completion Worksheet (<https://www.colorado.edu/gssl/critical-theory-completion-worksheet/>) and submit it to the Graduate Program Assistant, Karen Hawley, gssl@colorado.edu. Note: worksheet should be submitted the semester the student competes the certificate requirements (or any semester thereafter); certificate is awarded when the student completes their graduate program. Once the director has approved the worksheet, and once student completes their graduate program, the certificate will be added to the student's transcript.

Graduate Certificate Forms and Links

- Certificate Elective Courses List (<https://www.colorado.edu/gssl/graduate-certificate-program-critical-theory-elective-courses/>)
- Affiliated Faculty List (<https://www.colorado.edu/gssl/affiliated-faculty/>)
- Certificate Completion Worksheet (<https://www.colorado.edu/gssl/critical-theory-completion-worksheet/>)

For more information contact the Certificate Director (<https://www.colorado.edu/gssl/contact-us/>) or the Graduate Program Assistant, Karen Hawley (Karen.Hawley@colorado.edu), (303) 492-3529.

Required Courses and Credits

A total of 12 credit hours are required for completion of the certificate. Of those, 6 credits are earned through a two-course core sequence designed to provide the intellectual history and philosophical foundations for contemporary research directions in critical theory. Students must also take two electives in theory. These courses may be from the list below, and students can also request that the director approve other theory courses.

Students must obtain a grade of B or above in each course taken toward the certificate.

Code	Title	Credit Hours
Required Courses		
Students are required to take the following 2 core graduate courses. Although they may be taken in any order, we encourage students to take them in order when possible. Neither of these courses may be taken as an independent study.		
GRMN 5030	Foundations of Critical Theory	3
GRMN 5051	Critical Theory of the Frankfurt School	3
Electives		
Select two additional elective courses in theory from the list below. Students may also submit a request to the director to recognize courses not listed by submitting a copy of the current syllabus. (Except under extraordinary circumstance, independent study courses do not count toward the graduate certificate.)		6
ANTH 5785	Advanced Seminar in Cultural Anthropology	
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology	
ANTH 7620	Seminar: Ethnography and Cultural Theory	
ARTF 5004	Topics in Film Theory	
ARTF 5604	Colloquium in Film Aesthetics	
ARTH 6929	Seminar: Theories of Art History	
COMM 6010	Communication Research and Theory	
COMM 6320	Rhetorical Theory	
COMM 6360	Social and Cultural Theory	
ENGL 5019	Survey of Contemporary Literary and Cultural Theory	
ENGL 7489	Advanced Special Topics	
ENVS 5240	Environmental Philosophy	
FREN 5445	Literary Theory, Part I	
GEOG 5100	Special Topics: Geography	
GEOG 5632	Development Geography	
GEOG 6742	Seminar: Cultural Geography	
HIST 6540	Readings in Cultural History and Theory	
HIST 6414	Readings in European Intellectual History	
HIST 7326	Seminar: U.S. Intellectual History	
LING 6320	Linguistic Anthropology	
LING 7350	Language and Gender in Cultural Perspective	
LING 7420	Syntactic Theory	
MDST 6051	Media Theories	
MDST 6071	Critical Theories of Media and Culture	
MDST 7011	Proseminar in Media Communication Theory 1	
MDST 7021	Proseminar in Media and Communication Theory 2	
PHIL 5110	Contemporary Moral Theory	
PHIL 5200	Contemporary Political Philosophy	
PHIL 5240	Seminar in Environmental Philosophy	
PHIL 5300	Philosophy of Mind	
PHIL 5490	Philosophy of Language	

PSCI 7004	Seminar: Political Theory
SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 7036	Feminist Theory
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures
THTR 5010	Introduction to Performance Studies
WGST 6090	Feminist Theories
Total Credit Hours	12

History

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All history graduate students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history); and
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses.

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Course code for this program is HIST.

Master's Degree

- History - Master of Arts (MA) (p. 1222)

Doctoral Degree

- History - Doctor of Philosophy (PhD) (p. 1223)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

HIST 5000 (3) Historical Methods: Introduction to the Professional Study of History

Introduces purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5012 (3) Graduate Colloquium in European History

Acquaints students with key works in the literature of European history, and addresses matters of method and interpretation. Department enforced requisite: admission to the graduate program in history.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5013 (3) Law and Society in Premodern England to 1688

Examines the origins and developments of English legal and political institutions, including kingship, the common law, procedure and the court and jury system and sets such developments in the context of broader social and religious changes from the Anglo-Saxon period to the 17th century. Emphasizes the implications of these institutions for the development of contemporary American, English and British colonial legal systems.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4013

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 1011 or HIST 1113.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5053 (3) Britain and the Empire, 1688-1964

Examines the external polity of Great Britain from 1688 to 1964 in Europe, the East, Africa and the Americas.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4053

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5061 (3) Twilight of Antiquity

Explores the reasons for the fall of the Roman Empire in the western Mediterranean and its survival in the East as Byzantium. Emphasizes Christianity; barbarians; social, economic and cultural differences; contemporary views of Rome; and modern scholarship. No Greek or Latin is required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4061 and CLAS 4061 and CLAS 5061

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5106 (3) Graduate Colloquium in United States History

Students gain an acquaintance with major works in the field and discuss current issues of interpretation and methodology.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5116 (3) History of U.S. Foreign Relations, 1865-1940

Traces the rise of the United States to world power. Explores the interactions of expansionist and isolationist impulses with politics, ideology, culture and economics, with a focus on the Spanish American War and the acquisition of empire, World War I and the coming of World War II. Instructor's permission required for non-history graduate students.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4116

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5125 (3) Early American History to 1763

Explores the colonial era of American history from the pre-Columbian period to the end of the Seven Years' War. Topics include pre-contact Native societies, exploration, European settlement and Native American responses, labor system and the rise of slavery, imperial wars, and the developments in religion, society, politics and culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4125

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5126 (3) History of U.S. Foreign Relations Since 1941

Traces the development of the United States as a superpower. Details American power and diplomacy in World War II and the rise of the national security state in the Cold War. Explores the Korean, Vietnam and Persian Gulf Wars, and the era of modern-day globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4126

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5128 (3) The History of Modern Mexico Since 1821

Centers on the Mexican search for political consolidation and stability through the 19th, 20th and 21st centuries. Focuses on the Mexican Revolution (1910-1940) and the post revolutionary rule of the Institutional Revolutionary Party. Examines the War on Drugs and the causes of Mexican migration to the United States.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4128

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5129 (3) Colloquium in Modern Asian History

Introduces major topics and themes in Asian history. Analyzes readings relating to topics such as imperialism, cultural agency, gender, race, nationalism, decolonization, and revolution.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5205 (3) The Colonial Wars and the Coming of American Independence, 1739-1776

Investigates imperial warfare and its effects during the late colonial period, concentrating on the French and Indian War (1754-1763), the disruption of Anglo-American relations and the origins of the War of American Independence (1775-1783).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4205

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5215 (3) The Revolutionary War and the Making of the American Republic, 1775-1801

Investigates the Revolutionary War and its impact on the creation of American political institutions, as well as its cultural, social and economic effects, from the Battles of Lexington and Concord through the inauguration of Thomas Jefferson.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4215

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5222 (3) War and the European State, 1618-1793

Studies the development of the European states in response to international power struggles in the 17th and 18th centuries (up to the French Revolution).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5223 (3) The French Revolution and Napoleon

Traces the origins, course, and consequences of the most important modern revolution, the French Revolution of 1789. While seeking to explain how a liberal movement for progressive change soon degenerated into the factional bloodbath of the Terror, will also examine the revolution's global impact and how three decades of revolutionary warfare lead to the rise and fall of Napoleon Bonaparte.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4223

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5235 (3) Jacksonian America

Focuses on the social and cultural history of the Jacksonian Era. Issues include the transformation of the market economy, slavery, moral reform, Indian removal, changes in ideas about men's and women's natures and roles, western expansion, and political culture.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4235

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5303 (3) Venice and Florence during the Renaissance

Comparative urban study of Florence and Venice from 13th through 16th centuries. Principal subjects are the distinctive economies of the cities, political developments, Renaissance humanism, patronage of the arts, and foreign policy.

Equivalent - Duplicate Degree Credit Not Granted: HIST 5303

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5328 (3) The Modern Middle East, 1600 to the Present

Primarily from 1800 to the present. Attention divided equally between the region's political history and international relations and its patterns of economic, social and cultural modernization in the main countries.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4328

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5339 (3) Borderlands of the British Empire

Examines the development of the borderlands of the British empire through imperial expansion, consolidation, and early decolonization. Focuses on the 19th and early 20th centuries. Topics include domination, resistance and negotiation in areas such as India, Afghanistan, the Palestine Mandate. Aims for students to acquire skills in comparative history and to develop a better understanding of the roots of contemporary conflicts.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4339

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5343 (3) Spain and Portugal during the Golden Age

Surveys the history of Spain and Portugal from the late medieval period through early modern period. Explores the thought, art, politics and socio-economic milieu of the Golden Age. Topics include attitudes toward minorities, the Inquisition, the Age of Exploration and the establishment of colonial empires in Asia and the Americas, court culture and architecture, religious conflicts and literary production. Formerly HIST 5064.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4343

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5349 (3) Decolonization of the British Empire

Examines the end of the British Empire. Focuses on connections between imperial territories, such as networks of anticolonial activists and links between British decision makers. Students will acquire research skills and develop a better understanding of the roots of contemporary conflict. Prior coursework in British imperial history and excellent writing skills are required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4349

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 5422 (3) World War I in Europe

Examines the origins of World War I; the military, social, and cultural character of the conflict; and its enduring impact in the post-1918 world. By thinking about the war as both a military undertaking and an experience that affected domestic and global politics, the course will explore why World War I constituted an event of major importance to Europe and the twentieth-century world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4422

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5448 (3) Wars of Liberation in Southeast Asia

Uses the contemporary nations of Indonesia, Myanmar, and Singapore as case studies to examine the making and unmaking of European and Japanese colonialism in Southeast Asia in the years surrounding World War II. In what ways did different communities understand and narrate imperialism and independence? How can we understand wars of liberation as local, regional, and global experiences, with legacies for today?

Equivalent - Duplicate Degree Credit Not Granted: HIST 4448 and ASIA 4448

Grading Basis: Letter Grade

HIST 5538 (3) History of Modern India

Examines the history of India from the British conquest of India in the late 18th century to independence in 1947. Emphasizes the impact of British rule on the political, economic and social development of modern India.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4538

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of any history coursework.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5544 (3) History of Yiddish Culture

Jews have produced culture in Yiddish, the vernacular language of Eastern European Jewry, for 1000 years and the language continues to shape Jewish culture today. We will look at the literature, film, theater, music, art, sound and laughter that defined the culture of Eastern European Jewry and, in the 20th century, Jews around the world.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4544 and JWST 4544

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Europe: Topical

HIST 5548 (3) Women in Modern India

Examines the history of women and gender in India from the late 18th century to the present. Explores topics such as the changing legal status of women in the colonial and postcolonial period, marriage, domesticity and patriarchy, and women's education and participation in anti-colonial and postcolonial politics, women, work and the environment, violence against women, and women and globalization.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4548

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5616 (3) History of Gender and Sexuality in the United States to 1870

Examines the social history and cultural construction of genders and sexualities in America to 1870, exploring how discourses of race, religion, nationalism, medicine and criminality have shaped erotic encounters, informed gender and sexual identities a served as sites of political conflict.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4616 and WGST 4616

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5619 (3) Women in East Asian History

Considers major issues in the history of women in East Asia (China, Korea, Japan) in the 17th through 20th centuries. Focuses on gender roles in Asian family, state, and cultural systems. Topic varies in any given semester.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4619 and WGST 4619

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 5628 (3) Modern China: Collapse of Imperial Brilliance, 1644-1949

Examines the brilliance of the Qing dynasty, its collapse in 1911, and the bloody and chaotic several decades that followed, up to the 1949 Communist Revolution. Focuses on such topics a Qing imperialism in Central Asia, global capitalism and Western imperialism in China, the opium trade, domestic violence, nationalism, concepts of modernity, competing revolutionary movements, and WW II in Asia.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4628

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5636 (3) Lesbian and Gay History: Culture, Politics, and Social Change in the United States

Considers current theoretical approaches to the history of sexuality and traces the changing meaning of same-sex sexuality in the U.S. through investigation of lesbian and gay identity formation, community development, politics, and queer cultural resistance.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4636 and WGST 4636

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5638 (3) Contemporary China: Radicalism and Reform, 1949 to Present

Examines the dramatic, often tragic, and globally transformative history of China under the Chinese Communist Party. Focuses on such topics as political, social, and cultural revolution, nationalism, Maoism, the Great Leap Forward, Red Guards and the Great Proletarian Cultural Revolution, the Deng Xiaoping era, relations with Taiwan, the 1989 Tiananmen Massacre, and China's rise as a world power.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4638

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5658 (3) China and Islam from the 7th Century to the 20th Century

Traces how "Muslims in China" transformed themselves into "Chinese Muslims" while at once accommodating and conflicting with Chinese states and people throughout history until the present time.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4658

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5728 (3) Modern Japanese History

Begins with early modern Japan, proceeds through the era of rapid modernization after the Meiji Restoration in the mid-19th century, and concludes with Japan's gradual descent into prolonged war, first with China and then in the Pacific.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4728

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5738 (3) History of Early Modern Japan (1590-1868)

Covers the history of early modern Japan (1590-1868). Explores the political, social, cultural and economic context of Japan's history from the era of Warring States through the rise and fall of the Tokugawa military government (Shogunate).

Equivalent - Duplicate Degree Credit Not Granted: HIST 4738

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 5761 (3) Roman Law

Studies the constitutional and legal history of ancient Rome; emphasizes basic legal concepts and comparisons with American law. No Greek or Latin required.

Equivalent - Duplicate Degree Credit Not Granted: HIST 4761 and CLAS 4761 and CLAS 5761

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5840 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 5841 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 5842 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 5843 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 5844 (1-3) Independent Study-Europe/Topical

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 5845 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 5846 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 5847 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 5848 (1-3) Independent Study

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 5849 (1-3) Independent Study

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6000 (3) Teaching History in the University

Introduces graduate students to basic pedagogy with special attention to discipline-specific methods, practices, and challenges in teaching history at the college level. In touching upon and integrating the several stages of teaching in a graduate student's career and after, this course provides a solid foundation for students to continue their pedagogical development as their instructional experience and skills become more advanced.

Requisites: Restricted to graduate students only.

HIST 6012 (3) Readings in Modern European History

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 6019 (3) Readings in World History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6020 (3) Modern Empires: Readings in Imperial History

Introduces major topics and themes in imperial history. Reviews central theories of modern colonial empire, ranging from economic and political motivations for expansion, to the cultural and social impact of empire, to post-colonialism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6028 (3) Readings in Modern Latin American History

Examines major themes and topics in the social, political and economic history of Latin America. Possible topics include nationalism and state-building, neocolonialism, revolution and reaction, race, and gender.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite HIST 5128.

Additional Information: Departmental Category: World Areas: Specific Regions

HIST 6030 (3) Readings: Frontiers and Borderlands in the Americas

Introduces classic and recent scholarship on frontiers and borderlands in the Americas. Chronological focus will vary by semester, from contact through twentieth century. A hemispheric approach encourages comparative insights about topics such as colonialism and ecological change, war and violence, indigenous resistance, acculturation, ethnogenesis, and evolving ideas about race, gender, and identity at the margins of empires and nation-states.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6109 (3) Readings in Asian History

Explores a specific theme in Asian History in depth. Topic may vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6113 (3) Readings in English History to 1714

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6115 (3) Readings in American Colonial History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 6116 (3) Readings in American Diplomatic History

Requisites: Restricted to graduate students only.

Recommended: Requisite undergraduate work in American history.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6123 (3) Readings in English History Since 1688

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 6150 and ARTH 6150 and ANTH 6150

Requisites: Requires prerequisite course of MUSM 5011 (minimum grade D-).

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6212 (3) Readings in 17th Century Europe

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 6317 (3) Readings in the American West

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6326 (3) Readings in United States Intellectual History

Examines the history of ideas and the social history of intellectuals in American society during the 19th and 20th centuries. Stresses social and political dimensions and the changing cultural and institutional contexts of intellectual discourse.

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6329 (3) Readings in Comparative Ethnohistory

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

HIST 6330 (3) History of Sex and Sexuality

Examines major historical trends in the study of meanings and practices of sex and sexuality. Focuses on emergence and negotiation of sexual matters in circumstances where sex and identity were not coterminous.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6349 (3) Decolonization in Transnational Perspective: The End of the British Empire in S Asia & Middle East

Examines Britain's withdrawal from South Asia and the Palestine mandate. Topics include collaboration, anticolonial resistance, Indian and Palestinian nationalisms, Zionism, transcolonial connections, counter insurgency, and partition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 6410 (3) Readings in Environmental History

Offers historical perspective on the complex and interdependent relationship between human social and cultural institutions and the natural world. Considers interdisciplinary methodologies incorporating history, biology, geography, law, and other disciplines. Formerly HIST 6417.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6413 (3) Readings in Modern German History

Requisites: Restricted to graduate students only.

Recommended: Requisite general background in European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 6414 (3) Readings in European Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 6420 (3) Memory and History in Transnational Perspective

Engages in debates about historical methods and how the past is represented. Central topics will include memory and the forces of nationalism and war; commemoration and monuments; the role of memory in the construction of race and ethnicity; personal past and cultural remembrance; and the relationships between academic, public, and popular histories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6427 (3) Readings in African American History

Introduces classic and recent scholarship, and critical issues in African American history, from slavery to the present.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 6511 (3) Readings in Medieval History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 6526 (3) Readings in U.S. Social History, 1880--1940

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6528 (3) Reading in South Asian History

Introduces major topics and themes in South Asian history. Reviews central theories relating to topics such as religion, nationalism, law, gender, colonialism, and literature.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: World Areas: Specific Regions

Departmental Category: Asia Content

HIST 6540 (3) Readings in Cultural History and Theory

Introduces standard works and recent developments in cultural history. Explores structuralism and post-structuralism, semiotics, social construction, relativism, hegemony, and the idea of postmodernity in the uses of culture as an historical category.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6610 (3) Readings in Gender History

Examines the field of gender history that includes an understanding of women's and/or men's experience as lived and socially or culturally constructed. Regional or national focus and time period to be determined by the faculty member teaching the course in any given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6616 (3) Readings in the History of American Women

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6756 (3) Race and Nationalism

Focuses on analytical, ideological, cultural, and political tensions between understandings of race and nationalism. Readings are interdisciplinary, but students identify and analyze tensions between race and nationalism at particular historical moments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 6790 (3) Readings in Digital History

Re-conceptualizes topics surrounding traditional theories, methods, and practices of writing history in the digital age. Topics revolve around collating big data, curating digital exhibits, copyright and image preparation for digital/print publications, website development/design, cartography, sustainability and preservation, among other themes. Lab work provides conceptual and technical recommendations required to conceive, launch, and preserve online digital history projects.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6800 (3) Readings in Global History

Explores various topics, regions, and methods in history and historical writing by utilizing a global/thematic approach. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7052 (3) Seminar: Modern European History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7110 (3) Research Seminar in Atlantic History 1500-1800

Discusses the concepts and methods that inform the field of Atlantic history in the early modern era. Readings and research papers explore the interactions of peoples from Europe, Africa, and the Americas, including the exchange of ideas, peoples, commodities, and cultural practices.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Methodological, Comparative, and Global

HIST 7119 (3) Graduate Research Seminar in Asian History

Prepares students for research in historical documents in Asian languages in order to write a substantial original research paper based on primary and secondary source materials.

Requisites: Restricted to graduate students only.

Recommended: Requisite background in Asian history.

Additional Information: Departmental Category: World Areas: Comparable and General

Departmental Category: Asia Content

HIST 7153 (3) Seminar: English History, 800--1688

Requisites: Restricted to graduate students only.

Recommended: Requisite background in English or European history.

Additional Information: Departmental Category: Europe: Specific Countries

HIST 7155 (3) Seminar: Early American History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Chronological Periods

HIST 7156 (3) Seminar: American Diplomatic History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7252 (3) Seminar: Early Modern Europe, 16th to 18th Centuries

Introduces graduate students to various research approaches and methods in early modern European historiography and requires them to produce a substantial and original research paper using both primary and secondary sources. Specific topics will vary.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Modern

HIST 7257 (3) Seminar: History of the American Frontier

Requisites: Restricted to History (HIST) graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 2

HIST 7326 (3) Seminar: U.S. Intellectual History

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical Courses 1

HIST 7415 (3) Graduate Seminar in Modern United States History

Introduces students to various research approaches and methods in modern U.S. historiography and requires them to produce a substantial and original research paper using both primary and secondary sources.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States:

Chronological Periods

HIST 7424 (3) Research Methods in Medieval/Early Modern European History

Introduces students to research skills needed to work with historical manuscripts. Students learn to read late medieval/early modern handwriting, explore CU's microfilmed collections of manuscripts, and write a research paper based on the manuscript materials.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Europe: Topical

HIST 7485 (3) Seminar: United States History, 1948-Present

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States:

Chronological Periods

HIST 7556 (3) Seminar: American Society and Thought

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: United States: Topical

Courses 1

HIST 7581 (3) Latin Paleography

Discusses the development of formal scripts from the late Roman Empire to the 15th century. Provides practice in identification, transliteration, and translation of medieval manuscripts.

Requisites: Restricted to graduate students only.

Recommended: Requisite reading knowledge of Latin.

Additional Information: Departmental Category: Europe: Ancient and Medieval

HIST 7800 (3) Research Seminar in Global History

Discusses various topics, themes and methods which inform the field of Global History. Readings and research papers will explore transnational and global historical interactions, including the exchange of ideas, peoples, commodities, and cultural practices. Geared toward graduate students in History, but students from other disciplines with graduate standing may enroll with instructor consent. Topic and content of course will vary depending on instructor.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to History (HIST) graduate students only.

HIST 7840 (1-3) Independent Study**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Methodological, Comparative, and Global**HIST 7841 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Ancient and Medieval**HIST 7842 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Modern**HIST 7843 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Specific Countries**HIST 7844 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: Europe: Topical**HIST 7845 (1-3) Independent Study****Repeatable:** Repeatable for up to 3.00 total credit hours.**Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Chronological Periods**HIST 7846 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 1**HIST 7847 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: United States: Topical Courses 2**HIST 7848 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Specific Regions**HIST 7849 (1-3) Independent Study****Requisites:** Restricted to graduate students only.**Additional Information:** Departmental Category: World Areas: Comparable and General**HIST 8990 (1-10) Doctoral Dissertation**

All doctoral students must register for no fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.**Additional Information:** Departmental Category: Methodological, Comparative, and Global

History - Master of Arts (MA)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students

understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular geographical area of study as well as an ability to situate that area of study in a larger global context.

All MA students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should carefully read the Master's Degree Requirements (p. 1030) section carefully. For more information, visit the department's Graduate Students webpage.

Requirements

Admission Requirements

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

As general preparation for graduate work in history, a broad liberal arts education, as well as a major in history, are desirable, though not specifically required. Candidates for graduate degrees may be required to pursue such fundamental courses in history as the department deems necessary to provide a suitable historical background.

Degree Requirements

The following are special departmental requirements. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Most MA coursework will be at the 5000, 6000 and 7000 levels. With the approval of a student's academic advisor and the endorsement of the department's director of graduate studies, a maximum of 6 credit hours of upper-division (4000-level) undergraduate history coursework may be counted toward the MA degree. All courses completed at CU Boulder must be taken in the Department of History, except for courses recommended by the advisor and approved by the director of graduate studies.

All MA students must complete the following:

Code	Title	Credit Hours
Required Courses		
HIST 5000	Historical Methods: Introduction to the Professional Study of History	3
A two-semester regional/national field colloquium sequence.		6
HIST 5106	Graduate Colloquium in United States History ("To 1865" and "Since 1865")	
HIST 5012	Graduate Colloquium in European History ("To 1789" and "Since 1789")	
HIST 5129	Colloquium in Modern Asian History ("South Asia" and "East Asia")	

Degree Plans

Plan I: Thesis Option

Thesis-track MA students must complete a total of 24 credit hours of coursework, plus 6 credit hours of MA thesis credit (HIST 6950). Of those, a minimum of 12 credit hours must come in each of a student's two fields, regional/national and global/thematic. A thesis must be successfully defended before a faculty committee as the final requirement for the degree.

Plan II: Non-Thesis Option

Non-thesis track MA students must complete 30 credit hours of coursework, including a minimum of three hours of 7000-level research seminar. Students must complete 12 credit hours in each of their two fields (regional/national and global/thematic). A final examination must be passed in the field of study before the degree is granted.

Language Requirement

For students working in fields of history that require the use of foreign languages, their advisory committees may require a demonstration of language proficiency.

History - Doctor of Philosophy (PhD)

Historians study the past, in all of its complexity, to better understand our contemporary world and the forces that created it. Historians analyze change over time, and they use archival and other primary-source evidence to build interpretations that explain change and put it into context. In seeking to understand historical subjects on their own terms, and by appreciating the diverse perspectives of past actors, students of history develop empathy even as they rigorously engage with the ethical dimensions of past human decisions and actions. When students understand the past, they recognize their power to shape the present and the future.

History faculty conduct research and teach courses in a wide range of eras—from ancient to modern times—and across most major world areas including Africa and the Middle East, South and East Asia, Europe and the Americas. History faculty also pursue multiple methodologies and approaches, including cultural, diplomatic, demographic, economic, environmental, ethnic, gender, intellectual, legal, political, religious, social and transnational history.

At CU Boulder, history graduate students are trained in the central principles and research methods that characterize the discipline of history through class instruction and professional development seminars. They also gain a thorough grounding in their particular

geographical area of study as well as an ability to situate that area of study in a larger global context.

All PhD students focus their studies in two equally weighted fields:

- a regional/national field (i.e., American/U.S. history, European history or Asian history)
- a global/thematic field, for which students are required to take a variety of courses that examine global and transnational history through specific thematic lenses

For the purposes of the comprehensive examination (portfolio), students are expected to work with their faculty advisors to craft subfields of emphasis within both the regional/national and global/thematic fields.

Students wishing to pursue graduate work in history leading to candidacy for an advanced degree should read the Doctoral Degree Requirements (p. 1031) section carefully. For more information, visit the department's Graduate Students (<https://www.colorado.edu/history/graduate-program/>) webpage.

Requirements

Admission

For purposes of admission to the graduate program, the general Graduate Record Examination is required and a score in the 85th percentile or above on the verbal component is generally expected.

Prerequisites

Students who wish to work toward the PhD degree in history must indicate knowledge of certain fields of history, acquaintance with the fundamental tools of historical scholarship and the ability to do original work. The PhD program does not require the completion of a master's degree, but directly admits those qualified applicants who hold an undergraduate history degree or who have completed appropriate undergraduate history preparation and who have been recommended by the graduate admissions committee.

Degree Requirements

A total of 45 post-baccalaureate credit hours, at least 36 of which must be taken at this university, and a dissertation are required for the degree. A minimum of one foreign language is required; however, students must be able to use those languages essential to research and advanced study in their respective fields. In addition, as required by the Graduate School, those students pursuing a PhD should complete a minimum of 30 credit hours of dissertation work beyond the minimum coursework requirement.

After completion of the coursework requirements, each candidate for the PhD degree must assemble and defend a PhD portfolio before proceeding to the dissertation stage of the program. The dissertation must be an original contribution to the discipline. An oral defense of the dissertation must be successfully completed in order for the degree to be conferred.

Residence

At least three years of graduate study, two of which must be spent in residence, are required for the PhD degree.

Integrative Physiology

The Department of Integrative Physiology offers a variety of graduate study opportunities that range from a coursework-only master's degree option to MS and PhD research-intensive options. To facilitate maximal flexibility in the design of a student's program, the Department has

established a minimum number of required courses that must be completed by all graduate students and the remainder of the program can be individualized to meet the long-term goals of the student.

A graduate degree in integrative physiology provides opportunities for careers in academia, industry, and the health professions. The placement list of PhD and MS graduates (<https://www.colorado.edu/iphy/graduate/placement-recent-phd-and-ms-graduates/>) indicates some of the jobs and educational programs that our graduate students have found after completion of the PhD or MS degree.

Course code for this program is IPHY.

Master's Degree

- Integrative Physiology - Master of Science (MS) (p. 1227)

Doctoral Degree

- Integrative Physiology - Doctor of Philosophy (PhD) (p. 1228)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

IPHY 5010 (1) Graduate Student Research Forum

Special topics spanning the broad scope of integrative physiology are covered in a seminar-style format. Presentations by current IPHY faculty are augmented by graduate student presentations of thesis and dissertation work.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5100 (2) Colloquium in Integrative Physiology

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5102 (2) Introduction to Physiology Genomics

Covers recent developments in genomics: a body of revolutionary new approaches that deal with the analysis of all the DNA sequence in the cell. Relies on a genomics text and student presentation/discussion aided by a study guide.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200.

IPHY 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and PSYC 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5262 (3) Application of Bioinformatics and Genomics

Explore public websites, databases, and bioinformatic tools that can be used for analysis of genomic data. These include NCBI Resources, genome databases, gene expression databases, tools for nucleotide and algorithms analyses and protein databases. Students develop a mini-grant proposal that is required to incorporate use of some of the tools covered.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Recommended: Prerequisite IPHY 5200 and IPHY 5102.

IPHY 5300 (3) Statistical Genetics for Complex Traits

Focuses on the methods of mapping complex disease genes in both population and family-based samples. Topics include both linkage and association analyses of qualitative and quantitative phenotypes.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5440 (4) Endocrinology

Introduces mammalian endocrine system. Provides a thorough analysis of chemical communication by hormones and related bioregulators with emphasis on the major endocrine systems such as the thyroid, gonad, pituitary and the brain. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab).

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4440

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5550 (3) Exercise Biochemistry

Examines the underlying biochemical mechanisms that are responsible for the physiological adaptations to short- and long-term dynamic exercise including carbohydrate, fat, and protein metabolism. The interaction of key biochemical alterations as it relates to disease (diabetes, obesity, and aging) and exercise will be addressed.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650 and one year of general chemistry (lecture + lab).

IPHY 5580 (3) Sleep Physiology

Describes the physiology, neurobiology, physiology and functions neurobiology of sleep and circadian rhythms; explains the impact of sleep, sleep deprivation, and circadian rhythms, as well as sleep and circadian disruptions and disorders on immune, endocrine, thermoregulatory, cardiovascular, respiratory, and neural systems; systems, as well as examines changes in sleep and circadian rhythms across the life span. The integrative nature of sleep and circadian rhythms in normal physiological and cognitive functions and their importance in health and disease processes will be emphasized. Department enforced prerequisite: statistics equivalent.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4580

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 5600 (3) Immunology

Studies the immune system, a multi-cellular system that functions to protect us from disease. Introduces concepts associated with the development and function of individual cells of the immune system (T-cells, B-cells, neutrophils, dendritic cells, macrophages), as well as their integrative roles in physiology and host defense.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4600

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisites one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab); IPHY 3470.

IPHY 5720 (4) Neurophysiology

Explores the function of the nervous system, including how the properties of neurons influence nervous system activity, how the nervous system controls the activity of muscles and how the sensory effects of muscle activity influence the function of the nervous system. Department enforced prerequisites: one year of general biology (lecture + lab) and one year of general chemistry (lecture + lab), IPHY 2800 (or equivalent); IPHY 3410.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4720

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Grading Basis: Letter Grade

IPHY 5730 (3) Integrative Motor Control

Investigates human motor control by integrating concepts from exercise physiology, biomechanics, and sport psychology. Applications are made to clinical and educational exercise contexts.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4730

Recommended: Prerequisites IPHY 3410 and IPHY 3470.

IPHY 5740 (3) Theory of Motor Skill Learning

Offers a critical analysis of motor learning theories, including Adam's closed loop theory, Schmidt's schema theory and the influence of contextual interference on learning and performance. Also covers feedback and practice organization. Projects and presentations required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4740

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

IPHY 5780 (3) Sleep, Circadian Rhythms, and Health

Examines the history of the fields of sleep and circadian rhythms; lifespan development of sleep and rhythms; observational, physiological, and clinical measures of sleep; screening for sleep and circadian disorders; associations between poor sleep and circadian misalignment and health; and evidenced-based sleep and circadian interventions/preventions in healthy and clinical samples. Dept. enforced requisite: one year of biology (lecture and lab); statistics course.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4780

IPHY 5800 (4) Advanced Statistics and Research Methods in Integrative Physiology

Introduces advanced statistical techniques important for analyzing data rising in biomedical research, including physiology. Statistical reasoning will be emphasized through problem solving and applications using statistical software packages.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 2800.

IPHY 5840 (1-6) Graduate Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 5880 (3) Advanced Data Analysis in Biomedical Research

Provides advanced training on statistics and scientific reasoning in laboratory and clinical research. Conceptual foundations of classical and modern statistical techniques is reviewed. Multiple class projects consist of written reports on statistical analysis of data representative of the student's field of interest. The use of statistical packages, primarily R, is required.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4880

Requisites: Requires prerequisite course of IPHY 5800 (minimum grade B).

Grading Basis: Letter Grade

IPHY 5900 (3) Data Literacy in Biomedical Research

Provides a platform to develop a deeper understanding of quantitative biomedical research, current trends, challenges, and limitations. The course complements graduate statistical training by introducing topics relevant to open science and data literacy, including reproducibility, data privacy challenges, and the importance of good data management. Challenges in advanced statistical data evaluation and analysis in biomedical research settings will be discussed.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 5800.

Grading Basis: Letter Grade

IPHY 6010 (1-3) Seminar

Presents special topics in integrative physiology.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6650 (3) Cellular Cardiovascular Physiology

Focuses on the cellular control of cardiac and smooth muscle contraction, at rest and in response to acute and chronic exercise. Addresses certain pathophysiological and physiological adaptive mechanisms.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisite IPHY 4650.

IPHY 6660 (3) Locomotion Energetics and Biomechanics

Critiques and discusses both classic and cutting edge scientific research in the area of terrestrial locomotion.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

Recommended: Prerequisites IPHY 4540 and IPHY 4650.

IPHY 6670 (2) Hypothesis Testing in Locomotion Biomechanics

Focuses on the scientific process including formulating and testing hypotheses in studies of locomotion. Students analyze primary articles to determine whether the studies tested hypotheses and to generate new hypotheses that logically follow from previous studies.

Requisites: Restricted to Integrative Physiology (IPHY) or Integrative Physiology Concurrent Degree (C-IPHY) graduate students only.

IPHY 6680 (3) Matlab for Physiological and Biomechanical Research

Introduces Matlab programming skills needed to write and modify programs for data acquisition and analysis, statistics, plotting, and simulation.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6830 (3) Professional Skills for the Research Scientist

Discusses grant and manuscript writing, scientific presentations, peer-review, setting up/directing a research laboratory, research ethics, mentoring and other professional skills.

Requisites: Restricted to Intergrative Physiology (IPHY) doctoral students only.

IPHY 6840 (1-3) Research Project

Involves a scholarly investigation of a selected topic using literature and/or experimental techniques. Advisor required.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 6950 (1-6) Master's Thesis

Must have 4 credit hours and may be repeated up to 6 total credits.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) graduate students only.

IPHY 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Requisites: Restricted to Intergrative Physiology (IPHY) doctoral students only.

Integrative Physiology - Master of Science (MS)

Physiology is the field of biology that deals with function in living organisms. The academic foundation of the department is the knowledge of how humans and animals function at the level of genes, cells, organs and systems. A graduate degree in the Department of Integrative Physiology at the University of Colorado Boulder provides opportunities for careers in academia, industry and the health professions.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU

Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Integrative Physiology - Bachelor of Arts (BA) (p. 407)

Requirements

Admission Requirements

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in integrative physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

Deficiencies

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

Course Requirements

Master's candidates entering the graduate program must complete 30 credits to graduate. They may select one of three options:

- Coursework only plan: 30 required credits to graduate
- Research project plan: 3 research project hours as part of the 30 required credits to graduate
- Thesis plan: 4 to 6 thesis hours as part of the 30 required credits to graduate

It is possible, however, to change from one option to another during the program of study.

Students must have a minimum cumulative grade point average of 3.0 in all graduate work taken, and must perform satisfactorily on the comprehensive exam.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
IPHY 5100	Colloquium in Integrative Physiology	2
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
Degree Plan Option		
Select the coursework-only (0 credits), research project (3 credits) or thesis (4-6 credits) option.		0-6
IPHY 6840	Research Project	
IPHY 6950	Master's Thesis	
Electives		
Elective coursework to fulfill the 30-credit minimum.		18-24
Total Credit Hours		30

Candidacy for Degree

Within the first semester of study, the student and mentor must prepare a program of study for the student. This program of study may be changed during the residence of the student with the approval of the mentor. It is the student's responsibility to transfer the program of study to the Application for Admission to Candidacy form required for graduation. The Application to Candidacy is due no later than ten weeks prior to defense of the thesis or research project. The original Application to Candidacy form should be submitted to the program assistant for review and approval.

Comprehensive Examination

All candidates are required to complete an examination (oral or written) covering the thesis or research project as well as coursework leading to the degree.

Integrative Physiology - Doctor of Philosophy (PhD)

The objectives of the doctoral program in the Department of Integrative Physiology at the University of Colorado Boulder are to:

- Provide an academic foundation for understanding how humans and other animals function at the level of genes, cells, tissues, organs and systems.
- Develop the professional skills required to become a research scientist.

Requirements

Admission Requirements

To obtain materials for application and for any additional information, visit the Integrative Physiology (<http://www.colorado.edu/intphys/grad/>) website.

Entering graduate students must have an undergraduate preparation equivalent to the basic core curriculum requirements in Integrative Physiology or departmental approval of their academic preparation for graduate study.

All graduate applicants must have an introductory course in statistics or research design. In addition, students should have the knowledge base that would be obtained by completing human physiology or comparative animal physiology lecture and lab courses.

Deficiencies

If the undergraduate preparation of a prospective graduate student is not adequate, the student may be allowed to pursue graduate study with the understanding that identified deficiencies will be completed. The graduate admissions committee will determine the nature and extent of these deficiencies.

Deficiencies in any area of the undergraduate major may be met by completing approved coursework in the subject at CU Boulder or at other institutions. All entering graduate students with deficiencies must satisfy all deficiencies within the first year of graduate study.

Required Courses and Semester Credit Hours

Code	Title	Credit Hours
Required Courses		
IPHY 5100	Colloquium in Integrative Physiology (2 academic-year semesters)	4
IPHY 5800	Advanced Statistics and Research Methods in Integrative Physiology	4
IPHY 6830	Professional Skills for the Research Scientist	3
Electives		
Elective coursework		19
Dissertation		
IPHY 8990	Doctoral Dissertation	30
Total Credit Hours		60

Advisory Committee

The student's advisory committee will consist of the student's mentor (chair of the committee), a faculty member in the student's interest area, and either the graduate coordinator or the chair of the department. The committee will assist the student in developing a program of study.

Preliminary Review

After the first academic year, which usually consists of 16 to 18 hours of coursework, the student completes the preliminary review process. The student's advisory committee will perform this review. The preliminary evaluation includes an evaluation of the student's academic status (minimum GPA of 3.0 is required), a detailed proposal of the student's program of study, written input from the student's mentor, and other pertinent materials deemed necessary by the committee.

The outcome of the preliminary review process can be one of three judgments: pass, fail, or probation. A student who passes may continue to pursue the doctoral degree. A student who fails will be dismissed from the doctoral program. A student on probation must complete any deficiencies determined by the committee before continuing to pursue the doctoral degree. Regardless of the outcome, the committee will submit a written report to the graduate coordinator for filing.

Comprehensive Examination

The comprehensive exam will be administered to the student within four semesters of entry into the doctoral program. The format of the exam, and the composition of the comprehensive exam committee will be determined by the mentor in consultation with the student. The examination will be based on a document that is about 25 pages in length and designed to demonstrate the student's comprehensive knowledge on a topic. The composition of the committee (a minimum of five members) is submitted to the Dean of the Graduate School for approval. Students are given two opportunities to pass the exam. The written portion of the exam is based on the student's coursework and requires demonstration of a broad-based knowledge in integrative physiology. Specific areas to be examined are determined by the mentor and the student.

Dissertation

Successful completion of the exam advances the student to doctoral candidate status, and the student may then begin a dissertation. All students must complete a formal written dissertation that conforms to the requirements established by the Graduate School at CU Boulder.

Final Examination

After completion of the dissertation, a final examination is scheduled. The exam consists of a written submission of the dissertation work and an oral defense. The final examination committee consists of at least five members, one of whom must be from outside the department. Three of the members must be Boulder campus resident faculty.

Jewish Studies

The Program in Jewish Studies, which is open to all students of all backgrounds, Jewish and non-Jewish, explores Jewish culture, history, religion, society, and thought from a broad, interdisciplinary perspective, training graduate students for diverse career paths.

With a faculty of engaged scholars and teachers working in fields across the humanities, arts, and social sciences, the Program supports the research, teaching, and professional development of graduate students pursuing a master's or doctoral degree in a diverse and growing array of departments, including history, religious studies, English, Germanic and Slavic languages and literature, linguistics, art and art history, and critical media practices. Students receive intensive mentoring through the graduate colloquium, and/or to complete a graduate certificate.

Course code for this program is JWST.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Sacks, Elias R. (https://experts.colorado.edu/display/fisid_151425/)
Director, Associate Professor; PhD, Princeton University

Wartell, Rebecca (https://experts.colorado.edu/display/fisid_164288/)
Instructor; PhD, Monash University (Australia)

Weber, Beverly Marie (https://experts.colorado.edu/display/fisid_144523/)
Associate Professor, Associate Faculty Director; PhD, University of Massachusetts at Amherst

Certificate

- Jewish Studies - Graduate Certificate (p. 1229)

Courses

JWST 5200 (3) Religion and Reproductive Politics in the United States

Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, WGST 5200

JWST 5348 (3) Graduate Topics in Jewish History

Covers topics in Jewish history from biblical beginnings to present day. Topics vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

JWST 5800 (3) Ethics, Medicine and the Holocaust: Legacies in Health and Society

Engages the disturbing fact that German health care professionals actively participated in the architecture and machinery of the Third Reich; explores the implications of these facts for contemporary health care ethics; expands beyond the Holocaust to consider the ramifications for our understanding of the problem of evil in general.

Equivalent - Duplicate Degree Credit Not Granted: JWST 4800

Grading Basis: Letter Grade

JWST 5900 (1-6) Graduate Independent Study in Jewish Studies

Working with a faculty member in Jewish Studies on an independent study research project provides graduate students with an opportunity to learn outside the formal classroom structure with individual direction from Jewish Studies faculty on a topic of mutual interest not offered in regularly scheduled classes. (Independent study may not be used to substitute for a regular course not being offered in a given term).

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Jewish Studies - Graduate Certificate

This certificate program allows graduate students across campus who are interested in Jewish studies to explore Jewish culture, history, society, and thought in a number of disciplines. Jewish studies also provides intensive mentoring of graduate research and writing projects through the Jewish Studies Graduate Student Colloquium.

Requirements

Admission Requirements

This graduate certificate is open to all currently matriculated graduate students. Students may apply for the graduate certificate at any point in their graduate career at CU. For more information, view the Jewish Studies website (<https://www.colorado.edu/jewishstudies/certificate/>).

Course Requirements

Successful completion of 3 graduate courses (9 credit hours) with a grade of B or higher from Jewish Studies' list of approved graduate courses, issued every semester, which comprises graduate courses crosslisted in the Program in Jewish Studies as well as approved courses taught by faculty in the Program in Jewish Studies. If you think a course is missing from this list, please contact the Director of Graduate Studies.

Students may petition the graduate studies committee to have a maximum of one graduate level course (including independent study courses) from outside this list, if that course contains significant Jewish Studies content and the student's completed work for that course is related to Jewish Studies.

Code	Title	Credit Hours
Approved Courses		
JWST 5200	Religion and Reproductive Politics in the United States	3
JWST 5348	Graduate Topics in Jewish History (Modern Childhood in Israel/Palestine)	3
JWST 5800	Ethics, Medicine and the Holocaust: Legacies in Health and Society	3
JWST 5900	Graduate Independent Study in Jewish Studies	1-6
ENGL 5109	Literature and Culture of the United States (Jewish American Literature)	3
GRMN 5410	Seminar: Topics in Early 20th Century German Society (Ruins of Modernity)	3
GRMN 5520	Seminar: Current Issues in German Literature and Media (Depending on Semester Syllabus)	3
HIST 5544	History of Yiddish Culture	3
HIST 6012	Readings in Modern European History (depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Global History of Genocide - depending on the semester syllabus)	3
HIST 6800	Readings in Global History (Microhistory - depending on the semester syllabus)	3
RLST 5170	God and Politics	3
RLST 5180	Is God Dead?	3
RLST 5190	Love and Desire	3
RLST 5260	Topics in Judaism	3
RLST 5820	Interdisciplinary Seminar on Religion (Mediterranean Religious Society)	3
RLST 5820	Interdisciplinary Seminar on Religion (Medieval Spain: Religion, Culture and Ethnicity)	3
RUSS 5401	The Russian Jewish Experience	3

Colloquium

The certificate requires two semesters of participation in the Program in Jewish Studies Graduate Student Colloquium, which meets three times per semester. Participation will be defined as attendance at two colloquium sessions in a given semester and presentation of a work in progress during that semester.

Linguistics

Linguistics is the study of all aspects of human language: how languages make it possible for us to construe another person's ideas and feelings; how and why languages are similar and different; how we develop different styles and dialects; what will be required for computers to understand and produce spoken language; and how languages are used in everyday communication as well as in formal settings. Linguists

try to figure out what it is that speakers know and do by observing the structure of languages, the way children learn language, slips of the tongue, conversations, storytelling, the acoustics of sound waves and the way people's brains react when they hear speech or read. Linguists also reconstruct prehistoric languages, and try to deduce the principles behind their evolution into the thousands of languages of the world today.

Purpose of the MA Program

The goal of the MA program in linguistics is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career and prepares students who decide to do so to apply to the PhD program at CU or at other institutions.

The main component of the MA program is 30 credits of coursework (at least 24 of them in linguistics). Students may also choose to write an MA thesis. Students on both the thesis plan and non-thesis plan must take and pass the comprehensive exam in the fourth semester of study in order to receive the MA degree. By meeting additional requirements, MA students may also obtain the MA with a certificate in cognitive science, human language technology, teaching English to speakers of other languages (TESOL), or culture, language and social practice (CLASP).

Purpose of the MS Program

The program is intended to provide students with a solid background in both theoretical linguistics and computer science. Graduates of the program will be specialists in the application of computers to the processing of natural languages, such as English, Chinese, Arabic and Urdu. The field of computational linguistics, also known as text analytics, natural language processing and informatics, is burgeoning and has become critical to the success of mainstream global businesses who compete for employees qualified to address these needs. The interdisciplinary nature of CLASIC is a significant market strength, because success in this developing field of natural language processing requires a strong background in both linguistics and computer science. The training will prepare students for careers in predictive text messaging, search engines, question-answering, interactive virtual agents and machine translation.

CLASIC students will complete a two-year degree (32 credits of approved graduate study in linguistics and computer science), including a 2-credit capstone project that will run in conjunction with an internship or CU based research project. As part of the capstone, students will be evaluated by their employer or industry project manager. Students will prepare a technical report on the completed project that the program directors and project leader will jointly evaluate. For more information, visit the department's Computational Linguistics (CLASIC) MS (<https://www.colorado.edu/linguistics/current-students/graduates/computational-linguistics-clasic-ms/>) webpage.

Purpose of the PhD Program

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations. We encourage doctoral students to begin engaging in research projects early, as these will contribute to developing the research program that will lead to the thesis project. Early projects not only lead to preliminary exam topics and/or publishable papers, but also enable students to pilot methods that will be usable for the dissertation project. Early projects

may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Doctoral students complete a core of required courses that provide a firm foundation in linguistic theory and methods. These courses are supplemented by advanced courses and individual work related to an area of specialization in a field where this department offers research strengths (e.g., description of Native American and Indigenous languages, sociolinguistics, interaction and grammar, computational linguistics, psycholinguistics, first-language acquisition, phonetics, laboratory phonology, functionally-oriented syntax). Doctoral students may complete the CLASP or human language technology certificates. Additionally, students may apply to pursue a joint PhD in linguistics and cognitive science.

Course codes for this program are LING and ESLG.

Master's Degrees

- Computational Linguistics, Analytics, Search and Informatics - Master of Science (MS) (p. 1593)
- Linguistics - Master of Arts (MA) (p. 1236)

Doctoral Degree

- Linguistics - Doctor of Philosophy (PhD) (p. 1235)

Certificates

- Cognitive Science - Graduate Certificate (p. 1236)
- Culture, Language and Social Practice - Graduate Certificate (p. 1237)
- Human Language Technology - Graduate Certificate (p. 1238)
- Teaching English to Speakers of Other Languages (TESOL) - Graduate Certificate (p. 1239)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bell, Alan
Professor Emeritus

Brown, Susan Windisch
Assistant Professor Adjunct; PhD, University of Colorado Boulder

Calder, Jeremy (https://experts.colorado.edu/display/fisid_159936/)
Assistant Professor; PhD, Stanford University

Cowell, James Andrew (https://experts.colorado.edu/display/fisid_107090/)
Professor; PhD, University of California, Berkeley

Farrelly, Raichle (https://experts.colorado.edu/display/fisid_166033/)
Senior Instructor, Lecturer; PhD, University of Utah

Fox, Barbara (https://experts.colorado.edu/display/fisid_106066/)
Professor; PhD, University of California, Los Angeles

Frajzyngier, Zygmunt (https://experts.colorado.edu/display/fisid_104000/)
Professor; PhD, University of Warsaw (Poland)

Gutiérrez Lorenzo, Ambrocio (https://experts.colorado.edu/display/fisid_168627/)
Assistant Professor; PhD, University of Texas, Austin

Hall, Kira (https://experts.colorado.edu/display/fisid_123111/)
Professor, Associate Chair; PhD, University of California, Berkeley

Haynie, Hannah (https://experts.colorado.edu/display/fisid_166099/)
Assistant Professor; PhD, University of California, Berkeley

Hodges, Adam
Assistant Professor Adjunct; PhD, University of Colorado

Hulden, Mans (https://experts.colorado.edu/display/fisid_154602/)
Associate Professor; PhD, University of Arizona

Menn, Lise
Professor Emerita

Michaelis-Cummings, Laura A. (https://experts.colorado.edu/display/fisid_105599/)
Professor, Chair; PhD, University of California, Berkeley

Narasimhan, Bhuvaneshwari (https://experts.colorado.edu/display/fisid_144863/)
Associate Professor; PhD, Boston University

Palmer, Alexis
Assistant Professor; PhD, University of Texas at Austin

Palmer, Martha (https://experts.colorado.edu/display/fisid_138162/)
Professor; PhD, University of Edinburgh (Scotland)

Raymond, Chase Wesley (https://experts.colorado.edu/display/fisid_158278/)
Associate Professor; PhD, University of California, Los Angeles

Rood, David
Professor Emeritus

Scarborough, Rebecca (https://experts.colorado.edu/display/fisid_143741/)
Associate Professor, Associate Chair; PhD, University of California, Los Angeles

Shay, Erin J. (https://experts.colorado.edu/display/fisid_110594/)
Assistant Professor Adjunct; PhD, University of Colorado

Stenzel, Kristine (https://experts.colorado.edu/individual/fisid_154889/)
Professor Adjunct; PhD, University of Colorado

Taylor, Allan R.
Professor Emeritus

Thomas-Ruzic, Maria L.
Senior Instructor Emerita

Courses

LING 5030 (3) Linguistic Phonetics

Introduces practical and theoretical aspects of phonetics. Provides training in recognition and production of speech sounds, and instruction on fundamentals of articulatory, acoustic, and auditory phonetics.

Requisites: Restricted to graduate students only.

LING 5140 (2) CLASIC Capstone

In this capstone to the Computational Linguistics, Analytics, Search and Informatics (CLASIC) professional master's program, we will review each student's internship project and prepare presentations and technical reports based on those internships. Students will present their work on the annual Industry Day or at an Advisory Board meeting to industry representatives. They will also submit a paper to a relevant conference or workshop. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5140

Requisites: Restricted to students in the Computational Linguistics, Analytics, Search and Informatics (CLSI) program only.

Recommended: It is recommended that this course be taken after the CLASIC internship has been completed.

LING 5200 (3) Introduction to Computational Corpus Linguistics

Covers computer methods for doing linguistics with on-line corpora. Includes extensive introduction (with lab) to the Python programming language, UNIX corpus tools, concordance programs, syntactic treebanks, propbanks, and corpora for discourse and phonology research.

Equivalent - Duplicate Degree Credit Not Granted: LING 4200

Requisites: Restricted to graduate students only.

LING 5300 (3) Research in Psycholinguistics

After a general introduction to issues and research methods in psycholinguistics (language production and comprehension, language and cognition, language acquisition), several major current research topics, such as models of speech production and theories of brain specialization for language, are explored.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one graduate-level course in LING, PSYC or CSCI.

LING 5410 (3) Phonology

Studies sound systems of language. Introduces both principles of organization of sound systems and major kinds of phonological structures found worldwide. Provides extensive practice in applying phonological principles to data analysis.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5030.

LING 5420 (3) Morphology and Syntax

Introduces principles of word formation and sentence structure. Covers major morphological and syntactic structures found in the world's languages, and methods for describing grammatical structures, and includes practice in analyzing data from a variety of languages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4420

Requisites: Restricted to graduate students only.

LING 5430 (3) Semantics and Pragmatics

Explores fundamental concepts of semantics and pragmatics, including theories of communication and meaning, representation, conversational implications, speech acts, and discourse structure.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 5570 (3) Introduction to Diachronic Linguistics

Familiarizes students with terminology, methods, and theories dealing with phenomena of language change through time.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 5610 (3) Pedagogical Grammar for Teachers of English to Speakers of Other Languages

Provides an introduction to the study of English grammar from the perspective of the nonnative learner and user of English. The focus is on understanding the form, meaning, and use of grammatical constructions and on how to teach these constructions in an ESL/EFL context.

Equivalent - Duplicate Degree Credit Not Granted: LING 4610

Requisites: Restricted to graduate students only.

LING 5620 (3) Teaching Second Language (L2) Oral Skills and Communication

Provides teaching and learning principles and practices for developing nonnative speakers' oral English proficiency and intercultural communication skills. Examines the sound system of American English (including prosody), listening and pronunciation, lexical considerations, and discourse functions and grammar, and how these contribute to speaking fluency, accuracy and communicative effectiveness. Focuses on teaching applications and includes one-on-one sessions with English learners.

Equivalent - Duplicate Degree Credit Not Granted: LING 4620

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 3100 or LING 5030 and LING 5410.

Grading Basis: Letter Grade

LING 5622 (3) Statistical Analysis for Linguistics

Aims to acquaint students with the fundamentals of quantitative analysis in linguistics and provide a practical introduction to the R statistical computing environment. Topics that will be covered include examining and manipulating data, tests for independence, regression modeling, mixed models, measures of association, and data visualization. It is suitable for students with no prior experience with statistics or statistical software packages.

Equivalent - Duplicate Degree Credit Not Granted: LING 4622

LING 5630 (3) TESOL and Second Language Acquisition: Principles and Practices

Provides an overview of methods and materials for teaching English as an additional language, along with opportunities for students to observe, discuss and analyze these in relation to language teaching principles, linguistic considerations, and global and local contexts. Aimed primarily at the teaching of English to nonnative speaking adults, the course also addresses second and foreign language teaching generally.

Equivalent - Duplicate Degree Credit Not Granted: LING 4630

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5610 or LING 5620.

Grading Basis: Letter Grade

LING 5700 (3) Conversation Analysis and Interactional Linguistics

Provides an introduction to the theories and methods of Conversation Analysis (CA) and Interactional Linguistics (IL), which aim to uncover the procedural infrastructure of language use in social interaction.

The course emphasizes hands-on experience in analyzing naturally-occurring interactional data. Topics may include: turn-taking, sequence and preference organization, repair, reference, epistemics, and identity.

Equivalent - Duplicate Degree Credit Not Granted: LING 4700

Grading Basis: Letter Grade

LING 5800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 5832 (3) Natural Language Processing

Explores the field of natural language processing as it is concerned with the theoretical and practical issues that arise in getting computers to perform useful and interesting tasks with natural language. Covers the problems of understanding complex language phenomena and building practical programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 5832

Requisites: Restricted to graduate students only.

LING 5900 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 5910 (1-3) TESOL Practicum

Provides observation and supervised teaching experiences in classroom and other contexts involving the teaching of English to speakers of other languages, especially adults and young adult learners in settings outside K-12. Meetings provide opportunities to debrief and to consult on teaching practice; help students connect theory, methods and practice; and support a professional teaching portfolio process.

Equivalent - Duplicate Degree Credit Not Granted: LING 4910

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite course of LING 4630 or LING 5630 (minimum grade C). Restricted to graduate students only.

Recommended: Prerequisite LING 4610 or LING 5610.

LING 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

LING 6300 (3) Topics in Language Use

Discusses current issues and research in a selected area related to language use and function. Sample topics include conversational interaction, language policy, language content, and sociolinguistic variation.

Requisites: Restricted to graduate students only.

LING 6310 (3) Sociolinguistic Analysis

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary sociolinguistic analysis, with special emphasis on linguistic variation, diversity and change.

Requisites: Restricted to graduate students only.

LING 6320 (3) Linguistic Anthropology

Serves as an advanced introduction to the empirical and theoretical foundations of contemporary linguistic anthropology, with special emphasis on the ways in which culture and society emerge semiotically through language and discourse.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6320

Requisites: Restricted to graduate students only.

LING 6450 (3) Syntactic Analysis

Introduces the major constructs used by formal theories of syntax to capture the relationship between meaning and syntactic form and uses data from diverse languages to explore the universality of these constructs.

Requisites: Restricted to graduate students only.

LING 6500 (3) Issues in Indigenous Languages

Addresses socio-cultural issues concerning indigenous languages, including human rights, intellectual property, language endangerment and maintenance, identity, linguistic relativity, sense of place.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 6500

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

LING 6510 (3) Language Structures

Surveys the structure of one or more languages, emphasizing understanding how parts of the language interact. Designed to supplement courses in which parts of languages are used to illustrate theoretical claims.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 6520 (3) Topics in Comparative Linguistics

Students compare and contrast selected structures of languages treated from a typological, genetic, or a real perspective. No special prior knowledge of the subject language is required.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 6560 (3) Language Acquisition

Theories and research methods in first-language acquisition of phonology, morphology, syntax, semantics, and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5430.

LING 6632 (3) Machine Learning and Linguistics

Is an introduction to machine learning, with a focus on linguistic applications. It is oriented toward students who want to understand the basics of machine learning and apply well-known techniques to address problems related to language and linguistics. The main goal is to achieve a practical grasp of the fundamental and most successful concepts in machine learning and to be equipped with techniques to apply this knowledge in linguistic domains. The course is also intended to provide a perspective on natural language acquisition and learning; namely, insight into what types of language acquisition problems are truly difficult, and what types of learning problems can be solved by fairly straightforward pattern recognition techniques.

LING 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6861

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

LING 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

LING 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7030 (3) Phonetic Theory and Analysis

Provides students with the practical skills and the conceptual framework to do independent research in phonetics (or in other areas relying on phonetic data). Introduces current and traditional issues in phonetic research (both experimental and theoretical) and gives training in analytical methods.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5030 and LING 5410.

LING 7100 (3) Field Methods 1

Introduces the process of discovering structure of a language from data obtained directly from its speakers. Emphasizes effectiveness in the field context, rapid recognition of structural features, and preliminary formulation using computational tools.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7310 (3) Social Semiotic Theory

Semiotics is the study of signs, how they are used, and how they are interpreted. What is a sign? What are the components of a sign? How do people use signs in social and linguistic practice and what purpose do these signs serve? What are the connections between objects and social meanings and how do these connections arise and transform? How do social meanings of signs stem from and transform social and cultural practice more broadly? This course will engage with key topics and concepts in the study of semiotic theory; e.g., indexicality, iconicity, enregisterment, embodiment, agency, and how these topics bear on research in sociolinguistics and linguistic anthropology.

Recommended: Prerequisite LING 6310 or LING 6320.

LING 7350 (3) Language and Gender in Cultural Perspective

Examines organizations of language and gender in a variety of societies and cultures from the perspectives of sociolinguistics, linguistic anthropology, and socially-oriented discourse analysis.

Requisites: Restricted to graduate students only.

LING 7410 (3) Phonological Theory

Phonetic and morphophonological representations: distinctive features, segments, prosodic structures, morphological structures. Phonological processes and their interaction. Naturalness conditions.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5410.

LING 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project. Department enforced prerequisites: CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

LING 7420 (3) Syntactic Theory

Covers various topics in syntactic theory.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5420.

LING 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506.

LING 7430 (3) Semantic Theory

Current developments in the theory of linguistic semantics. Topics include truth-conditional theories, generative linguistic theories, semantic theories of communicative competence and integration of these theories in development of a combined theory of semantics and pragmatics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite LING 5430.

LING 7565 (3) Computational Phonology and Morphology

Surveys of the main approaches and central questions related to computational modeling and learning of morphology and phonology. We consider questions related to learnability of phonology/morphology, machine learning implementations, and linguist-driven grammar modeling.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7565

Recommended: Prerequisites LING 5410 and LING 5420.

LING 7570 (3) Advanced Diachronic Linguistics

Presents theories of language change. Discusses mechanisms of language change, its trajectories over linguistic categories and items and its relation to theories of grammar and of language variation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites LING 5410 and LING 5420 and LING 5570.

LING 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

LING 7800 (3) Open Topics in Linguistics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors. Contact the department office for information.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 7900 (1-5) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

LING 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Linguistics - Doctor of Philosophy (PhD)

The goal of the linguistics doctoral program is to prepare graduates to design and conduct original, empirically based research within a theoretical framework. Doctoral students prepare for careers in academic research and teaching or applied work in industry or other organizations.

We encourage doctoral students to begin engaging in research projects early, as this engagement contributes to the development of the research program that will lead to the thesis project. Early projects may also lead to preliminary exam topics and/or publishable papers, and importantly, they may enable students to pilot the methods they'll use for the dissertation project. Projects may be extensions of coursework and may involve a faculty advisor other than the thesis advisor.

Students should select a specialization and begin their own research as early as possible. The department offers specializations in:

- sociolinguistics
- phonetics
- semantics
- syntax
- morphology
- laboratory phonology
- conversation analysis
- historical linguistics
- typological comparison
- Native American and Indigenous linguistics

- linguistic anthropology
- psycholinguistics
- corpus linguistics
- language development
- cognitive linguistics
- computational modeling of language knowledge

Students wishing to pursue graduate work in linguistics should carefully read the Doctoral Degree Requirements (p. 1031) section of this catalog and the detailed degree requirements available from the department office.

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree. They should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level. GRE scores are optional. TOEFL or IELTS scores are normally required from foreign applicants.

To be admitted to the PhD program, students must have completed coursework equivalent to 4 of the following:

Code	Title	Credit Hours
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3

Degree Requirements

Thirty credit hours of coursework are normally required for the PhD. Four linguistics courses are required at the 6000 level or above, and the remaining six courses may include up to four courses in other departments appropriate to the specialization.

Code	Title	Credit Hours
------	-------	--------------

Required Courses

Both of the following courses must be taken:

LING 6450	Syntactic Analysis	3
LING 7100	Field Methods 1	3

Select two of the following linguistics courses:

LING 7030	Phonetic Theory and Analysis	6
LING 7310	Social Semiotic Theory	
LING 7410	Phonological Theory	
LING 7420	Syntactic Theory	
LING 7430	Semantic Theory	
LING 7570	Advanced Diachronic Linguistics	

Electives

Select six courses appropriate to the specialization, up to four of which can be from other departments.

18

Total Credit Hours**30****Language Requirement**

All PhD students must demonstrate the ability to read linguistic literature in a language other than English.

Preliminary Examination

As a PhD preliminary examination, students submit a data-based research paper early in the second year in the PhD program.

Comprehensive Examination

The university comprehensive examination requirement is completed in two steps: the completion of a synthesis paper followed by the defense of a dissertation prospectus.

Doctoral Thesis Credits

To complete the requirements for the PhD degree, a student must register for a minimum of 30 dissertation credit hours. These are distinct from the 30 credit hours of coursework that are required for the PhD. A student may not register for more than 10 dissertation credit hours in any one semester. A minimum of 5 credits must be taken each semester following passing of the comprehensive exam.

Linguistics - Master of Arts (MA)

The goal of this master's program is to provide students with sufficient knowledge of linguistics to enable them to work in industry and organizations, where knowledge of linguistics helps in problem solving. The program also helps students determine in a relatively short time whether they want to make research in linguistics a lifelong career, and prepares students who decide to do so to apply to the PhD program at CU (p. 1235) or at other institutions.

Students wishing to pursue graduate work in linguistics should carefully read the master's degree requirements (p. 1030) section of this catalog, as well as the detailed degree requirements available on the departmental website (<https://www.colorado.edu/linguistics/current-students/graduates/masters-program/>).

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated Bachelor's degree(s): Linguistics - Bachelor of Arts (BA) (p. 443)

Requirements

Admission Requirements

Applicants should hold a recognized baccalaureate degree, and should have considerable knowledge of a language other than their native language. This knowledge may have been gained by formal study or by use of the language in a country, community or institution where it is the usual means of communication. The department may require formal study of a foreign language by graduate students whose proficiency in this area is less than the equivalent of the college junior level.

GRE scores are optional. TOEFL or IELTS scores are normally required from international applicants.

Degree Requirements

The master's degree calls for a minimum of three semesters of study, though most students require four semesters. Courses are normally taken at the 5000 level or above.

All students must pass a comprehensive written examination covering general topics in linguistics.

Degree Plans

Plan I: Thesis Option

Students in this plan must complete a total of 30 credit hours, at least 24 of which must be in linguistics, including 4–6 thesis credit hours.

Code	Title	Credit Hours
Required Courses		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
Electives		
Additional courses to fulfill the 30-credit minimum.		9-11
Thesis		
LING 6950	Master's Thesis	4-6
Total Credit Hours		30

Plan II: Non-Thesis

Students in this plan must complete a total of 30 credit hours of coursework, at least 24 of which must be in linguistics.

Code	Title	Credit Hours
Required Courses		
LING 5030	Linguistic Phonetics	3
LING 5410	Phonology	3
LING 5420	Morphology and Syntax	3
LING 5430	Semantics and Pragmatics	3
LING 5570	Introduction to Diachronic Linguistics	3
Electives		
Additional courses to fulfill the 30-credit minimum.		15
Total Credit Hours		30

Cognitive Science - Graduate Certificate

Tailored to the individual student's area of interest, the cognitive science curriculum for this certificate is designed to provide broad as well as in-depth training in the cognitive sciences.

Graduate students in good standing in one of the following participating academic units may apply to earn a graduate certificate in cognitive science:

- Psychology and Neuroscience
- Philosophy
- Computer Science
- Linguistics
- Speech, Language, and Hearing Sciences
- Education
- Integrative Physiology
- Architecture and Planning
- Information Science

Earning such a certificate can significantly enhance a student’s academic knowledge and career choices.

To learn more about the certificate, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>).

Requirements

The graduate certificate consists of course requirements only.

Code	Title	Credit Hours
Required Courses		
PSYC 6200/ CSCI 6402/ EDUC 6504/ LING 6200/ PHIL 6310	Issues and Methods in Cognitive Science	3
PSYC/LING 7775/CSCI 7772/ EDUC 7775/SLHS 7775/PHIL 7810	Topics in Cognitive Science (2 semesters, 1 credit per semester)	2
Electives		
Three cognitive science courses of 2 credit hours or more		6
One interdisciplinary course		2-3
Additional courses to complete the credit-hour requirement from at least two different departments outside of the student’s home department		

To learn more about the program, visit the department’s Cognitive Science Graduate Certificate (<https://www.colorado.edu/ics/graduate-programs/cognitive-science-graduate-certificate/>) webpage.

Culture, Language and Social Practice - Graduate Certificate

CU Boulder is home to the Graduate Certificate in Culture, Language and Social Practice (CLASP). This program provides an interdisciplinary forum on language and society for CU students and faculty. This is facilitated through regular colloquia on the subject of language and society, as well as the diverse course offerings in the CLASP graduate certificate program.

The CLASP program brings cohesion to empirical and theoretical research currently conducted on campus in varied analytic traditions that focus on the study of culture, language and social practice. These traditions include sociolinguistics, linguistic anthropology, literacy, bilingualism, second language acquisition, language endangerment and revitalization, narrative studies, symbolic interactionism, language

variation and change, ethnography of speaking and diverse forms of discourse analysis, such as conversation analysis, critical discourse analysis, interactional sociolinguistics and multimodal discourse analysis.

The program currently has over twenty affiliated faculty members from a variety of schools and departments, among them anthropology, communication, education, French and Italian, German and Slavic, linguistics, political science, Spanish and Portuguese, sociology and speech, language and hearing science.

For more information on the application process and program requirements, visit the CLASP: Culture, Language & Social Practice (<http://www.colorado.edu/clasp/>) website.

Requirements

Twelve credit hours of graduate-level coursework are required for the graduate certificate in culture, language and social practice. Three credit hours must come from the list of approved core courses (Group A); six credit hours must come from the list of elective courses (Group B); and the three remaining credit hours must come from a course in either social theory or research methods (Group C), subject to approval by the CLASP curriculum committee. The course chosen to fulfill the Group C requirement, while not necessarily language-related, should be a methodological or theoretical course that informs the student’s research interests in the relationship between language and society. *At least one of the three selected courses from Lists A and B must be from outside the student’s home department.*

A student may opt to substitute a CU Boulder MA thesis on the subject of culture, language and social practice for one of the Group B courses, if approved by the curriculum committee, which is constituted by the CLASP faculty advisor and CLASP director. An independent study may also be substituted for a formal course, if approved by the committee.

A number of new and unlisted seminars on the subject of language and society are taught within individual departments each year. Students should check with the CLASP program director each semester for a list of additional courses that fulfill the requirements. Students wanting to substitute an unapproved course for one of the courses listed below must receive approval from the CLASP curriculum committee.

The acquisition of a CLASP certificate is dependent on the successful completion of all courses in the academic curriculum with a grade of B or higher.

Required Courses and Credits

Code	Title	Credit Hours
Group A: Core Courses		
Students will choose one core course from the list below.		3
ANTH/LING 6320	Linguistic Anthropology	
COMM 6410	Discourse Analysis	
COMM 6445	Intercultural Communication	
COMM 6460	Ethnography of Communication	
LING 5700	Conversation Analysis and Interactional Linguistics	
LING 6310	Sociolinguistic Analysis	
LING 6320	Linguistic Anthropology	
EDUC 5615	Second Language Acquisition	

EDUC 5635	Education and Sociolinguistics
SPAN 5450	Introduction to Hispanic Linguistics
Group B: Elective Courses	
Students will choose two elective courses. Recently offered courses that fulfill this requirement include: ¹	6
ANTH 6320	Linguistic Anthropology
COMM 5210	Readings in Communication Theory
COMM 5435	Readings in Community and Social Interaction
COMM 6410	Discourse Analysis
COMM 6445	Intercultural Communication
COMM 6460	Ethnography of Communication
EDUC 5425	Introduction to Bilingual/Multicultural Education
EDUC 5455	Literacy for Linguistically Different Learners
EDUC 5615	Second Language Acquisition
EDUC 5635	Education and Sociolinguistics
EDUC 5465	Introduction to ELD/Bilingual and Special Education
EDUC 5635	Education and Sociolinguistics
EDUC 8615	Language Issues in Education Research
LING 6310	Sociolinguistic Analysis
LING 6320	Linguistic Anthropology
LING 7350	Language and Gender in Cultural Perspective
SPAN 5450	Introduction to Hispanic Linguistics
Group C: Courses in Social Theory and Research Methods	
Choose one course in either social theory or research methods that is appropriate for research goals, in consultation with their CLASP faculty advisor. ²	3
Examples of social theory courses include:	
ANTH 5530	Theoretical Foundations of Sociocultural Anthropology
ANTH 5605	Anthropology of Neuroscience
ANTH 5610	Medical Anthropology
ANTH 5730	Latin American Politics and Culture through Film and Text
ANTH 5745	Science, Technology and Society
ANTH 5755	Cultures of Expertise: Science, Power and Knowledge
ANTH 5780	Core Course-Cultural Anthropology
ANTH 5785	Advanced Seminar in Cultural Anthropology
ANTH 7010	Seminar: Contemporary Theory in Cultural Anthropology
ANTH 7620	Seminar: Ethnography and Cultural Theory
COMM 6360	Social and Cultural Theory
EDUC 5075	Sociology of Education
EDUC 6325	Anthropology of Education
GEOG 6742	Seminar: Cultural Geography
HIST 6330	History of Sex and Sexuality
PSCI 7004	Seminar: Political Theory

SOCY 5201	Graduate Seminar in Sociological Theory
SOCY 6041	Cultural Sociology
SOCY 7006	Sociology of Sex and Gender
SOCY 7036	Feminist Theory
SOCY 7131	Seminar in Social Psychology
WGST 5000	
WGST 5001	Advanced Topics in Gender and Sexuality Studies (AH)
WGST 5002	Advanced Topics in Gender and Sexuality Studies (SS)
WGST 5400	Critical Inquiries in Transgender Studies
WGST 6090	Feminist Theories
WGST 6290	Special Topics in Gender and Sexuality Studies
WGST 6796	Queer Theories
Examples of seminars in methods include:	
ANTH 7000	Seminar: Current Research Topics in Cultural Anthropology
ANTH 7300	Seminar: Research Methods in Cultural Anthropology
COMM 6030	Qualitative Research Methods
COMM 6455	Community-based Research Methods
EDUC 7346	Ethnographic Methods in Educational Research
EDUC 8250	Qualitative Methods I
EDUC 8260	Qualitative Methods II
SOCY 5111	Data 1: Introduction to Social Statistics
SOCY 6111	Data 2: Data Analysis
SOCY 6121	Qualitative Methods
SOCY 7026	Feminist Research Methods
SOCY 7121	Qualitative Analysis
WGST 6190	Feminist Methodology

Total Credit Hours **12**

¹ The courses listed in this category have been offered at CU Boulder in the recent past. They are not necessarily offered on a regular basis, and they often have rotating faculty members and are subject to change. Students may also substitute an approved independent study with a CLASP faculty member as one of the required electives.

² This is a working list of possible courses offered in these areas at CU Boulder, as listed in the catalog. Note that these are not CLASP-approved courses. Unlike the courses specified in Categories A and B, these courses are listed as suggestions only, to provide examples of the kinds of seminars that might be used to fulfill this requirement. Because many of these courses are taught by revolving faculty members who are not CLASP-affiliated, the course content is subject to change from semester to semester. In addition, some of these seminars have prerequisites or limit student enrollment on the basis of disciplinary background.

Human Language Technology - Graduate Certificate

The explosive growth of the web and the vast improvements in computing power in the last decade have led to a strong need for education and research in human language technology. Human language

technology is an interdisciplinary field that includes the following key technological and scientific areas:

- Computer speech recognition and understanding
- Natural language understanding and generation
- Text-based information retrieval
- Web-based dialog agents

CU Boulder's interdisciplinary certificate in human language technology, offered jointly by the Institute of Cognitive Science; the Department of Computer Science; the Department of Linguistics; and the Department of Speech, Language and Hearing Sciences, provides a rich and broad background for students interested in computational tools for human language processing.

To learn more about the certificate, visit the Institute of Cognitive Science (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>) website.

Required Courses and Credits

The curriculum for the certificate consists of *five* different courses, as shown in the course table below. Three of these five required courses must be taken at the graduate level.

Code	Title	Credit Hours
Programming		
One semester of programming required (waived for those with programming background).		
CSCI 1300	Computer Science 1: Starting Computing	4
Core Courses		
Choose three core courses from the list below; at least two must be outside the student's home department and college.		9
<i>Speech and Language Technologies</i>		
CSCI 5832	Natural Language Processing	
CSCI 6302	Speech Recognition and Synthesis	
<i>Human Communication</i>		
SLHS 2010	Science of Human Communication	
LING 5030	Linguistic Phonetics	
LING 5420	Morphology and Syntax	
LING 7800	Open Topics in Linguistics	
Optional Course		
Choose one from the optional course list (or two if programming was waived). Extra courses from the core list (beyond the required three) can also be counted as optional courses. ¹		3
Total Credit Hours		16

¹ For a full list of core and optional courses, visit the ICS website (<https://www.colorado.edu/ics/graduate-programs/human-language-technology-certificate/>).

Teaching English to Speakers of Other Languages - Graduate Certificate

The graduate certificate in Teaching English to Speakers of Other Languages (TESOL) is a 14-15 credit post-baccalaureate program. It is designed for individuals who wish to gain, or continue to develop, the professional knowledge, skills and dispositions that qualify them to teach learners of English as an additional language in the U.S. and/or abroad. This graduate certificate prepares teacher candidates to teach young learners, adolescents and adults in a number of contexts, domestic and abroad, including community-based programs, private language institutes, intensive English programs and after school programs.

Coursework prepares students with foundational knowledge in the structure of the English language including the grammar, phonological systems and concepts related to sociopragmatics, semantics and morphology. Required linguistics (TESOL) courses prepare students to design activities and lesson plans that target specific learning objectives fostering the development of English language learners' macro- and micro-language skills (macro: listening, speaking, reading, writing; micro: fluency, pronunciation, vocabulary, comprehension). Field placements (praxis) allow for students to develop their identities as reflective practitioners as they make connections between theory and classroom practice.

Requirements

Admission Requirements

Students interested in the graduate certificate should complete the application form on the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website. This is an in-house form that the department uses to admit and track students in the program. Interested post-baccalaureate degree and non-degree students may contact the Academic Program Director Dr. Rai Farrelly (Raichle.Farrelly@colorado.edu?subject=TESOL%20BA%20Certificate) with any questions. The Director will also advise students on their course plans and successful certificate completion.

Note: Non-matriculated students will need to enroll through Continuing Education (<https://ce.colorado.edu/>) (CE) to acquire a student ID and an Identikey, which provides access to course enrollment, a student email account, tuition bill and more. Learn more about enrollment options for graduate certificate programs at the Department of Linguistics (<https://www.colorado.edu/linguistics/graduate-certificate-tesol/>) website.

Required Courses and Credits

To earn the certificate, students must meet the following course requirements and receive a grade of B- or better in all certificate courses.

Code	Title	Credit Hours
Required Linguistics Courses with a TESOL Focus		
LING 5630	TESOL and Second Language Acquisition: Principles and Practices	3
LING 5610	Pedagogical Grammar for Teachers of English to Speakers of Other Languages	3
LING 5620	Teaching Second Language (L2) Oral Skills and Communication	3

Required Education Course

EDUC 5615	Second Language Acquisition	3
Elective Course		
Choose one:		2-3
COMM 6445	Intercultural Communication	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
LGTC 5010	Second Language Acquisition and Language Education (Summer, online) ¹	
LGTC 5031	Emerging Technology for Language Learning (Language Technology Tools in Practice - Fall, online) ¹	
LGTC 5031	Emerging Technology for Language Learning (Emerging Technology for Language Teaching - Spring, online) ¹	
LGTC 5035	Online and Blended Language Instruction (Fall, online) ¹	
LING 5910	TESOL Practicum	

Total Credit Hours **14-15**

¹ LGTC courses are shorter, 2-credit courses taught online. Students pursuing the graduate certificate alongside the MA in Linguistics will be one credit short by taking an LGTC course as an elective.

Mathematics

PhD Program

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes and topology. For more information, see the Department of Mathematics (<https://www.colorado.edu/math/>) website.

MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the bachelor's-accelerated master's (p.) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Course code for this program is MATH.

Master's Degree

- Mathematics - Master of Arts (MA) (p. 1246)

Doctoral Degree

- Mathematics - Doctor of Philosophy (PhD) (p. 1246)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MATH 5000 (3) Foundations of Mathematics

Focuses on a complete deductive framework for mathematics and applies it to various areas. Presents Goedel's famous incompleteness theorem about the inherent limitations of mathematical systems. Uses idealized computers to investigate the capabilities and limitations of human and machine computation. Department enforced prerequisites: MATH 2130 and MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4000

Requisites: Restricted to graduate students only.

MATH 5001 (3) Analysis 2

Provides a rigorous treatment of infinite series, sequences of functions and an additional topic chosen by the instructor (for example, multivariable analysis, the Lebesgue integral or Fourier analysis).

Equivalent - Duplicate Degree Credit Not Granted: MATH 4001

Requisites: Restricted to graduate students only.

MATH 5030 (3) Intermediate Mathematical Physics 1

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory, and Fourier analysis. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5030

Requisites: Restricted to graduate students only.

MATH 5040 (3) Intermediate Mathematical Physics 2

Surveys classical mathematical physics, starting with complex variable theory and finite dimensional vector spaces. Discusses topics in ordinary and partial differential equations, the special functions, boundary value problems, potential theory and Fourier analysis. Department enforced prerequisite: MATH 5030.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 5040

Requisites: Restricted to graduate students only.

MATH 5120 (3) Introduction to Operations Research

Studies linear and nonlinear programming, the simplex method, duality, sensitivity, transportation and network flow problems, some constrained and unconstrained optimization theory, and the Kuhn-Tucker conditions, as time permits.

Equivalent - Duplicate Degree Credit Not Granted: APPM 4120 and MATH 4120 and APPM 5120

Requisites: Restricted to graduate students only.

Recommended: Prerequisites APPM 3310 OR MATH 2130 OR MATH 2135 or equivalent.

MATH 5140 (3) Abstract Algebra 2

Explores some topic that builds on material in MATH 3140. Possible topics include (but are not limited to) Galois theory, representation theory, advanced linear algebra or commutative algebra. Department enforced prerequisite: MATH 3140.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4140

Requisites: Restricted to graduate students only.

MATH 5150 (3) Linear Algebra

Highlights vector spaces, linear transformations, eigenvalues and eigenvectors, and canonical forms. Department enforced prerequisite: MATH 2130 or MATH 2135. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5200 (3) Introduction to Topology

Introduces the basic concepts of point set topology. Includes topological spaces, metric spaces, homeomorphisms, connectedness and compactness.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4200

MATH 5230 (3) Differential Geometry of Curves and Surfaces

Introduces the modern differential geometry of plane curves, space curves, and surfaces in 3-dimensional space. Topics include the Frenet frame, curvature and torsion for space curves; Gauss and mean curvature for surfaces; Gauss and Codazzi equations, and the Gauss-Bonnet theorem.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4230

Requisites: Restricted to graduate students only.

MATH 5240 (3) Hilbert Spaces and the Mathematics of Quantum Mechanics

Provides an introduction to Hilbert spaces and their application in quantum mechanics. The primary goal is to prove and understand the so-called spectral theorem, which is crucial for the formulation of quantum mechanics. In addition, some examples from physics will be discussed, such as the quantum harmonic oscillator and the spectrum of the hydrogen atom.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4240

Requisites: Restricted to graduate students only.

MATH 5330 (3) Fourier Analysis

The notion of Fourier analysis, via series and integrals, of periodic and nonperiodic phenomena is central to many areas of mathematics. Develops the Fourier theory in depth and considers such special topics and applications as wavelets, Fast Fourier Transforms, seismology, digital signal processing, differential equations, and Fourier optics. Department enforced prerequisite: MATH 4001.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4330

Requisites: Restricted to graduate students only.

MATH 5430 (3) Ordinary Differential Equations

Introduces theory and applications of ordinary differential equations, including existence and uniqueness theorems, qualitative behavior, series solutions, and numerical methods, for scalar equations and systems. Department enforced prerequisites: MATH 2130 and MATH 3001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5440 (3) Mathematics of Coding and Cryptography

Gives an introduction, with proofs, to the algebra and number theory used in coding and cryptography. Basic problems of coding and cryptography are discussed; prepares students for the more advanced ECEN 5682.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4440

Requisites: Restricted to graduate students only.

MATH 5470 (3) Partial Differential Equations

Studies initial boundary and eigenvalue problems for the wave, heat and potential equations. Solution by separation of variables, Green's function, and variational methods. Department enforced prerequisite: MATH 3430 or MATH 5430. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4470

Requisites: Restricted to graduate students only.

MATH 5510 (3) Introduction to Probability Theory

Studies axioms, combinatorial analysis, independence and conditional probability, discrete and absolutely continuous distributions, expectation and distribution of functions of random variables, laws of large numbers, central limit theorems, and simple Markov chains if time permits.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4510

Requisites: Restricted to graduate students only.

MATH 5520 (3) Introduction to Mathematical Statistics

Examines point and confidence interval estimation. Principles of maximum likelihood, sufficiency, and completeness: tests of simple and composite hypotheses, linear models, and multiple regression analysis if time permits. Analyzes various distribution-free methods. Department enforced prerequisite: one semester calculus-based probability course, such as MATH 4510 or APPM 3570.

Equivalent - Duplicate Degree Credit Not Granted: STAT 4520 and MATH 4520 and STAT 5520

Requisites: Restricted to graduate students only.

MATH 5540 (3) Introduction to Time Series

Studies basic properties, trend-based models, seasonal models, modeling and forecasting with ARIMA models, spectral analysis and frequency filtration. Department enforced prerequisite: MATH 4520 or MATH 5520 or APPM 4520 or APPM 5520.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4540 and STAT 4540 and STAT 5540

Requisites: Restricted to graduate students only.

MATH 5600 (3) Numerical Analysis 1

Solution of nonlinear algebraic equations, interpolation, approximation theory and numerical integration. Department enforced prerequisites: MATH 2130 or MATH 2135 or APPM 3310 and experience with a scientific programming language. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5610 (3) Numerical Analysis 2

Solution of linear systems, eigenvalue problems, optimization problems, and ordinary and partial differential equations. Department enforced prerequisite: MATH 5600 or APPM 5600. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 5730 (3) Set Theory

Studies in detail the theory of cardinal and ordinal numbers, definition by recursion, the statement of the continuum hypothesis, simple cardinal arithmetic and other topics chosen by the instructor.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4730

MATH 5810 (1-3) Special Topics in Mathematics

Covers various topics not normally covered in the curriculum. Offered intermittently depending on student demand and availability of instructors.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4810

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 5820 (3) History of Mathematical Ideas

Examines the evolution of a few mathematical concepts (e.g., number, geometric continuum, or proof), with an emphasis on the controversies surrounding these concepts. Begins with Ancient Greek mathematics and traces the development of mathematical concepts through the middle ages into the present.

Equivalent - Duplicate Degree Credit Not Granted: MATH 4820

Requisites: Restricted to graduate students only.

Recommended: Prerequisite completion of upper division Written Communication requirement.

MATH 5905 (1) Mathematics Teacher Training

Designed to train students to become effective teachers. Students teach a mathematics course, meeting weekly with faculty to discuss problems particular to the teaching of mathematics. Department enforced prerequisite: current employment as a teaching assistant.

Requisites: Restricted to graduate students only.

MATH 6000 (3) Model Theory

Proves the compactness theorem, showing the essential finiteness of logical implication. Proves many basic properties of theories, showing how the syntactic form of statements influences their behavior w.r.t., different models. Finally, studies properties of elements that cannot be stated by a single formula (the type of the element) and shows it can be used to characterize certain models.

Requisites: Restricted to graduate students only.

MATH 6010 (3) Computability Theory

Studies the computable and uncomputable. Shows that there are undecidable problems and from there builds up the theory of sets of natural numbers under Turing reducibility. Studies Turing reducibility, the arithmetical hierarchy, oracle constructions and end with the finite injury priority method. Department enforced prerequisite: MATH 6000.

Requisites: Restricted to graduate students only.

MATH 6110 (3) Introduction to Number Theory

Examines divisibility properties of integers, congruences, diophantine equations, arithmetic functions, quadratic residues, distribution of primes and algebraic number fields. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6130 (3) Algebra 1

Studies group theory and ring theory. Department enforced prerequisite: MATH 3140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6140 (3) Algebra 2

Studies modules, fields and Galois theory. Department enforced prerequisite: MATH 6130. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6150 (3) Commutative Algebra

Introduces topics used in number theory and algebraic geometry, including radicals of ideals, exact sequences of modules, tensor products, Ext, Tor, localization, primary decomposition of ideals and Noetherian rings. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6170 (3) Algebraic Geometry

Introduces algebraic geometry, including affine and projective varieties, rational maps and morphisms and differentials and divisors. Additional topics might include Bezout's Theorem, the Riemann-Roch Theorem, elliptic curves, and sheaves and schemes. Department enforced prerequisite: MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6180 (3) Algebraic Number Theory

Introduces number fields and completions, norms, discriminants and differentials, finiteness of the ideal class group, Dirichlet's unit theorem, decomposition of prime ideals in extension fields, decomposition and ramification groups. Department enforced prerequisites: MATH 6110 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6190 (3) Analytic Number Theory

Acquaints students with the Riemann Zeta-function and its meromorphic continuation, characters and Dirichlet series, Dirichlet's theorem on primes in arithmetic progressions, zero-free regions of the zeta function and the prime number theorem. Department enforced prerequisites: MATH 6110 and MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6210 (3) Introduction to Topology 1

Introduces elements of point-set topology and algebraic topology, including the fundamental group and elements of homology. Department enforced prerequisites: MATH 2130 and MATH 3140 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6220 (3) Introduction to Topology 2

Continuation of MATH 6210. Department enforced prerequisite: MATH 6210. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6230 (3) Introduction to Differential Geometry 1

Introduces topological and differential manifolds, vector bundles, differential forms, de Rham cohomology, integration, Riemannian metrics, connections and curvature. Department enforced prerequisites: MATH 2130 and MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6240 (3) Introduction to Differential Geometry 2

Continuation of MATH 6230. Department enforced prerequisite: MATH 6230. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6250 (3) Theory of Rings

Studies semi-simple Artinian rings, the Jacobson radical, group rings, representations of finite groups, central simple algebras, division rings and the Brauer group. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories. Department enforced prerequisites: MATH 6230 and MATH 6240 and PHYS 5250 and PHYS 7280. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 6260

Requisites: Restricted to graduate students only.

MATH 6270 (3) Theory of Groups

Studies nilpotent and solvable groups, simple linear groups, multiply transitive groups, extensions and cohomology, representations and character theory, and the transfer and its applications. Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6280 (3) Advanced Algebraic Topology

Covers homotopy theory, spectral sequences, vector bundles, characteristic classes, K-theory and applications to geometry and physics. Department enforced prerequisite: MATH 6220. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6290 (3) Homological Algebra

Studies categories and functors, abelian categories, chain complexes, derived functors, Tor and Ext, homological dimension, group homology and cohomology. If time permits, the instructor may choose to cover additional topics such as spectral sequences or Lie algebra homology and cohomology. Department enforced prerequisites: MATH 6130 and MATH 6140.

Requisites: Restricted to graduate students only.

MATH 6310 (3) Introduction to Real Analysis 1

Develops the theory of Lebesgue measure and the Lebesgue integral on the line, emphasizing the various notions of convergence and the standard convergence theorems. Applications are made to the classical L^p spaces. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6320 (3) Introduction to Real Analysis 2

Covers general metric spaces, the Baire Category Theorem, and general measure theory, including the Radon-Nikodym and Fubini theorems. Presents the general theory of differentiation on the real line and the Fundamental Theorem of Lebesgue Calculus. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite MATH 6310.

MATH 6350 (3) Functions of a Complex Variable 1

Focuses on complex numbers and the complex plane. Includes Cauchy-Riemann equations, complex integration, Cauchy integral theory, infinite series and products, and residue theory. Department enforced prerequisite: MATH 4001. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6360 (3) Functions of a Complex Variable 2

Focuses on conformal mapping, analytic continuation, singularities and elementary special functions. Department enforced prerequisite: MATH 6350. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6534 (3) Topics in Mathematical Probability

Offers selected topics in probability such as sums of independent random variables, notions of convergence, characteristic functions, Central Limit Theorem, random walk, conditioning and martingales, Markov chains and Brownian motion. Department enforced prerequisite: MATH 6310. Instructor consent required for undergraduates

Requisites: Restricted to graduate students only.

MATH 6550 (3) Introduction to Stochastic Processes

Systematic study of Markov chains and some of the simpler Markov processes, including renewal theory, limit theorems for Markov chains, branching processes, queuing theory, birth and death processes, and Brownian motion. Applications to physical and biological sciences. Department enforced prerequisite: MATH 4001 or MATH 4510 or APPM 3570 or APPM 4560. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: APPM 6550

Requisites: Restricted to graduate students only.

MATH 6730 (3) Set Theory

Presents cardinal and ordinal arithmetic, and basic combinatorial concepts, including stationary sets, generalization of Ramsey's theorem, and ultrafilters, consisting of the axiom of choice and the generalized continuum hypothesis. Department enforced prerequisites: MATH 4000 or MATH 5000 and MATH 4730 or MATH 5730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6740 (3) Forcing

Presents independence of the axiom of choice and the continuum hypothesis, Souslin's hypothesis and other applications of the method of forcing. Introduces the theory of large cardinals. Department enforced prerequisite: MATH 6730. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 6900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 6940 (1) Master's Candidate for Degree

This course is for students preparing for the no-thesis option for a master's degree. The content is set by the students' advisors.

Requisites: Restricted to graduate students only.

MATH 6950 (1-6) Master's Thesis**MATH 8114 (3) Topics in Number Theory**

May include the theory of automorphic forms, elliptic curves, or any of a variety of advanced topics in analytic and algebraic number theory. Department enforced prerequisite: MATH 6110. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8174 (3) Topics in Algebra I

Department enforced prerequisites: MATH 6130 and MATH 6140. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8234 (3) Topics in Differential Geometry

Presents advanced topics in Differential Geometry, such as index theory, partial differential equations on manifolds, exterior differential systems, and Cartan's methods.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of MATH 6230 and MATH 6310 (minimum grade D-). Restricted to graduate students only. Instructor consent required for undergraduates.

MATH 8250 (3) Mathematical Theory of Relativity 1

Focuses on Maxwell equations, Lorentz force, Minkowski space-time, Lorentz, Poincare, and conformal groups, metric manifolds, covariant differentiation, Einstein space-time, cosmologies, and unified field theories. Instructor consent required.

Requisites: Restricted to graduate students only.

MATH 8304 (3) Topics in Analysis 1

Presents advanced topics in analysis including Lie groups, Banach algebras, operator theory, ergodic theory, representation theory, etc. Department enforced prerequisites: MATH 8330 and MATH 8340. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8330 (3) Functional Analysis 1

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisites: MATH 6310 and MATH 6320. Instructor consent required for undergraduates. See also MATH 8340.

Requisites: Restricted to graduate students only.

MATH 8340 (3) Functional Analysis 2

Introduces such topics as Banach spaces (Hahn-Banach theorem, open mapping theorem, etc.), operator theory (compact operators and integral equations and spectral theorem for bounded self-adjoint operators) and Banach algebras (the Gelfand theory). Department enforced prerequisite: MATH 8330. Instructor consent required for undergraduates. See also MATH 8330.

Requisites: Restricted to graduate students only.

MATH 8370 (3) Harmonic Analysis 1

Examines trigonometric series, periodic functions, diophantine approximation and Fourier series. Also covers Bohr and Stepanoff almost periodic functions, positive definite functions and the L^1 and L^2 theory of the Fourier integral. Applications to group theory and differential equations. Department enforced prerequisites: MATH 5150 and MATH 6320. Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

MATH 8714 (3) Topics in Logic 1 and 2

Requisites: Restricted to graduate students only.

MATH 8815 (1-3) Ulam Seminar

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MATH 8900 (1-3) Independent Study

Instructor consent required for undergraduates.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

MATH 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School portion of the catalog.

Requisites: Restricted to graduate students only.

Mathematics - Master of Arts (MA) MA/MS Program

Students may obtain an MA/MS degree as either an undergraduate student through the Bachelor's–Accelerated Master's (BAM) degree program or as a graduate student.

As a rule, graduate students are admitted to the PhD program in Mathematics and earn an MA or MS when they complete their PhD comprehensive exam. Students may choose to leave the program with MA/MS degree. Under certain circumstances, students can be admitted to the graduate program for a terminal MA/MS degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Mathematics - Bachelor of Arts (BA) (p. 455).

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete 30 hours of approved credit. At least 24 credit hours must be completed at the 5000 level or above. A maximum of six credit hours may be completed at the 3000 or 4000 level if approved by the department. Students must take two 2-semester sequences. For fulfillment of all course requirements, mathematics courses must be numbered 5000 or higher excluding MATH 5820.

For the MS degree in applied mathematics, 6–12 credit hours must be in an approved minor program outside the mathematics department, and at least 18 credit hours must be approved inside the mathematics department.

Students should read carefully the materials describing the university requirements in the Graduate School section. The student is responsible for satisfying these requirements at the proper time.

Examinations

To earn an MA degree, a student must pass a master's examination based on the particular program of the student.

Thesis

For the MA degree in mathematics, students can pursue a thesis option, which requires 4–6 credit hours of thesis work, and a thesis defense.

Mathematics - Doctor of Philosophy (PhD)

The Department of Mathematics offers coursework and research leading to the PhD degree in mathematics. The department has a diversified graduate faculty with current areas of research in algebra, classical analysis, differential equations, geometry, harmonic analysis, logic and foundations, number theory, probability and stochastic processes, and topology.

For more information, visit the Department of Mathematics (<http://www.colorado.edu/math/>) website.

Requirements

Admission Requirements

Applicants must have demonstrated mathematical maturity and accomplishment roughly at the level of a successful mathematics major at CU Boulder. Applicants must also demonstrate mathematical potential: success in courses in advanced calculus and abstract algebra help demonstrate this potential. General and mathematics GRE subject scores are required for PhD students.

Degree Requirements

Students must complete at least 30 credit hours of approved graduate coursework and 30 credit hours of thesis work.

Before being admitted to candidacy for the PhD degree in mathematics, a student must take two graduate courses each in algebra, real analysis and geometry/topology en route to passing two out of three preliminary exams in these fields. In addition, the student must take a course in complex analysis. The student must then pass a comprehensive exam.

Students should read the Doctoral Degree Requirements (p. 1031) section carefully. The student is responsible for satisfying these requirements at the proper time.

Molecular, Cellular and Developmental Biology

In view of the strong research orientation of the fields involved, the department does not accept applications from students seeking the MA as a terminal degree. The master of arts degree, either with a thesis (Plan I) or without (Plan II), is awarded under special circumstances.

Course code for this program is MCDB.

Doctoral Degree

- Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD) (p. 1250)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

MCDB 5201 (1) Graduate Lab in Molecular Evolution

Ever wonder what functional clues might reside in the DNA sequence of your favorite gene? In this course, graduate students will learn the fundamentals of phylogenetics with an emphasis on evolutionary models that infer selective pressures in protein-coding DNA sequences (genes). During the course, students will be working on their favorite gene and using it as a case study for applying all of the concepts that we will cover. By the end of the course they will have generated a publication-quality summary figure, along with appropriate supplemental figures, of the selective pressures shaping their favorite gene. Additionally, they will learn how to design and execute an experimental approach based off of findings from the evolutionary analysis.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 5210 (3) Cell Structure and Function (Lecture and Discussion)

MCDB 5220 (3) Graduate Core 2

Requisites: Restricted to graduate students only.

MCDB 5230 (3) Graduate Core 1

Requisites: Restricted to graduate students only.

MCDB 5250 (3) Topics in Developmental Genetics (Methods and Logic)

Repeatable: Repeatable for up to 6.00 total credit hours.

MCDB 5301 (3) Immunology

Emphasizes cellular and molecular mechanisms by which organisms protect themselves from pathogens and the experimental basis for our understanding of these processes. Discusses development, function, and malfunction of t-cells, b-cells and other components of the immune system, focusing on the human immune system.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4300

Requisites: Restricted to graduate students only.

MCDB 5310 (3) Microbial Genetics and Physiology

Examines the physiology and genetics of bacteria, Archaea and viruses. Particular emphasis will be on metabolism, regulation of gene expression and protein function, mechanisms of interactions with and manipulation of the environment, and evolution in response to environmental pressures.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4310

MCDB 5312 (3-4) Quantitative Optical Imaging

Explores the fundamentals of optical imaging in biology, especially molecular and cellular biology. Covered topics include an introduction to optics and microscopes, fluorescence microscopy and image analysis, and biological applications. MATLAB will be taught at the beginning of the course and used throughout for image processing. Prior experience with MATLAB (or Python) is highly recommended but not required.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5312,

MCDB 4312 and BCHM 4312

Grading Basis: Letter Grade

MCDB 5350 (3) Microbial Diversity and the Biosphere

Provides a molecular phylogeny-based perspective on microbial diversity and the interactions between organisms that result in the biosphere. Provides overview of recent methods and findings in microbial ecology, as well as computer-based workshop in molecular phylogeny.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4350

Requisites: Restricted to graduate students only.

MCDB 5361 (3) Evolution and Development

Relates how recent discoveries in the molecular mechanisms of development are shaping our understanding of animal evolution. Reviews basic principles of molecular developmental biology and applies these concepts to critically discuss current research in the field of Evo-Devo (evolution and development).

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4361

MCDB 5425 (3) Topics in Membrane Biology: Cell Biology, Physiology and Disease

Students will apply their knowledge of basic biology to exploring several of the most exciting topics in biomedicine including protein folding and stress responses, nutrient sensing and balance and signal transduction across membranes. Emphasis will be placed upon human physiology and associated human diseases including Alzheimer's disease, diabetes and cardiovascular disease.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4425

Requisites: Restricted to graduate students only.

MCDB 5426 (3) Cell Signaling and Developmental Regulation

Introduces several cell signaling processes and their biological functions. Students read and analyze original research articles to learn the thinking processes of scientific research. Writing assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4426

MCDB 5427 (3) Biology of the Visual System

Explores the neurobiology, cell biology, genetics and developmental biology of the visual system. Discusses neurodegenerative and vascular diseases that lead to blindness. Students read and analyze original research articles to train scientific reasoning. Involves student-organized presentations and classroom discussion.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4427

Requisites: Requires prerequisite courses of MCDB 3135 and MCDB 3145 (all minimum grade C-).

MCDB 5441 (4) Animal Developmental Diversity

Surveys development in a range of vertebrate and invertebrate systems to reconstruct the common bilaterian ancestor, and elucidate the developmental genetic changes underlying animal diversification. Lab focuses on vertebrate embryos and explores key methods in evolutionary developmental biology including in situ hybridization, embryo microinjection, and transgenesis.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4441 and EBIO 4440 and EBIO 5440

Requisites: Restricted to graduate students only.

MCDB 5471 (3) Mechanisms of Gene Regulation in Eukaryotes

Focuses on manifestations of regulated gene expression. Studies gene regulation at multiple steps, including transcription, RNA processing and translation. Is based on critical analysis of primary research papers. Written assignments and oral presentations are required.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4471

MCDB 5520 (3) Bioinformatics and Genomics

Computational and experimental methods in bioinformatics and genomics, and how these methods provide insights into protein structure and function, molecular evolution, biological diversity, cell biology and human disease. Topics include database searching, multiple sequence alignment, molecular phylogeny, microarrays, proteomics and pharmacogenomics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4520

Requisites: Restricted to graduate students only.

MCDB 5521 (1) Bioinformatics and Genomics Laboratory

Provides experience with, and exposure to, computational and experimental methods in bioinformatics and genomics. Meets once a week. Students are expected to read original research papers, discuss findings, plan and execute data analysis in selected areas.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4521

Grading Basis: Letter Grade

MCDB 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4550 and PHYS 4550 and PHYS 5550

MCDB 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4560 and PHYS 4560 and PHYS 5560

Grading Basis: Letter Grade

MCDB 5615 (3) Biology of Stem Cells

Stem cells have received considerable notice in both the scientific and social arena. Examines the stem cell concept by a critical examination of the primary scientific literature. Topics will include pluripotency and plasticity, environment, technology, self-renewal, transdifferentiation, molecular signature, epigenetic programming and stem cell versus cancer cell. Fulfills MCDB scientific reasoning requirement.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4615

Requisites: Restricted to graduate students only.

MCDB 5621 (3) Genome Databases: Mining and Management

Lec. Develops essential skills for performing genomic analyses, with focus on developing practical research tools. Introduces human genome and microbiome projects, Python/Sql scripting, accessing and understanding genomic data, sequence alignment and search, evolutionary models, expression data, biological networks, and macromolecular structure.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5621, MCDB 4621 and BCHM 5621

MCDB 5650 (2) Teaching and Learning in Undergraduate Science Courses

Discusses recent research on how students learn and applications to the teaching of undergraduate science courses. Conducted as an interactive workshop, in which active-engagement in learning approaches are modeled and experienced by participants. Open to undergraduate and graduate students. May be used to fulfill the pedagogical training requirement for undergraduate Learning Assistants in upper division science courses. Post-doctoral and faculty auditors are welcome to participate as regular auditors.

MCDB 5651 (3) Developmental Biology

Explores the development of invertebrate and vertebrate organisms, emphasizing cellular, molecular and genetic mechanisms. Focuses on conceptual understanding and experimental approaches to topics such as embryology, developmental control of gene expression in eukaryotic cells, mechanisms of differentiation and morphogenesis and developmental genetics.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4650

Requisites: Restricted to graduate students only.

MCDB 5680 (3) Mechanisms of Aging

Studies aging as a developmental process emphasizing genetic, cellular and molecular mechanisms.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4680

Requisites: Restricted to graduate students only.

MCDB 5750 (3) Animal Virology

Encompasses the structure and replication of both lytic and transforming animal viruses. Emphasizes diversity of naturally occurring genomic structures and the resulting strategies of infection as well as the impact of viral epidemics on society. Includes critical analysis of primary research papers. Fulfills MCDB scientific reasoning requirement. Course has additional graduate student level requirements.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4750

Requisites: Restricted to graduate students only.

MCDB 5776 (1) Scientific Ethics and Responsible Conduct in Research

Lect. Advanced discussion of topics in scientific ethics, including requirements for responsible conduct of research, case histories of fraud, research misconduct, ethical misconduct and development of professional values and ethical standards.

Equivalent - Duplicate Degree Credit Not Granted: BCHM 5776

Requisites: Requires a corequisite course of MCDB 5230 or BCHM 5771.

MCDB 5777 (3) Molecular Neurobiology

Introduces the functional anatomy of the nervous system and explores current knowledge regarding the molecular and genetic basis of the development and function of the nervous system. Studies recent insights into the molecular basis of neurodegenerative diseases, in the last portion of the course.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4777

MCDB 5811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its valuation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: MCDB 4811 and EDUC 4811 and EDUC 6811

Requisites: Restricted to graduate students only.

MCDB 6000 (3) Introduction to Laboratory Methods

Introduces methodology and techniques used in biological research. Designed as a tutorial between a few students and one faculty member. Students are expected to read original research papers, discuss findings, and to plan and execute experiments in selected areas.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Biological Sciences (MCDB) graduate students only.

MCDB 6440 (1-3) Special Topics in MCD Biology

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

MCDB 6441 (1) Faculty Res Seminar

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 6442 (2) Research Grant Writing

Acquaints students with various topics not normally covered in the curriculum. Offered intermittently or upon student demand, and often presented by visiting professors.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

MCDB 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

MCDB 6950 (1-6) Master's Thesis

Students seeking a master's degree should consult a departmental advisor. Plan I or Plan II is offered.

MCDB 7840 (1-6) Graduate Independent Study

An independent study contract is required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

MCDB 7910 (1) Seminar Practicum

Designed for graduate students to give oral presentations on their thesis research, field questions, respond to critiques, and present background information.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to graduate students only.

MCDB 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate students only.

Molecular, Cellular and Developmental Biology - Doctor of Philosophy (PhD)

Areas of Study

Opportunities for graduate study and original research leading to the PhD degree are available in a variety of areas. The department does not offer a terminal, stand-alone master's degree program. Students enrolled in the doctoral program may earn their master's degree if they decide to leave the program after completing 30 hours of graduate coursework and the PhD oral and written comprehensive examination.

Molecular Biology

Includes gene regulation, virology, nucleic acid-protein interactions, chromosome structure and function, chromosome replication, microbial diversity, human genome structure, RNA structure and catalysis.

Cell Biology

Includes cytoskeleton, biophysical cytology, vacuole assembly, analysis of yeast spindle pole bodies and vertebrate centrosomes, synthesis and secretion of glycoproteins and polysaccharides, defense responses in

plants and 3-D high resolution reconstruction, biogenesis of mitochondria and chloroplasts, energy metabolism, assembly of membrane protein complexes, cell cycle regulation and checkpoints and signal transduction.

Developmental Biology

Covers mechanisms and regulation of morphogenesis and cell growth, genetic control of development, molecular genetics of embryogenesis, sex determination, ras proteins and vulval development and programmed cell death in nematodes, molecular genetics of *Drosophila* neurobiology, developmental genetics of *Drosophila* and *Caenorhabditis*, neural development in mice, transgenic mice and muscle development and function.

Genetics

Includes genetics of human disease, complex traits, mouse development and invertebrate development.

Requirements

Admission Requirements

The graduate program of the Department of Molecular, Cellular and Developmental Biology is sufficiently flexible to accommodate students with a wide range of training. Students with bachelor's degrees in any of the biological, biochemical or physical sciences are encouraged to apply.

Degree Requirements

A minimum of 30 credit hours of courses numbered 5000 and above, plus 30 credit hours of doctoral thesis, are required. Specific courses depend on the student background and field of specialization.

The faculty of the department offers a variety of courses to help graduate students acquire knowledge in the various areas of study. Further, students are required to work in four different laboratories to broaden their education and to help them identify the field of greatest interest for their thesis work.

Advisory Committee

An advisory committee, appointed upon entrance, develops an appropriate curriculum based in part on the student's background. A written preliminary exam consists of a series of courses and exams administered during the first year.

Qualifying Exam

A comprehensive qualifying exam administered at the beginning of the spring semester of the second year includes a written research proposal and an oral defense of the proposal that emphasizes breadth and depth of knowledge as well as an ability to communicate and synthesize facts into a coherent scientific argument.

Thesis

The principal elements in graduate training are defining a thesis problem, investigating this problem with a coherent piece of research that constitutes a substantial contribution to knowledge, and writing a report on this work in the form of peer-reviewed journal articles and a thesis submitted to a departmental committee for approval. Thesis research must result in at least one peer-reviewed research article with the candidate as first or co-first author. After completion of the thesis, each candidate for the PhD degree is required to take a final oral examination on the thesis and related topics, and to present a public seminar.

Teaching

Generally, each candidate for the PhD degree does two semesters of apprentice teaching. This obligation is usually met during the student's first year of graduate study.

Museum and Field Studies

Graduate training in anthropology, art history, history, botany, entomology, paleontology and zoology is provided under the direction of museum faculty in cooperation with cognate departments and the Museum and Field Studies Program. Areas of study include, but are not limited to:

- anthropological interpretation
- diatom taxonomy, systematics and ecology
- southwestern archaeology and ethnology
- plant taxonomy, evolution and phytogeography
- vertebrate paleontology and Cenozoic mammals
- biology of aquatic invertebrates
- systematics and population biology of insects of the Rocky Mountain Region
- plant–insect interactions
- mammalogy

Museum assistantships include support from the Walker Van Riper fund and research support from the Collie and William Henry Burt museum funds. Other financial assistance is available to selected students. Students interested in working toward advanced degrees under the direction of museum faculty may use the contact information above.

Course code for this program is MUSM.

Master's Degree

- Museum and Field Studies - Master of Science (MS) (p. 1254)

Certificate

- Museology - Graduate Certificate (p. 1256)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Tripp, Erin Anne (https://experts.colorado.edu/display/fisid_152313/)
Associate Professor; PhD, Duke University

Courses

MUSM 5011 (4) Introduction to Museum Studies

Provides background in history and literature of museums, their objectives and methods, laboratory exercises in curatorship, exhibition theory, and administration.

Additional Information: Departmental Category: Museum Studies

MUSM 5021 (2-4) Selected Museum Topics

Provides framework for student projects on varied museum topics (e.g., ethics of collecting, data management, the museum's role in the community). Student projects include case study analysis, interviewing, and original presentations. Topics vary each semester. Department consent required.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Museum Studies

MUSM 5030 (3) Museum Education

Survey of the theory and practice of education in museums and informal learning centers. Topics include current trends in the field, learning theories, teaching methodologies, program development, museum/school relationships, the role of education in exhibit development, and being a critically reflective practitioner.

Additional Information: Departmental Category: Museum Studies

MUSM 5031 (3) Museums and the Public: Exhibit Development

Covers elements of exhibition development and design, up to production and evaluation of exhibit prototypes. The team approach is emphasized. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5041 (3) Museum Administration

Covers theory of organizations and how it applies to museums. Application of small business management and nonprofit organizations. Review museum organizational charts and staffing. Evolution of marketing and development in a museum context are reviewed. Budget process and annual financial reporting are discussed, and there is an emphasis on evaluating financial statements. Department enforced prerequisite: restricted to graduate students.

Additional Information: Departmental Category: Museum Studies

MUSM 5045 (3) Introduction to Museum Anthropology

Traces the development of Anthropology and museums in America from late 19th century to present day. Students are encouraged to: explore museum theory and practice; think critically about the history of relations among Native Americans, Anthropology, and museums; consider the legacy of collecting and challenges of representing others; and, examine the interplay of Anthropology, material culture, and colonialism.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4045 and ANTH 5045

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Anthropology

MUSM 5051 (3) Museum Collections Management

Deals specifically with curation and data management. Topics include acquisition practices and problems; organization, management, use and preventive conservation of collections; computer data management of collections.

Additional Information: Departmental Category: Museum Studies

MUSM 5061 (3) Introduction to Scientific Illustration

Intended for students with little to no art background. Focus is on the accurate rendering of scientific subjects for publication and for public display. Course begins with basic drawing skills and sharpening of visual perception. Students progress to be able to produce realistic renderings of subjects. Students are exposed to a variety of black and white and color techniques and the standards for presenting illustrations for a variety of audiences. Course concludes with computer illustration tools and techniques.

Additional Information: Departmental Category: Museum Studies

MUSM 5474 (4) Vertebrate Paleontology

Discusses the history and evolution of the vertebrates, including the phylogenetic relationships and evolutionary patterns of the major groups. Lab focuses on comparative vertebrate osteology and fossil representation of major groups.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 4474 and GEOL 5474

Additional Information: Departmental Category: Geology

MUSM 5484 (3) Museum Field Methods in Geology

Paleontological and paleoecological field techniques including collecting; recording of geographic, stratigraphic and quarry information; preservation; interpretation, including applicable readings. Designed for individuals who have some background in geology but little or no prior field experience. Offered summer only.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4484

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Geology

MUSM 5760 (4) Mammalogy

Lect., lab, and field studies. Discusses origin, evolution and adaptation, geographic distribution, ecology and taxonomy of mammals; field and laboratory study of Coloradan species. Uses animals and/or animal tissues.

Equivalent - Duplicate Degree Credit Not Granted: EBIO 4760 and EBIO 5760

Additional Information: Departmental Category: Zoology

MUSM 5795 (3) Field Methods in Zoology and Botany

Class covers research and field methods for biological disciplines associated with natural history museums: vertebrates, invertebrates and plants. Emphasis is on field research techniques: observations, sampling, collection and preservation methods and comparisons among elevation zones. Includes 5 field labs, 2 weekend trips, 5 lab practica, experience with several taxonomic experts and individual research projects.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4795 and ENVS 4795

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Zoology

MUSM 5900 (1-6) Independent Study

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4900

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Independent Study

MUSM 5912 (3) Collections Research Practicum in Cultural Anthropology

Designed as a practicum, introduces students to research and practice in museum anthropology, utilizing the extensive anthropology collections at CU-Boulder Museum. Students will gain skills in primary and secondary research, collections and object research and narrative story development for the exhibition of anthropological material culture.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4912 and ANTH 4470 and ANTH 5470

Repeatable: Repeatable for up to 6.00 total credit hours.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Anthropology

MUSM 5913 (3) Museum Practicum in Botany

Students take part in curatorial procedures of the botany section of the museum: specimen preparation, labeling, identification, cataloguing, conservation and collection management. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4913

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Botany

MUSM 5914 (3) Museum Practicum in Geology

Students take part in curatorial procedures of the geology section of the museum: field collection, specimen preparation, cataloguing, collection management and a survey of current laws as they apply to specimens. Enrollment is limited therefore students should make arrangements during the previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4914

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Geology

MUSM 5915 (1-3) Museum Practicum in Zoology

Students take part in basic curatorial procedures of the zoology section of the museum: relaxing, fixing, positioning, preserving, cataloguing, storing and shipping. Also introduces students to the animal kingdom.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4915

Additional Information: Departmental Category: Zoology

MUSM 5916 (1-3) Museum Practicum in Entomology

Students take part in curatorial procedures of the entomology section of the museum: field collection, specimen preparation, labeling, identification, rearing techniques and exhibit preparation. Enrollment is limited, students should make arrangements during previous semester.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4916

Recommended: Prerequisite MUSM 5011.

Additional Information: Departmental Category: Entomology

MUSM 5917 (1-3) Museum Practicum in Techniques

Students participate in museum public education functions that may include researching, planning, developing, and producing exhibits, traveling trunks, booklets, and other materials. May involve writing labels, molding and casting, conservation, and restoration.

Equivalent - Duplicate Degree Credit Not Granted: MUSM 4917

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Museology

MUSM 5918 (3) Museum Practicum in Advanced Collections Management

Provides a hands-on environment for exploring issues in museum collections management. Through lecture, resource procurement, in-class activities and out-of-class projects, students will gain practical and professional experience in areas of policy, procedure, best practices, museum storage planning and legal issues.

Recommended: Prerequisite MUSM 5051.

Additional Information: Departmental Category: Museum Studies

MUSM 5919 (3) Collections Research Practicum: Archaeology

Focuses on Museum collections management from archaeological sites mainly in the American Southwest and Mongolia. The course involves readings, discussion, and collections analysis and archival documentation. Extra time outside of class is required for the practicum aspect of this course. Each student will need to schedule with the professor an additional 3 hours each week when they will focus on an aspect of their project, to be discussed below under grading criteria. Formerly offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ANTH 4919 and ANTH 5919

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

MUSM 6110 (1-3) Advanced Seminar in Museum Issues

Offers a weekly seminar for museum and field study students that addresses one new topic each semester relevant to museum operations such as archival administration, museums, multiculturalism, repatriation and others. Department enforced prerequisite: MUSM 5011.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Museum Studies

MUSM 6150 (3) Critical and Theoretical Issues in Museums

Investigates key problems facing museum institutions and studies the staging and representation of historical knowledge, the ethics of collecting and display, the changing nature and uses of historical evidence and relations between curatorial practice, collecting and field work. Critically examines different approaches to museums and museology in various disciplines, both past and present. Department enforced prerequisite: MUSM 5011.

Equivalent - Duplicate Degree Credit Not Granted: ARTH 6150 and HIST 6150 and ANTH 6150

Additional Information: Departmental Category: Museum Studies

MUSM 6930 (2-4) Museum Internship

Provides experience in museums of different sizes, audiences, and subjects, including history, natural history, art, and children's museums. Each student is supervised individually by a faculty member as well as the appropriate person in the cooperating museum.

Additional Information: Departmental Category: Museum Studies

MUSM 6940 (1-4) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Additional Information: Departmental Category: Museum Studies

MUSM 6950 (1-6) Master's Thesis

A thesis, which may be of a research, expository, critical or creative type, is required of every master's degree candidate under the thesis option.

Department enforced prerequisites: MUSM 5011 and MUSM 5051 and one of the following: MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

MUSM 6960 (1-4) Master's Project or Paper

A project or paper in the student's discipline and related to some aspect of museum studies is required of every master's degree candidate under the non-thesis-option plan. Department enforced prerequisites:

MUSM 5011 and MUSM 5051. Students in collections/field track also need MUSM 5030 or MUSM 5031 or MUSM 5041.

Additional Information: Departmental Category: Museum Studies

Museum and Field Studies - Master of Science (MS)

The interdisciplinary museum and field studies program is administered by the University of Colorado Museum of Natural History, in conjunction with the departments of anthropology; history; art history; ecology and evolutionary biology; and geological sciences; as well as other departments. The program provides a strong background in a chosen field as well as theoretical and practical grounding in museology.

Internships are offered at a variety of museums in the region, including natural history, history and art museums. Students completing the MS are trained as collection managers, curatorial assistants, registrars, museum educators, exhibit technicians and administrators.

Program Tracks

Three tracks are available: a collections/field track, a public/administration track and an art history track.

Collections/Field Track

This track offers training for students interested in the curatorial and research aspects of museum work, such as floristic or faunistic studies of the past and present, material culture of the past and present and biological inventory. The curriculum gives students academic training as well as experience in all areas of museum work. Field experience is offered through the curatorial and field practica.

Public/Administration Track

This track offers education for students interested in the public aspects of the museum such as program development and evaluation, exhibition planning and design, education and the organization and management of museums. The curriculum offers both academic training in a discipline and hands-on experience with all aspects of the public museum.

Art History Track

The art history track in the MFS program is open to applicants who hold a BA degree in the liberal arts, preferably with a major in art history. This track addresses issues specific to the research and curation of artworks. The curriculum provides students with academic training in art history and offers students firsthand museum experience in curatorial and collections work through exhibitions practica and collections research.

Requirements

Admission Requirements

Students must meet all university requirements for admission to graduate school and have a baccalaureate degree and at least a B (3.00) grade-point average in previous academic work. The baccalaureate degree should be in anthropology, biology, geology, geography, history (including archival studies), classics, fine arts or education, although other majors will be considered. Acceptance to the program is decided by the admissions committee of the University Museum in consultation with the student's department. The student must be accepted by an advisor in his or her discipline. Applicants accepted for graduate work by museum faculty must be admitted to the Graduate School.

Course Requirements

The degree in museum and field studies is a two-year program requiring a total of 32 credit hours, plus 150 hours of internship. Depending on the track and plan, students complete from 9 to 15 credit hours in a department and from 13 to 22 credit hours in museology courses. View the Program Tracks (p. 1254) tab for more information.

Internship

A museum internship of 150 hours is required.

Committee

A committee of at least three graduate faculty will be selected during the first semester in residence, by consultation between the student, the student's advisor, and the director of the MFS program. At least one member of the committee must be a tenured or tenure-track member of the museum faculty. The committee will serve as program advisors for the comprehensive exam and as the defense committee for the thesis or project. A student and advisor may apply for an exception in writing, which must be approved by the MFS program director.

Degree Plans

Students may choose either the thesis or non-thesis plan.

Plan I: Thesis Option

This plan requires the completion and successful defense of a thesis.

Plan II: Non-Thesis Option

This plan requires the completion of a project and paper.

Museology - Graduate Certificate

Providing professional museum training for CU Boulder graduate students and for museum professionals who seek to upgrade their skills and credentials, the Professional Certificate in Museology serves a range of disciplines in the arts and sciences, education and engineering, as well as the Colorado museum community.

CU Graduate Students

The Museum and Field Studies program offers a Graduate Professional Certificate in Museology for graduate students. This program provides professional training and certification for students at the University of Colorado Boulder whose primary enrollment is in a graduate program in another museum-related discipline (e.g., anthropology, art, art history, biology, business administration, education, geological sciences, history, etc.). For graduate students in other university departments, the coursework in a cognate discipline is provided by MA/MS or PhD programs in their home department.

Museum Professionals

Additionally, the professional certificate program is open to museum professionals in Colorado and the surrounding Rocky Mountain region. The program provides an avenue for early and mid-career museum staff to upgrade their skills and credentials in order to better meet the challenges and opportunities that museum work affords in the 21st century. For museum professionals, additional disciplinary work is available as appropriate upper division undergraduate or graduate coursework taken as electives under the nondegree study plan available in the ACCESS program through Continuing Education.

Requirements

The Professional Certificate in Museology requires a minimum of 12 credit hours and a 75-hour internship that may be waived if comparable professional experience is demonstrated.

Philosophy

Applicants for admission to the Graduate School for work toward a master's or doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the master's and doctoral programs must satisfy a variety of requirements, including the completion of coursework. The Department of Philosophy has a diversified faculty that can supervise the writing of master's theses and doctoral dissertations on a wide range of topics.

The Department makes available teaching assistantships and then graduate part-time instructorships to doctoral students, and assists with job placement. Teaching assistantships are available to several master's students each semester as well.

An overview (<https://www.colorado.edu/philosophy/graduate/overview/>) and descriptions of both degree programs (PhD (<https://www.colorado.edu/philosophy/graduate/phd-program/>) and MA (<https://www.colorado.edu/philosophy/graduate/ma-program/>)) are available from the Department of Philosophy. Students wishing to pursue graduate work in philosophy should note master's (p. 1030) and doctoral (p. 1031) degree requirements, and consult the Graduate (<https://www.colorado.edu/philosophy/graduate/>) portion of the Department's website.

Course code for this program is PHIL.

Master's Degree

- Philosophy - Master of Arts (MA) (p. 1260)

Doctoral Degree

- Philosophy - Doctor of Philosophy (PhD) (p. 1263)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bailey, Dominic T.J. (https://experts.colorado.edu/display/fisid_145110/)
Associate Professor; PhD, University of Cambridge

Boonin, David Isaac (https://experts.colorado.edu/display/fisid_113100/)
Professor, Chair; PhD, University of Pittsburgh

Bredeson, Garrett Zantow (https://experts.colorado.edu/display/fisid_154933/)
Instructor, Associate Chair; PhD, Vanderbilt University

Cleland, Carol (https://experts.colorado.edu/display/fisid_105674/)
Professor; PhD, Brown University

Demarest, Heather (https://experts.colorado.edu/display/fisid_159052/)
Assistant Professor; PhD, Rutgers University

Fileva, Iskra Nikova (https://experts.colorado.edu/display/fisid_154600/)
Assistant Professor; PhD, Boston University

Heathwood, Christopher Charles (https://experts.colorado.edu/display/fisid_141144/)
Associate Professor; PhD, University of Massachusetts at Amherst

Huemer, Michael (https://experts.colorado.edu/display/fisid_113081/)
Professor; PhD, Rutgers University–Newark

Jacobson, Daniel (https://experts.colorado.edu/individual/fisid_167068/)
Professor; PhD, University of Michigan

Kaufman, Daniel Patrick (https://experts.colorado.edu/display/fisid_134174/)
Associate Professor; PhD, University of Massachusetts at Amherst

Lee, Mi-Kyoung (https://experts.colorado.edu/display/fisid_141821/)
Associate Professor, Associate Chair; PhD, Harvard University

Norcross, Alastair J. (https://experts.colorado.edu/display/fisid_144850/)
Professor; PhD, Syracuse University

Oddie, Graham James (https://experts.colorado.edu/display/fisid_104741/)
Professor; PhD, University of London (England)

Pasnau, Robert C. (https://experts.colorado.edu/display/fisid_115293/)
Professor; PhD, Cornell University

Potter, Jason Timothy (https://experts.colorado.edu/display/fisid_103972/)
Instructor; PhD, University of Colorado Boulder

Rupert, Robert D. (https://experts.colorado.edu/display/fisid_139802/)
Professor, Associate Chair; PhD, University of Illinois at Chicago

Saucedo Ceballos, Raul (https://experts.colorado.edu/display/fisid_153759/)
Assistant Professor; PhD, Cornell University

Staffel, Julia (https://experts.colorado.edu/display/fisid_163744/)
Associate Professor; PhD, University of Southern California

Steup, Matthias P. (https://experts.colorado.edu/display/fisid_157766/)
Professor; PhD, Brown University

Talbot, Brian Thomas (https://experts.colorado.edu/display/fisid_147617/)
Assistant Professor; PhD, University of Southern California

Wingo, Ajume H. (https://experts.colorado.edu/display/fisid_144391/)
Associate Professor; PhD, University of Wisconsin–Madison

Youkey, David A. (https://experts.colorado.edu/display/fisid_105211/)
Instructor; PhD, University of Colorado Boulder

Courses

PHIL 5010 (3) Single Philosopher

Philosophers covered include, from year to year, Plato, Aristotle, Augustine, Aquinas, Descartes, Spinoza, Locke, Leibniz, Hume, and Kant. Includes at least one course per year on an ancient author and one course per year on a modern author.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4010

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5020 (3) Topics in the History of Philosophy

Examines a specific philosophical problem over an extended historical period.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4020

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5030 (1) Greek Philosophical Texts

Selected readings in classical philosophy, in the original language, with a focus on achieving fluency in reading philosophical Greek.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5040 (1) Latin Philosophical Texts

Selected readings in classical and medieval philosophy, in the original language, with a focus on achieving fluency in reading philosophical Latin.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

PHIL 5100 (3) Ethics

Presents representative positions in normative ethics and metaethics.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5110 (3) Contemporary Moral Theory

Provides an in-depth look at some recent work in moral theory, usually organized around a single topic. Topics vary from year to year. Previous topics include: consequentialism and its critics, virtue theory, deontological ethics, moral psychology, well-being, and metaethics.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4110

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5120 (3) Philosophy and Animals

Examines the moral status of nonhuman animals, and its implications for the common use of animals as food and experimental subjects for humans.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 5120

Requisites: Restricted to graduate students only.

PHIL 5150 (3) Topics in Applied Ethics

Discusses advanced work in applied normative philosophy. Topics vary from semester to semester and may focus on one or two specific areas (e.g., race, procreative ethics, military ethics, sports ethics) or take a broader approach that includes issues from across a wider range of subjects.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4150

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5200 (3) Contemporary Political Philosophy

Provides a survey of recent approaches to political philosophy: liberalism (Rawls, Dworkin); libertarianism (Nozick); communitarianism (Sandel, Macintyre); feminism (Jaggar). Topics and readings vary with the instructor.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5210 (3) Philosophy and Social Policy

Studies philosophical approaches to social and political issues such as abortion, bioethics, environmental preservation, human rights, and reverse discrimination. Gives attention to strengths and weaknesses of philosophical treatments of these issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5230 (3) Bioethics and Public Policy

Examines public policy implications of contemporary biological, genetic, biomedical, and behavioral science in light of ethics and human values. Considers theoretical and practical grounds for moral assessment of scientific research and possible applications of technology.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5240 (3) Seminar in Environmental Philosophy

Philosophical examination of several different approaches to environmental problems: economic, juridical, political and ecological. Discusses specific environmental problems, focusing on their moral dimensions, e.g., wilderness preservation, animal rights and land use and urban planning.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5240

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5260 (3) Philosophy of Law

Considers philosophical topics concerning law and the U.S. legal system. Topics that may be considered include the nature of law, relations between law and morality, justifications of punishment, the moral duty to obey the law, and law and liberty.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5290 (1-3) Topics in Values and Social Policy

Deals with topics in the area of philosophy and public policy and is often interdisciplinary in focus. Topics vary from one semester to another.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5300 (3) Philosophy of Mind

Discusses topics in the philosophy of mind, including the mind-body problem, consciousness, intentionality, rationality, mental causation and the nature of mental states.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4300

Requisites: Restricted to graduate students only.

PHIL 5340 (3) Epistemology

Studies some of the main topics of theory of knowledge, such as evidence, justification, prediction, explanation, skepticism, and concept acquisition.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4340

PHIL 5360 (3) Metaphysics

Traditional and contemporary theories of the basic categories of reality and the human relationship to it, including universals, substance, identity, change, mind and body, free will and modality.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4360

Requisites: Restricted to graduate students only.

PHIL 5370 (3) Free Will and Determinism

Explores the full range of questions relating to the problem of free will and determinism. Topics may include; the scientific evidence for determinism, hard versus soft determinism, arguments for and against the compatibility of free will and determinism, moral responsibility and the principle of alternate possibilities, hierarchical motivation, the deep self, reactive attitudes, the intelligibility question for libertarianism, divine foreknowledge.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4370

PHIL 5400 (3) Philosophy of Science

Advances students' knowledge of topics in philosophy of science and develops students' ability to think and write clearly about science. Topics may include scientific methodology; distinguishing science from pseudoscience; characterizing experimental and historical sciences; interpretations of special and general relativity; interpretations of quantum mechanics; the nature of biological species; approaches to defining life; criteria for identifying alien life; artificial intelligence; neuroscience and consciousness; fundamental physical properties and laws of nature; chance and probability; and causation.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4400

Requisites: Restricted to graduate students only.

PHIL 5440 (3) Topics in Logic

Provides for offering courses in a variety of topics in logic, including, but not limited to, mathematical logic, philosophical issues in logic, probability theory, decision theory, and inductive logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4450 and PHYS 5450 and PHYS 5450

Requisites: Restricted to graduate students only.

PHIL 5460 (3) Modal Logic

Introduces the most philosophically relevant kind of logic that builds on PHIL 2440. Modal logic is the logic of the concepts of necessity, possibility and contingency. A variety of systems of sentential modal logic will be covered, along with the standard system of first-order modal logic.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4460

Requisites: Restricted to graduate students only.

PHIL 5470 (3) Probability and Rational Choice

Examines issues in four related areas: probability theory (e.g. the interpretation of probability, the raven paradox and the principle of indifference), decision theory (e.g., the Newcomb problem, the toxin puzzle and Pascal's wager), game theory (e.g., Prisoner's dilemma, tragedy of the commons and Schelling points) and social choice theory (e.g., Arrow's theorem). Familiarity with symbolic logic is strongly recommended.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4470

Requisites: Restricted to graduate students only.

PHIL 5480 (3) Formal Methods in Philosophy

Introduces formal methods used in contemporary philosophy beyond classical first-order logic. Specific topics may vary. Examples: extensions of and alternatives to first-order logic (including propositional and quantified modal logic and higher-order and plural logic), alternatives to classical logic (including many-valued and intuitionistic systems), generalized and substitutional quantifiers, the lambda calculus, indicative and subjunctive conditionals, probability theory, inductive logic, and decision theory.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4480

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5490 (3) Philosophy of Language

Examines theories and problems regarding the nature of language and its relation to reality. Concepts discussed include sense, reference, conventions, intentions and their relation to science and social life. Relevant literature includes readings in Frege, Russell, Quine, Putnam, Kripke and Chomsky.

Equivalent - Duplicate Degree Credit Not Granted: PHIL 4490

Requisites: Restricted to graduate students only.

PHIL 5550 (3) Metaphysics and Epistemology Proseminar

Covers seminal classic texts and/or fundamental topics in analytic metaphysics and epistemology.

Requisites: Restricted to Philosophy graduate students only.

PHIL 5600 (3) Philosophy of Religion

Studies topics falling under philosophy of religion, such as proofs for God's existence, religious language, mysticism, psychology of religion, modern theological movements, miracles, and study of individual theologians.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5700 (3) Aesthetics

Analyzes the principal topics of aesthetics, including such issues as formal structure of aesthetics, the nature of critical judgments, and the status of the work of art.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 5800 (3) Open Topics in Philosophy

Variety of new courses at the 5000 level. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5810 (1-3) Special Topics in Philosophy

Instructor meets regularly with three or more students to discuss special topics in philosophy.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 5840 (1-3) Graduate Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6000 (3-4) Seminar in the History of Philosophy

Studies advanced topics in the history of philosophy. Content varies by semester, but may extend to any period in the history of philosophy, from the Presocratics into the modern era.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6100 (3) Seminar in Ethics

Intensive study of selected topics in ethical theory.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6200 (3) Seminar in Social and Political Philosophy

Provides an in-depth look at some particular topic in social and political philosophy, such as rights, political freedom, political obligation, or democracy.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6300 (3) Seminar in Philosophy of Mind

Intensive study of selected topics in philosophy of mind.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6310 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Recommended: Prerequisite at least one course at the 3000-level or higher in CSCI, LING, PHIL, or PSYC.

PHIL 6340 (3) Seminar in Epistemology

Intensive study of selected topics in epistemology.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6380 (3) Seminar in Metaphysics

Intensive study of selected topics in metaphysics.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6400 (3) Seminar in Philosophy of Science

Topics connected with development of nature of science: the structure of scientific theories, the testing of hypotheses, the theory of decisions in science and the basic conceptions and models of abstraction in the history of science.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHIL 6490 (3) Seminar in Philosophy of Language

Studies some of the main topics in the philosophy of language, such as meaning and theories of meaning, translation, speech acts, rules of language, reference, relevance of psycholinguistics, language and thought, and language and ontology.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

PHIL 6950 (1-6) Master's Thesis

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

PHIL 7415 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for graduate students pursuing a joint PhD in an approved core discipline and cognitive

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

PHIL 7425 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-).

Recommended: Prerequisite EDUC 6505 or PHIL 6310.

PHIL 7810 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

PHIL 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Philosophy graduate students only.

Philosophy - Master of Arts (MA)

The MA in Philosophy is intended to provide students with:

- A solid foundation in all the core areas of philosophy, together with a thorough grounding in the history of philosophy, in preparation for more advanced and specialized work at the doctoral level.
- Philosophical training for those who intend to go on to work in interdisciplinary areas bordering with philosophy, such as cognitive science or applied ethics and public policy.
- An opportunity for those who wish to explore more advanced study of philosophy for personal enrichment and satisfaction.
- The education needed for teaching philosophy at the secondary school level or at a community college.

We offer to MA students not only an outstanding education in philosophy, but also all the benefits of being in a large, active, collegial department, with numerous colloquia, conferences, workshops and reading groups in many areas of philosophy. MA students enroll in the same classes as PhD students, and are treated as full members of the graduate program.

Master's degree students do not typically receive guaranteed departmental funding, but in recent years most master's students have received teaching assistantships in some of their semesters in the program. (TA-ships come with both a stipend and a tuition waiver.) The department also has a fellowship specifically for MA students, the Wille Fellowship, which is awarded each semester to a first-year MA student to help defray the costs of tuition. MA students are encouraged to apply through the university for financial aid and university scholarships (for more information, see the Funding (<https://www.colorado.edu/philosophy/graduate/funding/>) webpage).

All domestic graduate students qualify for in-state tuition (<https://www.colorado.edu/bursar/costs/>) after just one year of residency in Colorado (<https://www.colorado.edu/registrar/students/state-residency/adult/>). Applicants admitted to the MA program who are not residents of Colorado or of any of the Western states might consider petitioning to defer their enrollment for one year, during which time they can establish residency in Colorado, in order to avoid paying out-of-state tuition.

The Department of Philosophy at the University of Colorado Boulder is a member of the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) (WRGP) which means that students from the Western states (Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington and Wyoming) can enroll in our MA program at in-state Colorado tuition rates (<http://bursar.colorado.edu/tuition-fees/tuition-and-fees-rate-sheets/>). Students need not demonstrate financial need. To be considered for the WRGP tuition rate, students simply apply directly to our program and identify themselves as WICHE WRGP applicants. WRGP students must fulfill all of our usual requirements for admission, meet all admission deadlines, and be selected for admission.

Students in the master's program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified

faculty that can supervise the writing of master's theses on a wide range of topics. There is also a non-thesis option for the MA.

Students considering both our PhD and our MA program should apply to the PhD program. Applicants not accepted to the PhD will automatically be considered for the MA program. Those interested only in the terminal MA program should apply just to that program. Students applying to the MA program can expect to hear about admission some time in late March to early April.

Students wishing to pursue a master's degree in philosophy should note the Graduate School requirements in the master's degree requirements (p. 1030) section and consult the MA Program page (<https://www.colorado.edu/philosophy/graduate/ma-program/>) and the Graduate Admissions page (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the Philosophy Department's website.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree, Philosophy - Bachelor of Arts (BA) (p. 485) and the Bachelor's–Accelerated Master's Program page (<https://www.colorado.edu/philosophy/undergraduate/bachelors-accelerated-masters-program/>) on the Philosophy Department's website.

Requirements

Degree Plans

Plan I: Thesis Option

The MA requires:

- 30 hours of approved graduate study at the 5000 level or above (philosophy courses taken below the 5000 level may be taken as PHIL 5810, with approval)
- demonstrated proficiency in the core areas of philosophy
- a successful thesis defense.

Four to six hours of the 30 credit hours must be thesis hours; the remaining 24 to 26 hours are for coursework credit hours (typically eight courses). At least 18 hours must be philosophy courses (PHIL 6940 and PHIL 6950 do not count).

No more than 9 hours of credit may be transferred into the program from other graduate programs. Students who enter the MA program already holding an MA degree may not transfer into the program any credits that applied toward the MA degree already held.

Students must demonstrate competence in the core areas of philosophy by passing, with a grade of B or better, one graduate or upper-division course in each of the following three areas: history of philosophy, metaphysics and epistemology, and values.

Required Courses and Credit Hours

Code	Title	Credit Hours
Required Courses		
PHIL 6950	Master's Thesis	4-6

Electives

One course on the history of philosophy. Course topic must cover a philosopher or subject in ancient (5th century BC through Augustine) or early modern philosophy (17th to 18th century; roughly Decartes to Kant).	3
PHIL 5010	Single Philosopher
PHIL 5020	Topics in the History of Philosophy
PHIL 6000	Seminar in the History of Philosophy
One course in metaphysics and epistemology:	3
PHIL 5300	Philosophy of Mind
PHIL 5340	Epistemology
PHIL 5360	Metaphysics
PHIL 5370	Free Will and Determinism
PHIL 5400	Philosophy of Science
PHIL 5490	Philosophy of Language
PHIL 5550	Metaphysics and Epistemology Proseminar
PHIL 6300	Seminar in Philosophy of Mind
PHIL 6340	Seminar in Epistemology
PHIL 6380	Seminar in Metaphysics
PHIL 6400	Seminar in Philosophy of Science
PHIL 6490	Seminar in Philosophy of Language
One course in values:	3
PHIL 5100	Values Proseminar
PHIL 5110	Contemporary Moral Theory
PHIL 5120	Philosophy and Animals
PHIL 5150	Topics in Applied Ethics
PHIL 5200	Contemporary Political Philosophy
PHIL 5210	Philosophy and Social Policy
PHIL 5230	Bioethics and Public Policy
PHIL 5240	Seminar in Environmental Philosophy
PHIL 5260	Philosophy of Law
PHIL 5290	Topics in Values and Social Policy
PHIL 5470	Probability and Rational Choice
PHIL 5700	Aesthetics
PHIL 6100	Seminar in Ethics
PHIL 6200	Seminar in Social and Political Philosophy
Other course as approved by the graduate director.	
Other electives to fulfill the 30-credit minimum:	15
PHIL 5030	Greek Philosophical Texts
PHIL 5040	Latin Philosophical Texts
PHIL 5440	Topics in Logic
PHIL 5450	History and Philosophy of Physics
PHIL 5460	Modal Logic
PHIL 5600	Philosophy of Religion
PHIL 5810	Special Topics in Philosophy (no more than 9 hours may be counted toward the 30-hour requirement)
PHIL 5840	Graduate Independent Study (no more than 6 hours may be counted toward the 30-hour requirement)
PHIL 6310	Issues and Methods in Cognitive Science

PHIL 7415	Cognitive Science Research Applications Seminar 1	
PHIL 7810	Topics in Cognitive Science	
Students must demonstrate competence in logic by earning a grade of B– or better in PHIL 2440 (Symbolic Logic), or an equivalent course, or in some more advanced logic course. Students may satisfy this requirement either by taking all the examinations in PHIL 2440 and averaging at least a B– or by earning at least a B– on the comprehensive final examination offered in that course each semester. Students may be exempted from this requirement by the Director of Graduate Studies if they have done suitable work in formal logic at other institutions, or in other departments at CU Boulder.		
Total Credit Hours		28-30

Thesis and Oral Defense

Each student must prepare a thesis plan acceptable to the chair of his or her thesis committee and proceed to write the thesis, working as closely as necessary with the chair. At the appropriate time, the committee will convene to hold a final oral defense of the thesis. A copy of the thesis must be furnished to each committee member at least two weeks prior to the scheduled date of the defense.

Plan II: Non-Thesis Option

The department will award a non-thesis MA to any student who has completed 33 credits of graduate-level coursework with a B+ average or better. Twenty-four hours of coursework must be in philosophy.

The student must also meet the standard logic requirement and take three credits in each of our three general areas: history of philosophy (ancient or modern, specifically); metaphysics and epistemology; and values.

Standard restrictions on the number of credits earned from special topics and from independent study apply.

Philosophy - Doctor of Philosophy (PhD)

The PhD program in philosophy at CU Boulder consists of approximately 2.5 years of coursework and 2.5 years of work on a dissertation, with 5 years of guaranteed funding. We are both a research and a teaching department; teaching appointments are not only the principal means of supporting graduate students but are also the way that we train graduate students for a career of teaching as well as doing research in philosophy.

Applicants for admission to the Graduate School for work toward a doctoral degree with a major in philosophy are expected to have had 18 or more credit hours in undergraduate courses in the subject.

Students in the doctoral program must satisfy a variety of requirements, including the completion of coursework. The department has a diversified faculty that can supervise the writing of doctoral dissertations on a wide range of topics. The department makes available teaching assistantships and then graduate part-time instructorships to its doctoral students, and assists with job placement.

Students wishing to pursue doctoral work in philosophy should note the doctoral degree requirements (p. 1031) and consult the PhD program portion (<https://www.colorado.edu/philosophy/graduate/phd-program/>) and the Graduate Admissions portion (<https://www.colorado.edu/philosophy/graduate/graduate-admissions/>) of the Department of Philosophy website.

Requirements

- *Coursework*: Students must take a minimum of 45 hours of approved graduate study, in addition to the 30 hours of dissertation credit hours required by the Graduate School.
- *Distribution requirements*: 27 hours must be devoted to satisfying specific distribution requirements.
- *Language and technical requirement*: Students must satisfy any language and/or technical requirements that the department judges to be necessary given the area of the dissertation.
- *Logic*: Students must demonstrate proficiency in propositional and first-order logic
- *Diagnostic paper*: Students must submit a diagnostic paper, generally at the beginning of the third semester of graduate study.
- *Qualifying papers*: Students must submit a qualifying paper, generally at the beginning of the fifth semester of graduate study. Students may advance in the program only if the qualifying paper is judged acceptable by the examining committee and approved by the department.
- *Prospectus and oral examination*: After passing the qualifying paper, students must assemble a prospectus committee of five faculty members, including a Chair/Advisor and (typically) an outside member. Students must submit a written prospectus to this committee, who, after judging the prospectus acceptable, will conduct an oral exam on the prospectus and related topics.
- *Dissertation and oral defense*: Students must write a dissertation that is acceptable to the dissertation committee, and defend the dissertation in a public, oral defense at a time deemed appropriate by the committee.
- Students are expected to make reasonable progress toward the PhD, and will be evaluated by the department in this regard each spring.

For detailed requirements, consult the PhD section (<https://www.colorado.edu/philosophy/graduate/phd-program/>) of the department's website and especially the Official PhD Requirements and Additional Program Information (<https://www.colorado.edu/philosophy/phdreqs/>) (PDF).

Recommended Plan of Study

Ideally, PhD students in their first two years will take and complete three courses per semester, for a total of 12 courses (36 credit hours) by the end of the second year. The minimum number of courses PhD students can take to make good progress in the first two years of the program is five courses per year.

At the beginning of the third semester in the program, students turn in a diagnostic paper and will receive feedback from three faculty members.

At the beginning of the fifth semester in the program, students turn in the qualifying paper, which will be evaluated anonymously; this is a qualifying event that the student must pass in order to be considered for advancement to candidacy in the PhD program.

In the fifth semester, students continue to take courses in order to complete the required 45 credit hours (typically 15 courses). Ideally, students should have completed coursework by the end of their fifth semester and should then begin work on the prospectus.

Ideally, students will submit and defend their prospectus sometime in their sixth semester. Students are eligible to sign up for up to 10 dissertation hours before they pass their prospectus exam. The

remainder of the required 30 dissertation hours are used in the fourth and fifth (and possibly sixth) years in the program while completing the dissertation.

Physics

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, quantum information science, and physics education research.

Doctoral programs in chemical physics and geophysics are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Course code for this program is PHYS.

Master's Degree

- Physics - Master of Science (MS) (p. 1271)

Doctoral Degree

- Physics - Doctor of Philosophy (PhD) (p. 1271)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

PHYS 5030 (3) Intermediate Mathematical Physics 1

This course and its continuation, PHYS 5040, form a survey of classical mathematical physics. Studies complex variable theory and finite vector spaces, and includes topics in ordinary and partial differential equations, boundary value problems, potential theory, and Fourier analysis.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5030

Requisites: Restricted to graduate students only.

PHYS 5040 (3) Intermediate Mathematical Physics 2

Continuation of PHYS 5030. Includes group theory, special functions, integral transforms, integral equations and calculus of variations.

Equivalent - Duplicate Degree Credit Not Granted: MATH 5040

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5030.

PHYS 5070 (3) Introduction to Computational Physics

Surveys methods and practices in programming and scientific computing for the study of physics, using the Python programming language. Core material will include data analysis and visualization, numerical solution of differential equations, working with large-scale remote computers, and general software skills such as debugging, version control, and collaborative tools. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

PHYS 5130 (3) Biological Electron Microscopy: Principles and Recent Advances

Covers basic mechanisms for imaging and recent advances used in current biological research, elements of electron optics, image optimization, resolution, radiation damage, various imaging modes (TEM, HVEM, Sem, Stem, Stm), specimen quantitation and reconstruction (stereo and 3-D), microanalysis and electron diffraction. Specimen preparation treated only incidentally.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4130

PHYS 5141 (3) Astrophysical and Space Plasmas

Covers magnetohydrodynamics and a few related areas of plasma physics applied to space and astrophysical systems, including planetary magnetospheres and ionospheres, stars, and interstellar gas in galaxies.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5140

Requisites: Restricted to Physics (PHYS) or Astronomy (ASTR) graduate students only.

PHYS 5150 (3) Introductory Plasma Physics

Includes basic phenomena of ionized gases, static and dynamic shielding, linear waves, instabilities, particles in fields, collisional phenomena, fluid equations, collisionless Boltzman equations, Landau damping, scattering and absorption of radiation in plasmas, elementary nonlinear processes, WKB wave theory, controlled thermonuclear fusion concepts, astrophysical applications and experimental plasma physics (laboratory). Department enforced prerequisite: PHYS 3310. Instructor consent required for undergraduates.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5150

Requisites: Restricted to graduate students only.

PHYS 5160 (3) Fundamentals of Optics and Lasers

Covers the basic physics of lasers. Topics include basics of optical resonators and gaussian beam propagation, stimulated emission, laser threshold conditions, laser linewidth, q-switching and mode locking of lasers, tuning of CW lasers, and specifics of various common lasers.

Requisites: Restricted to graduate students only.

PHYS 5210 (3) Theoretical Mechanics

Variational principles, Lagrange's equations, Hamilton's equations, motion of rigid body, relativistic mechanics, transformation theory, continuum mechanics, small oscillations, Hamilton-Jacobi theory.

Requisites: Restricted to graduate students only.

PHYS 5250 (3) Introduction to Quantum Mechanics 1

Quantum phenomena, Ehrenfest theorem and relation to classical physics, applications to one-dimensional problems, operator techniques, angular momentum and its representations, bound states and hydrogen atom, and Stern-Gerlach experiment and spin and spinor wave function. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 5260 (3) Introduction to Quantum Mechanics 2

Symmetries and conservation laws, identical particle systems, approximation techniques (including time-dependent and time-independent perturbation theories and variational techniques) and their applications, scattering theory, radiative transitions, and helium atom.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5250.

PHYS 5400 (3) Introduction to Fluid Dynamics

Covers equations of fluid motion relevant to planetary atmospheres and oceans and stellar atmospheres; effects of rotation and viscosity; and vorticity dynamics, boundary layers and wave motions. Introduces instability theory, nonlinear equilibration and computational methods in fluid dynamics. Department enforced prerequisite: partial differential equations or equivalent.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5400 and ASTR 5400

Requisites: Restricted to graduate students only.

PHYS 5430 (3) Advanced Laboratory

Two lectures, one lab per week. Experiments introduce students to realities of the experimental physics so they gain a better understanding of theory and an appreciation of the vast amount of experimental work done in the physical sciences today. Department enforced prerequisites: PHYS 3330 and PHYS 3220 and PHYS 3320. Department enforced corequisites: PHYS 4410.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4430

Requisites: Restricted to graduate students only.

PHYS 5450 (3) History and Philosophy of Physics

Investigates the role of experiment in physics; case studies in the history and philosophy of physics and in scientific methodology.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4450 and PHIL 4450 and PHIL 5450

Requisites: Restricted to graduate students only.

PHYS 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4460 and EDUC 4460 and EDUC 5460

Requisites: Restricted to graduate students only.

PHYS 5550 (3) Cells, Molecules and Tissues: A Biophysical Approach

Focuses on the biophysics governing the structure/function of enzymes, cells, extracellular matrix and tissue. Synthesizes ideas from molecular biology, physics, and biochemistry, emphasizing how low Reynolds number physics, not Newtonian physics, is relevant to life inside a cell.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4550 and MCDB 4550 and MCDB 5500

PHYS 5560 (3) Introduction to Biophysics

Covers an introduction to the physics of living systems. Focuses on how living systems are able to generate order, with both physical principles and biological examples. Covers the development of quantitative models for biological systems, including estimates. Taught from a physics perspective, with biology background introduced as needed.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4560 and MCDB 4560 and MCDB 5560

Grading Basis: Letter Grade

PHYS 5606 (3) Optics Laboratory

Consists of 13 optics experiments that introduce the techniques and devices essential to modern optics, including characterization of sources, photodetectors, modulators, use of interferometers, spectrometers and holograms, and experimentation of fiber optics and Fourier optics.

Equivalent - Duplicate Degree Credit Not Granted: ECEN 5606

Recommended: Prerequisite undergraduate optics course such as PHYS 4510.

PHYS 5730 (3) Particle Physics

Introduces the properties of elementary particles, phenomenology of particle interactions, particle detector, particle accelerators, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, symmetries and symmetry breaking.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites undergraduate courses in quantum mechanics and electricity and magnetism.

PHYS 5770 (3) Gravitational Theory (Theory of General Relativity)

Presents Einstein's relativistic theory of gravitation from geometric viewpoint; gives applications to astrophysical problems (gravitational waves, stellar collapse, etc.). Instructor consent required for undergraduates.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 3320.

PHYS 5840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 5970 (3) Seminar on Physical Methods in Biology

Covers basic mechanisms and applications of physical methods used in current biological research, microprobe analysis, EELS, elementary electron and x-ray crystallography, biomedical imaging (NMR, MRI, PET, CAT), Fourier analysis, synchrotron radiation, EXAFS, neutron scattering and novel ultramicroscopy techniques. Includes lectures, student presentations, occasional demonstrations. Emphasis depends on student interest.

Equivalent - Duplicate Degree Credit Not Granted: PHYS 4970

Requisites: Restricted to graduate students only.

PHYS 6260 (3) Geometry of Quantum Fields and Strings

Focuses on differential geometric techniques in quantum field and string theories. Topics include: spinors, Dirac operators, index theorem, anomalies, geometry of superspace, supersymmetric quantum mechanics and field theory and nonperturbative aspects in field and string theories.

Equivalent - Duplicate Degree Credit Not Granted: MATH 6260

Recommended: Prerequisites MATH 6230 and PHYS 5250 and MATH 6240 and PHYS 7280.

PHYS 6610 (3) Earth and Planetary Physics 1

Examines mechanics of deformable materials, with applications to earthquake processes. Introduces seismic wave theory. Other topics include inversion of seismic data for the structure, composition and state of the interior of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6610 and ASTR 6610

Requisites: Restricted to graduate students only.

PHYS 6620 (3) Earth and Planetary Physics 2

Covers space and surface geodetic techniques as well as potential theory. Other topics are the definition and geophysical interpretation of the geoid and of surface gravity anomalies; isostasy; post-glacial rebound; and tides and the rotation of the Earth.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6620 and ASTR 6620

Requisites: Restricted to graduate students only.

PHYS 6630 (3) Earth and Planetary Physics 3

Examines the solar system, emphasizing theories of its origin and meteorites. Highlights distribution of radioactive materials, age dating, heat flow through continents and the ocean floor, internal temperature distribution in the Earth, and mantle convection. Also covers the origin of the oceans and atmosphere.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6630 and ASTR 6630

Requisites: Restricted to graduate students only.

PHYS 6650 (1-3) Seminar in Geophysics

Advanced seminar studies in geophysical subjects for graduate students.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6650 and GEOL 6650

Requisites: Restricted to graduate students only.

PHYS 6655 (3) InSAR Processing and Interpretation

Understand the concepts and applications of interferometric synthetic aperture radar (InSAR) and differential InSAR, to include an introduction to physical geodesy and satellite techniques.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6655
Grading Basis: Letter Grade

PHYS 6670 (2) Geophysical Inverse Theory

Principles of geophysical inverse theory as applied to problems in the Earth sciences, including topography, Earth structure and earthquake locations.

Equivalent - Duplicate Degree Credit Not Granted: GEOL 6670

Requisites: Restricted to graduate students only.

Recommended: Prerequisites a course in calculus and a course in computer programming (any language).

PHYS 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

PHYS 6950 (1-6) Master's Thesis

Approved problem in theoretical or experimental physics under the direction of staff members. Intended to introduce the student to procedures in research and development work. Work of an original nature expected.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

PHYS 7160 (3) Intermediate Plasma Physics

Continuation of PHYS 5150. Topics vary yearly but include nonlinear effects such as wave coupling, quasilinear relaxation, particle trapping, nonlinear Landau damping, collisionless shocks, solutions; nonneutral plasmas; kinetic theory of waves in a magnetized plasma; anisotropy; inhomogeneity; radiation- ponderomotive force, parametric instabilities, stimulated scattering; plasma optics; kinetic theory and fluctuation phenomena.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 7160

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 5150.

PHYS 7230 (3) Statistical Mechanics

Classical and quantum statistical theory, including study of both equilibrium and nonequilibrium systems. Topics covered include kinetic theory, degenerate gases, macrocanonical and grand canonical ensembles, and irreversible processes. Department enforced prerequisite: advanced undergraduate quantum mechanics course.

Requisites: Restricted to graduate students only.

PHYS 7240 (3) Advanced Statistical Mechanics

Introduces current research topics in statistical mechanics. Topics vary from year to year and may include phase transitions, critical phenomena, nonequilibrium phenomena, dense fluids, dynamical systems, plasma physics, or quantum statistical mechanics.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7230.

PHYS 7250 (3) Quantum Many Body Theory

Theory of quantum many body systems, including methods based on Green's functions, Feynman diagrams, and coherent state path integral with applications to interacting quantum gases, superconductivity and superfluidity, quantum phase transitions, quantum magnetism, quantum motion in the presence of disorder, and topological states of matter.

Requisites: Restricted to graduate students only.

PHYS 7270 (3) Introduction to Quantum Mechanics 3

Radiation theory; relativistic wave equations with simple applications; introduction to field theory and second quantization.

Requisites: Restricted to graduate students only.

PHYS 7280 (3) Advanced Quantum Theory

Quantum theory of fields, elementary particles, symmetry laws, and topics of special interest.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7270 or instructor consent required.

PHYS 7310 (3) Electromagnetic Theory 1

Sophisticated approach to electrostatics, boundary value problems, magnetostatics, applications of Maxwell's equations to electromagnetic wave propagation, wave guides, and resonant cavities and magnetohydrodynamics.

Requisites: Restricted to graduate students only.

PHYS 7320 (3) Electromagnetic Theory 2

Continuation of PHYS 7310. Topics include relativistic particle dynamics; radiation by moving charges; multiple fields; radiation damping and self-fields of a particle; collisions between charged particles and energy loss; radiative processes; and classical field theory.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PHYS 7310.

PHYS 7430 (3) Soften Condensed Matter Physics

Introduces the science of liquid crystals, polymers, biological membranes, biopolymers, block copolymers, molecular monolayers, colloids, nanoparticle suspensions, emulsions, foams, gels, elastomers and other soft materials. Topics vary from semester to semester and is geared toward graduate students with diverse preparation backgrounds, including students from the Department of Physics, as well as other science and engineering departments.

Requisites: Restricted to graduate students only.

PHYS 7440 (3) Theory of the Solid State

Stresses application to the solid state of physical concepts basic to much of modern physics, single-particle approximation, and the energy-band description of electron states in solids, pseudopotential theory applied to ordered and disordered systems, dynamical behavior of electrons in solids, lattice dynamics, Hartree-Fock and random-phase approximation in solids, many-body aspects of magnetism, and superconductivity.

Requisites: Restricted to graduate students only.

PHYS 7450 (3) Theory of Solid State 2

Second semester of condensed matter physics, covers topics in soft condensed matter physics, liquid crystals, semiconductors, Quantum Hall effect, Fractional Quantum Hall effect, superconductivity and other topics at the discretion of the instructor.

Requisites: Restricted to graduate students only.

PHYS 7550 (3) Atomic and Molecular Spectra

Covers theory of atomic structure and spectra, including coupling of angular momenta, tensor operators, energy levels, fine and hyperfine structure, transition probabilities, Zeeman and Stark effects. Molecular spectra: electronic, vibrational, and rotational states. Rotation matrices, symmetric top.

Requisites: Restricted to graduate students only.

PHYS 7560 (3) Quantum Optics

Covers quantum optical and atomic systems including topics such as: coherent and squeezed states, theory of optical coherence, atom-radiation interaction, optical Bloch equations, open quantum systems, dynamics on the Bloch sphere, resonance fluorescence, beam-splitters and interferometry, entanglement and quantum information.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 3220 and PHYS 4410.

PHYS 7570 (3) Quantum Information and Computing

Covers the foundations of quantum information and computing. Includes bits and qubits, entanglement, quantum algorithms, and quantum error correction. More advanced topics selected from: Quantum Shannon theory, quantum communication and networks, quantum-enhanced measurements, and quantum simulation. Department enforced prerequisite: PHYS 5250.

Requisites: Restricted to graduate students only.

PHYS 7650 (3) Nonlinear and Nano-Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include: description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their integration, measurement and manipulation and their use in applications including spectroscopy.

Requisites: Restricted to graduate students only.

Recommended: Prerequisites PHYS 4510 or PHYS 5160.

PHYS 7660 (3) Ultrafast Optics

Covers the field of ultrafast optics including both experimental and theoretical aspects. Topics include description of ultrashort optical pulses, propagation of pulses including dispersion and nonlinearity, their generation, measurement and manipulation and their use in applications including spectroscopy. Department enforced prerequisite: PHYS 5160, or PHYS 4510, or ECEN 5645.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

PHYS 7730 (3) Theory of Elementary Particles

Systematics of elementary particles, leptons, quarks, gauge bosons, symmetries and symmetry breaking, scattering cross sections, decay rates, electron-positron annihilation, lepton scattering and hadron structure, quantum chromodynamics, electroweak interactions, gauge theories.

Requisites: Restricted to graduate students only.

PHYS 7810 (1-3) Special Topics in Physics

Various topics not normally covered in the curriculum; offered intermittently depending on student demand and availability of instructors.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

PHYS 7820 (3) Topics in Scientific Writing

Teaches strategies used in scientific writing with emphasis on problem statement, audience analysis and principles of sound argument; reviews and reinforces essential writing skills, stressing the need for careful and strategic revision; provides experience in writing academic and professional communications; presentation skills and proposal writing. Most appropriate for students beginning to write journal articles, Comps II paper, or dissertation chapter.

Requisites: Restricted to graduate students only.

PHYS 7830 (1) Plasma Seminar

One credit 'journal club' style course covering current and significant historical advances in plasma physics research. Each week the class is assigned a journal article to read in advance of the meeting and one student is selected (on a rotating basis) to present a synopsis and lead a round-table discussion. Cannot be used for minimum credit hour requirements of graduate program. See also PHYS 7810 and PHYS 7820. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

PHYS 7840 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 7850 (1-3) Selected Topics for Graduate Independent Study

Subject matter to be arranged. May be repeated for a total of 7 credit hours.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PHYS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Physics - Master of Science (MS)

Students may obtain a master's degree as either an undergraduate student through the bachelor's–accelerated master's degree program or as a graduate student.

Graduate students are generally only admitted to the PhD program in physics. Therefore, graduate students who have completed their PhD comprehensive exam or who are unable to complete the PhD program may earn an MS degree en route to a PhD degree. In certain circumstances, students can be admitted to the graduate program for a terminal master's degree, in which case the prerequisites are the same as for the doctoral program.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degrees:

- Physics - Bachelor of Arts (BA) (p. 499)
- Engineering Physics - Bachelor of Science (BSEP) (p. 851)

Requirements

Qualifying Examination

The Graduate Record Examination (GRE) aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this examination is normally taken before the time of entry into the Graduate School.

Course Requirements

There are two separate plans for obtaining the master's degree, both of which require a total of 30 credit hours with a grade of B- or better at the 5000 level or above (up to 6 credit hours may be at the 3000 or 4000 level if approved by the physics graduate chair). All but 3 credit hours must be in physics (more credit hours may be allowed with permission of the physics graduate chair). A minimum of a B average (GPA of 3.0) must be maintained.

Degree Plans

Plan I: Thesis Option

This plan requires 4–6 thesis credit hours and completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
Required Courses		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	

PHYS 7230	Statistical Mechanics	
Total Credit Hours		15

The student must write a thesis and present a talk to a three-member faculty committee.

Plan II: Non-Thesis Option

This plan requires completion of five of the following courses with a grade of B- or better.

Code	Title	Credit Hours
Required Courses		
Select five of the following courses:		15
PHYS 5250	Introduction to Quantum Mechanics 1	
PHYS 5260	Introduction to Quantum Mechanics 2	
PHYS 7310	Electromagnetic Theory 1	
PHYS 7320	Electromagnetic Theory 2	
PHYS 5210	Theoretical Mechanics	
PHYS 7230	Statistical Mechanics	
Total Credit Hours		15

The student must pass the comprehensive exam II, which is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question and answer oral session.

Physics - Doctor of Philosophy (PhD)

Graduate study and opportunities for basic research are offered in the areas of nuclear physics, theoretical physics, condensed matter physics, elementary particle physics, plasma physics, atomic and molecular physics, optical science and engineering, laser physics, fundamental measurements, liquid crystal science and technology, biophysics, quantum information science, and physics education research.

Doctoral programs in chemical physics (<https://catalog.colorado.edu/graduate/colleges-schools/arts-sciences/programs-study/chemistry-biochemistry/chemical-physics-doctor-philosophy-phd/>) and geophysics (p. 1200) are offered jointly with the Department of Chemistry and with the other departments that participate in the interdepartmental geophysics program.

Requirements

Prerequisites

Entering graduate students must have a thorough undergraduate preparation in physics, equivalent to an undergraduate physics major at a recognized college or university. This preparation includes courses in general physics, analytical mechanics, electricity and magnetism, thermodynamics, quantum mechanics, atomic physics and mathematics through differential equations and complex variables.

Students wishing to pursue graduate work in physics leading to candidacy for an advanced degree should carefully read the Doctoral Degree Requirements (p. 1031) section of this catalog.

Qualifying Examination

The Graduate Record Examination aptitude tests and advanced test in physics are normally used in place of a qualifying examination, and this

examination is normally taken before the time of entry into the Graduate School.

Course Requirements

To earn a PhD, candidates must complete 30 credit hours of graduate courses and 30 hours of dissertation credit. At least 27 of the 30 credit hours of coursework must be physics courses at the 5000 level or above; exceptions may be granted with the discretion of the associate chair of graduate studies. All courses, required or otherwise, must be passed with a grade of B- or better, and a course may be repeated only once.

Comprehensive Examination

The comprehensive examination is divided into three parts. Part I consists of passing any five of the following six courses with a B- or better:

Code	Title	Credit Hours
PHYS 5210	Theoretical Mechanics	3
PHYS 7230	Statistical Mechanics	3
PHYS 5250 & PHYS 5260	Introduction to Quantum Mechanics 1 and Introduction to Quantum Mechanics 2	6
PHYS 7310 & PHYS 7320	Electromagnetic Theory 1 and Electromagnetic Theory 2	6

The associate chair may waive courses for students with graduate-level equivalents. Students who are enrolled in Applied Physics Tracks have different course requirements than listed above. See the Applied Physics Tracks Requirements page (<https://www.colorado.edu/physics/academics/graduate-students/graduate-program-requirements-phd/graduate-tracks-applied-physics-and/>) on the Department of Physics website for more information. Part II is a three-section examination that includes a formal research review paper and a formal presentation, followed by a question-and-answer oral session. Part III consists of a thesis prospectus presented to the thesis committee.

Part II of the comprehensive examination must be taken after successful completion of Part I, but no later than the student's sixth enrolled regular semester. Part III must be completed prior to the completion of the student's fourth year. Parts II and III of the comprehensive examination may be taken a second time, no more than one semester after the first attempt.

Language Requirement

The department has no requirement in foreign languages.

Political Science

The Department of Political Science offers instruction and research in the art and science of politics. Work within the department is organized around six basic fields: American government and politics, comparative politics, international relations, public policy, political theory and empirical theory and methodology. The department's mission is to understand the political world and to equip students and their community with the skills for a lifetime of inquiry and engagement.

Course code for this program is PSCI.

Doctoral Degree

- Political Science - Doctor of Philosophy (PhD) (p. 1280)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Adler, Edward Scott (https://experts.colorado.edu/display/fisid_108903/)
Professor; PhD, Columbia University

Courses

PSCI 6851 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science.

Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and SOCY 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

PSCI 6948 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSCI 7002 (3) Seminar in West European Politics

Examines West European politics in terms of general theories of comparative politics, including institutional, behavioral and political economy approaches.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7004 (3) Seminar: Political Theory

Allows for intensive research in and presentation of selected topics. Introduces students to the broad context within which political ideas arise. Deals with classical and modern thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7008 (1) Teaching Political Science

Designed to prepare graduate student teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline-specific education.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 7011 (3) Seminar: American Politics

Core field seminar for students of American politics. Course work emphasizes the diversity of contemporary research on American political history, political institutions, and political behavior.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7012 (3) Seminar: Comparative Political Systems

Discusses current literature on comparative politics including theoretical and methodological issues.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7013 (3) Seminar: International Relations

Reviews salient literature on international relations, and subsequent presentation and critical discussion of analytical studies. Allows students wide latitude in substantive and methodological approaches. Emphasizes changing trends and efforts to understand the bases for cooperation and conflict.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7021 (3) Latinos and U.S. Politics

Examines in depth the theoretical and empirical literature assessing the political situation and activities of Latinos (Mexican Americans, Puerto Ricans, Cuban Americans, and others) in the U.S. Stresses original research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7022 (3) Seminar in Political and Economic Development

Covers domestic political and economic development in Latin America, Africa, and Asia, as well as interactions with the global economy. Includes defining, explaining, and prescribing policies for successful development, and comparing the experiences of developing and industrialized countries.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7024 (3) Seminar: Selected Political Theories

Familiarizes students with selected political philosophies or theories in classical or modern political thought.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7028 (1) Teaching Political Science 2

Second course designed to train graduate teachers in the essentials of political science teaching and provide a background in theories of political science teaching and practical skills development in discipline specific education.

Requisites: Requires prerequisite course of PSCI 7008 (minimum grade D-). Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 7031 (3) Seminar: Political Attitudes and Behavior

Provides an intensive examination of topics in political attitudes and behavior such as political participation, ideology, voting, and elite behavior. Reviews methodology of behavioral research and introduces ICPSR data archive and computer-based research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7032 (3) Seminar: Latin American Politics

Stresses intensive study of the political process in Latin America with special emphasis on democratization.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7043 (3) Seminar: Problems of International Organization

Studies selected problems concerning administration and operation of public international organizations, including the United Nations and its specialized agencies. Considers decision making, executive leadership, internal organization, personnel policies, coordination of activities, and financing.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7046 (3) Seminar: Urban Public Policy

Focuses on formulation, revision, and outcomes of public policy in American urban communities. Also uses some comparative Canadian and European literature.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7051 (3) Seminar: The United States Congress

Comprehensively examines literature and selected research topics concerning the United States Congress.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7052 (3) Democracy & Authoritarianism

Examine differences between democracies and authoritarian regimes; the choices and the consequences of democratic institutions in authoritarian regimes; and the causes of authoritarian survival and demise and the subsequent political choice.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Additional Information: Departmental Category: Comparative

PSCI 7053 (3) War and Peace

Explores the conditions that promote conflict between countries, focusing on broad and systemic explanations of war and peace. Investigates classical as well as current behavioral approaches to understanding why countries fight.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7055 (3) Introductory Game Theory

Develops competence in engaging formal theories of politics and in constructing and solving basic game-theoretic models of political behavior.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7056 (3) Readings in Public Policy

Explores diverse approaches to policy choice, change, and learning processes. Overviews literature on policy determinants and typologies, policy subsystems, innovation and diffusion, agenda setting, implementation, problem definition and social construction, policy design, institutional analysis, and policy and democratic values.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7062 (3) The Politics of Ethnicity

Explores the political aspects of pluralism, ethnonationalism, separatism, and related phenomena. Examines theories of ethnic mobilization, conflict, and accommodation in the context of political development and nation building. Includes cross-polity comparisons and case studies of multiethnic societies in the developed and developing world.

Requisites: Restricted to graduate students only.

Recommended: Requisite at least one course in comparative politics.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7071 (3) Seminar: An Introduction to the Rule of Law

Introduces students to debates about the role of institutions, particularly but not exclusively legal institutions, in placing limits on the state and fostering the rule of law. What is law? Why do courts exist and what is their role in the state? What institutions are necessary to establish the rule of law? Why are institutions successful in some contexts and not others? Considers these questions by surveying classic and current research from American and comparative politics literatures on topics such as judicial independence, credible commitments, separation of powers and constitutional design.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7073 (3) Seminar: Global Political Economy

Introduces graduate students to concepts, theories, and data used to study the global system from a political-economic framework. Examines world systems analysis, regime change theory, and dependency theory with respect to operation of the exchange and power relationship within the contemporary world system.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7075 (3) Scope and Methods of Political Science

Introduces students to research design, with a subsequent focus on professional development. Students learn about different styles of research, central methodological points surrounding (and differentiating) these styles, and standards for evaluating research, regardless of approach or content.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7085 (4) Introduction to Political Science Data Analysis

Provides intensive experience with quantitative techniques commonly employed in political science research, covering basic inferential and descriptive statistics through multiple regression. Students undertake substantive research projects, requiring lab instruction in the use of the computer in quantitative applications of political science research.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7091 (3) Politics of Social Movements

Examines theoretical and empirical research on American social movements. Emphasizes the role of movements as political actors and their ability to bring about changes in public policy and national political institutions.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7095 (3) Advanced Political Data Analysis

Provides advanced training in the statistical modeling of political relationships. Focuses on the properties and assumptions of the ordinary least squares regression model, building on material covered in PSCI 7085: Introduction to Political Science Data Analysis.

Requisites: Requires prerequisite course of PSCI 7085 (minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7108 (3) Special Topics

Various topics not normally offered in the curriculum. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 7111 (3) Seminar: American Political Institutions

Intensive examination of the structure and rules of different political institutions in the United States. Explores both the changing approaches to the study of American political institutions as well as many of the major research topics on the presidency, Congress, the judiciary, and the bureaucracy.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7114 (3) Survey of Historical and Contemporary Political Theory

Examines major texts of Western political thought from the ancients through the 21st century. Introduces students to major schools of contemporary political theory, while situating these in their larger political context. Professionalizes students through presentations and research projects. Texts vary each semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7115 (3) Qualitative Methods

Develop proficiency in constructing research designs with qualitative methods. The goal is to understand and be able to justify research designs involving relatively small numbers of observations as good political science given the fact that such designs may limit our ability to generalize.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7116 (3) Context-Sensitive Research Methods

Prepares students to conduct research on topics where data is not obvious or not easily available. Encompasses variations in context and setting as part of data observations. Methods include interviewing protocols, interpretive methods, cluster analyses, case study methodologies and textual analyses.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 5740

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7118 (3) Foundations of Environmental Justice

Examines environmental justice movements, policies, institutions, objectives, and scholarship. Identifies factors that contribute to environmental inequality, and efforts to reduce it.

Equivalent - Duplicate Degree Credit Not Granted: GEOG 7118, COMM 7118 and ENVS 7118

Requisites: Restricted to graduate students only.

PSCI 7123 (3) Civil Conflict

Surveys historical, theoretical, and empirical analyses of violent conflict behavior, including the causes and consequences of civil war, protests, insurgency, terrorism, revolution, and intervention.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7124 (3) Contemporary Democratic Theory

Surveys major schools of contemporary democratic theory and introduces students to current scholarly debates about democracy and democratic politics. Professionalizes students through class presentations and research projects. Specific controversies and texts vary each semester.

Requisites: Restricted to graduate students only.

Recommended: Requisite some previous coursework in political theory or philosophy.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7126 (3) Introduction to Public Policy

Designed for graduate students specializing in the field of public policy in the political science program. Surveys a wide variety of approaches to the analysis and understanding of public policy. The course is not a survey of any particular set of substantive policy areas but instead is intended as an examination of the enduring puzzles that analysts of public policy commonly confront, the kinds of research methodologies that they employ, and a selection of the techniques that they bring to bear on their research questions.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7131 (3) Political Psychology

Focuses on the psychological roots of political behavior, including the origins of political beliefs, political decision-making processes, and the psychology of group interactions.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7132 (3) Comparative Political Economy

Explores the relationship between economics and politics in developed and developing countries. Gives students an historical overview of 20th century economic trends and covers scholarly approaches to topics such as political and economic institutions, economic ideas and interests, the political causes of growth and equality, globalization and the welfare state, and varieties of capitalism.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite PSCI 7012.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7136 (3) Public Policy and Behavioral Science

Public policy is usually designed with the assumption that we make optimal choices based on our own best interests. Findings from the behavioral sciences, however, challenge this traditional view and reveal that a wide array of factors influence our decisions. In this course, we will explore the gaps between how we assume individuals to behave and how people actually behave. With better knowledge of what motivates human behavior, we will examine and discuss how policy might be better designed and executed to improve outcomes in society.

Requisites: Restricted to graduate students only.

PSCI 7143 (3) Strategic Choice of Political Conflict

Explores the conditions under which political actors go to war, and the conditions under which they broker peace. Approaches political conflict from the perspective of strategic choice. Conflict is not an accident, but is the deliberate result of decisions by actors. Actors choose conflict when bargaining obstacles prevent them from reaching a peaceful agreement.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

PSCI 7145 (3) Advanced Game Theory

Covers more advanced applications of game theory in political science. Equips students with the skills to design and solve models at a reasonably high level of complexity and generality, and to understand how to effectively make use of such models in their research.

Requisites: Requires prerequisite course of PSCI 7055 (minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7151 (3) American Subnational Politics and Government

Provides a comprehensive overview of the issues and literature concerning American "Subnational" politics. Considers three bodies of literature: American federalism and intergovernmental relations, state politics, and urban/local politics. Also examines a number of policy issues.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7155 (3) Maximum Likelihood Estimation and Generalized Linear Models

Introduces maximum likelihood estimation and extends the linear model to several "generalized linear models." Provides students with the skills to analyze and understand a broad class of outcome variables and data structures such as dichotomous outcomes, counts, ordered and unordered categorical outcomes and bounded variables. Also examines several special topics such as multilevel models, causal inference and missing data.

Requisites: Requires prerequisite courses of PSCI 7075 and PSCI 7085 and PSCI 7095 (all minimum grade B-). Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7165 (3) Experimental Methods

Focuses on the design, implementation, and analysis of experiments in political science, including lab experiments, survey experiments, and field experiments.

Requisites: Restricted to Political Science (PSCI) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7171 (3) Seminar: Law and Democratic Governance

Explores cutting-edge debates in election law. Studies different perspectives on the current controversies in the field, in addition to select opportunities to engage scholars directly about their work. Develops students' understanding of the law of democracy, exposing students to some of the best scholarship, and improving students' ability to evaluate and critique legal scholarship.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8205

Recommended: Prerequisite PSCI 7011.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7172 (3) Comparative Political Institutions

Institutional theory has burgeoned across the social sciences in the last three decades. This course aims to raise awareness and understanding of institutional theory in comparative politics, as compared to alternative approaches such as political economy, political behavior, etc., and to help students develop skills to communicate this awareness and understanding to other professional political scientists.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7173 (3) The Politics of International Factor Flows

Focuses on the second dimension of international trade: the politics of international factor flows. Economic globalization can be defined as the freer flow of (1) goods and services (i.e., international trade) and (2) factors of production (e.g., capital and labor) across national borders. Links these topics in International Political Economy to broader theories of International Relations, namely Institutionalism and Liberalism.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7175 (3) Dissertation Seminar

Help students make progress towards (1) in the short term: focusing in on a dissertation topic, crafting a dissertation prospectus, and identifying potential funding sources; and (2) in the long term: sending papers out for review, developing a package for the job market, and understanding the academic job market and the tenure process.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7181 (3) Immigration Law and Immigrants' Rights

Addresses four broad questions: Who is a citizen of the United States? Who else can come to this country? When and why can noncitizens be forced to leave? Who has the authority to answer these questions? These questions prompt us to examine the history of U.S. immigration, the constitutional-statutory-regulatory framework that governs immigration and citizenship law and the federal agencies that administer it. Also addresses contemporary challenges to, and assertions of, immigrants' rights.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7615

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7183 (3) International Cooperation

Investigates the origins, forms and consequences of international cooperation. The course covers both theoretical material related to international cooperation and various related global issue areas; security, economy, environment and social welfare. For each issue area, the key theoretical debates, empirical findings, as well as central challenges and parameters that constrain international cooperation will be investigated.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7185 (3) Political Network Analysis

Explores all aspects of political network analysis including disciplinary background, theories and concepts, approaches and applications, data basics and measurement, and techniques of analysis. Data assignments use software such as UCINET and R. Introduces visualization software including NetDraw, NetworkX and Cytoscape.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7191 (3) Law and Politics Colloquium: Race in America

A co-taught colloquium that exposes students to highly prominent scholars conducting research on current topics at the intersection of race, social science and the law, including racial profiling, hate crime and affirmative action. Students will complete a final paper satisfying the CU Law seminar requirement.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 8645

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7203 (3) Political Economy of International Migration and Policy

Provides an overview of the seminal and cutting edge research on the political economy of international migration including both immigration and emigration. Covers a diverse set of international migration issues, including public attitudes toward immigration, special interest politics of immigration policy making and the dynamics between political institutions and international migration.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7206 (3) Public Policy and the Governance of Natural Resources

Addresses a basic empirical puzzle in comparative environmental policy: why are some governmental organizations able to create relatively functional governance arrangements for natural resources management, while many others fail to do so? More specifically, we will seek to understand the particular contextual conditions that make successful governance transformations more likely.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7222 (3) Comparative Political Behavior

Provides an introduction to research on behavioral processes and outcomes using readings mainly from the sub-fields of American Politics and Comparative Politics. Geographic emphasis leans toward advanced democracies because this is how behavioral research has generally developed but will also explore works by developing country experts. The main goals are to help students become familiar with the existing literature and to help them explore several key debates in the field.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7255 (3) Time Series and Pooled Time Series

Time series models; models which take advantage of variation over time in a single unit; and pooled time series (sometimes called cross-sectional time series or time series cross-sectional) models; which utilize variation across both time and spatial units; are very common in political science. While these models offer substantial leverage over important social science problems that use purely cross-sectional data, there are a number of pitfalls that are necessary to avoid during estimation.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite students should have a background in advanced regression statistics (such as PSCI 7085, PSCI 7095 and PSCI 7155).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7306 (3) Program Evaluation

Focuses on applying the tools of causal inference and program evaluation to various policy issues. The course materials explore whether programs meet their desired goals. There are a number of ways in which the effectiveness of a program can be defined and measured. Empirical applications based on real-world data will be drawn from a wide range of policy areas, including education, welfare, unemployment, discrimination, health, immigration, the environment, and economic development. Previously offered as a special topics course.

Grading Basis: Letter Grade

PSCI 7901 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 7902 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 7903 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 7904 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 7905 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 7906 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 7908 (1-3) Independent Study

Not a free option; must be approved by the student's advisor and program chair. Does not count as seminar. Not more than 6 hours of independent study may be credited toward PhD degree in political science. Special independent study approval agreement form must be completed by student and signed by faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 8901 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: American

PSCI 8902 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Comparative

PSCI 8903 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: International Relations

PSCI 8904 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Political Theory

PSCI 8905 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8906 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Public Policy

PSCI 8908 (1-3) Graduate Research Topic

Provides an opportunity for independent research in a topic of special interest. Arrangements are made to suit the needs of each particular student. Not a free option; must be approved by student's advisor and department chair. Does not count as a seminar.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General

PSCI 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: American

PSCI 8992 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Comparative

PSCI 8993 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: International Relations

PSCI 8994 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Political Theory

PSCI 8995 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Empirical Theory and Research Methodology

PSCI 8996 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 99.00 total credit hours.

Additional Information: Departmental Category: Public Policy

Political Science - Doctor of Philosophy (PhD)

The Department of Political Science at CU Boulder offers instruction and research in the art and science of politics. The department has a long tradition of excellence in training graduate students. A diverse faculty of nearly 30 professors trains graduate students to conduct original research in six areas of political science:

- American government and politics
- comparative politics
- international relations
- political theory

- public policy
- empirical theory and methodology

Admission is highly competitive, with approximately 10–12 new students enrolled each fall. This ensures a high faculty-to-student ratio and close mentoring opportunities. In addition, the department holds an outstanding placement record.

The department does not accept applications for a terminal MA in political science. Students in the PhD program earn an MA in political science after the completion of a successful qualifying paper and defense at the end of the second year in the program.

Requirements

The Department of Political Science PhD program includes coursework in six fields of study, a qualifying research paper and oral defense, comprehensive written and oral examinations, doctoral prospectus defense, final dissertation defense, and minimum 30 dissertation credit hours.

Students take a wide range of courses and demonstrate mastery of two different fields, the major (first field) and the minor (second field). Students take a minimum of three seminars in each field and at least three courses outside of their major and minor fields.

Students complete a minimum of 42 credit hours of coursework with a B average or better. Of these 42 credit hours, 39 must be at the 7000 level or higher and 35 credit hours must be taken in the Political Science Department. Students also take a minimum of 30 dissertation credit hours.

Students take additional coursework with the consideration that they will fulfill all requirements needed to complete the program. During the first semester in residence students are required to take three introductory courses:

- PSCI 7008 Teaching Political Science
- PSCI 7075 Scope and Methods of Political Science
- PSCI 7085 Introduction to Political Science Data Analysis

In addition, there are five majors with required core seminar coursework.

- American Politics Major - PSCI 7011 is required.
- Comparative Politics Major - PSCI 7012 is required.
- International Relations Major - PSCI 7XX3 is required (please identify an appropriate graduate seminar in consultation with your advisor).
- Political Theory Major - PSCI 7004 is required.
- Public Policy Major - PSCI 7126 is required.

As a condition of funding, all students appointed as graduate assistants are required to enroll in a minimum of 9 credit hours per semester for their first five semesters or until they have passed comprehensive exams.

Students wishing to pursue graduate work toward the degree should carefully read the Doctoral Degree Requirements (p. 1031) section and review the courses listed in this catalog. Requirements for the political science graduate program are clarified in more detail on the department's PhD Requirements and Handbook (<http://www.colorado.edu/polisci/graduate/phd/>) webpage.

Time Limit

Full-time students are expected to complete all requirements for the PhD degree within five years of entering the program; the maximum time allowed by the Graduate School is six years.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric, and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<https://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

Note: The department does not offer a terminal master's degree program.

Course codes for this program are PSYC and NRSC.

Doctoral Degrees

- Neuroscience - Doctor of Philosophy (PhD) (p. 1288)
- Psychology - Doctor of Philosophy (PhD) (p. 1289)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Allen, David (https://experts.colorado.edu/display/fisid_114466/)
Senior Instructor; PhD, University of California, Los Angeles

Alpern, Herbert P.
Professor Emeritus

Arch, Joanna (https://experts.colorado.edu/display/fisid_147415/)
Associate Professor; PhD, University of California, Los Angeles

Bachtell, Ryan (https://experts.colorado.edu/display/fisid_146084/)
Associate Professor; PhD, Oregon Health Science University

Banich, Marie (https://experts.colorado.edu/display/fisid_120646/)
Professor; PhD, University of Chicago

Baratta, Michael V. (https://experts.colorado.edu/display/fisid_149599/)
Assistant Professor; PhD, University of Colorado Boulder

Barth, Daniel (https://experts.colorado.edu/display/fisid_100820/)
Professor; PhD, University of California, Los Angeles

Bidwell, Cinnamon (https://experts.colorado.edu/display/fisid_155117/)
Assistant Professor; PhD, University of Colorado Boulder

Blair, Irene (https://experts.colorado.edu/display/fisid_107261/)
Professor, Chair; PhD, Yale University

Courses

Neuroscience

NRSC 5015 (3) Affective Neuroscience

Experiencing and learning from affect—emotional value—is a fundamental part of the human experience. When people started thinking of brains as computers, research on emotion fell by the wayside. Recently however, this has changed, and there is an explosion of work on the brain mechanisms of affective value. Covers recent advances in understanding the emotional brain.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4015

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 5032 (3) Neurobiology of Learning and Memory

Provides a comprehensive treatment of how the brain acquires, stores, and retrieves memories. To do this we will consider (a) the methods used to address these issues, (b) what we know about how brain systems are organized to support memories of different types, and (c) the synaptic mechanisms that are involved.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4032

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5072 (3) Clinical Neuroscience: A Clinical and Pathological Perspective

Provides a review of the anatomy and physiology of the nervous system and then explores how alterations in these systems can result in neurologic or psychiatric disorders. Emphasizes pathological neuroanatomy, neurophysiology and neuropharmacology, which is essential for understanding problems related to health and disease.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4072

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5082 (3) Neural Circuits of Learning and Decision Making

Provides an in-depth survey of the neural mechanisms of learning, motivated behavior and decision making. Analysis will focus on the interaction of neural circuits underlying these processes with particular attention to the cellular, molecular and information-processing aspects of identified pathways and considered into the context learning-based and neuroeconomic models of choice.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4082

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Grading Basis: Letter Grade

NRSC 5092 (3-4) Behavioral Neuroendocrinology

Provides an introduction to neuroendocrinology with a focus on the interaction between hormones and brain function. In addition to attending and meeting all the requirements for the lecture portion of the course, graduate students meet for an additional hour each week to discuss in depth behavioral neuroendocrinology relevant research articles.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4092

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5100 (3) Introduction to Neuroscience I

This first course in the year-long sequence of introduction to neuroscience provides an intensive introduction to the principles of neuroscience, covering detailed neuroanatomy, physiology, neurophysiology, neurochemical and developmental characteristics of the central nervous system. Structure-function relationships in sensory and motor systems are then explored with neuroanatomical and electrophysiological perspectives.

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

NRSC 5110 (3) Introduction to Neuroscience II

Provides an intensive interdisciplinary introduction to the principles of neuroscience. It is a sequel to NRSC 5100. Provides a detailed overview of neurochemistry, neurodevelopment, neuromotor control, neurogenetics, and cognitive neuroscience. Open to undergraduates with instructor permission.

Requisites: Requires a prerequisite course of NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students and students in the interdepartmental neuroscience program.

NRSC 5132 (3) Neuropharmacology

Study of drug action within the central nervous system. This course is designed to provide a fundamental understanding of the neurobiological and neurochemical mechanisms of drug action. Topics covered include the following: 1) principles of pharmacology; 2) brain neurotransmitter systems; 3) biochemical basis of psychiatric disorders and their pharmacological treatment.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4132

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5262 (3) Mammalian Neuroanatomy

Provides a detailed overview of peripheral and central nervous system connective neuroanatomy targeted at delineating functional sensory, motor and motivational systems and the control of behavior and cognition. Emphasizes histological, anatomical and functional techniques employed in investigations of the nervous system. Formerly PSYC 5262.

Requisites: Requires a prerequisite course of NRSC 2100 or NRSC 5100 or NRSC 4052 or PSYC 4052 (minimum grade C-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

NRSC 5545 (3) Neurobiology of Addiction

Covers an intensive survey and synthesis of recent findings contributing to our understanding of the neurobiological basis of addiction. Analysis of both drug and behavioral addictions will be made at the molecular, cellular and neurocircuitry levels and synthesized into models utilizing common themes between various addictions and contributing pathologies.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4545

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 5911 (3) Teaching of Neuroscience

Offers a rich experience for students to develop and organize curriculum to complement the Neuroscience core courses. Offers a valuable teaching experience utilizing computational modeling to simulate experimental results. Any Neuroscience curriculum course, such as Intro to Neuroscience I or II, Neuropharmacology, Neurobiology of Learning and Memory or Behavioral Neuroscience may be appropriate with instructor consent.

Equivalent - Duplicate Degree Credit Not Granted: NRSC 4911

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 6100 (2) Advances in Neuroscience Seminar

Designed for beginning graduate students interested in neuroscience. Students read, discuss, and evaluate the primary literature on a number of current topics in neuroscience as well as attend the seminar program in neuroscience.

Repeatable: Repeatable for up to 8.00 total credit hours.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 6602 (1-3) Behavioral Neuroscience Professional Skills Development

Enrolled graduate students in the behavioral neuroscience program will be asked to prepare, present and receive feedback on scientific presentations of their own research or from review of a current research project.

Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Grading Basis: Letter Grade

NRSC 7102 (1-3) Topics in Neuroscience

Advanced seminar dealing with different specialized topics in neuroscience. Instructor consent required for students outside of the department.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires a prerequisite course of NRSC 5110 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

NRSC 7152 (3) Special Topics in Neuroscience V

Advanced seminar dealing with several different specialized topics in Neuroscience.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Psychology**PSYC 5052 (4) Behavioral Neuroscience**

This advanced course the anatomy and physiology of the central nervous system in detail, and applies that understanding to the visual, auditory, and sensorimotor systems, demonstrating how the anatomy and physiology of the nervous system can be used to explain behavior. The laboratory uses live animals and computer simulations.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4052 and NRSC 4052 and NRSC 5052

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

PSYC 5082 (2-3) Seminar: Biological Psychology

Special topics concerning biological bases of behavior.

Repeatable: Repeatable for up to 3.00 total credit hours.

Requisites: Requires a prerequisite course of PSYC 4052 (minimum grade D-). Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

PSYC 5102 (3) Introduction to Behavioral Genetics

Provides introduction to basic principles of genetics in the study of behavior, methods used to examine the influences of genes and environment on behavior and interpretation of studies using these methods.

Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

Additional Information: Departmental Category: Biological

PSYC 5112 (3) Concepts in Behavioral Genetics

Examines selected topics in greater detail than is possible in the comprehensive undergraduate course in behavioral genetics (PSYC 3102). Topics covered may include inheritance of behavioral characteristics from perspectives of pharmacogenetics, transmission genetics, biochemical genetics, and evolutionary genetics.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

Additional Information: Departmental Category: Biological

PSYC 5122 (3) Quantitative Genetics

Surveys principles of genetics of quantitative characteristics. Topics include gene frequencies, effects of mutation, migration, and selection. Also looks at correlations among relatives, heritability, inbreeding, crossbreeding, and selective breeding.

Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

Additional Information: Departmental Category: Biological

PSYC 5131 (3) Affective Science

Core graduate course on affective science and fulfills APA Cognitive and Affective Aspects of Behavior Requirement. Introduces students to a diverse array of theoretical and empirical issues related to the study of human emotion. Evolutionary theories of emotions; cognitive and behavioral aspects of emotion; neurobiological mechanisms; development of emotion; and psychopathology and emotion.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: General

PSYC 5145 (4) Advanced Cognitive Psychology

Advanced course in human cognitive processes. Covers key aspects of cognition, such as perception, attention, learning, memory, language and thinking. Discusses major theories and ideas in terms of the research they have inspired. Emphasis varies with instructor. One lab per week and a research project is required.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4145

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5175 (4) Computational Cognitive Neuroscience

Introduction to cognitive neuroscience (how the brain gives rise to thought) using computer simulations based on the neural networks of the brain. Covers a full range of cognitive phenomena including perception and attention, learning and memory, language, and higher-level cognition based on both large-scale cortical neuroanatomy and detailed properties of cortical neural networks. One lab per week.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 4175

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 5200 (3) Physiological Genetics and Genomics

Covers fundamental concepts in molecular genetics/genomics with physiological applications. Topics include structure and function of nucleic acids, genome structure, genetic and genomic research tools, methods for identifying disease-causing mutations, regulation of gene expression, pharmacogenetics, gene therapy and ethical issues in modern genomics. First course of a 3-course series recommended for IBG students. Includes a recitation section.

Equivalent - Duplicate Degree Credit Not Granted: IPHY 4200 and IPHY 5200

Requisites: Restricted to Integrative Physiology (IPHY or C-IPHY) or Psychology (PSYC) graduate students only.

Additional Information: Departmental Category: General

PSYC 5232 (2) Molecular Genetics and Physiology

Covers fundamental mechanisms of gene action, including genome structure and regulation of gene expression. Discusses molecular techniques used to examine human genetic diseases. Emphasizes genetic diseases with behavioral, neurologic, and physiologic abnormalities.

Requisites: Requires a prerequisite course of PSYC 5200 or IPHY 5200 (minimum grade D-). Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students

Additional Information: Departmental Category: Biological

PSYC 5242 (3) Biometrical Methods in Behavioral Genetics

Studies development of structural models appropriate to behavioral genetics and the estimation procedures necessary for their application.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Biological

PSYC 5423 (3) Research Problems in Clinical Psychology

Provides an overview of fundamental research methods relevant to clinical psychology, including literature synthesis, hypothesis formulation and study design, measure selection, and data analysis. Students will gain specific experience writing scientific papers and funding proposals.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: Clinical

PSYC 5433 (3) Adult Psychopathology

Intensively surveys major theories, research findings, and behavioral characteristics associated with deviant reaction patterns.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: Clinical

PSYC 5453 (3) Developmental Psychopathology

Examines the development of psychopathology across the lifespan, including etiological influences, neurobiological correlates, symptom presentation, and clinical diagnosis and intervention.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: Clinical

PSYC 5541 (1-6) Special Topics in Psychology

Studies and analyzes special interest topics from the broad and diversified field of psychology. Particular section content is determined by instructor. Instructor consent required for students outside of the department.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: General

PSYC 5606 (3) Proseminar: Social-Personality Psychology

Provides a thorough introduction to methods and theories in social psychology concerned with topics such as the self, social cognition, judgment and decision making, attitude formation and change, small group processes, inter-group relations, health and social psychology, and others.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Social Psychology PhD students.

Additional Information: Departmental Category: Social

PSYC 5656 (3) Advanced Graduate Research Methods

Provides training in the philosophical roots of empirical research, inference of causality, internal and external validity and reliability. These topics will be covered as they relate to a range of research designs including passive observational, experimental, quasi-experimental, meta-analytic and longitudinal. Additional topics include statistical inference and research ethics.

Requisites: Restricted to Social Psychology PhD students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Social

PSYC 5665 (2) Perception and Attention Proseminar

Required proseminar for students in the Cognitive Psychology Ph.D. program. Provides an introduction to current thinking about sensory and perceptual processing, object recognition and attention. Students will read peer-reviewed journal articles and make class presentations on appropriate topics, including methods of data collection and analysis.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5685 (2-3) Research Methods Proseminar

Main topic is research methods in cognitive psychology, with an emphasis on experimental methods. Skills and knowledge will be gained that are necessary to A) critically evaluate existing research and B) design, conduct, analyze and write up experimental studies. Required for graduate students in Cognitive Psychology.

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5695 (2) Memory Proseminar

Provides beginning Ph.D. students with a basic introduction to (primarily human) memory research. One of the six required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of experimental, theoretical, behavioral and cognitive neuroscience perspectives on memory. Instructor consent required for students outside of the department.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5741 (4) General Statistics 1

is part 1 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software. Restricted to Psychology and Neuroscience (PSYC & NRSC) graduate students. Instructor consent required for students outside of the department.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: General

PSYC 5751 (4) General Statistics 2

is part 2 of the 2-semester course sequence, PSYC 5741 and PSYC 5751. This course surveys probability and statistics in psychology, using the general linear model as a basic "recipe" for data analysis. After introducing a few powerful concepts that enable a range of questions to be asked, the course focuses on building and interpreting models using standard regression software.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: General

PSYC 5761 (3) Structural Equation Modeling

Provides training in the use of structural equation modeling, a class of analytic techniques that include the estimation of unobserved, or latent, constructs and an estimation of relationships among latent constructs.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Recommended: Prerequisite successful completion of graduate level statistics.

Additional Information: Departmental Category: General

PSYC 5815 (2) Language Proseminar

Introduction to research on human language. A required proseminar for Cognitive Psychology Ph.D. students. Covers research at the cognitive, neural, and computational levels. Addresses phenomena at the levels of phonology, grammar, and meaning. Emphasizes interrelationships between language and other domains of cognition (perception, memory, executive function).

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5825 (2) Executive Function Proseminar

Provides beginning Ph.D. students with an introduction to the study of executive functions. Required proseminar for students in the Cognitive Psychology Ph.D. program. Includes consideration of working memory, inhibition, multi-tasking, monitoring, selection, lifespan changes and social/clinical applications at the cognitive, neural and computational levels.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 5835 (2) Thinking Proseminar

Provides beginning Ph.D. students with a basic introduction to research on complex human cognition, including reasoning, problem solving, decision making, analogy, concept learning and knowledge representation. Includes consideration of theoretical, behavioral and cognitive neuroscience perspectives. One of six proseminar modules required of students in the Cognitive Psychology Ph.D. program.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 6200 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in computer science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General

PSYC 6603 (1) Professional Issues in Clinical Psychology

Covers a range of topics important for professional development in clinical psychology, including preparation and delivery of research presentations, preparation of grant proposals/manuscripts and practicum experience (i.e., interviewing and assessment, treatment planning, intervention and documentation). Intended to prepare students for careers as research scientists and clinicians. Instructor consent required.

Repeatable: Repeatable for up to 10.00 total credit hours.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: Clinical

PSYC 6605 (1) Cognitive Psychology Research Update

Provides summaries of current research by graduate students and faculty members in the Cognitive Psychology program in the Department of Psychology and Neuroscience. Professional Development issues relevant to cognitive psychologists will also be discussed. Graduate students in all programs and advanced undergraduates welcome with instructor consent.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Psychology (PSYC) and Neuroscience (NRSC) PhD Students only.

PSYC 6606 (1) Professional Issues in Social Psychology

Covers a range of topics important for professional development in social psychology, including preparation and delivery of research presentations, preparation of grant proposals and manuscripts, and peer review of manuscripts. Intended to prepare students for careers as research scientists.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Social Psychology PhD students.

Additional Information: Departmental Category: Social

PSYC 6761 (3) Topics in Advanced Structural Equations Modeling

Covers topics in advanced structural equation modeling, including modeling with nonlinear observed variables, latent variable interactions, longitudinal models, mixture models and transition analysis. Other topics will be covered by request.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Recommended: Prerequisite PSYC 5761.

Additional Information: Departmental Category: General

PSYC 6831 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 6851 and PSCI 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

PSYC 6841 (1-3) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSYC 6911 (1-3) Research Practicum

Department consent required to enroll.

Repeatable: Repeatable for up to 18.00 total credit hours.

Additional Information: Departmental Category: General

PSYC 6941 (1) Master's Candidate for Degree

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

PSYC 6951 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General

PSYC 7012 (1-3) Research in Behavioral Genetics

Individual research projects.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Behavioral, Psychiatric and Statistical Genetics PhD students.

Additional Information: Departmental Category: Biological

PSYC 7102 (2-3) Seminar: Behavioral Genetics

Intensive study of selected topics in behavioral genetics. Emphasizes recent research. Attention to both human and animal studies. Instructor consent required.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Biological

PSYC 7215 (3) Seminar: Experimental Psychology

Advanced seminar dealing with different specialized topics, at the discretion of the instructor, in different years. Topics chosen are within the broad range of experimental psychology. Instructor consent required.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7291 (3) Multivariate Analysis

Familiarizes students with scientific concepts, matrix theory, and computer techniques of multivariate analyses for psychological research. Topics include cluster and factor analysis, multiple regression, and discriminant functions. Emphasizes research technology rather than mathematical theory.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: General

PSYC 7315 (2) Advanced Research Seminar on Human Memory

Addresses topics in the experimental psychology of human memory. Specific content varies from semester to semester. Both theoretical issues and contemporary empirical work will be reviewed. Each student will be required to engage in laboratory work outside of class, which will include an original experiment.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: Experimental

PSYC 7415 (2) Cognitive Science Research Applications Seminar 1

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and SLHS 7418

Requisites: Requires a prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Experimental

PSYC 7425 (2) Cognitive Science Research Applications Seminar 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and SLHS 7428

Requisites: Requires a prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade B). Restricted to graduate students only.

Additional Information: Departmental Category: Experimental

PSYC 7536 (1-3) Personality and Social Psychology

Selected topics in the area of social-personality psychology. Students may register for more than one section of this course within the term and/or within their graduate career. These seminars may be on one of the following topics: stereotyping and prejudice, social neuroscience, person perception, social psychology and the self, health and social psychology, race and ethnic identity, or social cognition. Instructor consent required for students outside of the Social Psychology program.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Social Psychology PhD students.

Additional Information: Departmental Category: Social

PSYC 7663 (1) Intellectual Assessment Laboratory

Practice administration of common intellectual and neuropsychological tests.

Requisites: Requires corequisite courses of PSYC 7683. Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7673 (3) Adult Psychotherapy

Provides an intensive introduction to the science and practice of psychological treatments for adult psychopathology. Will focus on selected treatments and address the relevant theoretical and empirical base for each approach and the specific principles and procedures utilized. Aim of course is for students to acquire both a scientific and applied knowledge of evidence-based practice in clinical psychology, with a focus on intervention for adult mental disorders. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7683 (1-3) Intellectual Assessment, with Practicum, in Clinical Psychology

Focuses on administering and interpreting objective test commonly used in clinical psychology practice. Includes case study approach and direct clinical experience.

Repeatable: Repeatable for up to 8.00 total credit hours.

Additional Information: Departmental Category: Clinical

PSYC 7693 (3) Personality Measurement

Covers theory and basic applications of psychological assessment, with an emphasis on measurement theory and the assessment of psychopathology and personality. Instructor consent required.

Additional Information: Departmental Category: Clinical

PSYC 7703 (1-3) Seminar: Clinical Psychology

Selected topics in the area of clinical psychology. Instructor consent required for students outside of the Clinical Psychology program.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Clinical Psychology PhD students.

Additional Information: Departmental Category: Clinical

PSYC 7713 (1-3) Practicum in Clinical Psychology

Provides direct clinical experience for clinical graduate students only. Instructor consent required.

Repeatable: Repeatable for up to 18.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Clinical

PSYC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the LCS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science. Restricted to students enrolled in LCS Cognitive Science Academic Programs.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Additional Information: Departmental Category: Experimental

PSYC 7793 (1-3) Child Assessment Practicum

Allows students who have already learned adult assessment measures to broaden their knowledge and skills in order to complete psychoeducational evaluations with children. The course covers the background of common childhood disorders, general testing strategies with children, and specific test administration.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite PSYC 7683.

Additional Information: Departmental Category: Developmental

PSYC 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Psychology and Neuroscience (PSYC NRSC) graduate students.

Additional Information: Departmental Category: General

Neuroscience - Doctor of Philosophy (PhD)

The neuroscience community at CU Boulder is made up of over 80 faculty and research associates rostered in 13 departments and institutes. Neuroscience activities on the campus are coordinated by the Center for Neuroscience.

The graduate PhD program in neuroscience is an interdepartmental program currently consisting of eight tracks to a PhD:

- Behavioral, Psychiatric and Statistical Genetics (Integrative Physiology, Psychology & Neuroscience)
- Behavioral Neuroscience (Psychology & Neuroscience)
- Clinical Neuroscience (Psychology & Neuroscience)

- Cognitive Neuroscience (Psychology & Neuroscience)
- Social Neuroscience (Psychology & Neuroscience)
- Integrative Physiological Neuroscience (Integrative Physiology)
- Molecular, Cellular and Developmental Neuroscience (Molecular, Cellular and Developmental Biology)
- Speech, Language and Hearing Neurosciences (Speech, Language and Hearing Sciences)

The neuroscience curriculum includes a year-long intensive core course, graduate seminar courses linked to an invited speaker series and wide-ranging neuroscience courses offered by many departments and institutes across campus.

Interested students are encouraged to visit the Center for Neuroscience (<https://www.colorado.edu/neuroscience/>) website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Requirements

Admission Requirements

Students apply for admission to one of the participating departments, which determines whether to admit the student to CU Boulder and provide financial support. Once in residence, students enter the neuroscience PhD program while still maintaining their "home" in the department to which they were admitted. They receive a PhD that lists both their home department and neuroscience. All students are admitted with the expectation that they will work toward the PhD degree. Many students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field; furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

Required Courses and Semester Credit Hours

Code	Title	Credit Hours
Required Neuroscience Core Courses		
NRSC 5100	Introduction to Neuroscience I	3
NRSC 5110	Introduction to Neuroscience II	3
NRSC 6100	Advances in Neuroscience Seminar (three semesters, 2 credits per semester)	6
Required Fundamentals of Neuroscience Depth Courses		
Choose a minimum of 3 additional neuroscience-related courses (2-3 credit hours per course). ¹		7-9
Neuroscience-Related Discipline Specialization		
Choose a sequence of courses that provides an advanced graduate-level specialization in a discipline that contributes to the field of neuroscience.		11
Total Credit Hours		30-32

¹ For a list of approved neuroscience courses, visit the Neuroscience PhD Program (<https://www.colorado.edu/neuroscience/graduate-education-neuroscience/>) webpage.

Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related

fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed.

A variety of advanced research seminars are taught on a regular basis. Students are required to be enrolled in at least one substantive course in the department each semester until the comprehensive examinations have been successfully completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Potential applicants are encouraged to visit the Center for Neuroscience website, which provides detailed information on the program, application process, courses, faculty and current trainees.

Psychology - Doctor of Philosophy (PhD)

The Department of Psychology and Neuroscience at the University of Colorado Boulder offers a PhD degree with five subplans:

- Behavioral, Psychiatric and Statistical Genetics
- Behavioral Neuroscience
- Clinical Psychology
- Cognitive Psychology/Cognitive Neuroscience
- Social Psychology

For detailed information about each field of study, visit the department's Graduate Program Subplans (<http://www.colorado.edu/psych-neuro/graduate-programs/graduate-program-areas/>) webpage.

Note: The department does not offer a terminal master's degree program.

Requirements

All students are admitted with the expectation that they will work toward the PhD degree. Students receive a Master of Arts degree in the course of working toward the PhD. Students who receive the PhD degree must demonstrate that they are proficient in some broad subject of learning and that they can critically evaluate work in this field. Furthermore, they must show the ability to work independently in their chosen field and must make an original contribution of significance to the advancement of knowledge.

In the first year of graduate study, there is a first-year research requirement that starts the student on an active program of research. First-year graduate students typically enroll in a two-semester graduate statistical sequence. The student also must enroll in a sequence of courses designed to give exposure to various research topics and methods. In later years, a variety of advanced research seminars are taught on a regular basis.

Students complete a master's degree (MA) based on research and coursework completed within their first 2-3 years. Before admission to candidacy for the PhD degree, the student must pass a comprehensive examination in the field of concentration and related fields. This examination tests the student mastery of a broad field of knowledge, not merely the formal coursework completed. Upon completing the comprehensives, students engage in the dissertation research, culminating in a public oral defense.

Religious Studies

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Course codes for this program are RLST and SNSK.

Master's Degree

- Religious Studies - Master of Arts (MA) (p. 1292)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

RLST 5030 (3) Religions in America

Studies various religious movements in the U.S. and other parts of the Americas. Includes American religion and religions, religion and nationalism, revitalization and religion and Asian religions in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4030

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5050 (3) Topics in Christian Studies

Studies a particular topic in Christian theology and culture such as early Christianity, medieval Christianity, Christianity in the United States, women and Christianity, liberation theologies, Christianity and literature, and modern Christian thought.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4050

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

RLST 5170 (3) God and Politics

Explores the relationship between religion and politics. Examining traditions such as Judaism and Christianity, this course considers diverse ways in which ancient, medieval and modern sources have imagined the role of religion in civic life. Some topics include the status of religious minorities, the nature of religious freedom and contemporary debates surrounding issues such as torture, sexuality and climate change.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4170 and JWST 4170

Requisites: Restricted to graduate students only.

RLST 5180 (3) Is God Dead?

Explores debates about the following questions: does it make sense to believe in God? Should believing or not believing in God make a difference for how individuals behave? Examining ancient and modern views on the existence and nature of a higher power, this course considers topics including evil and suffering, religion and science and religion's role in politics.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4180 and JWST 4180

Requisites: Restricted to graduate students only.

RLST 5190 (3) Love and Desire

Explores debates about the following questions: what and whom should humans and gods love, and what role should passions play in religion? Examining traditions such as Judaism and Christianity, this course considers diverse views on topics including religion and sexuality, the promise and perils of loving gods and humans, and the relationship between love, politics, and violence.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4190 and JWST 4190

Requisites: Restricted to graduate students only.

RLST 5200 (3) Topics in Hinduism

Examines in depth central themes, schools of thought and movements in Hinduism, such as myth and ritual, renunciation, Vedanta, Tantra and Yoga.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4200

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 hours of RLST courses at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5210 (3) Advanced Readings in Sanskrit

Requires at least two years of prior Sanskrit training. Students will read texts in the original. Class time is devoted to parsing out difficult grammatical structures, discussing the philosophical import of the readings and addressing the historical contexts that assist in interpreting the texts. The topic varies according to student interest.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires prerequisite course of SNSK 2120 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5250 (3) Topics in Buddhism

Examines in depth central themes, schools of thought and movements in Buddhism, such as Theravada in Southeast Asia, Mahayana and Tantrayana thought, Zen and Buddhism in America.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4250

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Asia Content

RLST 5260 (3) Topics in Judaism

Examines in depth central themes, schools of thought, and movements in Judaism, along with other traditions, across a range of historical periods.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4260 and JWST 4260

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 5280 (3) Body and Magic in India

Addresses ideas of the body and its use and functions within magic, particularly in Tantric traditions. Uses classical Hinduism and Tantra as a point of departure, focusing on subtle bodies and Tantric bodies and will also supplement this with writing about the body and its connection to mind in contemporary Western thought addressing the mind-body problem.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4280

Requisites: Restricted to graduate students only.

RLST 5300 (3) Topics in Native American Religions

Examines a topic (varies at different offerings) focusing on religions of peoples indigenous to the Americas. May consider mythology; shamanism and medicine; trickster, clown and fool; crisis cult movements.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4300

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 3 additional credit hours of RLST course work or instructor consent.

RLST 5350 (3) Native American Religions: Regional Studies

Studies religion(s) of a single native North American tribe or geographic region within context of history and culture of the tribe.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 additional credit hours of RLST course work or instructor consent.

RLST 5353 (3) Indigenous Traditions and Law: A Global Perspective

Explores intersections of indigenous religions and law through historical and contemporary case studies. American Indian and Hawaiian contexts will be featured, as well as the study of the United Nations Declaration on the Rights of Indigenous Peoples and its recent implementation in places as diverse as Bolivia, Norway and Nagaland. Theoretical issues in the academic study of religion and ethnic studies will be emphasized.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4353 and ETHN 4353 and ETHN 5353

Requisites: Restricted to graduate students only.

RLST 5650 (3) Islam in the Modern World

Globally surveys Islam, covering religion and politics; Islam and the West; the Islamic revival and its varied forms in Iran, Indonesia, Libya and Pakistan; development and change; the status of women; media and academic stereotyping.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4650

Requisites: Restricted to graduate students only.

Recommended: Prerequisite 6 credit hours of religious studies at any level or instructor consent.

Additional Information: Departmental Category: Asia Content

RLST 5750 (3) Daoism

Traces the development of Daoism from its origin as an organized, communal religion in the second century CE to the vibrant living religion of today, encompassing meditative monastics, martial exorcists, solemn ritual masters and lay practitioners of inner alchemy and other self-cultivation techniques. Focuses on the extensive Daoist ritual tradition and the community of believers who created and used it.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4750 and CHIN 4750 and CHIN 5750

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5780 (3) New Religions of East Asia

Explores the new religious movements of modern China, Japan, and Korea, which have arisen over the last century due to the influence of the West and in response to the pressures of modernization. Previous coursework in religious studies or Asian languages and civilizations is recommended.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4780

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 5820 (3) Interdisciplinary Seminar on Religion

Variable topics in religion, drawing from a variety of disciplines and methodologies as they shed light on specific traditions and issues.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4820

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 5850 (3) Gender in Hagiography

Explores gendered ideals of sainthood in medieval hagiographic literature. We draw primarily from the lives of female mystics in Buddhist and Christian sources and also examine the construction of mendicant masculinities. Reading from an array of primary sources, we query the category of mysticism and ask why visionary experience has so often been gendered female.

Equivalent - Duplicate Degree Credit Not Granted: RLST 4850 and WGST 4850

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6110 (3) Adv Tpcs: Chicana/o Studies: US/Mexico Borderlands

Examines complex histories, cultural practices and liminal, 3rd spaces of the US and Mexico borderlands; racial and gender identities; community formations. Considers a range of autobiographic testimony narratives, films, social and legal studies, and theories of subjectivity that engage with the politics of representation vis a vis the criminalization of Chicana/o and ethnic youth, immigrants and those perceived to be immigrants.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6110

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

RLST 6830 (3) Introduction to the Academic Study of Religion

Introduction to the graduate academic study of religion through the exploration of contemporary models and issues that demonstrate the nature and future of the field. Students prepares a profile of intended area of research.

Requisites: Restricted to graduate students only.

RLST 6840 (1-6) Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

RLST 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to graduate students only.

RLST 6945 (1-4) Portfolio: Non-Thesis Option

Course work finished or in the last semester.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

RLST 6950 (1-4) Master's Thesis

Requisites: Restricted to graduate students only.

Religious Studies - Master of Arts (MA)

The curriculum in the Department of Religious Studies at CU Boulder trains students in the scholarly understanding and interpretation of the

complex phenomenon we call religion through careful study of history, texts, rituals, narrative, art and media. The program offers the skills to approach the comparative study of religion with the option of gaining deeper knowledge in Islam, Hinduism, Buddhism, Judaism, Christianity, religions in America, religions in the Mediterranean, religions in Asia, and several indigenous traditions. We also allow students to develop expertise in thematic areas such as religion and the body; ritual studies; religion and the environment; ethics, politics and law; religion, gender and sexuality; and ancient and medieval religions.

The graduate degree in religious studies emphasizes the application of various theoretical and methodological approaches to the study of religion; the understanding of religious practices and traditions with attention to historical context and present-day impact; and the development of media literacy, critical thinking, effective oral and written communication, and research skills in our increasingly globalized and religiously diverse world.

In addition, students with a degree in religious studies are expected to achieve basic religious literacy: the ability to communicate and analyze practical information regarding religious diversity as educated citizens of a pluralistic society and thereby to effectively understand and participate in public debates and discussions about religion.

Requirements

Course Requirements

The student must successfully complete 30 credit hours of academic work, at least 27 of which must be completed at the 5000 level or above. Up to 6 credit hours of coursework may be taken outside the department or transferred from another accredited institution, consistent with the student's special needs and interests and with the advisor's approval. Independent study credit hours shall not exceed 6 credit hours.

A graduate degree represents the mastery of a significant body of knowledge and interpretation within an academic discipline. A degree is not granted merely because a student completes a specific number of courses. The student is expected to acquire both breadth and depth in religious studies.

A student who has not completed at least 12 credit hours, or the equivalent, of undergraduate academic coursework directly related to the study of religion will be required to do remedial work to make up this deficit before beginning graduate study or, with the director of graduate studies' permission, after beginning the program. This can be done by attaining a grade of B or better in an appropriate 2000- or 3000-level course taken within the first year. Remedial courses may not be counted toward the degree.

Courses for each term must be approved by the student's faculty advisor and be in compliance with the requirements of the Graduate School where necessary. In order to register for any given term, the student must have the course of study for that term approved in writing by the advisor on the student's Record of Progress Toward the MA Degree Form. No changes can be made to registration without the advisor's approval.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
RLST 6830	Introduction to the Academic Study of Religion	3
RLST 6945	Portfolio: Non-Thesis Option	3-6

or RLST 6950 Portfolio: Thesis Option

Electives	24-21
Total Credit Hours	30

Residency Requirement

All students must fulfill the residency requirement. In general this can be fulfilled by either two full-time semesters or four part-time semesters of study. A full-time program is defined as 5 credit hours of coursework at the 5000 level or higher, 8 credit hours of total coursework or at least one credit hour of thesis research.

Degree Plans

In the second year of graduate study, students will select either the MA portfolio option or the MA portfolio with thesis option.

Plan I: Portfolio with Research Paper

Students selecting the portfolio with research paper option will take a 3-credit portfolio preparation course on secondary scholarship in a specific field (theoretical topic, geographic area or religious tradition) that will culminate with a portfolio defense. The portfolio defense, to be completed in accordance with the deadline set by the graduate school each semester, will involve a three-member committee, and will be overseen by the advisor.

Plan II: Portfolio with Thesis

Students selecting the portfolio with thesis option will take 6 credits of thesis coursework over two semesters (RLST 6950). The first semester of RLST 6950 (3 credit hours) will result in a thesis prospectus with the thesis committee. After successfully completing the prospectus defense, the student will enroll in the second semester of RLST 6950 (3 credit hours), which will result in the full portfolio defense, which includes defending the thesis.

Total Credit Hours		30

Plan II: Portfolio with Thesis

Course	Title	Credit Hours
Year One		
Fall Semester		
One Seminar		3
RLST 6830	Introduction to the Academic Study of Religion	3
Credit Hours		6
Spring Semester		
Three Seminars		9
Credit Hours		9
Year Two		
Fall Semester		
Two Seminars		6
RLST 6950	Master's Thesis	3
Credit Hours		9
Spring Semester		
One Seminar		3
RLST 6950	Master's Thesis	3
Credit Hours		6
Total Credit Hours		30

(Note: Students who have not already established Colorado residency at the time they begin the program may wish to consider taking 12 credits during their first year and 18 credits during their second year.)

Dual Degree Programs

The Department of Religious Studies also participates in a dual master's degree program with the Departments of History and Asian Languages and Civilizations. Students interested in exploring this option should contact the graduate director of the department for specific requirements.

For more information visit the department's Dual MA (<https://www.colorado.edu/rlst/graduate/dual-ma/>) webpage.

Sociology

The graduate program in the Department of Sociology at CU Boulder seeks to train creative and productive scholars and teachers. The department maintains a strong emphasis in the theories and methods of the discipline while specializing in the following areas:

- Criminology
- Cultural Sociology
- Environment, Hazards and Disasters
- Gender and Sexuality
- Health and Medicine
- Life Course, Aging and Youth
- Political Economy
- Population
- Race and Ethnicity
- Social Psychology and Emotions

The department offers a PhD program focusing on teaching, researching and training in theory and methods. It does not, however, offer a separate

MA program. More information about program specifics can be found in the Graduate Handbook (<http://www.colorado.edu/sociology/students/graduate-students/resources/>).

Graduate students will meet with faculty advisors during their time at CU Boulder to foster social integration at the university as well as research interests. Financial support is given to students serving as teaching assistants (TAs). A teaching assistantship is a fulfilling position that allows students to further their understanding of a specific area of study while gaining knowledge in instructing at the university level.

Additionally, advanced graduate students are encouraged to teach their own courses as graduate part-time instructors (GPTIs). The department encourages graduate students to pursue opportunities for funded research wherever possible and supports the efforts of other university units in which students may seek financial support for their research, such as the Institute of Behavioral Science. Aside from teaching and research, CU Boulder offers a wide array of courses for graduate students taught by a diverse and well-regarded faculty.

Course code for this program is SOCY.

Doctoral Degree

- Sociology - Doctor of Philosophy (PhD) (p. 1298)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

SOCY 5031 (3) Research Design

Principles and practice of social research, including the nature of scientific explanation, the relationship between theory and research, research design, measurement problems, sampling questionnaire construction, interviewing, ethnographic methods, and statistical analysis.

Additional Information: Departmental Category: General Sociology

SOCY 5037 (3) Hazards, Disasters and Society

Explores the societal dimensions of hazards and disasters, emphasizing disaster theory and research, key issues in the sociological study of disasters, social vulnerability, the impacts of disasters in the U.S. and worldwide and the U.S. Emergency Management System.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4037

Additional Information: Departmental Category: Environment and Society

SOCY 5071 (3) Social Stratification

Studies theories of class, ethnic, sex, and age stratification. Examines social inequality in the United States and analyzes the resulting conflicts.

Equivalent - Duplicate Degree Credit Not Granted: SOCY 4071

Additional Information: Departmental Category: General Sociology

SOCY 5111 (3) Data 1: Introduction to Social Statistics

Introduces statistical analysis in the social sciences. Introduces basic techniques of inferential statistics and several bivariate statistical techniques including t-test for the difference in means, chi-square independence, analysis of variance (ANOVA), correlation, and simple regression (OLS). Prepares students for the required course on multivariate regression techniques (Data 2).

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5181 (3) Logics of Qualitative Inquiry

A required first-year seminar that introduces the logics of qualitative inquiry in sociology. Introduces the history of qualitative epistemology. Considers the logic of common qualitative methodologies and qualitative research representations. Engages with the logics of inquiry in classic and more recent well regarded qualitative sociological works.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 5201 (3) Graduate Seminar in Sociological Theory

Examines theoretical approaches to core issues and problems in sociology, including the nature of society, the relationship between society and the individual, the role of culture and social structure, the sources of social power, and the conceptual structure of sociological knowledge itself.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 5202 (3) Graduate Seminar in Contemporary Theory

Examines selected sociological theories considered contemporary, including but not limited to cultural sociology, feminist theory, postcolonial thought, actor-network theory, microsociology, field theory, and poststructuralism. Discusses the formation of a sociological canon and the challenge of categorizing theory. Considers the process of theorizing as an acquired skill. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

SOCY 5350 (3) Comparison, Narrative, Meaning, and Method in Historical Sociology

Examines the comparative, narrative, and interpretive methods historical sociologists use when investigating temporally unfolding social processes occurring in the recent or distant past. Through an introduction to the methodological literature and a close reading of exemplary historical research, students will learn to (a) critically evaluate historical sociological research and (b) design methodologically sophisticated historical research projects that address questions that most interest them, potentially incorporating ethnographic and/or quantitative methods into their research designs. Previously offered as a special topics course.

Requisites: Restricted to graduate students only.

SOCY 5611 (3) Teaching in Sociology

Learn how to teach sociology more effectively while developing a new content area and a clearer sense of the field. Choose a content area within sociology as the basis for planning a course and developing and practicing different teaching techniques. Department enforced prerequisite: enrollment in the Sociology graduate program.

Additional Information: Departmental Category: General Sociology

SOCY 5750 (3) Climate Politics and Science-Policy

Explores, understands and critically analyzes influences and trends in climate politics and science-policy. Course participants will gain an improved understanding of the myriad factors, pressures and processes that are involved in contemporary climate politics undergirding explicit policy proposals. Course participants will more capably identify consequential spaces of decision-making, recognize tractable places for change and fashion constructive strategies for their own research by way of best available evidence from work done in these areas. Overall, our attention to these course themes, concepts and case studies will help us to more capably understand, analyze and engage in the high-stakes 21st century arena of climate politics and science-policy. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5750, GEOG 5750 and ENVS 5750

Grading Basis: Letter Grade

SOCY 5841 (1-6) Independent Study in Sociology

Graduate variable credit. Instructor consent required.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: General Sociology

SOCY 5937 (1-6) Graduate Research Internship in Environmental Sociology

Offers the opportunity for sociology graduate students specializing in environmental sociology to work with local governmental or non-profit organizations on research assignments. The research topic, academic reading list, and expectations for the final project will be developed collaboratively with a faculty sponsor and organizational representative.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Environment and Society

SOCY 6004 (3) Topics in Criminology

Variety of courses in criminology to be taught by visiting lecturers. See current departmental announcements for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 6007 (3) Foundations of Environmental Sociology

Provides overview of environmental sociological theory and research including topics such as: public environmental perception, concern, and knowledge; environmentalism as a social movement; environmental justice; energy, technology, and risk; human dimensions of environmental change; and natural hazards and disasters.

Equivalent - Duplicate Degree Credit Not Granted: ENVS 6007

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6012 (3) Population Issues, Problems, and Policies

Presents contemporary perspectives on relations between population and society. Focuses on mortality, fertility, and migration, the major demographic areas, with reviews of specific demographic phenomena and controversies.

Additional Information: Departmental Category: Population and Health Issue

SOCY 6016 (3) Topics in Sex and Gender

Covers diverse specializations of faculty in the area of sex and gender. See current departmental announcements or online Schedule Planner for specific content.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 6017 (3) Inequality, Democracy, and the Environment

Focuses on the structural forces affecting environmental degradation and environmental behavior by examining the relationships between a) inequality and democratic decision making and b) undemocratic economic and political decision making, U.S. and corporate food and energy policy; and global environmental degradation. Focus will also be placed on the role that global inequality plays in fostering environmental degradation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 6041 (3) Cultural Sociology

Explores "the cultural turn" in sociology and related disciplines. Reviews basic themes in cultural studies: distinguishing "cultural" and "social"; narrative as catalyst between symbols and practices; cultural production processes; self as embodied; culture and power; methods and epistemological issues. Students present their own projects in class and as research papers.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6111 (3) Data 2: Data Analysis

Introduces students to mainstream multivariate regression techniques used in the social sciences. The majority of the course focuses on the Ordinary Least Square model and on the extension of this model to nominal, ordinal and count dependent variables. Students analyze data of their choosing with statistical software packages including SPSS, SAS, and STATA. Department prerequisite: SOCY 5111 or equivalent.

Additional Information: Departmental Category: General Sociology

SOCY 6121 (3) Qualitative Methods

Training in the systematic observation of people in situations, finding them where they are, staying with them in a role acceptable to them that allows intimate observations of behavior. Students report their findings in ways useful to social science but not harmful to those observed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6821 (1-2) Graduate Sociology Forum 1

Introduces first-year graduate students to the full range of substantive topics, research programs, and other projects in which graduate sociology faculty are engaged. Provides a forum in which issues of the discipline are presented and discussed. Features weekly presentations by graduate sociology faculty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6831 (1) Graduate Professional Seminar

Offers guidance and instruction on topics related to advanced graduate study and academic life beyond graduation. Discussions will include writing journal articles; creating a vitae; writing dissertations; applying for grants and other sources of funding; the academic job search; and what to expect as a junior faculty member.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6841 (1-6) Guided Research in Sociology

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6851 (2) Interdisciplinary Social Science Professional Socialization

Trains graduate students and provides professional socialization in interdisciplinary social science research. Open to all interested students, with programming provided by the Institute of Behavioral Science. Sessions include IBS-housed colloquia and workshops in professional socialization, technological tools, interdisciplinary research, ethics, grant writing, etc. Students workshop and submit a research paper.

Equivalent - Duplicate Degree Credit Not Granted: PSYC 6831 and PSCI 6851

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 6861 (1-2) Interdisciplinary Training in the Social Sciences Methods Course

This is a new course number for a series of interdisciplinary graduate methods seminars created as part of the new Interdisciplinary Training in the Social Sciences program, which is co-funded by the Graduate School and the College of Arts and Sciences. These courses, which have rotating topics, train graduate students in qualitative and quantitative methods. CARTSS/IBS will arrange three one-credit advanced methods mini-courses each Spring semester. The mini-courses will be taught weekly (two hours per week) for five weeks. The courses will change each spring; topics include a wide variety of advanced statistical analysis methods, machine learning for social sciences, text analysis, experimental techniques, network analysis, survey design, interview protocols, etc. Open to all interested graduate students, with programming provided jointly by the Institute of Behavioral Science (IBS) and the Center to Advance Research and Teaching in the Social Sciences (CARTSS).

Equivalent - Duplicate Degree Credit Not Granted: LING 6861

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

SOCY 6941 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: General Sociology

SOCY 6951 (1-6) Master's Thesis

Additional Information: Departmental Category: General Sociology

SOCY 7002 (3) Social Disparities in Health

Presents social disparities in health in their social context. Includes the sociology of health behavior; links between health status and social statuses including gender, race, ethnicity, and socioeconomic status; fundamental causes and other explanations for social disparities in health; environment and health; health insurance disparities; the physician-patient interaction and its consequences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7004 (3) Criminological Theory

Examines the major criminological theories of the 18th through 21st centuries in Europe, Australia, and the U.S. Emphasizes the historical contexts and paradigms of knowledge influencing these theories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7006 (3) Sociology of Sex and Gender

Theoretical and empirical examination of sex stratification, sex role differentiation, and sex differences in socialization, personality, institutions, and culture.

Additional Information: Departmental Category: Sex and Gender

SOCY 7012 (3) The Social Demography of Race

Introduction to relevant, timely research within sociological and social demographic research on race and ethnicity. Specific areas will include conceptual/measurement issues; population size, growth, and migration; health and mortality; marriage, family, and fertility; socioeconomic context; and policy considerations. Course content will be structured around current empirical pieces in sociology literature with emphasis on methodological approach in analyses.

Additional Information: Departmental Category: Population and Health Issue

SOCY 7014 (3) Gender, Race, Class, and Crime

Examines crime and the criminal legal system practices through the lens of intersecting oppressions, particularly racism, sexism, heterosexism and classism.

Equivalent - Duplicate Degree Credit Not Granted: ETHN 6014

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7017 (3) Population and Environment

Reviews research on human-environment interactions, with a focus on ways in which demographic processes influence, and are influenced by, the environmental context. Specific topics include conceptual and analytical frameworks; methodologies; intervening factors shaping human dimensions of environmental change; and regionally-focused research.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Environment and Society

SOCY 7024 (3) Punishment and Social Control

Exploration of sociological perspectives on the criminal justice process. Considers organization of criminal law responses, including enforcing and sentencing. Race, class, gender, and age differences in treatment and sentencing are analyzed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7026 (3) Feminist Research Methods

Epistemological and methodological issues generated by feminist research and students' own projects.

Additional Information: Departmental Category: Sex and Gender

SOCY 7034 (3) Capital Punishment in the United States

Surveys the history and current status of capital punishment in the United States, with a critical examination of arguments both for and against the death penalty.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Deviance and Criminology

SOCY 7036 (3) Feminist Theory

Examines the main schools of feminist thought and their impact upon sociological theories. Also examines current feminist theoretical debates and their relevance to feminist sociology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Sex and Gender

SOCY 7111 (3) Data III--Advanced Data Analysis

Denotes third graduate course in sequence of quantitative methods. Following basic inferential statistics (SOCY 5111) and multivariate regression analysis (SOCY 6111), students study advanced statistical techniques such as event history analysis, multilevel modeling, structural equation modeling, and latent class analysis.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Requires a prerequisite course of SOCY 6111 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7121 (3) Qualitative Analysis

Drawing on data gathered through participation, observation and in-depth interviewing, students focus on developing theoretical analyses and exploring classical and post-modern ethnographic writing formats. Students present and revise their papers as well as review journal articles. Department enforced prerequisite: SOCY 6121.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 7131 (3) Seminar in Social Psychology

Studies the individual in social context. Focuses on theoretical perspectives and substantive issues specific to sociological and social psychology, including socialization, the self, social roles, language, deviance, gender, collective behavior, group processes, attitudes and behavior, social norms, and conformity.

Additional Information: Departmental Category: General Sociology

SOCY 7141 (3) Third-year Paper Seminar

Guides graduate students through the creation of the required third-year paper and helps establish productive writing habits. Includes assigned readings, discussion, peer review, and specific tasks related to scholarly writing. Students will revise and defend the paper during the semester following the seminar. Department enforced prereqs., SOCY 5111 and SOCY 5201.

Requisites: Restricted to Sociology (SOCY) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Sociology

SOCY 7171 (3) Special Topics

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Sociology

SOCY 8991 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: General Sociology

Sociology - Doctor of Philosophy (PhD)

Our program offers solid training in the foundational theories and methods of the discipline and allows students the flexibility to pursue

interests in a variety of specialty areas. The Department of Sociology at CU Boulder is a well-respected center for teaching and research. Here students can work with award-winning faculty members who have been recognized for their research, teaching and service.

The Department of Sociology strives to maintain a diverse mix of graduate students, promote respect for and opportunities to learn from others with a broad range of backgrounds and experiences, and otherwise promote inclusive excellence. By providing a variety of perspectives, a diverse student body enhances students' educational experiences and strengthens our research and outreach endeavors.

We have strengths in the following areas:

- criminology
- cultural sociology
- environment, hazards and disasters
- gender and sexuality
- health and medicine
- life course, aging and youth
- political economy
- population
- race and ethnicity
- social psychology and emotions

Community

The department views the recruitment and retention of an inclusive and diverse student body as an essential component of a successful graduate program. Besides enhancing the quality of our program by bringing a larger diversity of experience to it, recruitment and retention of students from many different backgrounds and experiences will increase the diversity in the profession of sociology overall. Our department is committed to improving the diversity of the student body and the graduate program experience.

Students are encouraged to become involved in CU Boulder's United Government of Graduate Students (UGGS) (<http://www.colorado.edu/uggs/about-uggs/>). UGGS is committed to enhancing the graduate student experience by interacting with the university administration on matters such as financial aid, etc. UGGS has worked with the Graduate School to develop the Graduate Student Bill of Rights and Responsibilities (<http://www.colorado.edu/uggs/sites/default/files/attached-files/Graduate%20Student%20Bill%20of%20Rights%20and%20Responsibilities.pdf>).

Requirements

Students must complete a total of 45 credit hours of coursework before taking the specialty area comprehensive exam. At least 24 hours must be in the Department of Sociology on the Boulder campus. All courses taken within the Department of Sociology must be numbered 5000 or above to qualify for graduate credit.

All first-year coursework must be completed with at least a 3.50 GPA and no grade lower than a B to continue into the second year.

At the end of the first and second years, faculty members teaching required courses, faculty mentors/advisors and faculty supervising teaching assistants conduct a review of students' progress.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
SOCY 5031	Research Design	3
SOCY 5111	Data 1: Introduction to Social Statistics	3
SOCY 5181	Logics of Qualitative Inquiry	3
SOCY 5201	Graduate Seminar in Sociological Theory	3
SOCY 5202	Graduate Seminar in Contemporary Theory	3
SOCY 6111	Data 2: Data Analysis	3
Electives		
A second theory seminar of the student's choice.		3
Two 1-credit-hour graduate forums:		2
SOCY 6821	Graduate Sociology Forum 1	

Master's Degree

The Department of Sociology does not have a master's degree program; however, students who are unable to meet the requirements for the doctoral degree may pursue an MA with Graduate Committee approval. In addition, PhD students may obtain the MA in the process of completing the doctoral degree. The department does not allow extra time for the completion of the MA degree while pursuing the PhD.

All MA students are required to complete a minimum of 30 credit hours of graduate coursework. These 30 credit hours must include at least 6 credit hours in at least two seminars in the student's major fields. Students may take a maximum of 6 credit hours of independent study. Independent study may not be substituted for regular seminars. In addition, all students must take courses from at least four faculty members. Finally, all MA students must designate a master's advisory committee that consists of at least three regularly appointed graduate faculty members from the Department of Sociology.

For the MA degree, a student must complete 30 credit hours of coursework at the 5000 level or above, including 4–6 thesis credit hours and the required Theory and Methods sequence with a B or higher in addition to the preparation of a written thesis and a successful oral defense of the thesis. Students must register for thesis credit hours in the semester of thesis defense.

Dissertation

Students must prepare a written dissertation proposal and orally defend it before the dissertation committee, and complete dissertation research and defend by the end of the sixth program year.

Recommended Plan of Study

Students enter the program in a cohort of approximately 12 students. Students typically focus on required courses during the first year. Graduate students are expected to take two or three seminars each semester. We encourage students to work with their faculty advisors to determine the course load for the first year based on prior coursework, etc. Beyond the first year, we recommend that students take three courses each semester.

Each incoming student will be assigned an individual faculty advisor who will help guide the student through the first year of the program. Under the first-year advising system, students are encouraged to work with their first-year advisors to explore the program, the research specialties of the

department and their own developing research interests while getting to know faculty members. Once a student has had an opportunity to meet and work with a variety of faculty, decisions regarding long-term advisors should be made. Beginning in year two of the program, graduate students are expected to seek their own faculty advisors.

Students in their first year are required to attend the graduate forum (SOCY 6821). Students will meet bimonthly throughout the academic year with the forum leader. The primary purposes of the forum are to introduce faculty and their research to the first-year cohort and to provide a communal forum for the cohort to discuss issues of concern with the forum leader.

The department offers an ongoing professionalization seminar ("prosem") led by a group of elected graduate students.

During the first two years, a student's coursework will focus on theory and methods. In the third and fourth years, the student will work with their advisor to develop a specialty area. Upon successful completion of the specialty comprehensive exam, the student will be admitted to candidacy and begin their dissertation research.

Spanish and Portuguese

Ranked as a top graduate program in the nation by the National Research Council, the Department of Spanish and Portuguese offers MA degrees in Peninsular and Latin American Literature as well as Hispanic Linguistics. It also offers PhD degrees in Peninsular and Latin American Literatures, and Medieval and Early Modern Hispanic Literatures.

All students are eligible for graduate teaching assistantships. These appointments include a monthly stipend and tuition remission, and they cover all student health insurance premiums. Grants and fellowships (summer, research and travel) are also available by application.

Course codes for this program are SPAN and PORT.

Master's Degree

- Spanish - Master of Arts (MA) (p. 1303)

Doctoral Degree

- Spanish - Doctor of Philosophy (PhD) (p. 1305)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Baena, Julio (https://experts.colorado.edu/display/fisid_101497/)

Lecturer

Courses

Portuguese

PORT 5110 (3) Brazilian Literature

Focuses on Brazilian literature through the lenses of literary and cultural studies. May address fiction, poetry or the relationship between literature and film. Besides reading literary texts, reading of academic essays is included.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4110

Additional Information: Departmental Category: Portuguese

PORT 5150 (3) Literature of the Portuguese Speaking World

Examines major works of Portuguese literature and/or Portuguese speaking African literature through the lenses of cultural and literary studies. May address fiction, poetry, or the relationship between literature and cinema.

Equivalent - Duplicate Degree Credit Not Granted: PORT 4150

Additional Information: Departmental Category: Portuguese

Spanish

SPAN 5120 (3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7120

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5130 (3) Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7130

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 5200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7210

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7320

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5400 (3) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7400

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5410 (3) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7410

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5430 (3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7430

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 7440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5450 (3) Introduction to Hispanic Linguistics

Introduces students to the main areas of inquiry within the field of Hispanic linguistics. Topics to be covered include speech and language, phonetics and phonology, morphology and syntax, semantics, linguistic change and variation and Spanish spoken in the United States.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4450

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 5580 (1) Research Methods and Skills

This seven-week introductory course is designed to refine research methods and skills and to critically examine different types of materials (print, music recording, electronic resources). In the age of fake news, you will consider an array of information sources that will help you reflect on the research process while enhancing critical thinking and evaluative research skills. Reading knowledge of the Spanish language is desired.

Equivalent - Duplicate Degree Credit Not Granted: LIBR 5580

Grading Basis: Letter Grade

SPAN 5650 (3) Methods of Teaching Spanish

Familiarizes students with current methodology and techniques in foreign language teaching. Peer-teaching coupled with opportunity to teach mini-lessons provide students with actual teaching experience in the foreign language classroom.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 4650

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6840 (3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 6950 (1-6) Master's Thesis

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7120 (3) Seminar: Spanish Literature and/or Spanish American Literature

Selected topics in Spanish and/or Spanish American literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5120

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7130 (3) Seminar: Critical Approaches to Iberian and Latin American Literatures and Cultures

An introductory study of theoretical approaches and critical analyses related to Iberian and Latin American literatures and cultures, with an emphasis on contemporary trends.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5130

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7140 (3) Seminar: Spanish Literature, Medieval Period

Studies medieval works, authors and themes, with consideration of principal influences from other literatures. Reading in Old Spanish.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5140

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Spanish

SPAN 7200 (3) Seminar: Spanish Literature, Renaissance and Baroque

Treats various topics, as needs and resources dictate. Special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include Renaissance poetry in Spain, Cervantes, Don Quixote and Novelas ejemplares, picaresque novel and the Spanish comedia of the 17th century.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5200

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7210 (3) Seminar: Spanish Literature, 18th and/or 19th Centuries

Treats various topics as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include romantic prose, poetry and theatre, realism and naturalism (prose narrative), 19th century poetry and 19th century theatre.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5210

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7220 (3) Seminar: Spanish Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include the generation of 1898, poetry of the 20th century, theatre of the 20th century, pre-Civil War novel, and post-Civil War novel.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5220

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7300 (3) Seminar: Spanish American Literature, Colonial Period and/or 19th Century

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include pre-Columbian literature, colonial prose and narrative, colonial poetry, romantic novel, the realist and naturalist novel and short story, 19th-century poetry, and gaucho literature.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5300

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7320 (3) Seminar: Spanish American Literature, 20th and/or 21st Centuries

Treats various topics, as needs and resources dictate. Gives special attention to developing historical and current theoretical and critical background of each topic. Representative topics might include modernism, theatre, the essay, the regional novel, the novel of the Mexican Revolution, the modern novel, contemporary theatre, and contemporary poetry.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5320

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7400 (3) Seminar: Spanish Phonology

Topics within Spanish phonology are treated as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics might include generative phonology applied to Spanish, Spanish phonology for college teaching and different schools of Spanish phonology.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5400

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7410 (3) Seminar: Spanish Syntax

Treats topics within Spanish syntax, each requiring a semester's study, as needs and resources dictate. Gives special attention to different schools and contemporary theoretical developments. Representative topics may include generative/transformational grammar applied to Spanish, fundamental problems in Spanish syntax and different schools of Spanish syntax.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5410

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7430 (3) Seminar: Hispanic Linguistics

Studies a major topic from an area such as phonology, syntax, history of the Spanish language, Hispanic linguistics and literature, or applied Hispanic linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5430

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 7440 (3) Seminar: Trends in Hispanic Linguistics

Provides an overview of major trends and issues in Hispanic linguistics, including phonology, syntax, dialectology, sociolinguistics, discourse analysis, text linguistics, semiotics, history of the Spanish language, language acquisition and applied linguistics.

Equivalent - Duplicate Degree Credit Not Granted: SPAN 5440

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 8840 (3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

SPAN 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Spanish (SPAN) graduate students only.

Additional Information: Departmental Category: Spanish

Spanish - Master of Arts (MA)

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master's Degree Requirements (p. 1030) section of this catalog.

Areas of Concentration

Peninsular/Spanish American Literature Concentration

Our MA in Peninsular and Latin American literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA students are required to take 30 hours of graduate coursework.

Hispanic Linguistics Concentration

Our MA in Hispanic linguistics is an interdisciplinary program that provides students with a solid foundation in linguistics through the coursework taken in the Departments of Spanish and Portuguese, Linguistics, Communication, Anthropology and the School of Education. Students have the unique opportunity to work closely in collaboration with faculty to develop their areas of concentration and graduate as specialists in a wide range of topics (e.g., history of the Spanish language, Spanish in the United States, sociolinguistics, etc.)

All MA students in the Hispanic linguistics option are required to take 30 hours of graduate coursework. They are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education could serve as important complements to linguistics courses taken in our department.

Spanish & Portuguese Studies Concentration

Our MA in Spanish and Portuguese studies is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds, with an emphasis on Lusophone culture. MA students are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level) and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Graduate students in this subplan are required to have Portuguese as the main area for their MA Comprehensive Exams.

Teaching Spanish Concentration

The MA in Spanish with an emphasis in teaching Spanish offers students a broad base in literature, linguistics and language pedagogy and education, and its 31 hours of coursework are almost evenly divided between these three areas. Six of the credits in the pedagogy and education area may be taken outside of the Department. If students wish to earn a teaching license, they can apply to and concurrently enroll in the Post-Baccalaureate Secondary Spanish Teaching Licensure program, completing remaining coursework and the student teaching semester after graduation with the MA. Upon completion, students will be prepared to teach and design Spanish language curricula at the secondary and post-secondary levels, as well as pursue further study and research in the fields of applied linguistics, second language acquisition or education.

Requirements

General Course Requirements

The MA in Spanish is offered in two areas of concentration: one with an emphasis on literature and one with an emphasis on linguistics.

All MA students are required to complete at least 30 hours of graduate coursework, at least 25 of which must be completed at CU Boulder. MA students may transfer to the department a maximum of 6 credit hours of acceptable graduate-level courses and may take no more than 6 credit hours of independent study courses.

Courses taken as part of the MA program must be offered by our department or by others upon having been approved by the student's MA supervisory committee (or the Associate Chair of Graduate Studies if the committee has not yet been formed). In addition, MA students may not take more than 9 hours of graduate coursework in any given semester.

No graduate course in the department may be taken pass/fail by a graduate student in our program. This rule also applies to those courses taken in the Department of Linguistics by our MA students.

Students who are failing a course will not be allowed to drop the course, except under special circumstances. To do so, approval must be secured from the course instructor, the Associate Chair of Graduate Studies and the department Chair.

Language Requirement

Students must demonstrate, as early as possible and before taking the comprehensive examination, a communication knowledge (as defined by the Graduate School) of a foreign language other than Spanish. They also must be able to speak, read and write English well.

Concentration Requirements

Peninsular/Spanish American Literature Concentration

The emphasis in Peninsular and Latin American Literatures is designed to give the student a broad overview of the cultural productions of the Latin American and Peninsular worlds. MA Students are required to take 30 hours of graduate coursework, of which 27 hours must be taken within the department.

All MA students in the Peninsular/Latin American Literature Option are required to take:

Code	Title	Credit Hours
Required Courses		
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures	3
SPAN 4980	Methods Language Learn/Pedagogy	1
In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the 3 following subject areas:		
1. <i>Medieval/Early Modern/Colonial Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5140	Seminar: Spanish Literature, Medieval Period	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
2. <i>Modern and Contemporary Peninsular Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5210	Seminar: Spanish Literature, 18th and/or 19th Centuries	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
3. <i>Modern and Contemporary Spanish American Literature</i>		6
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	
One Hispanic linguistics course:		3

SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
Electives		3
Any other graduate seminar offered by the department of Spanish and Portuguese:		
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	
SPAN 5650	Methods of Teaching Spanish	
PORT 5110	Brazilian Literature	
PORT 5150	Literature of the Portuguese Speaking World	
Additional 5000-level course(s), inside or outside the department, to fulfill the 30-credit minimum.		2
Total Credit Hours		30

Hispanic Linguistics Concentration

MA students in the Hispanic linguistics option are required to have their course selections in linguistics approved by their advisor and the Associate Chair of Graduate Studies, but they are encouraged to develop an interdepartmental and interdisciplinary course of study. Graduate seminars offered in linguistics, sociology, psychology, anthropology and education can serve as important complements to linguistics courses taken in our department.

Code	Title	Credit Hours
Required Courses		
LING 2000	Introduction to Linguistics ¹	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Electives		
One Spanish graduate-level literature seminar.		3
Additional courses to fulfill the 30-credit minimum.		23
Total Credit Hours		30

¹ Required for students who did not take a similar course as part of their previous course of study. Students who must take LING 2000 are required to do so during their first semester in the program.

Spanish & Portuguese Studies Concentration

MA students in the Spanish and Portuguese studies track are required to take PORT 2350 in their first semester of study (or place in upper Portuguese language level), and 30 hours of graduate coursework, of which 27 hours must be taken within the department. Graduate students in this subplan are required to have Portuguese as the main area for their MA comprehensive exams.

Code	Title	Credit Hours
Required Courses		
SPAN 5130	Seminar: Critical Approaches to Iberian & Latin American Literatures and Cultures	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Electives		
<i>One Hispanic Linguistics course</i>		3
SPAN 5400	Seminar: Spanish Phonology	
SPAN 5410	Seminar: Spanish Syntax	
SPAN 5430	Seminar: Hispanic Linguistics	
SPAN 5440	Seminar: Trends in Hispanic Linguistics	
SPAN 5450	Introduction to Hispanic Linguistics	
In addition, students in the Peninsular and Spanish American Literature Option are required to take a minimum of six graduate credit hours in each of the following subject areas:		18
<i>Medieval/Early Modern/Colonial Literature</i>		
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5140	Seminar: Spanish Literature, Medieval Period	
SPAN 5200	Seminar: Spanish Literature, Renaissance and Baroque	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
<i>Modern and Contemporary Peninsular Literature</i>		
PORT 5150	Literature of the Portuguese Speaking World	
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5220	Seminar: Spanish Literature, 20th and/or 21st Centuries	
<i>Modern and Contemporary Latin American Literature</i>		
PORT 5110	Brazilian Literature	
SPAN 5120	Seminar: Spanish Literature and/or Spanish American Literature	
SPAN 5300	Seminar: Spanish American Literature, Colonial Period and/or 19th Century	
SPAN 5320	Seminar: Spanish American Literature, 20th and/or 21st Centuries	
Additional graduate courses to fulfill the 30-credit minimum		6
Total Credit Hours		31

Teaching Spanish Concentration

MA students in the Spanish teaching concentration are required to complete a minimum of 30 graduate credit hours, of which at least 25 must be taken in the department. All students are required to have their course selections approved by their advisor and the Associate Chair for Graduate Studies.

Code	Title	Credit Hours
Required Courses		
SPAN 4650/5650	Methods of Teaching Spanish ¹	3
SPAN 4980	Methods Language Learn/Pedagogy	1
Spanish graduate-level literature seminars		9

Spanish graduate-level linguistics seminars	9
Graduate-level linguistics or literature electives in the Department	3
Education-related electives inside or outside of the Department	6
Total Credit Hours	31

¹ Candidates enrolled in this course will complete a special teaching project covering the planning, teaching and evaluation of a unit consisting of 10 to 15 lessons.

Spanish - Doctor of Philosophy (PhD)

Unique among other departments in the country, the Spanish and Portuguese Department at CU Boulder offers two distinct tracks to our PhD students:

- Medieval and early modern Hispanic literatures
- Peninsular and Latin American literatures

Both PhD programs offer students a rigorous yet flexible plan of studies designed to deepen their knowledge of Peninsular and Latin American literatures and cultures.

Our faculty is actively engaged in research and publication in a variety of topics covering the whole range of peninsular and Latin American literatures and cultures, from the role of women’s leadership in the Peninsular Middle Ages to cultural histories of banditry in Latin America, from Cervantes to the work of contemporary authors like Roberto Bolaño.

Students work closely with CU Boulder faculty members and are encouraged to pursue their own research interests.

Students wishing to pursue graduate work in Spanish leading to candidacy for advanced degree should carefully read the Master’s Degree Requirements section of this catalog.

Requirements

Residence Requirement

PhD students must complete a minimum of one academic year in residence on the Boulder campus (excluding summer) within the four years immediately preceding the date on which they present themselves for the PhD comprehensive examination.

Areas of Concentration

The PhD in Spanish is offered in six literary periods of concentration:

- Medieval
- Golden Age
- 18th and/or 19th century Peninsular
- 20th and 21st century Peninsular
- Colonial and 19th century Spanish American
- 20th and 21st century Spanish American

For further information on these options, contact the department.

Course Requirements

Prior to taking the PhD comprehensive exams, students must complete a minimum of 36 credit hours in graduate seminars in Spanish and/or related fields numbered 5000 or above. Students can take as many as 9 graduate credit hours outside the department. The student’s advisor and the Associate Chair of Graduate Studies, in consultation with the Chair of

the department, must approve credit hours in excess of 9, provided that the student formally requests it and gives a compelling reason for the standard limit to be overridden. Approval of the MA degree must also be presented for the PhD. Each advisor, in consultation with the student, will determine which courses will be acceptable.

All PhD students must take at least 30 credit hours of graduate coursework at CU Boulder. PhD students may transfer to the department a maximum of 6 hours of acceptable graduate-level credit. Transfer of credits will be considered only at the moment of admission into the program, not later on. Students may take no more than 3 credit hours of independent study courses. Additional independent study has to be approved by the graduate committee, which makes a recommendation to the Associate Chair of Graduate Studies or the Chair of the department. Under no circumstances can independent study coursework exceed 25 percent of the coursework required for the PhD degree.

Doctoral students can only take up to 12 credits in course load that are not regular graduate seminars in the Spanish and Portuguese Department. These 12 credits are a combination of credits taken outside of the Spanish and Portuguese Department and independent studies offered by a faculty member of the Spanish and Portuguese Department. If a student decides to take one independent study with their advisor, then the student is allowed to take 9 credits outside the department; this is the recommended situation. If a student takes two independent studies, then they can only take 6 credits outside the department, and so on. No more than 9 credit hours can be used in independent studies, and no more than 9 credit hours can be taken outside the department.

PhD students who did not take a teaching methodology seminar, a literary theory seminar, or a Hispanic linguistics seminar as part of their MA program must do so as part of their PhD program. Those students who did not take a minimum of 3 graduate credit hours in each of the seven subject areas as part of their MA program, must make up coursework in these areas as part of the PhD program. The Associate Chair of Graduate Studies makes the decision regarding this additional work during the student's first semester in the program. If this additional work is not completed the semester prior to the PhD exam, students will not be able to take their comprehensive exams.

Language Requirement

Students must demonstrate, as early as possible before taking the PhD Comprehensive Examination, communication knowledge in Portuguese and one other modern language (subject to the approval of the student's PhD Supervisory Committee). English and Spanish are not part of this language requirement. Communication knowledge is defined as the achievement of the current minimal acceptable score of the Graduate School Foreign Language Test or completion of a fourth-semester college-level course with a grade of B or higher. A fourth-semester college level of Latin (with a grade of B or higher) will also fulfill part of this requirement. Successful completion of PORT 2350 with a B or higher will satisfy the language requirement in Portuguese.

Speech, Language and Hearing Sciences

The graduate curriculum in speech, language and hearing sciences (SLHS) leads to either a master's or a doctoral degree including clinical degrees and research degrees. The clinical-training programs in speech-language pathology and audiology are accredited by the Council on

Academic Accreditation (CAA) and the Colorado State Department of Education.

Prospective students should read the Master's Degree (p. 1030) or Doctoral Degree Requirements (p. 1031) sections of this catalog.

Course code for this program is SLHS.

Accreditation

Degree programs in Speech-Language Pathology (SLP) and Audiology are designed to provide a theoretically and clinically rich learning experience for students planning to work as audiologists or speech-language pathologists in medical, educational and private practice settings. States have varied requirements for practitioners of speech-language pathology and audiology (e.g. additional externship hours, earning the Certificate of Clinical Competence (<https://www.asha.org/certification/>), etc.). Students are reminded to contact the applicable licensing board in the state where they are planning on looking for employment. Information is also available on the university's Accreditation & State Authorization (<https://www.colorado.edu/accreditation/professional-licensure-programs-degrees/>) website.

The MA education program in speech-language pathology and the Doctor of Audiology (AuD) education program in audiology at CU Boulder is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. (Address: 2200 Research Boulevard, #310, Rockville, MD 20850. Phone: 800-498-2071 or 301-296-5700)

Master's Degree

- Speech, Language and Hearing Sciences - Master of Arts (MA) (p. 1314)

Doctoral Degrees

- Audiology - Doctor of Audiology (AuD) (p. 1316)
- Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD) (p. 1317)

Certificate

- Speech-Language Pathology Assistant - Graduate Certificate (p. 1317)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Melinda
Assistant Professor Adjunct

Arehart, Kathryn H. (https://experts.colorado.edu/display/fisid_105561/)
Professor; PhD, University of Washington

Baiduc, Rachael (https://experts.colorado.edu/display/fisid_157676/)
Assistant Professor; PhD, University of Washington

Belin, Christine
Lecturer; AuD, University of Florida

Bonino, Angela (https://experts.colorado.edu/display/fisid_157741/)
Assistant Professor; PhD, University of North Carolina Chapel Hill

Boudreau, Donna
Lecturer; PhD, University of Colorado Boulder

Brennan, Christine (https://experts.colorado.edu/display/fisid_1155861/)
Assistant Professor; PhD, Northwestern University

Christensen, Kate
Lecturer; MA, University of Colorado Boulder

Damico, Jack (https://experts.colorado.edu/display/fisid_1165416/)
Professor, Chair; PhD, University of New Mexico

Finan, Donald (https://experts.colorado.edu/display/fisid_1122670/)
Lecturer; PhD, Indiana University

Fredrickson, Tammy L. (https://experts.colorado.edu/display/fisid_1148888/)
Clinical Associate Professor; PhD, University of Colorado Boulder

Gabbard, Sandra
Lecturer; PhD, University of Colorado Boulder

Glick, Hannah
Lecturer; PhD, University of Colorado

Greene, Nathaniel
Assistant Professor Adjunct; PhD, University of Rochester

Griffin, Meghann
Lecturer; MEd, Georgia State University

Hardin, Kathryn Theresa Yarema (https://experts.colorado.edu/display/fisid_1139358/)
Assistant Professor Adjunct; MA, University of Colorado Boulder

Hilger, Alexandra (https://experts.colorado.edu/individual/fisid_1167224/)
Assistant Professor; PhD, Northwestern University

Kan, Pui Fong (https://experts.colorado.edu/display/fisid_1145806/)
Associate Professor; PhD, University of Minnesota Twin Cities

Kates, James (https://experts.colorado.edu/display/fisid_1146722/)
Scholar in Residence; MS, Massachusetts Institute of Technology

Kleiber, Holly
Lecturer; MS, University of Washington

Langer, Elizabeth
Lecturer; PhD, University of Colorado Boulder

Lemke, Alison (https://experts.colorado.edu/display/fisid_1164203/)
Clinical Associate Professor; MA, University of Iowa

Lewon, Jennifer (https://experts.colorado.edu/display/fisid_1147362/)
Clinical Assistant Professor; MA, Northern Arizona University

Lynch, Karen
Lecturer; PhD, University of Louisiana at Lafayette

Marson Parker, Jennifer
Lecturer; MA, University of Colorado Boulder

Meyers-Denman, Christina Nicole (https://experts.colorado.edu/display/fisid_1155857/)
Assistant Professor; PhD, University of Arizona

Moers, Willard Lee (https://experts.colorado.edu/display/fisid_1114371/)
Instructor; MA, Gallaudet University

Moore, Susan
Clinical Professor Emeritus

O'Dell, Alexandra
Lecturer; AuD, University of North Carolina Chapel Hill

Pollard, Ryan D. (https://experts.colorado.edu/display/fisid_1153106/)
Clinical Assistant Professor, Lecturer; PhD, University of Colorado Boulder

Portnuff, Cory (https://experts.colorado.edu/individual/fisid_1159952/)
Lecturer; PhD, University of Colorado Boulder

Ramig, Peter R.
Professor Emeritus

Ramsberger, Gail
Associate Professor; ScD, Boston University

Riseman, Christina
Lecturer; MA, University of Colorado Boulder

Rudden, D'Anne
Lecturer; AuD, A.T. Still University

Schick, Brenda (https://experts.colorado.edu/display/fisid_1110058/)
Professor Emeritus; PhD, Purdue University

Schwartz, Scott
Lecturer; PhD, University of Wisconsin-Madison

Sharma, Anu (https://experts.colorado.edu/display/fisid_1143814/)
Professor, Associate Chair; PhD, Northwestern University

Snyder, Lynn
Professor Emeritus

Sommerfeldt, Kristin (https://experts.colorado.edu/display/fisid_1156054/)
Clinical Assistant Professor; AuD, University of Florida

Steffen, Jeffrey
Lecturer; MA, University of Colorado Boulder

Stith, Joanna
Lecturer; PhD, University of South Carolina

Sweetman, Richard H.
Professor Emeritus

Tennant, Sherri
Scholar in Residence; MS, University of Wisconsin Madison

Tucker, Kathryn
Lecturer; MA, University of Colorado Boulder

Walton, Patricia
Lecturer; MA, University of Colorado Boulder

Werner, LJ (https://experts.colorado.edu/display/fisid_1154952/)
Scholar in Residence; MA, University of Colorado Denver

Woeber, Caroline
Lecturer; MA, University of Central Florida

Yoshinaga-Itano, Christine
Professor Emeritus

Courses

SLHS 5012 (3) Evidence-based Practice and Research Methods

Focuses on the knowledge of research methods and the application of research principles into clinical practice. In particular, covers quantitative research methods that are in speech-language pathology clinical settings. Will cover (1) clinical practice and research methods in speech, language and hearing sciences; (2) single-subject designs in clinical settings; (3) introduction to data collection, data organization and data analysis; (4) interpretation and presentation of clinical data. Formerly SLHS 5000.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5032 (3) Competencies and Strategies for the SLPA

This course includes content regarding roles and responsibilities of the SLPA, Codes of Ethics and ethical issues, standard health precautions and infection control, health and safety policy and procedures, confidentiality (FERPA & HIPAA), culture of public schools, service delivery models, screening protocols, intervention processes and procedures, data collection and documentation, assistive technology, special populations and cultural-linguistic diversity, reflective practice and continuing professional growth. Students must be accepted in the SLPA certification program to enroll in this course.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5112 (2) Clinical Practice I

Provides entering graduate students a framework for beginning their clinical education and building the relationship of theory and research to current clinical practice in speech-language pathology.

Key topics for exploration include contemporary professional issues, licensure, professionalism, ethics and ethical conduct, scope of practice, competency development, teaming and collaboration, accountability and multicultural issues. Formerly SLHS 5110.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5122 (1) Clinical Practice II: Assessment and Treatment Planning

Explores critical elements associated with assessment and treatment planning in speech-language pathology. Topic areas include assessment style, interviewing, test selection and techniques of test administration. Diagnosis and treatment planning section includes differential diagnoses, ethics of diagnoses, goal writing and treatment rationale.

Requisites: Requires a prerequisite course of SLHS 5112 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5132 (1) Clinical Practice II: School Based Skills

Targeted skills for implementation in educationally-based settings for speech-language pathologists. Specific coursework will address writing IEPs/IFSPs, expanded work with service delivery models and implementation of state and federal requirements for school based services.

SLHS 5142 (1) Clinical Practice III: Clinical Practice in Medical and Private Practice Settings

Explores skills specific to working in medically-based settings and private practice. Topics include billing, coding and reimbursement, working with an interdisciplinary team and measures and documentation specific to these settings.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5242 (3) Language Disorders in School Age Children

Addresses the nature, assessment, and treatment of developmental language disorders in school age children.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5252 (3) Acquired Language Disorders in Adults

Introduces the neural bases and medical etiologies of acquired language disorders in adults, explores the ways in which normal language processing may become disordered, and studies current methods of evaluation and treatment design.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5262 (3) Dysphagia

Provides students with background in the anatomical, physiological, and neurological bases of swallowing function and disorders across the lifespan. Etiological factors are presented, as well as various assessment tools and principles of treatment of swallowing disorders in children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5272 (1) Augmentative Alternative Communication: Theory and Use

Provides an overview of the application of current technology to alternative/augmentative communication. Emphasizes assessment and intervention with nonverbal children and adults with need for alternative/augmentative communication systems. Presents various technological devices and systems. Addresses system selection, programming, development and integration of use in environmental contexts.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5282 (3) Acquired Cognitive Disorders

Explores the theoretical and clinical management of acquired cognitive disorders that impact communication. Includes basic functional neuroanatomy.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5292 (3) Neurogenic Speech Disorders in Adults

Presents the neural bases of normal and disordered speech motor control, teaches assessment and treatment of motor speech disorders in adults, and applies motor control research to clinical problems.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5302 (3) Speech Sound Disorders in Children

Provides overview of phonological development, perception, and production. Presents factors related to articulation and focuses on critical evaluation of traditional and phonological based assessment and intervention procedures. Includes coverage of phonological awareness, metaphonological skills as related to literacy, as well as treatments and principles specific to children with motor speech disorders.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5312 (2) Aging and Communication

Examines normal age-related changes to communication systems. Anatomic and physiological changes to the mechanisms of speech production, audition and the brain will be included, with a focus on the functional impacts of such changes for speech production and perception, cognition, language and social communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

SLHS 5322 (2) Complex Medical Speech-Language Pathology Cases

Expands upon the basic knowledge learned in SLHS 5252 (acquired language disorders), 5332 (voice disorders), 5282 (acquired cognitive disorders), 5262 (dysphagia), 5292 (neurogenic speech disorders) and 5362 (fluency disorders). Students will explore clinical management options for complex medical cases created by factors such as multiple and/or rare diagnoses, medical complications, socioeconomic factors and behavioral or personality issues.

Requisites: Requires prerequisite courses SLHS 5252 and SLHS 5332 and SLHS 5282 (all minimum grade B). Requires corequisite course SLHS 5292. Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5332 (3) Voice and Resonance Disorders

Examines the anatomical and physiological bases for normal and disordered laryngeal and velopharyngeal function including functional, organic, and neurogenic voice disorders, and velopharyngeal insufficiency and incompetence. Emphasis on evidence-based assessment and treatment of individuals with voice and resonance disorders, including special populations.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5342 (2) Counseling in Speech-Language Pathology

Designed to demonstrate the principles of counseling for individuals with communication disorders and their families throughout the client's lifespan. Counseling systems and techniques for specific communication disorders will be included. The course will focus on the basic theory of counseling and how counseling skills can be used in the treatment of various communication disorders. Provides an introduction to the basic counseling skills necessary to help speech-language pathologists achieve the greatest success possible when working with individuals exhibiting communication disorders.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5352 (3) Bilinguals with Communication Disorders

Covers current empirical research regarding the linguistic and cognitive system of bilinguals with and without communication disorders. Address cross-cultural and cross-linguistic issues in selection and implementation of assessment and intervention procedures. Discuss various intervention strategies for working with bilinguals and their families.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5362 (3) Fluency Disorders

Exploration of the nature, differential diagnosis and treatment of fluency disorders across the life-span. Students will develop the requisite skills and knowledge base to provide prevention, consultation, assessment and intervention for fluency disorders. Research bearing on affective, behavioral and cognitive components of stuttering will be reviewed, along with recent data on the neural bases of the disorder. A broad range of treatment approaches will be discussed and demonstrated.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5372 (1) Cleft and Resonance: Fundamentals for Evaluation and Treatment

Provides an overview of fundamental awareness and knowledge of the etiology, development and treatment of children with cleft lip and palate and other disorders of resonance. It covers general parameters of care for speech language pathologists across various age groups (birth, toddler, preschool, and school age) with this population. Students will learn the methods for identifying and treating compensatory mis-articulation patterns and abnormal resonance patterns and the aspects of multidisciplinary team care for families and individuals with cleft lip and palate.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5555 (3) Advanced Topics in Social Communication: Autism Spectrum Disorders

Students will acquire knowledge and skills in the appropriate selection, application and evaluation of interventions for children, adolescents and adults with autism spectrum disorders (ASD) and their families. Evaluation and diagnosis, including development of the IFSP and IEP, will be addressed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5576 (3) Neuroanatomy and Neurophysiology of Communication

Provides an introduction to the neuroanatomy and neurophysiology that collectively give rise to human communication including speech perception and production. We will consider how speech, language and hearing are represented in and controlled by the central nervous system and how neuropathologies affect processes of communication.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 5602 (3) Communication Challenges in Children: Birth to Six

Emphasizes nature and profile of language and communication disorders affecting infants and young children. Facilitates integration of clinical and theoretical perspectives with specific approaches for family-centered assessment and intervention principles, models and techniques.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5612 (3) Language Learning Disabilities

Expands upon the nature of Language Disorders in SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

Requisites: Requires a prerequisite course of SLHS 5242 (minimum grade B).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5622 (2) Advanced Topics in Learning Disabilities

Expands upon the nature of Language Learning Disabilities learned in SLHS 5612 (Learning Disabilities) and SLHS 5242 (School Age Language Disorders) including language-based difficulties in reading, written language and mathematical achievement, as well as deficits in executive functioning. Students will explore clinical management options through studies of intervention methods as well as through clinical case examples. Specifically, we will examine adaptive instruction and evidence-based intervention.

Requisites: Requires prerequisite courses of SLHS 5242 and SLHS 5612 (all minimum grade B).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5632 (1-3) Special Clinical Focus in Speech-Language Pathology

Provides opportunity for students to develop clinical area(s) of deeper knowledge and skill, via courses approved for professional-level continuing education units (CEU) by the American Speech Language Hearing Association (ASHA), in areas that may not be available through the SLHS curriculum. Courses may be taken via ASHA approved Online resources or through courses offered at professional scholarly meetings.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

SLHS 5674 (2) Signals, Systems, and Calibration in Audiology

Provides in-depth study of instrumentation used by audiologists for hearing aid evaluation and fitting, signal generation and modification, and signal measurement and calibration.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 5848 (1-4) Independent Study

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Practica

SLHS 5849 (1-4) Independent Study 1, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5859 (1-4) Independent Study 2, M.A.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 5898 (1-4) Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention

Offers on-campus and off-campus supervised clinical practice in diagnosis, assessment, and intervention of speech-language-hearing disorders in children and adults.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5918 (1-3) Audiology Clinical Practicum: Lab

Provides clinical training in the on site Speech, Language and Hearing Center in skills including audiology identification, evaluation and management for adults and children with hearing loss.

Repeatable: Repeatable for up to 16.00 total credit hours.

Requisites: Restricted to Speech, Language, and Hearing Sciences (SLHS) OR Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5928 (1-4) Audiology Clinical Practicum: Level 1

Provides clinical training in an off-campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires a prerequisite course of SLHS 5918 (minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

SLHS 5930 (4) Speech Language Pathology Assistant Internship

Placement for 15-18 hours per week for a total of 180 clock hours including a minimum of 50% supervised provision of 80 hours of direct intervention (in-person/virtual) with students on caseload.

SLPA interns will complete tasks for mentor/supervisor including file reviews, scheduling, research of evidence-based practices, materials preparation, observation of intervention and IEP meetings, and provide other assistance as specified by mentor and within the scope of practice of an SLPA (Asha, 2013). Competency development and professional growth will be documented through midterm formal conferences and final semester ratings of specific competencies and completion of internship assignments. Students must be accepted into the SLPA certificate program to enroll in this course.

Requisites: Requires a prerequisite course of SLHS 4918 (minimum grade D-).

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 5938 (1-4) Audiology Clinic Practicum: Level 2 Educational

Provides clinical training in an off campus educational audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Practica

SLHS 5948 (1-4) Audiology Clinic Practicum: Level 2 Medical

Provides clinical training in an off campus medical audiology facility in identification, evaluation and management for adults and children with hearing loss. Schedule is variable with a minimum requirement of 16 hours on rotation per week.

Repeatable: Repeatable for up to 15.00 total credit hours. Allows multiple enrollment in term.

Requisites: Requires prerequisite courses of SLHS 5918 and SLHS 6544 and SLHS 6614 (all minimum grade B). Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6000 (1-4) Advanced Topics in Speech, Language and Hearing Sciences

Studies selected topics related to the theory and management of communication disorders, and theoretical/scientific information related to speech, language, and hearing.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6006 (3) Advanced Hearing Science

Provides advanced study in hearing science, including physical, physiological, and psychological acoustics of both normal and impaired auditory systems. Department enforced prerequisite: graduate standing in SLHS; undergraduate course work in biology or anatomy.

Additional Information: Departmental Category: Didactic: Speech-Hearing Science

SLHS 6402 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Includes philosophy of mind; learning; categorization; vision and mental imagery; consciousness; problem solving; decision making, and game-theory; language processing; connectionism. No background in Computer Science will be presumed.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and EDUC 6504 and LING 6200 and PHIL 6310 and PSYC 6200

Requisites: Restricted to graduate students only.

SLHS 6504 (1) Professional Ethics in Audiology

Overview of ethics and ethical issues in the profession of audiology. Topics to be discussed include code of ethics by professions, approaches to analyzing ethical dilemmas, ethics in relationships with manufacturers, and ethical considerations in teaching, clinical practice and research.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6514 (1) Professional Issues in Audiology

Overview of professional issues related to the profession of audiology. Topics to be discussed include certification, licensure, professional associations, infection control, practice management, federal regulations related to audiology, professional communications and professional relationships.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6544 (3) Auditory Processes: Adult Assessment

Advanced study on the current science surrounding hearing assessment of adults across the age span. Includes theoretical foundations and clinical applications.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6554 (3) Auditory Processes: Child Assessment

Provides advanced study in hearing assessment and management of children across the age span. Topics include epidemiological, medical, audiological, developmental, and habilitative aspects of normal and impaired hearing in children.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite undergraduate background in SLHS.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6564 (3) Auditory Processes: Neurodiagnostics

Provides advanced study in the neural bases of hearing. Includes theoretical foundations and clinical assessment of neurological functioning in auditory systems with both normal and impaired function.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6614 (3) Fundamentals of Amplification

Discusses theoretical and clinical issues regarding the design, fitting, and evaluation of amplification technology for individuals with hearing loss. Includes the use of behavioral, psychological, electroacoustic, and physiological (real ear) measures in the selection and evaluation of digital and analog hearing aid technology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6642 (3) Development and Intervention in Childhood Hearing Loss

Reviews development and intervention with children who are deaf and hard-of-hearing, birth through school age. Focuses on speech, auditory training, language, literacy and cognitive development. Formerly SLHS 6640.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Speech-Language Pathology

SLHS 6650 (3) Counseling and Multicultural Issues in SLHS

Explores counseling theories and techniques following the diagnosis of a communication disorder across the life span. Considers issues related to grieving and mourning, parenting, disability, cultural customs, attachment, and relationships. Covers professional ethics and ethical responsibilities.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6670 (3) Aging and Hearing Loss

The course will address research and evidence-based practice regarding hearing loss in adults across the age span. Topics will include aural rehabilitation, co-morbidities associated with hearing loss (e.g., cognition and dementia; mental health; sensory-perceptual-motor skills; other health/medical conditions), and impacts of hearing loss on functioning, disability, health, and health services.

Requisites: Requires a prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

Recommended: Prerequisites SLHS 7418 and SLHS 7540.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6918 (7) Practicum 2: Medical-Clinical Internship

Gives an off-campus experience in a clinical or medical setting that provides in-depth practice in management of communication disorders of children and adults.

Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6928 (7) Practicum 2: Public School Internship

Provides an off-campus supervised experience providing extended and in-depth practice involving school-age children in a school classroom.

Repeatable: Repeatable for up to 14.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6938 (1-10) Audiology Clinic Externship Educational

Provides students with full time off campus experience in an educational audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 6948 (1-10) Audiology Clinic Externship: Medical

Provides students with full time off campus experience in a medical audiology facility offering in-depth and advanced procedures for identification, evaluation and management of hearing loss in adults and children.

Repeatable: Repeatable for up to 21.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 6950 (1-7) Master's Thesis

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7000 (3) Research Designs in Human Communication Sciences and Disorders

Offers an advanced seminar in research designs for human behavior: efficacy, ethnographic, single-subject, quasi-experimental, and experimental designs. Designed to familiarize students with terminologies and research designs frequently used in speech-language-hearing areas.

Recommended: Prerequisite basic statistics.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7200 (3) Business, Management and Ethics in Audiology

Focuses on the business aspects of managing an audiology practice. Addresses developing a business plan, contracting for services, legal issues, financial reporting, budgeting, pricing, billing and reimbursement, regulatory issues, marketing, personnel management, risk abatement, and business ethics.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7418 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and EDUC 6506 and LING 7415 and PHIL 7415 and PSYC 7415

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

SLHS 7428 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint Ph.D in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and EDUC 6516 and LING 7425 and PHIL 7425 and PSYC 7425

Requisites: Restricted to graduate students only.

SLHS 7450 (3) Audiology Capstone Project

Provides an individualized project for AUD, completed prior to initiation of final clinical year. May be in the form of research-based investigation, an evidence-based position paper, a clinical protocol based on peer-reviewed literature, a grant proposal, or another format approved by AUD committee. Project requires approved proposal by AUD committee and focused study supervised by capstone advisor.

Requisites: Restricted to Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7520 (3) Auditory Processes: Medical and Genetic Bases

Discusses current developments in epidemiology, pathogenesis, and symptomatology of hearing loss. Investigates the genetic bases of hearing loss and deafness. Incorporates clinical decision theory in assessment and intervention. Explores cross-disciplinary topics from genetics, radiology, pharmacology, pathology, and otology.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7530 (3) Auditory Processes: Theory and Application in the School Environment

Focuses on application of routine audiological practices such as screening, assessment, rehabilitation, and instrumentation to children in educational settings. Emphasizes federal education regulations and pertinent case law.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7540 (3) Auditory Processes: Physiology, Assessment, and Management of the Vestibular System

Emphasizes current research on physiology of the vestibular system, including both structure and function. Considers the etiology of both peripheral and central pathologies of the vestibular system. Discusses ways to assess function of the vestibular system as well as theoretical and practical considerations of vestibular rehabilitation.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7550 (3) Prevention of Hearing Loss from a Public Health Perspective

Discusses the prevention of hearing loss from public health perspectives. Includes the effects of noise and other damaging agents on the auditory physiology. Discusses prevention, screening, identification, and management of occupational and recreational hearing loss. Considers noise measurement and monitoring. Addresses local, national and global initiatives and legislation regarding hearing health.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7614 (3) Implantable Devices: Technology and Clinical Application

Examines technological aspects and clinical applications of implantable prostheses such as cochlear implants, brainstem implants, hybrid cochlear implants, Baha devices and middle ear implants. Topics will include: history of implantable devices, anatomy and histopathology of the inner ear, speech processing in implants, mapping devices, candidacy criteria, behavioral and electrophysiologic techniques for assessment and outcomes in implanted children and adults.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Recommended: Prerequisite good standing in the SLHS graduate program or instructor consent will be required.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7640 (3) Communication Processes and Hearing Loss: Birth through Six

Provides in-depth study of current research literature and its implications for clinical practice regarding development of communication processes in the first six years of life and impact of hearing loss. Investigates development of language, auditory perception, speech production, social-emotional abilities, and cognition.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7714 (3) Advanced Topics in Amplification

Discusses advanced issues in the design and fitting of hearing aid technology, including advanced signal processing, outcomes assessment, evidence-based practice and specialized fitting protocols for pediatric and geriatric populations. Current research is integrated with clinical case studies to guide the development of evidence-based practice in hearing aid fittings.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: Audiology

SLHS 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and EDUC 7775 and LING 7775 and PHIL 7810 and PSYC 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

SLHS 7800 (1) Seminars in Audiology: Advanced Topics

Graduate seminar exploring advanced topics in the field of audiology as they relate to diagnosis and (re)habilitation. Topics will include novel clinical issues and topics including tinnitus, intraoperative monitoring, pharmacology, hyperacusis/misophonia, auditory processing. Discussion of the evidence-based literature surrounding these advanced topics will be central to this seminar.

Requisites: Requires prerequisite course of SLHS 6544 (minimum grade B). Restricted to graduate students only.

Grading Basis: Letter Grade

SLHS 7849 (1-4) Independent Study 1, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7859 (1-4) Independent Study 2, PhD

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Independent Study

SLHS 7918 (3) Practicum 3: Clinical Supervision

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8918 (3) Practicum 3: Classroom Instruction

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8928 (3) Practicum 3: Research Coordination

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Practica

SLHS 8990 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to Speech, Language and Hearing Sciences (SLHS) or Audiology (AUDD) graduate students only.

Additional Information: Departmental Category: Didactic: All-Department

Speech, Language and Hearing Sciences - Master of Arts (MA)

Focus Areas

There are two areas of focus available at the MA level:

- MA leading to professional certification in speech-language pathology
- Research

Professional Certification Focus

The master's degree program leading to professional certification in speech-language pathology (MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>)) is designed to provide a theoretically and clinically rich path for students planning to work as speech-language pathologists in medical, educational, and private practice settings. Students in the MA-SLP program are provided with a strong foundation of theoretical and clinical knowledge through their coursework and clinical experiences.

Students completing the MA-SLP program obtain a Master of Arts degree from the University of Colorado and are eligible to receive the Certificate of Clinical Competence in speech-language pathology from the American Speech-Language-Hearing Association (<http://www.asha.org/>) (ASHA) upon successful completion of the clinical fellowship year and the national PRAXIS examination and thus meet educational requirements for Speech-Language Pathology licensure in all states. However, students should also contact the applicable licensing board in the state where they are planning on looking for employment. Students can also apply for Colorado State Licensure to work in the public schools.

Research Focus

The master's program with a research focus allows students to design their own master's degree in SLHS (<https://www.colorado.edu/slhs/graduate/masters-non-clinical-degree/>) in any topic related to speech, language or hearing sciences. This degree does not result in clinical certification. Working with an advisor, students design a plan of study, with coursework within SLHS and from other departments. A master's thesis is required.

Requirements

Professional Certification Focus

The master's program with a professional certification focus (MA-SLP) is a two-year (24-month) program that culminates in one or two internships and either successful passage of the comprehensive exam or completion of a thesis. The program consists of an initial summer intensive session beginning in early August and ends in late July two years later. Students are enrolled for August intensive, fall year 1, spring year 1, summer year 1, fall year 2, spring year 2, and summer year 2.

Within departmental and ASHA guidelines, master's students with a focus in speech-language pathology complete a core set of seminars and clinical assignments that assure at least minimal competence in the full scope of practice for speech-language pathologists. In addition, students complete at least one of three electives that provide the opportunity to develop greater knowledge and skills in areas of specific interest. Clinical assignments are initiated in the on-site Speech, Language and Hearing Center; later, student input is obtained in making off-campus clinical assignments in educational and medical settings.

Students with an undergraduate degree in speech-language pathology and audiology can expect to complete the program in two calendar years (see the MA-SLP (<https://www.colorado.edu/slhs/graduate/masters-degree-leading-asha-certification-speech-language-pathology/>) webpage). Those without such a background are required to make up undergraduate deficiencies, which normally require at least an additional 18 credit hours of courses in speech, language and hearing sciences and related disciplines.

Students must meet standards for both academic and clinical competence, as well as professional conduct. Full-time graduate study is required.

Prerequisites

In addition to meeting the Graduate School and SLHS requirements, students in the MA-SLP program must meet ASHA requirements for clinical certification. MA-SLP students must complete all undergraduate course prerequisites, which can be found on our website (<https://www.colorado.edu/slhs/prerequisite-coursework/>). Students may complete the prerequisites prior to applying to the graduate program, either as part of their undergraduate degree program, or following completion of the undergraduate degree in any other major. Students may also apply to enter the MA-SLP program and complete the prerequisites during the first year of their graduate study as a 3-year track student (the prerequisites will not count as credits in the MA-SLP program). Please note that all prerequisite coursework must be approved by the CAA Program Director.

Research Focus

The research focus is designed for students who are not seeking clinical certification.

Working with an advisor, students design a plan of study with coursework from SLHS and other departments. A master's thesis is required. The non-clinical master's degree in SLHS requires 30 credit hours of graduate coursework, with four to six credit hours devoted to the master's thesis. For more information, visit the Thesis Option (<http://www.colorado.edu/slhs/thesis-option/>) webpage.

At least 24 hours must be completed at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the academic department. Students may be able to transfer up to 9 credit hours of graduate credit towards this degree. The non-clinical master's degree requires close work with a faculty member of your choosing. Students interested in pursuing this degree option are encouraged to talk with SLHS faculty members who share their interests before applying (see the Meet Us (<http://www.colorado.edu/slhs/meet-us/>) webpage).

Sample Two-Year Plan of Study

Below is a sample curriculum for the MA-SLP program. MA-SLP students must take 3 credit hours of elective classes. Students will take either the comprehensive exam in the fall of the second year or pursue a thesis option. The department recommends students take the PRAXIS exam by mid-April of the second year. Due to the length of time of the two internships in spring of year two, most MA-SLP students officially graduate in the summer term.

Year One

August Intensive

		Credit Hours
SLHS 5112	Clinical Practice I	2
SLHS 5342	Counseling in Speech-Language Pathology	2
Credit Hours		4

Fall Semester

SLHS 5012	Evidence-based Practice and Research Methods	3
SLHS 5252	Acquired Language Disorders in Adults	3
SLHS 5362	Fluency Disorders	3
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5602	Communication Challenges in Children: Birth to Six	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
Credit Hours		16-19

Spring Semester

SLHS 5242	Language Disorders in School Age Children	3
SLHS 5272	Augmentative Alternative Communication: Theory and Use	1
SLHS 5282	Acquired Cognitive Disorders	3
SLHS 5302	Speech Sound Disorders in Children	3
SLHS 5332	Voice Disorders	2
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
Credit Hours		13-16

Summer

SLHS 5262	Dysphagia	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
Credit Hours		5-11

Year Two

Fall Semester

SLHS 5132	Clinical Practice II: School Based Skills	1
SLHS 5142	Clinical Practice III: Clinical Practice in Medical and Private Practice Settings	1
SLHS 5292	Neurogenic Speech Disorders in Adults	3
SLHS 5372	Cleft and Resonance: Fundamentals for Evaluation and Treatment	1
SLHS 5555	Advanced Topics in Social Communication: Autism Spectrum Disorders	3
SLHS 5898	Practicum 1: Speech-Language-Learning Diagnosis, Assessment, and Intervention	1-4
SLHS 5352	Bilinguals with Communication Disorders (Optional elective)	3
SLHS 6642	Development and Intervention in Childhood Hearing Loss (Optional elective)	3

SLHS 6000	Advanced Topics in Speech, Language and Hearing Sciences (Optional elective)	1-4
Credit Hours		17-23
Spring Semester		
SLHS 6918	Practicum 2: Medical-Clinical Internship	7
SLHS 6928	Practicum 2: Public School Internship	7
Credit Hours		14
Total Credit Hours		69-87

Audiology - Doctor of Audiology (AuD)

The AuD is the entry-level degree in clinical audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) that emphasizes both clinical competency development and evidence-based practice. Students in the AuD program complete a four-year curriculum that includes academic coursework, clinical practicum and a capstone project. Students take advanced seminars in hearing science, clinical audiology and research methods.

Students have the opportunity to pursue clinical research in both laboratory and clinical settings, with faculty in a wide range of areas including electrophysiology, psychological acoustics, physiological acoustics, diagnostic evaluation and intervention procedures for newborns through geriatrics, advanced amplification, speech perception in noise, assistive technologies, cochlear implants, vestibular assessment techniques and aural habilitation and rehabilitation of individuals with hearing loss. Furthermore, students undertake clinical practica to develop competency across the scope of practice consistent with national clinical certification and/or licensure in audiology. Successful completion of the AuD at CU Boulder meets the requirements for certification in audiology by the American Speech-Language-Hearing Association (ASHA). Currently, the AuD meet the educational requirements for licensure as an audiologist in every state.

Students will have the opportunity to complete clinical rotations in several different settings including full use of laboratories and suites in the Department of Speech, Language & Hearing Sciences. Clinical rotations occur at sites such as University of Colorado Hospital (UCH) in Denver and the UCH outpatient Boulder clinic, Children's Hospital Colorado, local school districts, and other clinical settings throughout the metro Boulder and Denver area. Students complete fourth-year externships in clinical settings both in Colorado as well as across the United States.

Requirements

Prerequisite Coursework

The AuD faculty recommends that students have undergraduate coursework in speech-language-hearing sciences including content knowledge in audiological evaluation and rehabilitation, hearing and speech science, language development, phonetics, and speech and language disorders. A strong foundation in college algebra and pre-calculus is also expected. A *college-level* course in statistics is required.

Students who matriculate in the AuD program are required to document their background content knowledge and to address any missing competencies. See the department's Doctorate of Audiology (<https://www.colorado.edu/slhs/graduate/doctorate-audiology/>) webpage for a list of prerequisites and a sample course schedule.

Course Requirements

The AuD program requires a total of 89 credits. Below is a list of sample courses that fulfill this requirement.

Code	Title	Credit Hours
SLHS 5576	Neuroanatomy and Neurophysiology of Communication	3
SLHS 5674	Signals, Systems, and Calibration in Audiology	3
SLHS 5918	Audiology Clinical Practicum: Lab	1-3
SLHS 5928	Audiology Clinical Practicum: Level 1	1-4
SLHS 5938	Audiology Clinic Practicum: Level 2 Educational	1-4
SLHS 5948	Audiology Clinic Practicum: Level 2 Medical	1-4
SLHS 6006	Advanced Hearing Science	3
SLHS 6544	Auditory Processes: Adult Assessment	3
SLHS 6554	Auditory Processes: Child Assessment	3
SLHS 6564	Auditory Processes: Neurodiagnostics	3
SLHS 6614	Fundamentals of Amplification	3
SLHS 6650	Counseling and Multicultural Issues in SLHS	2
SLHS 6670	Aging and Hearing Loss	3
SLHS 6938	Audiology Clinic Externship Educational	1-10
SLHS 6948	Audiology Clinic Externship: Medical	1-10
SLHS 7000	Research Designs in Human Communication Sciences and Disorders	3
SLHS 7200	Business, Management and Ethics in Audiology	3
SLHS 7450	Audiology Capstone Project	3
SLHS 7520	Auditory Processes: Medical and Genetic Bases	3
SLHS 7530	Auditory Processes: Theory and Application in the School Environment	3
SLHS 7540	Auditory Processes: Physiology, Assessment, and Management of the Vestibular System	3
SLHS 7550	Prevention of Hearing Loss from a Public Health Perspective	2
SLHS 7614	Implantable Devices: Technology and Clinical Application	3
SLHS 7640	Communication Processes and Hearing Loss: Birth through Six	3
SLHS 7714	Advanced Topics in Amplification	3

Dual Degree Program

AuD/PhD in Audiology and Speech, Language and Hearing Science

The department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the fields of audiology and hearing science. The PhD/AuD dual degree program (<https://www.colorado.edu/slhs/graduate/audphd-dual-degree/>) trains students in both clinical research and clinical practice in audiology. Students in the program gain training that will prepare them to become independent scholars, teach in higher education, conduct research,

become certified clinical audiologists and gain leadership skills. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program.

Speech, Language and Hearing Sciences - Doctor of Philosophy (PhD)

The PhD program is grounded in research. Supervisory, administrative, instructional and research activities acquaint students with problems and concepts at a higher level of professional activity and responsibility. Students in the PhD program gain the knowledge and skills that will prepare them to become independent scholars, teach in higher education, conduct research, and become leaders within the discipline.

Wide latitude prevails in planning individual PhD programs. It is expected that students have some professional or research experience before entering the program and that they have specific academic or professional goals in mind. PhD students must take a four-course sequence in statistics, four core courses within Speech, Language and Hearing Sciences (SLHS), complete the preliminary and comprehensive examinations and successfully defend a dissertation research project. Beyond that, student degree plans are individually designed through the joint efforts of the student and an advisory committee.

Requirements

The student will select an advisory committee during the first semester of his or her program. Then the student will develop a plan of study in conjunction with the advisory committee during the first year of doctoral study. The plan of study will detail the student's goals, coursework to be completed to meet those goals and departmental and Graduate School requirements, and a proposed schedule for completion of doctoral work. The plan of study will become the student's blueprint for their doctoral work. The advisory committee must approve the plan of study, which may be amended later with the committee approval.

Departmental and Graduate School requirements for doctoral students are intended to allow maximum flexibility in developing a plan of study. All students take three SLHS doctoral seminars, at least 12 credit hours in statistics and research tools, and additional coursework in their own research area. There is no foreign language requirement. The Graduate School specifies that not more than 25 percent of coursework can be taken through independent study.

Code	Title	Credit Hours
Required Coursework		
	Three doctoral-level SLHS seminars.	9
	At least 15 credit hours in the student's major content area.	15
	One teaching practicum:	3
SLHS 8918	Practicum 3: Classroom Instruction	
	One research practicum.	3
	Two courses each in statistics and research tools.	12-15
	Thirty hours of doctoral dissertation credit.	30
SLHS 8990	Doctoral Dissertation	
Total Credit Hours		72-75

Upon approval of the advisory committee, a maximum of 21 credit hours of coursework may be transferred to fulfill the above requirements. This

should be accomplished by the end of the first semester of doctoral study. Requests must be made to the Graduate School on a form, which they provide; an official transcript must accompany the request.

In order to continue in the program, a grade point average of 3.50 or better on coursework every semester will be required as well as continued recommendation of the SLHS faculty advisory committee. Grades below B will not count toward a doctoral degree.

The minimum registration requirement for doctoral students is six semesters beyond the attainment of an acceptable bachelor's degree. Two semesters of minimum registration credit may be allowed for a master's degree from an accredited institution; however, at least four semesters of minimum registration credit, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder.

Dual Degree Programs

Students may pursue a dual PhD with neuroscience (p. 1288) or cognitive science (p. 1137). In addition, the department offers students the opportunity to pursue an integrated program of study leading to dual doctorate degrees in the field of audiology and speech, language and hearing science. The PhD/AuD dual degree program trains students in clinical research and clinical practice in audiology. The dual degree program allows students to pursue both their clinical training and their research training in a rigorous, intensive and streamlined program. Students may apply to both programs simultaneously, or may apply to the PhD portion after having been accepted into the AuD portion or may apply to the AuD portion after having been accepted into the PhD portion.

For more information, visit the department's Graduate Coursework (<http://www.colorado.edu/slhs/graduate-coursework/>) webpage.

Speech-Language Pathology Assistant - Graduate Certificate

Speech-Language Pathology Assistants (SLPAs) work directly with students with communication challenges in public school settings under the supervision of a fully qualified and nationally certified speech-language pathologist (MA-SLP, CCC). SLPAs have a significant role in enhancing the quality of services for children and adolescents that need support for speech, communication, reading, and writing. This certificate program provides the opportunity to meet the requirements for SLPA authorization in the state of Colorado only, through the Colorado Department of Education, to work in Colorado public schools. The education provided in the Speech-Language Pathology Assistant (SLPA) Certificate program is not guaranteed to always meet educational requirements for authorization in other states as each state has variable criteria for practice. Students are encouraged to contact the appropriate state licensing board in the state they wish to practice to determine applicability. Successful completion of the SLPA certification program through SLHS can also apply towards ASHA National SLPA Certification requirements, given successful completion of the ASHA SLPA national certification exam.

Candidates develop the knowledge and skills to work under the supervision of a certified SLP in the public school setting with ages birth–21. This certificate is appropriate for individuals with a BA in speech, language and hearing sciences (SLHS); those completing a BA in SLHS (enrolled in their last semester of senior year at CU); or individuals with a BA in another field, who have completed or are completing equivalent leveling coursework (24 hours) through an approved SLHS

department. See coursework required as listed under the "Apply" section of the department website (<http://www.colorado.edu/slhs/online/slpa-certificate-program/requirements-admission/>).

The Colorado Department of Education currently provides a legislated statewide credential for SLPAs who meet qualifications to provide intervention services and supports, under the supervision of a qualified MA CCC-SLP provider. For additional information, please search for SLPA authorization on the Colorado Department of Education website (<http://www.cde.state.co.us/cdeprof/checklist-initialspeechlanguage/>). Acquisition of this SLPA license in Colorado does not necessarily transfer to all other states and it is recommended students inquire if applicable credentials exist in other states in which they intend to seek employment as an SLPA.

This certification program at CU Boulder was developed as a BA Plus program to address shortages of qualified personnel and extend the intensity of services to special education students, especially in high-need districts and rural areas in Colorado where there is an ongoing paucity of qualified professional related service providers. This was made possible through ongoing collaboration with the Colorado Department of Education, BOCES Boards throughout Colorado, and our university and district school partners. Many interested students complete the program as part of their residency in Colorado as they complete their BA to gain additional experience in speech-language pathology prior to applying for a MA degree. Others in rural or high needs areas see this online opportunity to continue their education and work as an SLPA as they prepare to move on to graduate school through distance learning programs as they work close to home without moving. Out of state BA students also apply to the program as an opportunity to continue their education as courses are offered remotely with onsite internships experience in their own state.

At this time, this program may not meet the educational requirements for SLPA certification or licensure in states other than Colorado. Students residing outside of Colorado are encouraged to consult the speech-language pathology and audiology board (<https://www.colorado.edu/slhs/node/1243/attachment/>) in their state prior to applying or enrolling in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting with an MA-SLP, CCC.

Requirements

Admission Requirements

The program is competitive and requires complete applications in electronic format. Preference for in-state students and especially qualified students in rural areas is given. A specific number of seats are reserved for Colorado students who qualify and are sponsored by BOCES to participate in the program. Out-of-state students are considered only if they can arrange a local internship in a public school setting in their own state with a MA CCC-SLP.

Required GPA of 3.0 or above.

Education Requirements

Completion of one option below:

- Last semester SLHS senior (students may be enrolled in a maximum of 2 required prerequisite courses concurrently with the SLPA program, although enrollment in only one is preferred).
- BA in SLHS.

- BA in a field other than SLHS with completion of 24 credits of "leveling" prerequisite coursework in SLHS.

Prerequisites or "Leveling" Coursework

The courses listed below are offered by the SLHS department at CU Boulder. Equivalent courses from other universities will also meet these requirements, if approved by the program director. These requirements are consistent with the Colorado Department of Education SLPA Authorization (<http://www.cde.state.co.us/>).

Code	Title	Credit Hours
LING 3100 or SLHS 3006	Language Sound Structures Phonetics	3
SLHS 3106	Hearing Science	3
SLHS 3116	Anatomy, Physiology, and Science of Speech	3
SLHS 4502	Language Disorders Across the Lifespan	3
SLHS 4512	Speech Disorders Across the Lifespan	3
SLHS 4560	Language Development	3
SLHS 4704	Audiological Evaluation	3
SLHS 4714	Audiological Rehabilitation	3
SLHS 4918	Introduction to Clinical Practice (Requires documentation of 25 hours of observation of ASHA-certified SLPs)	2

Required Courses and Credits

Students will register for two courses to be taken in the semester for which they have been admitted. These courses are as follows:

Code	Title	Credit Hours
SLHS 5032	Competencies and Strategies for the SLPA	3
SLHS 5930	Speech Language Pathology Assistant Internship ¹	4

¹ Placement hours must be under the 50 percent supervision of an MA CCC-SLP.

Theatre & Dance

The Department of Theatre & Dance is a community of students, scholars, artists and artisans who regard the collaborative and creative process as the core of education. We engage with that process at all levels of our work as we pursue excellence and understanding. From the root of process stems practice, and that practice bears the fruit of experience. The Department of Theatre & Dance guides that fruition, offering students an expanse of opportunities to encounter the art forms of theatre, dance and experience design, their making and meaning. We strongly value the ampersand in Theatre & Dance, and seek to make connections across communities. We aim to make change, make art, and to make a difference, together.

We honor a global diversity of ways of making and of knowing. European colonialism and U.S. imperialism have long worked to diminish and eliminate knowledge that differed from a European worldview. As a U.S.-based institution, we recognize that the only way we can truly see beyond the limitations of our own perspectives is to listen and learn from people with experiences that are different from our own throughout the world.

Our diversity efforts are therefore grounded on establishing long-lasting relationships with scholars and artists who have worked and continue to work outside of the United States, and to attract graduate students that can help us continue to learn from these perspectives.

The CU Boulder graduate studies in Theatre & Dance is designed to accommodate a variety of students, from the practicing professional to the recent BA/BFA graduate. Our approach is to develop students' creativity, pedagogical and scholarly skills in equal measure. We combine traditional studies with opportunities for practical training. Ambitious seasonal programs of theatre productions and dance concerts feature student performers, designers, directors and choreographers. Guest artists of national and international fame regularly participate in curricular, performance and extracurricular activities.

The performing arts at CU Boulder embrace many conventional and emerging modalities of presentation: proscenium stages, film, devised work, online social platforms, digital arenas, interactive installations, community collaboration, process-based work, performance activism that is both affective and effective, and new creations of bold imaginarians.

Our primary hope is to enable a deepening of your artistic and scholarly voice, to put what is distinctive about you in conversation with the world. Each of the above programs is designed to suit international expectations in skill acquisition and capacity. We differ from other colleges in our extensive efforts to support and enrich each student's individual interests and distinct gifts. For this reason, the number of annual admissions is limited to allow for highly personalized mentorship.

Students interested in theatre and performance studies, dance, and experience design are urged to consult with an advisor in the appropriate field to obtain both advice and the most current information concerning program opportunities and expectations.

Course codes for this department are THTR, DNCE, TDXD and THDN.

Departmental Requirements

Students wishing to pursue graduate work in theatre & performance studies, dance, and experience design should carefully read both requirements for advanced degrees in the Graduate School section and the individual degree handbooks published on the Theatre & Dance (<http://www.colorado.edu/theatredance/>) website. Students should note that departmental requirements are sometimes more comprehensive than those minimums established by the Graduate School.

Prerequisites

Applicants are admitted to the graduate programs in theatre & performance studies, dance, and experience design on the basis of their academic records and recommendations.

Advising

Every student is assigned a faculty advisor and will have a meeting with their advisor upon entering the program. Topics discussed in the meeting and other available information are employed to design the best possible course of study for the student.

All candidates for a degree have the responsibility of making certain that the appropriate persons or committees have been appointed to supervise the various steps in their graduate programs. Detailed instructions can be found in the handbook for each degree, available from the department website.

Master's Degrees

- Dance - Master of Fine Arts (MFA) (p. 1327)
- Experience Design - Master of Fine Arts (MFA) (p. 1330)
- Theatre and Performance Studies - Master of Arts (MA) (p. 1331)

Doctoral Degree

- Theatre and Performance Studies - Doctor of Philosophy (PhD) (p. 1335)

Certificates

- Applied Shakespeare - Graduate Certificate (p. 1337)
- Hip-Hop Studies - Graduate Certificate (p. 1336)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Bergner, Bruce Alan (https://experts.colorado.edu/display/fisid_113315/)
Associate Professor; MFA, University of Illinois at Chicago

Cloud, Anya (https://experts.colorado.edu/individual/fisid_167400/)
Assistant Professor; MFA, University of California San Diego

Cobin, Martin T.
Professor Emeritus

Coleman, Bertram E. (https://experts.colorado.edu/display/fisid_103065/)
Endowed/Named Professor, Dean, Endowed Chair; PhD, University of Texas at Austin

Devin, Richard
Professor Emeritus

Diachenko, Nada (https://experts.colorado.edu/display/fisid_101362/)
Professor Emerita

Ellsworth, Michelle (https://experts.colorado.edu/display/fisid_112060/)
Distinguished Professor, Chair, Endowed Chair; MFA, University of Colorado Boulder

Feeler, Jordan (https://experts.colorado.edu/display/fisid_166032/)
Instructor; BFA, Webster University

Gerland, Oliver W. (https://experts.colorado.edu/display/fisid_101092/)
Associate Professor; PhD, Stanford University

Haig, Robin
Senior Instructor Emerita

Hankin, Toby R.
Professor Emerita

Harris, Lorenzo R. (https://experts.colorado.edu/display/fisid_147634/)
Artist in Residence

Henry, Markas (https://experts.colorado.edu/display/fisid_134379/)
Associate Professor; MFA, University of Connecticut

Irey, Charlotte York
Professor Emerita

Lane, Connie I. (https://experts.colorado.edu/display/fisid_149778/)
Instructor; BA, Beloit College

Lessley, Merrill J.
Professor Emeritus

Manno, Jesse J. (https://experts.colorado.edu/display/fisid_120813/)
Senior Instructor; BA, University of Colorado Boulder

Mejia, Donna (https://experts.colorado.edu/display/fisid_151942/)
Associate Professor; MFA, Smith College

Meneghini-Stalker, Tamara L. (https://experts.colorado.edu/display/fisid_146090/)
Associate Professor; MFA, Northern Illinois University

Nichols, Lynn
Instructor Emeritus

Osnes, Mary Beth (https://experts.colorado.edu/display/fisid_102607/)
Professor; PhD, University of Colorado Boulder

Pang, Cecilia J. (https://experts.colorado.edu/display/fisid_129479/)
Associate Professor; PhD, University of California, Berkeley

Persons, Charles Howard (https://experts.colorado.edu/display/fisid_145012/)
Associate Professor; MFA, Columbia University

Potts, Margaret Lee
Associate Professor Emerita

Randall, Erika Anne (https://experts.colorado.edu/display/fisid_144755/)
Associate Professor, Chair; MFA, The Ohio State University

Rich, Kevin M. (https://experts.colorado.edu/display/fisid_157950/)
Associate Professor, Associate Chair, Faculty Director; MFA, Yale School of Drama

Shannon, Robert J.
Senior Instructor Emeritus

Southall, Lawrence (https://experts.colorado.edu/display/fisid_143027/)
Instructor; MFA, University of Colorado Boulder

Sowah, Nii Armah (https://experts.colorado.edu/display/fisid_115125/)
Senior Instructor; MA, Lesley College

Spanier, Nancy L.
Professor Emerita

Spencer, Jonathan (https://experts.colorado.edu/display/fisid_164209/)
Senior Instructor; MFA, Ohio University

Stark, Theodore (https://experts.colorado.edu/display/fisid_118462/)
Senior Instructor; MFA, Boston University

Steuernagel, Marcos (https://experts.colorado.edu/display/fisid_157686/)
Assistant Professor; PhD, New York University

Symons, James M.
Professor Emeritus

Wilkins, Helanius J. (https://experts.colorado.edu/display/fisid_155486/)
Assistant Professor, Associate Chair; MFA, George Washington University

Williams, Letitia S.
Senior Instructor Emerita

Yang, Daniel
Professor Emeritus

Courses

Dance

DNCE 5001 (1-2) Graduate Technique

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5012 (1) Concert Production

Meets with DNCE 4012.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5014 (2) Inside the Groove: Developing Rhythmic Skills for Graduates

Enhances rhythmic acuity through intensive rhythmic drills, analytical listening, drumming, notating and creating rhythm-based performance work. Course material explores non-Western rhythmic paradigms, irregular meters, mixed meters, poly-meter, polyrhythms, etc., and how to communicate clearly with a live accompanist in technique class. Meets with DNCE 3014.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5015 (3) Movement Analysis

Introduces Rudolf Laban's theories of movement and exposes several body therapies to heighten students' awareness of movement as a multifaceted (neuromuscular/spatial/dynamic) event. Emphasizes refinement of movement, observation skills, and improvement of performance. Meets with DNCE 4015.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Movement Awareness Injury Prevent for the Dancer

DNCE 5016 (3) Creative Dance for Children

Methods course for prospective teachers of creative dance for children. Lectures, readings and laboratory experiences are followed by observation and teaching in primary grades.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4016 (with addition of readings and a paper)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5017 (3) Dancing Histories: Sex, Gender and Race in U.S. Concert Dance

Traces the evolution of American concert dance through roots in select dance forms, including dances of the African Diaspora, Ballet, Social Dance, Jazz, Modern, and Folklorico. Studies specific dance artists against the backdrop of social, political, economic, and environmental issues.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4017, with addition of graduate papers and/or a project

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5023 (2) Performance Improvisation Techniques

Explores movement and vocal improvisational techniques to enhance creative, interdisciplinary, collaborative and performance skills. Helps individuals expand their definition of performance, discover and access the diversity of the human instrument and employ improvisation to create personal and social commentary.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4023 (with the addition of written analysis and creative assignments)

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5024 (2) SOUND Choices: Enhancing the Music/Dance Relationship

Examines how musical choices can profoundly affect audiences, dancers, and the creative process. Surveys historic and contemporary music styles and influential artists through guided listening and experimentation. Deepens understanding of music, including vocabulary, technology, collaboration skills, ethics, and copyright issues. Meets with DNCE 3024.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5036 (3) Dance Teaching Practices: Inclusive Approaches to Instruction

Examines legal, practical, pedagogical and philosophical issues in current dance education. Goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. All genres of dance may be utilized depending on the specialties of participants.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5038 (1-3) Dance Repertory

Learning and performing dances from the repertory of current faculty members, artists-in-residence and upon occasion from the repertory of historic modern dancers. Graduate students are required to keep a log of the learning process involved in repertory to document and analyze each work in terms of stylistic differences, musical/sound accompaniment and trends. Dance majors may repeat up to 9 total credit hours with different instructors. Enrollment by audition only.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4038

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5047 (3) Hip-Hop Dance History

Addresses the origin and evolution of American Hip-Hop dance rooted in a theoretical structure that springs from the elemental nature of the African Diaspora. Emphasis placed on the social, political, and economic environment in which it was fashioned. Pioneers, innovators, terminology, and styles will be identified. Course includes lectures, readings, audio/video analysis and discussion. Meets with DNCE 4047.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 5048 (3) Performance and Community Engagement

Engages students in the power of performance for effecting positive social change. Students research collaboratively to create performances and workshop experiences to intentionally author the future they want. Readings provide theoretical foundations that serve as the basis for creative work. Students engage in creative explorations. Open to all forms of performance.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5052 (1-3) Studio Concert

Provides the opportunity for choreographic and performative synthesis and experimentation via the execution of a project related to the student's major area of creative research. Project must be approved by the student's first reader.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Production

DNCE 5053 (3) Advanced Dance Composition

Meets with DNCE 4053.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 5056 (2) Graduate Teaching Seminar

Examines practical, pedagogical, philosophical, and legal issues in current dance education. The goals and content of professional and recreational dance training are considered and strategies for effective teaching practice are discussed. Provides practice in practical application of theoretical material. All genres of dance may be utilized.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 5064 (2) Music and Dance Seminar: Collaboration

Investigates music in relation to dance performance, choreography, and teaching. Topics may include: a survey of musical styles and composers; direct experimentation with composition and recording techniques; enhancement of rhythmic versatility; work with accompanist/composers; and/or improvement of analytical listening and writing skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Music

DNCE 5101 (1) Intermediate Graduate Ballet

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5128 (1) Ballet Repertory

Develops understanding of the ballet canon through practice of major solos from Romantic, Classical, and Neo-Classical ballets. For the advanced classical ballet student. Enrollment by audition only. Meets with DNCE 4128.

Repeatable: Repeatable for up to 2.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Performance

DNCE 5261 (1) Advanced Jazz Dance Technique

Refines advanced students' approach to the nuances and virtuosity of the jazz idiom. Emphasis is placed on efficient use of alignment, complex polyrhythmic explorations and improvisations, and dynamic performance style. Class moves quickly through material and demands a high level of proficiency. Enrollment by audition only. Meets with DNCE 4261.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5301 (2) Graduate Hip-Hop Technique 1

Introduces students to Hip-Hop dance as a culturally significant form. Students learn history, the social and political forces at work and the fundamental techniques (Campbell Locking, Popping, Breaking etiquette/movements, Hip-Hop Party Dance and House). Intellectual challenge is offered through the lens of critical race theory and historical context. Training addresses flexibility, sequencing, coordination and performance skills.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5331 (2) Graduate Hip-Hop Technique 2

Students deepen their understanding of Hi-Hop history through fundamental movement techniques, specifically, House, and study the social/political forces at work. Focuses on increasing dancers' capacity for variation, sequencing, musicality and free-styling in Hip-Hop dance. Enrollment by audition only. Meets with DNCE 3301.

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

DNCE 5339 (1-3) Hip-hop Practicum

Design and implement an experiential, action-based learning project that connects to local innovators in the Boulder/Denver Hip-hop community who are engaged in one of Hip-hop culture's five elements: mc'ing, dj'ing, breaking/street dance, graffiti, knowledge. Projects might range from creating a piece of graffiti with a local crew to organizing an academic panel or workshop with a Hip-hop pioneer.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

DNCE 5411 (2) Aerial Dance Technique

Study of basic technique skills in aerial dance on single point, low-flying trapeze. Additional skills include choreographic techniques, improvisation, and an historical overview of aerial dance. Through the theoretical readings and discussion, this course defines the place of aerial dance in the lineage of modern dance and addresses aesthetics, philosophical approaches to teaching, and safety issues.

Requisites: Restricted to graduate students only.

DNCE 5501 (2) Graduate African Dance

Explores the technique, styles and rhythms of regional and national cultures of Africa by introducing signature attributes common to different countries' dance traditions. Features discussions of the musical traditions, histories, cosmologies, philosophies and aesthetics to contextualize and increase familiarity. Areas of concentration may vary by each semester (e.g. Ghana, Guinea, Intermediate).

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Major Technique

DNCE 5601 (2) Alexander Technique for Graduate Students

Studies how human reaction, coordination, and movement play a role in all activities. Graduate students will explore direct application to dance training, performance, choreography, and teaching. Through in-depth class discussions, movement exploration, and individualized hands-on lessons, actors and dancers gain an understanding of the technique and its benefits to performance. Meets with DNCE 3601.

Requisites: Restricted to Dance (DNCE) or Theatre (THTR) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5701 (2) Contact Improvisation 2

Moves into rigorous exploration of weight sharing principles. Emphasis will be placed on ease and efficiency in partnering, and integrating this work into choreography and performance. Meets with DNCE 4701.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5901 (1-3) Graduate Technique Practicum

Offers special courses in the technique series. Course may meet at the same time with an undergraduate studio course and includes the practical movement experience with an additional scholarly study of specially chosen issues in dance.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 5909 (1-4) Special Topics

Explores topics and research in relation to areas such as technology, environment, teaching methods, performance, world dance, arts in society, and/or criticism that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 2909 and DNCE 4909

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 5919 (1-3) Dance Practicum

Project in dance under supervision of senior faculty.

Equivalent - Duplicate Degree Credit Not Granted: DNCE 4919

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6016 (2) Teaching Lab-Contemporary Dance

Provides opportunity to apply principles and skills introduced in DNCE 5056. Participating students share the responsibility for teaching a lab class that meets twice a week. Focuses on development, analysis and evaluation of teaching skills.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6017 (3) Cultural Collisions and Ethics in Dance and Movement Performance

Explores the inevitable transformation of traditions in dance/movement performance, using hip-hop and transnational fusion as foundation studies. As students expand their application of ethical inquiry, we will investigate what responsibility artists have as ambassadors in a digital culture. Films, readings and discussions will address personal integrity, ethics, industry practices, values and distortions imparted by history and socialization.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6047 (3) Dance Studies

Studies current dance trends, mostly in the United States, with particular attention paid to dance's intersection with philosophy, theory, technology, politics, current events and the other arts.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Dance and Cultural Studies

DNCE 6056 (2) Professional Development

Examines current trends and issues in dance education and the professional dance world. Explores curriculum development, administration, and job opportunities along with other topics such as grant writing, community engagement, dance advocacy, and working as an independent artist.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Pedagogy

DNCE 6073 (3) Choreography

Covers in-depth practical and theoretical approaches to dance composition for graduate students; solo and group forms; and analysis of historical and contemporary dance works.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Creative Process

DNCE 6101 (1) Advanced Graduate Ballet

Open only to graduate dance majors.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Major Technique

DNCE 6849 (1-3) Independent Study

Involves creative or scholarly investigation of an area of interest to the student not addressed in the curriculum. Work must be arranged with and advised by a faculty member.

Repeatable: Repeatable for up to 7.00 total credit hours.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6919 (1-3) Directed Studies

Explores advanced topics in dance not regularly covered in the curriculum of the graduate program.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6949 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6959 (1-6) Master's Thesis

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

DNCE 6969 (1-6) The Graduate Project

Provides the opportunity for synthesizing the graduate experience through the execution of a project related to the student's major area of interest. Project must be approved by the graduate faculty advisor.

Requisites: Restricted to Dance (DNCE) graduate students only.

Additional Information: Departmental Category: Independent Study

Experience Design**TDXD 5005 (3) Design Theory**

Interrogates the principals, theories and philosophies that scaffold successful and innovative design with specific application to the design of immersive and interactive experiences and across a range of commercial, performative and cultural contexts. Activities will clarify how the philosophies of design support the core story-telling and interactive elements of experience designs.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5105 (3) Collaboratory in Experience Design 1

Addresses philosophies of storytelling through experience and the general concepts and aesthetics of Experience Design. The first in a two-part series, this course lays foundational principles focusing on the components of a live experience and how space, narrative and interaction affect the design from early conceptualization through implementation.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 5500 (3) Experience Design Atelier 1: Design Evolution and Expression

Introduces students to various techniques for graphically representing design ideas using drawing and illustration techniques in order to augment and deepen the diverse skill sets of students in the class. The first in three-part sequence on graphic representation and expressive practices, students will learn how to work out design ideas through sketching, drawing, creating storyboards and collages.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5700 (3) Experience Design Atelier 2: Introduction to Design Graphics

Introduces students to advanced techniques for representing design ideas in graphic form including commonly used software applications (Sketchup, Vectorworks, AutoCAD), scale modeling, mechanical drawing and rendering. The second in a three-part class sequence on graphic representation and expressive practices, this atelier will offer a range of exercises tailored to the skill level of individual students.

Requisites: Requires a prerequisite course of TDXD 5500 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 5805 (3) Professional Portfolio 1

Focuses on selecting, organizing and developing a plan for presenting material that will eventually culminate in the completion of a competitive professional portfolio, a vital tool for gaining employment in the Experience Design industry. The first of a two-part credited final project, students begin the process to prepare their professional portfolio under the guidance of faculty and industry professionals.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6105 (3) Collaboratory in Experience Design 2

Introduces students to professional models of working in the Experience Design industry. The second in a two-part class sequence, students work collaboratively on industry case studies focusing on entertainment, education and cultural destination genres with input from outside professionals in the field.

Requisites: Requires a prerequisite course of TDXD 5105 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Process

TDXD 6210 (3) Storytelling for XD

Explores multi-modal, expressive strategies for experimental storytelling and investigates the diverse languages of live experience. Students complete projects using varying modes of conveyance including physical and spatial action, filmic approaches, digital media and alternative methods. Students will discuss current trends in expressive methods and the nature of story.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6500 (3) Experience Design Atelier 3: Packaging the Design Presentation

Investigates strategies for visually communication and "selling" design ideas in a compelling and well composed visual/aural presentation. The third in a three-part sequence on graphic representation and expressive practices, this class culminates in a final, comprehensive design project portfolio that follows current professional standards.

Requisites: Requires a prerequisite course of TDXD 5700 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Design: Technique

TDXD 6555 (3) Experience Design Technology

Explores established and cutting-edge technologies employed in visual, auditory, and interactive elements of designed environments and experiences. Develops an understanding of the function of these areas, the ways in which they facilitate a complete experience and examines new directions of experimentation in these fields. Elicits research, analysis, and development of new concepts in response to current practices and design problems.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

TDXD 6805 (3) Professional Portfolio 2

Through editing materials collected in TDXD 5805, students will complete adaptable versions (hard copy, digital, web-based and presentations) of their professional portfolios. In this second of a two-part credited project, a committee comprised of faculty and industry professionals guide the completion of XD portfolios.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires a prerequisite course of TDXD 5805 (minimum grade B-). Restricted to Experience Design (TDXD MFA) students only.

Additional Information: Departmental Category: Experience Dsgn: Documentation

TDXD 6849 (3-6) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

TDXD 6901 (3) XD Implementation and Engineering

Explores the realities and challenges of implementing themed entertainment design. Within the framework of project based case studies and a real work project, this course analyzes aspects of construction management, client management and approvals, scheduling, budgeting, value engineering, architecture and design.

Requisites: Restricted to Experience Design (TDXD MFA) students only.

TDXD 6910 (3-6) The Experience Design Center

Offers Experience Design students an opportunity to engage in and complete projects posed by industry professionals or non-profit partners seeking assistance with experiential projects in a professional, practicing lab/studio setting. The XD Center, housed in a campus "maker-space," accepts design challenges and assignments that provide a realistic field experience for students.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Experience Design (TDXD) MFA students only.

Theatre**THTR 5010 (3) Introduction to Performance Studies**

Introduces students to the diverse genealogies of the field of performance studies by surveying foundational texts and key topics and by examining theoretical and methodological questions raised by particular performance practices. Provides students with vocabulary and references to continue to navigate the field of performance studies, as well as the many other academic fields that intersect with it.

Requisites: Restricted to graduate students only.

THTR 5011 (3) Seminar: Theory and Criticism

Studies theories and criticisms of drama and theatrical performances from Plato to post-modernism.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5025 (3) Costume Patterning and Construction

Includes techniques for the patterning and construction of contemporary and period costumes. Hands-on format covers techniques, materials and equipment particular to theatrical production.

Requisites: Requires prerequisite courses of THTR 1105 and THTR 1115 (all minimum grade C-).

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5031 (3) Russian Theatre

Studies Russian theatre history and the development of Russian drama from the 18th century to the present. Taught in translation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 5033 (3) Advanced Movement for the Stage

Explores a wide range of physical actor training methods and practices that support the fundamentals of mask training and mask performance for the actor. Students will experience each mask by gaining an understanding of its historical and performative relevance and directly bring into play the authentic life required of the specific mask. Department consent required.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4033

Requisites: Restricted to graduate students only.

THTR 5039 (3) Musical Theatre Repertory

Developed around the learning of complete scenes, songs and dances that are representative of the major periods and styles within musical comedy from the 1920s to the present. Emphasizes in-class performance. Admission by audition.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4039

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5045 (3) Costume Crafts

Covers basic and advanced techniques in casting/molding, mask making, dyeing, painting, jewelry making, ventilating and wig style and millinery via a series of projects. Culminates in a final project encompassing all techniques. Instructor consent required.

Repeatable: Repeatable for up to 3.00 total credit hours.

Recommended: Prerequisite THTR 1115.

THTR 5049 (1-4) Special Topics in Theatre

Opportunity for students to explore, upon consultation with the instructor, areas in theatre that the normal sequence of offerings may not allow.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4049

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5051 (3) Special Topics in Theatre History

Detailed study of a particular topic in theatre history (e.g., an era, a style, a country, or an organization). Topic specified in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5061 (3) On Stage Studies: Asian Performance

Study of live performance forms, theory, and literature throughout Asia: performance history, production styles, and social functions of performance.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite background in theatre, dance, or Asian studies.

Additional Information: Departmental Category: History/Dramaturgy/Directing

Departmental Category: Asia Content

THTR 5065 (3) Theatrical Tailoring

Explores classic and theatrical tailoring techniques and theories through the construction of classical men's wear: trousers, vest/waistcoats and coats. Student work with hand and machine sewing techniques, patterning skills and appropriate tailoring materials. Period of exploration will vary by semester. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite THTR 1115.

THTR 5067 (3) Teaching Shakespeare

Provides students with pedagogies, lesson plans and exercises for making Shakespeare accessible for students of all ages and across multiple content. This online course may be taken as a standalone, 3-credit course or as part of the Graduate Certificate in Applied Shakespeare.

THTR 5071 (3) Advanced Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercises. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/Directing

THTR 5085 (3) Theatre Management

Concentrates on theory and practice of management aspects of the performing arts, emphasizing theatre and dance. Includes marketing, budgeting, house and stage management, audience development, grant writing, unions and season development. Includes practical experience.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4085

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5105 (3) Theatre Make-Up Design

Explores theatrical make-up styles and techniques from initial research through paper design to final make-up. Ranging from period styles to Byzantine mosaic, to clowns, to special effects (old age, wounds, stages of healing, zombies, etc.) Techniques include ombre blending, removing eyebrows, shrinking and enlarging features, creating 3D appliances and applying silicone and foam prosthetics.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4105

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5113 (3) Comedy Matters

Examines the role of comedy in performance within various cultures through readings, viewings and a participatory exploration. We will analyze comedy within various societies to understand the underlying ideals and values. Throughout this investigation we will seek to understand what makes something comedic, why, for whom, for what purpose, when and under what circumstances.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4113

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

THTR 5125 (3) Watercolor Illustration and Rendering Techniques

Gain fluency in established techniques and styles of master illustrators and painters. Famous illustrations are technically analyzed and copied in this exploration of intent, process, technique and style. Other mediums incorporated include pastels, color pencils, pen and ink and gouache. Painting supplies must be supplied by the student.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4125

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Theatre Design and Technology

THTR 5143 (3) Shakespeare in Community

Surveys a growing field of arts practitioners who are intersecting Applied Theatre, Shakespeare and community in meaningful ways, including Shakespeare in Prisons, Shakespeare with Veterans and Shakespeare for Inclusive Audiences. Students will explore a variety of methodologies for teaching and practicing Shakespeare and create original work using Shakespeare as a lens for examining a particular theme, topic or social issue.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4143

Requisites: Restricted to graduate students only.

THTR 5175 (3) Conceptualization

Fosters the student's creative and collaborative skills by introducing a variety of strategies and scenarios for conceiving live, theatrical productions, events and experiences. A project based curriculum offers several individual and team exercises in visualizing, documenting and communicating ideas for live performances, including their overall scope, aesthetic, style, audience relationship and mode of presentation.

Equivalent - Duplicate Degree Credit Not Granted: THTR 4175

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 5213 (3) Improvisation I: Thinking On Your Feet

Provides students with an introduction to several forms of improvisation, including short form, long-form, playback theatre and clown. A useful course for anyone interested in improving confidence with public speaking, communication and/or performance. Attendance and participation are mandatory.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Performance

THTR 5849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6003 (1-3) Production Research and Practicum: Acting

Allows students to undertake an acting project, normally within the major theatre season, that requires detailed preparatory research, testing of ideas, and public presentation. Students work under faculty supervision and prepare a written report and evaluation of the research, rehearsal, and performance process.

Requisites: Restricted to graduate students only.

Recommended: advanced studies in acting and advisor approval.

Additional Information: Departmental Category: Performance

THTR 6005 (1-3) Production Research and Practicum: Designing

Allows students to undertake a design project, normally within the theatre season, that requires detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision, and prepare a documented written report and evaluation of the research, design, and realization process, as well as fully rendered designs and/or plots. Projects may be in costumes, lights, or scenery.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Theatre Design and Technology

THTR 6007 (3) Colorado Shakespeare Festival Dramaturgy

Students work as production dramaturgs for the Colorado Shakespeare Festival, developing detailed textual, historical, and critical research for CSF productions, participating in education and outreach programs, and writing production-related articles for publication.

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Shakespearean Production

THTR 6011 (3) On-Stage Studies: Global Ancient and Classical Theatre

Studies classical and neoclassical drama in performance, with particular attention to 20th century productions and the critical and scholarly responses to these productions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

Departmental Category: Asia Content

THTR 6021 (3) On-Stage Studies: Shakespeare

Studies Elizabethan and Jacobean dramatic texts as playscripts for performance, with particular attention to contemporary Shakespeare criticism and landmark Shakespeare productions over the last two centuries.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6031 (3) On-Stage Studies: American Theatre

Studies American drama in performance, with particular attention to critical and scholarly responses to landmark productions of American classics.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6041 (3) On-Stage Studies: Global Modern Theatre

Studies global theatre from 1600 to 1950, with particular attention paid to critical and scholarly responses to landmark productions of classics from the period.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6051 (1-3) Production Research and Practicum: Directing

Advanced study of theory and practice of stage directing through examination of the work of leading directors, analysis of texts and classroom exercise. Instructor consent required.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6071 (3) Seminar: Perspectives on Acting

Art of acting is examined through study of acting theories and practices developed during major periods of theatre history. Examines the variety of theories about acting that remain today.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6081 (3) Seminar in American Theatre: Lesbians and Gays

Studies the portrayal of lesbians and gays in mainstream American theatre during the 20th and 21st centuries, as well as the contributions of gay and lesbian theatre artists during the same period.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6091 (1-3) Production Research and Practicum: Dramaturgy

Students undertake a dramaturgical project, normally within the major season, requiring detailed preparatory research, testing of ideas, and public presentation of theories and concepts in practice. Students work under faculty supervision and prepare a documented written report of their project.

Requisites: Restricted to graduate students only.

Recommended: advanced course work in dramatic literature and advisor approval.

Additional Information: Departmental Category: History/Dramaturgy/ Directing

THTR 6111 (3) On Stage Studies: Global Contemporary Theatre

Explores global theatre from the early 1960s to the present, with particular attention towards balancing the avant garde and popular theatre in recent world drama.

Requisites: Restricted to graduate students only.

THTR 6849 (1-3) Independent Study

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6949 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 6959 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Special Courses in Theatre

THTR 7004 (3-6) Colorado Shakespeare Festival Summer Immersion

Immersive summer intensive designed to provide an in-depth study of Shakespeare with the Colorado Shakespeare Festival (CSF). Students learn from and engage with CSF company members and faculty from English and Theatre & Dance departments in a small group, experiential setting. Students attend plays, rehearsals and lectures, and explore acting, directing and pedagogy.

Additional Information: Departmental Category: Shakespearean Production

THTR 8999 (1-10) Doctoral Dissertation

All doctoral students must register for not fewer than 30 hours of dissertation credit as part of the requirements for the degree. For a detailed discussion of doctoral dissertation credit, refer to the Graduate School section.

Repeatable: Repeatable for up to 30.00 total credit hours.

Additional Information: Departmental Category: Special Courses in Theatre

Theatre & Dance**THDN 5099 (3) Live Arts: Critical Curation**

Examines live arts curation and engages in both practical and theoretical investigations. Course observes how approach to curation requires changes in production practices as well as models of spectatorship. The course culminates in a student-directed creation of an original, team-based curatorial project. This course counts toward the Dance Seminar requirement. Recommended Prerequisite: THTR 5010.

Grading Basis: Letter Grade

THDN 6009 (2) Research and Teaching in Theatre, Dance and Performance Studies

Provides an overview of resources, methodologies, and strategies for graduate teaching in the fields of theatre, dance, and performance studies. Students will be exposed to library and other resources available to them in the department and in the university, and will develop a research proposal for a project they plan to develop during their graduate studies.

Requisites: Restricted to THTR MA, THTR PhD or DNCE MFA students

Dance - Master of Fine Arts (MFA)

The MFA program is designed to accommodate a variety of students, ranging from the practicing professional to the recent BA/BFA graduate with professional experience. The MFA develops students' creative, performance, pedagogical and scholarly work. With an emphasis on embodied research, this degree positions participants for teaching careers in higher education and a great variety of careers in the field of

dance, movement, entrepreneurship, critical theory, advocacy and arts administration.

The MFA is an intense immersion into a student's expertise and curiosities as an artist and scholar. Great transformations in learning are an expected part of the graduate school experience, and significant space is allocated for self-directed interests. The decision to pursue an MFA in dance indicates a hunger to embark upon the challenges, rewards and maturation this experience will bring.

Funding for the MFA is connected to Teaching Assistantships and Graduate Assistantships, so all prospective MFA students must have previous teaching experience.

Curriculum

The primary core MFA curriculum focuses on the development of the individual artistic voice in performance, choreography, teaching, research and writing. The presentation of new creative work is bolstered, augmented and enriched by the study of theory, history and many diverse artists of all dance genres and movement disciplines. The program is designed to be responsive to individual areas of interest and to ensure effective preparation for careers in academics, not-for-profit organizations, and the professional arenas.

Students are encouraged to think outside of the box in terms of course choices, creative pursuits and scholarly activities. A considerable number of the required credits consists of student-selected courses and electives, allowing for a great deal of freedom and individualized study. It is critical that a student work closely with their advisor in selecting courses in the dance curriculum, courses outside of the department and creating independent studies that will support the student's goals and secondary area of emphasis.

Performance and Choreography

All MFA students are expected to present choreographic work each semester, either as part of course-related events or in other departmentally-produced events. Students are coached to seek refinement of their established artistic practices, but also assiduously to expand their artistic selves into less familiar movement, choreographic, aesthetic and expressive modes. Evaluation of artistic growth is based on intellectual and physical articulateness, creative problem-solving, depth of critical, conceptual and aesthetic exploration and on the extent to which a student has deeply sought discovery, reconsideration and analysis of their art-making methods.

Students are encouraged to seek a variety of performance opportunities with fellow graduate students, undergraduates, faculty and guest artists. Produced performances are presented multiple times each year and informal showings occur regularly. Given the rigorous schedule of our MFA program, extensive work with off-campus groups can be extremely difficult to schedule and tends to overwhelm students with multi-tasking and juggling of priorities.

Modified MFA Program for Professionals

Those students entering our program with significant professional backgrounds including teaching, choreography and/or performance may be able to request a modified degree plan. For such students, an interview with the Director of Dance and the Director of Graduate Studies for Dance during the application/audition process is necessary. The interview will help determine if there is a good match between the student's goals and the MFA program.

The goal of the modified program for professionals is to provide flexibility in the pursuit of individual goals and the fortification of specific educational gaps. In close consultation with the faculty and graduate advisor, the student will be able to propose and develop new areas of research and creative work. All modifications to the MFA program must receive the approval of program directors and the CU Boulder Graduate School. The number of required credits and semesters will be determined based on the individual's exceptional professional experiences.

Requirements

Admission Requirements

Applicants are expected to show a high level of proficiency in dance performance, pedagogy and choreography. All applicants must submit the Teaching Application (<https://www.colorado.edu/theatredance/dance/graduates/graduate-assistantships-teaching-application/>) portion of the application. Funding (<https://www.colorado.edu/theatredance/financial-information/>) for the MFA is contingent upon teaching within our program.

The deadline for all applications is December 1. Select applicants will be invited to an initial Zoom interview in January. The faculty will then invite a small number of applicants for an in-person campus audition in February. International students may request to audition in digital format. The dance program does not accept applications or transfer requests for spring semester admission.

The specific audition dates and detailed information about the on-campus audition can be found on the department's Dance MFA Application (<https://www.colorado.edu/theatredance/dance/graduates/mfa-dance-application/>) webpage.

Graduate Record Exam (GRE) scores are not required for the MFA in Dance application.

Prerequisites

- Hold a baccalaureate degree in dance, or equivalent dance proficiency and experience with a degree in another field
- Have an undergraduate GPA of at least 2.75 and meet the Graduate School's minimum Admission Requirements (<https://www.colorado.edu/graduateschool/admissions/prepare-apply/>)
- Demonstrate a deep commitment to the field of dance with proficiency in practice, performance, choreography and teaching

Program Requirements

Required Courses and Credits

The three-year program requires a minimum of 60 credit hours, at least 50 of which must be completed on campus at CU Boulder. At this time there is no low-residency option for the MFA program. The curriculum focuses on performance, choreography, scholarship, pedagogy and a secondary area of specialization. Grades lower than a B- cannot be applied towards graduation; a 3.0 GPA is needed to graduate.

Code	Title	Credit Hours
Required Courses		
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
DNCE 5001	Graduate Technique	8
Somatic Practice Course (DNCE 5901 & future courses)		2
Varied Additional Technique Classes (DNCE)		6

DNCE 5012	Concert Production ¹	1
DNCE 5053	Advanced Dance Composition ¹	3
DNCE 5056	Graduate Teaching Seminar	2
DNCE 5064	Music and Dance Seminar: Collaboration	2
DNCE 6073	Choreography (taken twice with different instructors) ¹	6

Seminar

Select two of the following:		6
THTR 5010	Introduction to Performance Studies	
DNCE 5048	Performance and Community Engagement	
THDN 5099	Live Arts: Critical Curation	
DNCE 6047	Seminar: Dance	
DNCE 6969	The Graduate Project	4
Electives ²		
Secondary Emphasis		6-9
Additional Electives		9-12
Total Credit Hours		60

¹ Students must complete Advanced Composition, both Choreography courses, and Concert Production prior to the semester in which their choreographic/creative project is presented.

² Students who do the Aerial Dance or Somatic Secondary Emphases will complete fewer credit hours of electives.

MFA Project and Project Paper

The culmination of graduate study is the MFA Project and Project Paper. The MFA Project is based on creative work: a choreographic/creative project usually presented in a live performance or digital format, followed by a paper and an oral defense of the project and paper. We celebrate many varieties of creative projects and we offer the support and imaginative expertise of an outstanding production team.

Graduate Comprehensive Portfolio

Prior to graduation, MFA candidates submit a collection of scholarly, pedagogical and creative work. The portfolio is intended to document and synthesize the graduate's personal practice, philosophies, choreography and academic investigations. It includes creative and pedagogical statements, scholarly essays, a CV and digital documentation of teaching, performance and choreography.

Plan(s) of Study

Year One

Fall Semester		Credit Hours
DNCE 5001	Graduate Technique ¹	2
DNCE 5053	Advanced Dance Composition	3

Credit Hours		10
Year Three		
Fall Semester		
DNCE 5001	Graduate Technique	2
DNCE 6969	The Graduate Project	2
Electives and/or Independent Study		6
Credit Hours		10
Spring Semester		
DNCE 6969	The Graduate Project	2
Electives and/or Independent Study		8
Credit Hours		10
Total Credit Hours		60

¹ Students paying out-of-state tuition rates their first and second semesters are encouraged to discuss with the program a reduced course load option for those two semesters.

Secondary Emphasis

We wholeheartedly assert that a liberal arts education cultivates a healthy balance of critical thinking, creativity and communal excellence. In this spirit, MFA candidates choose at least one secondary area of study to give variety and dimension to their training.

Secondary Emphases Within Our Campus

Students may choose an emphasis that can be fulfilled by courses taken within the department and/or in other campus departments. Secondary emphases vary between two and five courses, depending on the choice of subject. The university setting is particularly well-suited to broad educational goals, given the wide assortment of subjects available at the CU Boulder campus. We encourage students to search far and wide through the course catalog to discover courses and areas of study that are particularly suited to their individual interests and goals.

Students may also choose to complete a graduate certificate as their secondary emphasis. The most common certificates earned by MFA students are:

- Women & Gender Studies Certificate (<https://www.colorado.edu/wgst/graduates/>)
- Hip-hop Studies Certificate (<https://www.colorado.edu/theatredance/dance/hip-hop-studies-certificate/>)

- Comparative Ethnic Studies Certificate (<https://www.colorado.edu/ethnicstudies/graduate/graduate-certificate/>)
- Emergent Technologies and Media Arts Practices (<https://www.colorado.edu/cmci/dcmp/cert-etmap/>)
- Critical Theory Certificate (p. 1212)
- Digital Humanities Certificate (<https://www.colorado.edu/crdds/dhgc/>)
- Arts Administration Certificate (<https://www.colorado.edu/music/academics/graduate-advising/graduate-certificate-arts-administration/>)

Aerial Dance Emphasis

The aerial dance emphasis is available to students who have a serious interest in aerial dance and its application to dance training, performance and/or teacher training. Students can work towards the completion of the Professional Training Program at Frequent Flyers Aerial Dance Studio (<http://www.frequentflyers.org/>)[®] (located in Boulder) while simultaneously pursuing their MFA degree. The Professional Training Program must be successfully completed before the MFA degree will be awarded. Before a student is eligible to begin work in the aerial dance emphasis, they must be officially accepted by Frequent Flyers[®] Professional Training Program and have been approved by the Director of Graduate Studies for Dance to follow the aerial dance emphasis.

The aerial emphases is sponsored by the program, but requires students to take off-campus training. Because of this, the number of CU Boulder credit hours required for the MFA is reduced from 60 to 50 credit hours.

Somatic Emphasis

The somatic emphasis is social justice oriented. It is intended for students with a strong devotion to intersectional practice-based research. Designed as a connective tissue within the MFA in Dance, the somatic emphasis fosters the artist-citizen to be accountable, embodied and aware through dancing, dance making, performance, critical discourse, collaboration, wellness and activism. Students are supported in accumulating broad experiential knowing through diverse somatic approaches.

We prioritize the development of skills and strategies toward cultivating radical aliveness. How we inhabit our living bodies/minds, and relate to others, impacts our identities, our communities, and the structures we participate in. We consider how somatic decolonizing will deepen collective movements toward justice, equity, diversity, inclusivity, and responsive global citizenship.

The MFA in Dance honors the complexity of somatic lineages and practices. We place value on knowing the global roots of somatics and strongly assert that Eurocentric certified somatic systems are not the only traditions to hold valuable somatic knowledge. Our program supports innovative research into somatic practices of every origin. We aim for a collaborative re-imagining of the potential applications for culturally informed and politically engaged somatic practice; depth of inquiry, integration of theory and practice, and queering of perspectives is encouraged. This emphasis calls for investment in the power of our anatomical, energetic, cultural bodies/minds in the face of converging crises, shifting human demographics, emerging realities, and potential futures.

The somatic emphasis consists of an individualized course of study worth 12 credits. The specific course of study will be developed by each student in collaboration with Dance faculty Anya Cloud.

Course of study will be developed from the following:

- Graduate level Dance courses in somatics
- One approved course in anatomy, physiology and/or kinesiology
- Peer-to-peer somatic lab practice
- Cumulative somatic research documentation and bibliography
- Intensive off-campus somatic training¹
- One approved course outside of the department from the following areas: Ethnic Studies, Women and Gender Studies, LGBTQ Studies, Disability Studies, Native American and Indigenous Studies, Peace and Conflict Studies, Environmental Justice and Eco-Social Justice, or a related and relevant course approved by faculty

¹ Students can apply for CU Boulder grant funding (<https://www.colorado.edu/graduateschool/funding/awards-grants/>) to pursue off-campus somatic training. MFA in Dance grant options are listed within the MFA Handbook (<https://www.colorado.edu/theatredance/graduate-student-resources/>). Current local partners include the Renée Crown Wellness Institute at CU Boulder and community practitioners of Feldenkrais®, Alexander Technique, Body-Mind Centering®, Gyrotonic®/Gyrokinesis®, and Pilates. Current international remote partner includes a practitioner of Kung Fu.

Students must declare the somatic emphasis by the end of the first year. Given the nature of the Somatic Emphasis, the number of CU Boulder credit hours required for the MFA with a Somatic Emphasis is reduced from 60 to 50 credit hours. All requirements must be successfully completed before the MFA degree will be awarded. The Dance faculty advisor for the somatic emphasis is Anya Cloud.

Learning Outcomes

- To encourage the clarification and individuation of each student's artistic voice
- To prepare and empower students to fulfill their chosen career paths, both in their graduate studies and in the professional world
- To investigate traditional and innovative approaches to movement invention, choreography and performance
- To deepen somatic awareness and increase fluency in dance technique, including but not limited to Improvisation, Jazz, African Caribbean, Aerial, Hip-hop, Transnational Fusion, North and West African dance, Ballet and Contemporary
- To actively engage in dance research, with particular attention to discovering relationships between scholarship and creative work
- To examine and practice pedagogical goals and strategies from aesthetic, cultural and anatomical perspectives
- To present choreography/creative work on a regular basis and perform in the creative work of faculty, peers and guest artists working in a variety of aesthetic and technical styles

Experience Design - Master of Fine Arts (MFA)

Every other year, this unique, studio-centric MFA in experience design (XD) admits a cohort of eight to twelve talented students from varied backgrounds, including all areas of design, art, architecture and engineering. Students in the XD program form a studio collective to complete an array of XD projects under the direct guidance of CU faculty and professionals in the field, many who provide project content. As a

result of this industry involvement, and the students own self-exploration, XD graduates are prepared to enter the field of experience design.

The MFA in XD also exposes students to new ways of seeing the reality around them, new ways of creating, resolving problems, expressing ideas and telling stories. Essentially, the MFA in XD is a course of study in using new languages.

The program also features a summer "design center" where students and faculty can accept real-time XD problems posed by outside entities (including some contracted projects with commercial firms) and solve them via a collaborative, studio approach. The work of this center provides a service to various communities and is a practical extension of learning for students.

While the MFA in XD advances a collaborative studio environment where teamwork is held in high regard, we consider it a mission of the program to foster the individual talents, visions, and interests of each student in the program. The program will make every effort to provide an environment where individual students may gestate their own concepts, allowing them room to explore, test and innovate with the support of the studio, other students, faculty and industry professionals.

Connections to Industry

Some of the program's professional advisors, endorsers and participants include:

- Jim Doyle of WET Design (<https://wetdesign.com/>), makers of the famed Bellagio Fountains in Las Vegas
- Dave Cooperstein and Al Cross of PGAV Destinations (<http://pgavdestinations.com>), designers of Sea World and the NASA Space Museum
- Electrosonic (<http://www.electrosonic.com>), makers of the live video projection technology for Disney's Magic Kingdom Castle
- Adam Bezark (<http://bezark.com>), Phil Hettema (<http://www.thehettemagroup.com>) and Steve Ryan, commercial producers of live experiences with credits at Disney, Universal and Landmark Entertainment
- Drew Campbell, Creative Director at International Resorts in Singapore
- Baam Productions (<http://www.baamproductions.com>)
- Nassal (<http://www.nassal.com>)
- Super 78 (<http://www.super78.com>)
- Bolder Interactive, Technology Designers for Themed Experiences
- Stantec, Experiential Architecture Firm

Requirements

Application Process

The professional MFA in experience design admits a new cohort of 8–12 students every other fall semester. Applications will be accepted on a rolling deadline for entry in a fall semester beginning in July of the previous year.

Theatre and Performance Studies - Master of Arts (MA)

Our Master of Arts in Theatre & Performance Studies is committed to performance as research as integral to the study of the history, theory and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender race, and/or coloniality play in this work? Why is it relevant today?

We offer two tracks in our MA in Theatre & Performance Studies, the thesis and the non-thesis track. The thesis track prepares students to pursue a PhD, requiring students to write and defend a substantial research document demonstrating mature critical thought and based on independent study and investigation.

The non-thesis track allows students to further their interests through coursework, and requires written and oral exams. Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond.

MA students who are accepted into the PhD program complete their PhD in an additional three years.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Theatre - Bachelor of Arts (BA) (p. 585)

Requirements

Prerequisites

Applicants must have a bachelor's degree and an undergraduate GPA of at least 2.75. While a bachelor's degree in theatre is not a requirement, theatre experience is highly desirable.

Program Requirements

Required Courses and Credits

Students must earn 30 credit hours, at least 24 of which must be at the 5000 level or above. A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor. Theatre courses below the 5000 level cannot be counted toward the degree. Courses in which grades below B- are received are not accepted for master's degree programs.

The degree is normally completed in four semesters (excluding summers).

Students must declare either the thesis or non-thesis option by the start of their third semester. Those choosing the thesis option will apply 4–6 thesis credit hours toward the 30-credit-hour requirement.

Elective Coursework

MA students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, MA students are encouraged to take courses in other departments. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements. All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments.

Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Independent study coursework cannot exceed 25 percent of the coursework required for the master's degree.

Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credits. A limit of 3 credits in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit are:

- one credit hour for successfully completing the project;
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch);
- three credits hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor.

MA Degree Tracks

The MA program in Theatre & Performance Studies has two tracks: a thesis option and non-thesis option. Students must declare either track by the start of their third semester.

Track I: Thesis Option

This track prepares students to pursue a PhD degree at CU or elsewhere. Students must write a thesis, a substantial research document demonstrating mature critical thought based on independent study and investigation. Students must demonstrate proficiency in three areas: academic coursework, the thesis and the final exam (oral).

Students in the thesis track take two one-hour oral examinations back-to-back (i.e. on the same day) after the majority of coursework for the degree has been completed and the master's thesis is "essentially" complete. The first oral exam covers coursework. The second oral examination covers the thesis.

Required Courses and Credits for the Thesis Track

Code	Title	Credit Hours
Required Courses		
THTR 5010	Introduction to Performance Studies	3
THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Select two of the following:		6
THTR 6011	On-Stage Studies: Global Ancient and Classical Theatre

THTR 6031	On-Stage Studies: American Theatre	
THTR 6041	On-Stage Studies: Global Modern Theatre	
THTR 6111	On Stage Studies: Global Contemporary Theatre	
Thesis Work		
THTR 6959	Master's Thesis (taken in fourth semester for thesis completion) ¹	4
Electives		12
Any graduate-level THTR course		
Any THDN, TDXD or DNCE course at the 3000 level or above ²		
Courses from other departments at the 3000 level or above, if approved by the student's advisor ²		
Total Credit Hours		30

¹ Students may take 4–6 thesis hours. The number of electives is adjusted accordingly.

² A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

Track II: Non-Thesis Option

Students who do not plan to pursue a PhD can elect the non-thesis track, which requires a two-part comprehensive exam, comprised of a take home written exam and a 1.5-hour oral exam. The written and oral exams will be comprehensive, covering all coursework presented for the degree. The exam will take place near the end of the last semester of coursework.

Students in this track will complete a culminating project that will serve as a unifying goal for their MA experience. This project might be a creative project, a research study, a management project, an engaged performance experience, or beyond. To complete the non-thesis track, students must demonstrate proficiency in two areas: academic coursework and the final exam (written and oral).

Dual Degree Program

MA/MBA in Theatre and Performance Studies

The Department of Theatre & Dance, in conjunction with the Leeds School of Business, offers students the ability to earn an MBA and an MA in Theatre & Performance Studies through a three-year dual degree program. The dual MA/MBA offers students the opportunity to earn both degrees together in less time than if the degrees were earned sequentially. An MBA degree in combination with an MA degree in Theatre & Performance Studies will provide students with a set of business tools to complement their artistic talents and expand their career options.

Students in the MA/MBA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums, not-for-profit organizations and arts presenters.

Application Process

Students may apply either to the Department of Theatre & Dance for the MA degree program or to the Leeds School of Business for the MBA degree program. Having been accepted, they will subsequently apply to the other degree program.

Alternatively, students may apply for both programs simultaneously, in which case students must apply to each program separately and meet the admissions standards for each program separately.

NOTE: Residents of U.S. Western states, including Alaska and Hawaii, may be eligible for in-state tuition for this dual degree program, provided the student applies and is accepted to both programs in the same admissions cycle. For more information, visit the Western Regional Graduate Program (<http://wiche.edu/wrgp/>) webpage.

Program Requirements

The MA/MBA is a dual degree program, and its curriculum is best conceived that way. A minimum of 67 approved credit hours must be

completed to earn both degrees. Dual degree students will be required to complete 43 hours of MBA coursework and 24 hours of theatre/dance coursework. The dual degree agreement allows students to count 18 credit hours of courses towards both degrees.

First-year students in the MA/MBA in Theatre & Performance Studies take courses exclusively in either the Leeds School of Business or the Department of Theatre & Dance. In the second year, courses are taken exclusively in the other program. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Because of the two-year cohort model at Leeds School of Business, students are advised to start their coursework in the Department of Theatre & Dance. This is the case even if the student was admitted to both programs simultaneously.

Coursework for the MBA portion of the Dual MA/MBA in Theatre & Performance Studies (p. 1395) can be found on the Leeds School of Business catalog page. The MBA requires 55 credit hours. MA/MBA students will complete 43 credit hours of business courses. Twelve credit hours from the student's coursework for the MA will count toward the MBA.

The MA in Theatre & Performance Studies requires 30 credit hours, 24 of which must be at the 5000 level or above. Six credit hours from the student's work in the Leeds School of Business will count toward the MA in Theatre & Performance Studies. Students are encouraged to explore classes outside the Department of Theatre & Dance for some of their electives, as approved by their advisor.

All coursework applying towards the degree must be taught by members of the graduate faculty holding current graduate faculty appointments. Theatre courses below the 5000 level cannot be counted toward the degree.

Courses in which grades below B are received are not accepted for the MA in Theatre & Performance Studies.

Students in the MA/MBA will choose between the thesis track and the non-thesis track. Those choosing the thesis track will take 4–6 master's thesis credit hours and the number of electives in THTR or DNCE will be adjusted accordingly.

Total Credit Hours		30

¹ Students who elect the thesis plan will take 4–6 master's thesis credit hours. The number of electives will be adjusted accordingly.

² A maximum of 6 credit hours may be completed at the 3000 or 4000 level at the discretion of the student's academic advisor.

Learning Outcomes

The goal of the MA, MA/MBA, BAM Degrees in Theatre & Performance Studies is to cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breadth and relevance to our field and beyond.

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development

- For non-thesis track: completion of culminating project and exam
- For thesis track: completion of thesis and exam

Theatre and Performance Studies - Doctor of Philosophy (PhD)

The PhD in Theatre & Performance Studies is primarily designed for those who intend to be scholars working in an academic environment.

Our PhD in Theatre & Performance Studies is committed to performance as research as integral to the study of the history, theory, and practice of theatre and performance from around the world. We approach performance simultaneously as an object of study, a way of knowing, and a methodological tool, and are invested in the ways in which it can help us better understand—and challenge—the complicated legacies of our own academic disciplines and artistic practices. Our courses place dramatic texts, performance traditions, and applied performance from throughout history in conversation with contemporary performance. We ask: How might this performance work today? What challenges does it present to the contemporary scholar, maker or facilitator? What role do gender, race and/or coloniality play in this work? Why is it relevant today?

The program is designed to be completed in four years for students entering with a master's degree. The first through fourth semesters focus on coursework, the fifth semester is spent preparing for and taking the comprehensive examination and writing the dissertation prospectus and the sixth through eighth semesters are spent writing and defending the dissertation. It is possible for a student entering the PhD program with a master's degree to finish in three years.

Requirements

Prerequisites

Applicants to the PhD in Theatre & Performance Studies must have a master's degree in any subject. Students who apply to the PhD but will not have earned a master's degree prior to the start of the program will instead be considered for the MA in Theatre & Performance Studies.

Program Overview

To complete the program, students must:

1. Demonstrate proficiency in academic coursework.
2. Demonstrate reading competency in at least one foreign language equivalent to the completion of a second-semester college-level course.
3. Pass a comprehensive exam.
4. Prepare and successfully defend a dissertation.

Doctoral students in theatre complete 30 credit hours of coursework beyond the master's degree at the 5000 level or above. When approved by the student's advisor, credit hours from other departments on campus may count, provided the course is taught by a member of the graduate faculty in that department. In addition to the 30 credit hours of coursework, 30 dissertation credit hours (THTR 8999) are required.

Required Courses

The PhD program is based upon a core of required courses which emphasize the interrelatedness of theory, history and practice.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
THTR 5010	Introduction to Performance Studies	3
THTR 5011	Seminar: Theory and Criticism	3
THDN 6009	Research and Teaching in Theatre, Dance and Performance Studies	2
Select three of the following:		9
THTR 6011	On-Stage Studies: Global Ancient and Classical Theatre	
THTR 6021	On-Stage Studies: Shakespeare	
THTR 6031	On-Stage Studies: American Theatre	
THTR 6041	On-Stage Studies: Global Modern Theatre	
THTR 6111	On Stage Studies: Global Contemporary Theatre	
Electives		
Additional courses to meet the 30-credit minimum.		13
Dissertation		30
THTR 8999	Doctoral Dissertation	
Total Credit Hours		60

Elective Coursework

PhD students are encouraged to take elective courses offered by theatre graduate faculty members in their area of research (e.g., performing voices of women, performance studies, directing, performance and community engagement), as well as graduate dance courses (e.g., graduate dance technique, advanced dance composition, African dance). When approved by the student's advisor, PhD students are encouraged to take courses in other departments, especially as they relate to the anticipated dissertation topic. Electives are determined by students and their advisors, consistent with Graduate School and departmental requirements.

Graduate Independent Study

Independent study is used for projects, research and educational opportunities both in and outside of the department. It may not be used as an avenue for taking undergraduate courses in the major department or replicating existing graduate classes. Although there is no limit to the number of independent study credit hours a doctoral student may take, they should be held to a minimum.

Production Research and Practicum Courses

These courses in acting, directing, design and dramaturgy may be taken for 1–3 credit hours. A limit of 3 credit hours in each category may apply toward the degree. All courses are supervised by members of the graduate faculty; regular meetings with the instructor of record are required.

Guidelines for flexible credit hours are:

- one credit hour for successfully completing the project
- two credit hours for completing the project and submitting a written record of it (e.g., an actor's journal, a director's regiebuch)
- three credit hours for doing all of the above and writing a pertinent 15 to 25 page research paper, with the topic to be determined in consultation with the advisor

Language Requirement

Reading competency in a foreign language is an important skill for a scholar. It allows the student to consider a dissertation topic beyond the limits of English-speaking theatre, thereby significantly broadening their research and publishing possibilities. Doctoral students are required to demonstrate proficiency in a foreign language equivalent to the completion of a second-semester college-level course before taking the comprehensive exam. This requirement may be fulfilled by coursework taken within five years previous to the exam or by testing.

Dissertation

The PhD program culminates in the dissertation, a research document that makes a significant and original contribution to the field of theatre studies. The dissertation will be defended before a committee of five members.

Learning Outcomes

Goal of the PhD Degree in Theatre & Performance Studies

To cultivate rigorous study, creative practice, and ethical teaching of theatre and performance within a vibrant culture of inquiry and innovation that is grounded in histories, builds towards equity, and expands with possibilities.

Measurable learning objectives based on these goals include:

- To know and critically analyze theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To creatively engage theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies (creative engagement could be realized through scholarship, dramaturgy, performance, design, direction, facilitation, co-creation and beyond).
- To develop individual strategies for teaching theory, practice, literature, histories, ethical implications and innovation within our expansive fields of theatre and performance studies.
- To learn and practice positive qualities as future professional colleagues.
- To learn methods, strategies and approaches for dismantling structural inequality and building more inclusive, accessible and equitable ways to research, create and teach.
- To demonstrate the ability to synthesize comprehensive knowledge of the field of theatre and performance studies, and contribute new knowledge of sufficient breath and relevance to our field and beyond.

Indicators for Reaching Learning Objectives

We use the indicators below to measure the extent to which a student has reached the above learning objectives.

- Coursework
- Research and creative work
- Professional and outward-facing development
- Completion of comprehensive examination and dissertation
- Assessment of teaching

Hip-Hop Studies - Graduate Certificate

This consolidated certificate program in Hip-hop Studies for matriculated graduate students is designed to expose students to the richness, complexity and vitality of Hip-hop—as theory and practice.

Hip-hop, which arose in youth communities of color in the 1970s amid political abandonment and economic devastation, has become the most important cultural movement of the last-half century. Practiced in nearly every corner of the globe, it is now one of the most important through-lines in human culture. To understand Hip-hop is to understand the world in which we live. Inclusive excellence is the bedrock of Hip-

hop; membership in its community is not defined by subscription to a particular place or race but rather to its unique ethos, which privileges virtuosic innovation as much as historic and self knowledge.

Hip-hop is fundamentally an interdisciplinary form. It does not live in one field alone. Rather, it is a dialogue that occurs across dance, music, visual and verbal arts, as well as history and theory. While the Graduate Certificate in Hip-Hop Studies is housed in the Department of Theatre & Dance, courses are available in other departments, such as History, Sociology, English and Ethnic Studies. Organized in this way, with offerings from several campus departments, the consolidated certificate program is the best way to give students a sense of the richness, complexity and vitality of Hip-hop.

Importantly, the certificate's community-based practicum ensures the students in the program will know Hip-hop as a lived culture, not merely an object to be consumed inside the halls of academia. This active learning component will integrate students into the local Boulder/Denver communities that are shaping the future of Hip-hop's forms. It ensures students will know themselves as ethnographers, as well as theorists, and know Hip-hop as an ever-evolving, potent and urgent tool of self-expression.

The certificate in Hip-hop Studies is designed to be an enriching, interdisciplinary supplement to other areas of study. It provides a broad base, which can serve as an entry point to more focused study and practice. While offering rich and rewarding experiences, the graduate certificate is not a professional endorsement from Rennie Harris or Larry Southall of the student's skills. Rather, it develops students' appreciation and respect for one of the most important American cultural forms to have emerged in the last half-century.

Requirements

Prerequisites

All currently matriculated graduate students at CU Boulder are eligible for admission to the certificate program. Students must submit a Statement of Interest which will be reviewed and approved by the Hip-hop Studies Directors, Rennie Harris and Larry Southall.

Program Requirements

To obtain this certificate, students will be required to complete eleven graduate-level credit hours:

- Two movement-based courses (4 credits)
- One community-based practicum (1 credit)
- Two elective courses that develop the critical thinking skills required for understanding Hip-hop's impact and socio-historical development (6 credits)

This broad menu of options, which upholds both theoretical engagement and embodied practice with equal importance, will equip students with the skills necessary to engage with Hip-hop as praxis.

Courses will be offered on a regular basis in the departments of Theatre & Dance, Ethnic Studies and English. Additionally, other departments may offer courses that are relevant to the certificate. Students may petition to have these and other Special Topics courses approved by their Hip-hop Studies advisor.

In order to earn the certificate, students must earn a grade of B in each course and meet the graduate school's overall GPA requirement.

Code	Title	Credit Hours
Movement Courses ¹		4
Choose from:		
DNCE 5001	Graduate Technique (Hip-hop section)

Total Credit Hours		11

¹ Students may petition their Hip-hop Studies advisor to have other courses approved. All courses for the certificate must be graduate level (5000 or above). Independent Study is not accepted.

Applied Shakespeare - Graduate Certificate

By participating in this unique, cross-disciplinary graduate certificate program that combines courses from the Department of Theatre & Dance and the Department of English, students get to know the Bard and his plays as never before.

Students experience a vital mix of performance and scholarship by taking two distance-learning courses and then visiting campus for a one-week summer intensive during the Colorado Shakespeare Festival (CSF) to learn from the nationally recognized CSF company members and CU faculty in small experiential groups.

The summer intensive includes acting, directing, stage combat, Elizabethan culture, rehearsal visits, play attendance, classes on how to teach Shakespeare and more. Self-directed reading and a final project are the conclusion of the certificate requirements.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Required Courses and Credits

Code	Title	Credit Hours
ENGL 5000	Introduction to Applied Shakespeare	3
THTR 5067	Teaching Shakespeare	3
THTR 5143	Shakespeare in Community	3
THTR 7004	Colorado Shakespeare Festival Summer Immersion	3
Total Credit Hours		12

Within one month of completing the two-week summer intensive, students must submit their final paper.

Women and Gender Studies

The graduate certificate in Women and Gender Studies offers CU Boulder graduate students a cutting-edge, interdisciplinary education in gender and sexuality studies. It provides a thorough grounding in feminist theories, queer theories, and/or feminist methodology, as well as the opportunity to explore diverse special topics in gender and sexuality studies. The graduate certificate is designed to train graduate students from a wide range of CU Boulder departments and programs to conduct interdisciplinary research in gender and sexuality studies. On a practical level, the certificate has proven especially useful to graduate students seeking to demonstrate their expertise in gender and sexuality studies to prospective employers in academia, government and the private sector.

Course code for this program is WGST.

Certificate

- Women and Gender Studies - Graduate Certificate (p. 1339)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

WGST 5001 (3) Advanced Topics in Gender and Sexuality Studies (AH)

Provides an advanced interdisciplinary course organized around a specific issue in the social sciences relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4001

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5002 (3) Advanced Topics in Gender and Sexuality Studies (SS)

Provides an advanced interdisciplinary course organized around a specific issue in the arts and humanities relating to gender and sexuality.

Equivalent - Duplicate Degree Credit Not Granted: WGST 5002

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Recommended: Prerequisite WGST 2000 or WGST 2600.

WGST 5200 (3) Religion and Reproductive Politics in the United States

Focuses primarily on how Protestant, Catholic, and Jewish conversations about sexuality and reproduction have shaped access and attitudes towards reproductive health in the US over the course of the twentieth and twenty-first centuries.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4200, JWST 4200, JWST 5200

WGST 5400 (3) Critical Inquiries in Transgender Studies

Examines theories, methods and debates in the emerging field of transgender studies. Drawing on interdisciplinary perspectives, examines transgender identities, communities and political movements in different historical and cultural contexts. Focuses on crosscutting issues that shape transgender subjectivities, with special attention given to how transgender movements negotiate race, class, sexuality, labor, culture and nation.

Equivalent - Duplicate Degree Credit Not Granted: WGST 4400 and LGBT 4400 and LGBT 5400

Grading Basis: Letter Grade

Additional Information: Departmental Category: LGBT Studies

WGST 6090 (3) Feminist Theories

Explores how feminist theorists have understood gender and how it interrelates to our understandings of race, ethnicity, sexuality, embodiment and knowledge. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6190 (3) Feminist Methodology

Explores feminist methodology across a range of disciplines. Themes include experience and interpretation, the social position of the researcher, language and argument structure, knowledge and power, bias and objectivity, and the ethics and politics of research. Meets the requirements for the WGST certificate.

Requisites: Restricted to graduate students only.

WGST 6290 (3) Special Topics in Gender and Sexuality Studies

Offers interdisciplinary feminist perspectives on different special topics such as gender and war, gender and globalization, women's social movements, gender and citizenship, gender and collective memory, and cultural representations of gender and sexuality. Meets the requirements for the WGST certificate.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

WGST 6796 (3) Queer Theories

Explores key concepts and debates in the field of queer theory with an interdisciplinary focus on crosscutting issues (aesthetic, cultural, legal, medical, political and social) that shape queer subjectivities, practices and relations.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

WGST 6840 (1-3) Independent Study

Provides course credit for a directed research project or reading program in women and gender studies, supervised by a WGST faculty member and approved by the WGST graduate director. Requires an independent study approval agreement form completed by the student and signed by the faculty advisor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Women and Gender Studies - Graduate Certificate

The graduate certificate in women and gender studies is designed to complement a CU Boulder graduate disciplinary degree program—providing graduate students the opportunity to engage a variety of scholarly and methodological approaches to the study of gender and sexuality.

Students wishing to take part in the women and gender studies certificate program must be currently enrolled in a graduate disciplinary degree or professional degree program at CU Boulder. Students are encouraged to apply for the graduate certificate early in their course of graduate studies; students enrolled in the program will get priority if placed on a waitlist for a graduate-level women and gender studies course.

Requirements

Students must complete 9 credit hours of coursework in women and gender studies and one additional 3 credit hour course to be approved by

the women and gender studies graduate director, for a total of 12 credit hours.

The minimum acceptable grade for courses submitted for the graduate certificate is a B. Minimum GPA for all courses submitted for the graduate certificate is a cumulative 3.5.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
At least three of the following four courses:		9
WGST 6090	Feminist Theories	
WGST 6190	Feminist Methodology	
WGST 6796	Queer Theories	
WGST 6290	Special Topics in Gender and Sexuality Studies	
Electives		
One additional 3-credit course approved by the women and gender studies graduate director. This course should focus on issues related to women, gender and/or sexuality; take an interdisciplinary approach; and ideally be taken either outside of the student's home department or as an additional course in women and gender studies.		3
Total Credit Hours		12

None of the three required women and gender studies courses may be taken as independent study.

Independent study courses taken with faculty not affiliated with the Department of Women and Gender Studies will not count for the graduate certificate. Independent study courses taken with department faculty members may count only in exceptional circumstances as determined by the graduate committee.

For more details, including application instructions, visit the WGST Graduate Certificate (<http://www.colorado.edu/wgst/graduates/>) webpage or email wgst@colorado.edu.

Business

The new innovation economy requires—and rewards—richer knowledge, sharper skills and a global mindset. Ultimately, the edge belongs to those who are principled leaders who bring inspiration and purpose to their work and in this way drive value for society.

Within this climate, the Leeds School of Business offers an innovative agenda designed to leverage our unique assets: the intellectual capital of Leeds faculty, our innovative and best-in-class curriculum, our focus on the "whole student" experience, our strong network of alumni and industry partners and our firm commitment to student support.

Accredited by the Association to Advance Collegiate Schools of Business (AACSB-International), Leeds awards four types of degrees: Bachelor of Science (BS), Master of Science (MS), Master of Business Administration (MBA) and Doctor of Philosophy (PhD). Students can specialize in accounting, finance, management and entrepreneurship, marketing, and real estate. Leeds further offers certificates in a variety of areas to provide opportunities for students to explore additional areas of interest and distinction.

World-class faculty provide the foundation for breakthrough thinking—creating knowledge from research, disseminating knowledge through teaching and applying knowledge in collaboration with the business community. Faculty discoveries are frequently published in prestigious academic journals and discussed in media outlets such as the *Wall St. Journal*, the *New York Times*, CNBC and more. The cutting-edge research we produce enhances the school's reputation for innovation.

From orientation to graduation, Leeds faculty and staff guide students to discover and optimize their potential. Through an array of targeted services, students create an individualized journey that maximizes the impact of their experience and leads to future opportunities. Ethics and social responsibility are hallmarks of a Leeds education, and the school's commitment to professional development is unrivaled.

Leeds alumni and industry partners collaborate to offer a meaningful level of engagement with students and faculty. Alumni provide the support and resources that ensure graduates are poised for maximum impact. Corporate partners infuse relevance to Leeds' curriculum innovation, supporting new programs and providing the school access to professional talent. Both communities are the backbone of one of the largest mentoring programs in the world.

Leeds joins the University of Colorado and the Boulder community to generate extraordinary opportunities for students. Cross-campus collaborations with fields like engineering and science link Leeds faculty and students with more resources to put innovation into action. Our location in Boulder provides inspiration with its physical beauty as well as the intellectual energy of a thriving start-up community and high concentrations of advanced technology and socially responsible industries.

Together, these assets make Leeds uniquely qualified to deliver on our mission of educating principled, innovative leaders who drive value.

Graduation Recognition Ceremony

Every December and May, the Office of the Dean and the Leeds Business Student Government sponsor a recognition ceremony honoring the graduating class, in addition to the university-wide commencement. Graduates and their families are invited to attend.

Facilities & Research

The Leeds School of Business houses resources for the specific needs of business students:

- Burridge Center for Finance
- Business Research Division
- Career Strategy
- Center for Education on Social Responsibility
- Center for Research on Consumer Financial Decision Making
- MBA Business Center
- Office of Diversity Affairs
- Real Estate Center
- Robert H. and Beverly A. Deming Center for Entrepreneurship
- smart classrooms
- student lounges
- Undergraduate Student Services
- William M. White Business Library and Information Commons

The William M. White Business Library and Information Commons

The White Business Library (<http://www.colorado.edu/libraries/libraries/william-m-white-business-library/>) and Information Commons provide students with a wealth of information pertaining to the business world. Students have access to the business and other libraries via the university libraries online catalog. Many databases are accessible through the wireless network and off campus. These databases contain a myriad of full-text magazines and journals; business periodical indexes; corporate annual, 10-K and proxy reports of all the public companies in the United States; short profiles of both American and international companies; demographic and business statistics; industry and market information; and investment reports written by Wall Street analysts. Over 50 computers provide access to the databases and the internet, and technology-outfitted team rooms are available for group study. Knowledgeable librarians are always available to help navigate the search for information. The Information Commons is open 24 hours, seven days per week and contains 30 of the 50 computers with a full suite of software. These are accessible to students, faculty and staff of the university. In addition, Leeds has 25 technology equipped team rooms. These rooms support group study and project work, and are available for reservation through University of Colorado Scheduling (<https://vems1.colorado.edu/>).

The White Business Library is part of the University of Colorado library system, which includes more than two million volumes, more than five million microforms and more than 24,000 periodicals and serials. The system is also a full depository for United States government, international and state documents.

All classrooms in the Leeds School of Business are equipped up to campus "smart" classroom technology standards. Technologies in a typical Leeds classroom include: a desktop computer loaded with Microsoft Office Suite applications, video projection system, ceiling speakers for audio, DVD/VCR, iClicker base station, campus cable and both wired and wireless Internet connections. All classrooms have the flexibility to support a personal laptop with connectivity in place to integrate with the video projection and sound system.

Business Research Division

Established in 1915, the Business Research Division is one of the earliest organized state service-oriented bureaus in the country.

The Business Research Division conducts business, economic and market research that contributes to the efficient use of Colorado's resources and increases interest in and awareness of the Leeds School of Business. It also is the umbrella organization for the Rocky Mountain Trade Adjustment Assistance (TAA) Center (RMTAAC). Through its annual Colorado Business Economic Outlook Forum, held in December, the division has established a base of knowledge that adds value to its work in other areas. In addition to providing businesses, government and nonprofits with information to help them make better-informed business and policy decisions, the division specializes in economic and fiscal analysis, market research and custom research projects. It also prepares a Colorado leading economic indicator series, the *Leeds Business Confidence Index*. Research results are distributed through presentations and reports; a quarterly newsletter, the *Colorado Business Review*; and the division's website.

Funding for center activities comes from the Leeds School of Business, the university, state agencies, the federal government, state and local business firms and from the sale of research products and services.

RMTAAC is one of 11 centers across the nation funded by the U.S. Department of Commerce to manage the Trade Adjustment Assistance for Firms Program, which helps import-impacted U.S. firms develop and implement business recovery strategies to strengthen their competitiveness in the global marketplace. The TAA for Firms Program is a cost-sharing federal grant program that pays a portion of professional consultant expenses or industry-specific expert services for projects that improve a firm's competitiveness, thereby increasing sales and creating U.S. jobs. Benefits of the program include up to \$75,000 in grant funds and 50/50 cost sharing for strategic projects.

Academic Centers

In addition to the Business Research Division, the school has five centers linking academic programs and the business community—the endowed Robert H. and Beverly A. Deming Center for Entrepreneurship, the Center for Real Estate, the Burrige Center for Finance, the Center for Education on Social Responsibility (CESR) and the Center for Business Integration.

The Robert H. and Beverly A. Deming Center for Entrepreneurship

As part of the Leeds School of Business, the Deming Center for Entrepreneurship's mission is to inspire and empower students, community, alumni, faculty and staff through entrepreneurship education and partnership with the community. The Deming Center does this in part by educating, engaging and partnering and focusing on student experience.

Cutting-Edge Curriculum

Our progressive curriculum and interdisciplinary programs include:

- courses in entrepreneurial finance, marketing and business planning,
- interdisciplinary programs in engineering, business, law and environmental studies,
- undergraduate business minor (p. 638) with a certificate of entrepreneurship for students across campus,
- undergraduate certificate of entrepreneurship (p. 641) for Leeds students,
- MBA (p. 1391) concentration in entrepreneurship, and
- world-renowned PhD program (p. 1398) in entrepreneurship.

The Deming Center supports the entrepreneurial curriculum and advances the Leeds School's leadership agenda through our collaborative initiatives across campus and in the business community in these key areas:

- **Education.** Our entrepreneurship students have access to a world class entrepreneurship faculty. The faculty are involved in collecting, curating and making available the latest research and thinking on entrepreneurship in the world. These faculty are inspiring and directing new research and thought leadership in entrepreneurship and constantly working with thought leaders to develop and stay ahead of the latest trends and tools for entrepreneurship education.
- **Real-world experience.** Our entrepreneurship students are challenged to turn accepted thinking on its head—in the classroom, in real-world industry projects, and by the business innovators serving as student mentors and advisors. The center helps connect students

with projects, advisors and internships that challenge them to use their new skills creatively.

- **Student experience.** Staff and faculty at Deming are focused on delivering an outstanding student experience. Deming promotes the development of entrepreneurial thinkers and doers. Entrepreneurial thinkers and doers are optimistic, resilient, resourceful, persistent, calculated risk-takers, efficient, creative problem solvers and effective workers. These are teachable skills any student is capable of learning.
- **The community.** Boulder is consistently named one of the best places in the country to launch a startup. The center connects students to industry leaders via the Deming Network—an active group of world-class entrepreneurs and innovators who are accessible and hands-on. CU Boulder is also a top research university. Across campus, the Deming Center helps students access opportunities in technology transfer and the engineering, law, biofrontiers and environmental science programs

Real Estate Center

The Real Estate Center, founded in 1995, is supported by an industry council with the goal of advancing academic excellence in real estate education and scholarship. The center oversees the school's real estate teaching programs and advises the faculty in designing an integrated curriculum at both the graduate and undergraduate levels. Coursework is drawn from the law school, the colleges of architecture and engineering, construction management and others.

The center creates real-world experiences for students by providing project coursework and being a resource for securing internships, mentors and jobs. It also provides support for faculty teaching and research activities in real estate and, through the Real Estate Foundation, assists the university with its real estate portfolio.

Burrige Center for Finance

The Burrige Center for Finance is dedicated to encouraging and supporting the creation and dissemination of new knowledge about the world financial markets with an emphasis on the U.S. financial markets by:

- facilitating the exchange of ideas and knowledge between professional investment managers, finance scholars, policy makers and the investing public,
- identifying critical research issues in the theory and practice of security analysis and valuation, and
- encouraging and supporting rigorous qualitative and quantitative research on topics relevant and useful to money managers, valuation experts and finance academics.

Center for Education on Social Responsibility (CESR)

CESR's goal is to help students become outstanding business leaders of tomorrow by preparing them to meet the ethical challenges posed by a highly competitive, globally-connected business world. Accordingly, CESR oversees the infusion of values and social responsibility discussions throughout the undergraduate and graduate curricula at the Leeds School of Business. As part of the central mission at Leeds, CESR creates pedagogies that are national models and plays a leadership role carrying out the school's commitment to developing leaders of conscience. Although the Center's primary focus is on excellence in curriculum development and delivery, CESR also undertakes a broad spectrum of initiatives including a certificate program, student organizations,

conferences and other extracurricular offerings as well as providing funding and administrative support for faculty research.

Courses

CESR is directly responsible for course development, staffing and coordination of the Business requisite introduction course World of Business, and collaborates on the design and delivery of the requisite 3000-level course Business Law, Ethics & Social Responsibility. CESR also offers leading edge electives such as CESR 4000, CESR 4005, CESR 4827/ACCT 4827, CESR 4828/MGMT 4828 and the Global Seminar *Social Entrepreneurship & Innovation* in Panama.

Certificate and Portfolio

CESR offers specialized recognition for students at the undergraduate and graduate levels. Undergraduates wishing to focus on CESR-related topics may earn the certificate in social responsibility and ethics (p. 642) (SRE). At the MBA level, CESR has formalized a Sustainability Portfolio of courses, including the MBA requisite Socially Responsible Enterprise course, and electives such as MBAX 6570 and MBAX 6140.

CESR Co-Curricular Activities

- **CESR Stampede at Leeds: A Week of Driving Values in Business.** This weeklong event showcases the values-driven and innovative curriculum developed by the CESR that is shaping tomorrow's business leaders. Through class visits, expert panels and lectures student competitions and showcases, attendees will explore their own values and network with like-minded professionals about applying positive values in a business setting. Stampede Week also includes the fourth annual Conscious Capitalism Conference, a CESR flagship event.

CESR routinely hosts events aimed at our students, our local business community and educators and industry leaders throughout the academic year. Guest speakers change each semester, but recurring events are included here:

- **CESR Business Ethics Case Competition (BECC).** The CESR BECC is an interactive way to deepen the Leeds undergraduate students' understanding of the importance of creating ethical as well as profitable business cultures. Teams are provided with a business case in the weeks leading up to the competition which they will have to analyze, create recommendations for course of action and present their solutions to a panel of professional judges. Cash prizes are awarded to the top three teams.
- **Conscious Capitalism Conference.** An annual conference hosted by CESR featuring innovative executives and entrepreneurs who have used the traditional tools of capitalism to serve social needs.
- **Student Center for Social Entrepreneurship.** CESR provides faculty sponsorship for SCSE, the student branch of Social Entrepreneurship for Equitable Development, an interdisciplinary, inter-generational campus group that is involved in researching, teaching and generating student involvement in the areas of social entrepreneurship and sustainable community development.
- **Net Impact Club.** CESR is home to a graduate chapter of Net Impact, an international nonprofit organization whose mission is to use the power of business to create a more socially and environmentally sustainable world.
- **New Venture Challenge Social Impact Track.** CESR developed and continues to support the Social Impact Track of the **CU New Venture Challenge**, a campuswide initiative connecting students and faculty with teammates in a broad range of disciplines and with mentors from the business community. The goal is to provide knowledge and

experience making entrepreneurship accessible to anyone on the CU Boulder campus with the enthusiasm and creativity required to start a new business.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Programs & Leadership

Professional Mentorship Program

The Professional Mentorship Program (PMP) is a unique program that offers one-on-one professional mentoring to current undergraduate students. The program's mission is to enhance business education at the Leeds School by offering hands-on learning, professional skills development, leadership opportunities and a sense of connection and community among current students, Leeds alumni and corporate partners. PMP mentors prepare and inspire our students to become the next generation of strong business leaders.

This two-year program matches students with executives or high-level business professionals who align by industry, geographic location or functional area. To ensure a quality experience for both students and mentors, the PMP provides workshops, training and additional support for participants throughout the program.

Program Benefits

Through this program, students gain an additional level of advising and career counseling from a business professional. Through the mentoring relationships, students can explore choice of majors, potential for

graduate school, work-life balance and effective networking and job search strategies.

Other potential benefits of being involved in the PMP include:

- advice and assistance on academic questions, career options, life beyond college and more,
- access to the PMP network and networking opportunities and the opportunity to start building the student's own professional network,
- opportunities to practice and strengthen professional communication and presentation skills,
- help in defining personal and professional goals, and the strategies to achieve them,
- unique internship and job opportunities, and
- development of a life-long friend and connection in the business world.

Study Abroad

Study abroad programs are available for students interested in international business or in cultural experiences abroad. The college-sponsored London Seminar in International Finance and Business is a five-week-long program held each summer in the financial district of London and is open to juniors, seniors and graduate students.

Student Organizations

Listed below are undergraduate organizations that promote professional interests and provide recognition of scholastic attainment:

- Alpha Kappa Psi
- Athletic Business Club
- CU Fashion Club
- Beta Alpha Psi
- Collegiate DECA
- CU Energy Club
- CU Finance Club
- CU American Marketing Association
- CU Investment Club
- CU Society for Human Resources Management
- Delta Sigma Pi
- International Business Club
- Leeds Ambassadors
- Leeds Association of Information Systems
- Leeds Council (Undergraduate Student Government)
- Multicultural Business Student Alliance
- Music Industry Club
- Real Estate Club
- Women in Business Club

Leeds School of Business Student Government

Leeds Council is the governing body of the Leeds School of Business that strives to serve, support and represent the student body. The council also

works to make Leeds a better business school through social, academic and professional programming. The council is made up of five primary committees and an executive board that control a significant portion of the Leeds student fees.

Two members of Leeds Council also serve as representatives on University of Colorado Student Government (CUSG) to voice the interests of business students at the main campus.

Career Opportunities

Leeds School of Business graduates are prepared for positions in the following fields:

- Accounting—public, private, nonprofit and governmental
- Banking and other financial institutions
- Consulting
- Corporate financial management
- Entrepreneurship and small business management
- Financial analysis
- Human resources management
- Information systems
- International business
- Investment management
- Management consulting and organization management
- Marketing and sales management
- Nonprofit management
- Operations management
- Real estate
- Retailing
- Taxation
- Technology management
- Transportation
- Venture capital

Other graduates hold positions in fields as diverse as business journalism, public relations, city planning, chamber of commerce and trade association management, college administration and government. The entrepreneurial area of application prepares students to start their own business ventures to take positions in emerging growth companies and the venture capital industry.

Zhang, Rui (https://experts.colorado.edu/display/fisid_157866/)
Assistant Professor; PhD, University of Maryland

Zhang, Xingtang (https://experts.colorado.edu/display/fisid_159295/)
Assistant Professor; PhD, University of Pennsylvania

Zikmund, Noah
Senior Instructor; MBA, University of Tulsa

Courses

For business administration (BADM) courses, see the Business Administration (p. 1373) section.

Accounting

ACCT 5100 (3) Oil and Gas Accounting

This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

Recommended: ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5120 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

Grading Basis: Letter Grade

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities

Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290

Recommended: restricted to ACCT-MS and ACTX-MS students.

Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade C). Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6780 (3) US International Taxation

This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

Recommended: Prerequisite ACCT 5450.

Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to Business (BUSN) graduate students only.

Business Environment & Policy**BPOL 6940 (1) Master's Candidate for Degree**

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

BPOL 6950 (1-6) Master's Thesis

Requisites: Restricted to graduate students only.

BPOL 7500 (3) Doctoral Seminar: Strategic Management 1

Provides an overview of the literature, including classic articles and books, in business strategy and policy (strategic management). Brings the student up to date on schools of thought, research issues, and practical applications in strategic management.

Repeatable: Repeatable for up to 6.00 total credit hours.

BPOL 7530 (3) Doctoral Seminar: Strategic Management 2

Continuation of BPOL 7500.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of BPOL 7500 (minimum grade D-). Restricted to Business Administration (BUAD) graduate students only.

BPOL 7560 (3) Entrepreneurship, International Business and Technology Management

Provides doctoral students with an understanding of strategic management and entrepreneurship theory, as applied to international business and technology management literatures. Additionally, students are exposed to research methods in the strategy and entrepreneurship arenas.

Requisites: Requires prerequisite courses of BPOL 7500 and BPOL 7530 (all minimum grade D-).

BPOL 8900 (1-3) Independent Study

Requires consent of instructor under whose direction study is taken. Departmental form required.

BPOL 8990 (1-10) Doctoral Dissertation**Business Law****BSLW 5120 (3) Advanced Business Law**

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120

Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study

Requisites: Restricted to Business (BUSN) graduate students only.

MBA Core**MBAC 6001 (1.5) Foundations of Teamwork**

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6002 (1.5-3) Social, Moral and Economic Foundations for Business

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics 1

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6012 (1.5) Managerial Economics 2

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6030 (1.5) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6031 (1.5) Quantitative Methods 1

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6051 (3) Operations Management

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers c-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6098 (1) Professional Development I

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBA Advanced Electives**MBAX 6000 (3) Socially Responsible Enterprise**

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6051 (2) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6101 (1.5) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6105 (3) Design Thinking for National Security

Covers research topics of current interest in computer science that does not fall into a standard subarea.

MBAX 6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6130 (3) Sustainable Venturing

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6140 (3) Social Entrepreneurship in Emerging Markets

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6170.

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying adolescent firms that are past the initial start-up stage but haven't evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6170 (3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6171 (1.5-3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite courses of MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6180 (3) New Venture Launch

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

Requisites: Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6195 (1-3) Special Topics in Entrepreneurship

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6210 (3) Applied Financial Management

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6211 (3) Applied Financial Management

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6220 (3) Investment Management and Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6221 (1.5-3) Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6240 (3) Financial Markets, Institutions and Regulations

Focuses on the legal and regulatory issues surrounding complex transactions that involve change of ownership. Topics include law/regulation issues affecting all stakeholders involved in corporate restructuring transactions, the legal aspects of the corporate bankruptcy process and the practical aspects of raising capital, such as understanding the instruments and the institutions involved in the financing activities of firms at different stages in their lifecycle, road shows and the mechanics of pursuing initial public offering.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Recommended: Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6280.

MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6300 (3) Marketing Communication

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Marketing

MBAX 6301 (2) Marketing Communications

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6310 (3) Marketing Strategy

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6311 (2) Marketing Strategy

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6330 (3) Market Intelligence

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6331 (3) Market Intelligence

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6340 (1.5) Marketing Field Project

Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6350 (3) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6351 (2) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6361 (3) New Product Development

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6365 (3) Practical Product Management

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6370 (2-3) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6372 (1.5-2) Professional Selling and Sales Management

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6420 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6421 (1.5-3) IT & Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6440 (3) Project Management

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6441 (3) Project Management

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

Requisites: Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6450 (3) International Operations Management

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6451 (3) International Business and Strategy

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including global trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing of the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6460 (1.5-3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Recommended: Prerequisite MBAC 6080.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6531 (2) Negotiations

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6550 (3) Management of Technology and Innovation

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6560 (3) Executive Leadership

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6561 (2) Executive Leadership

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population ; but fewer than 1% of Fortune 500 CEOs ; are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

Grading Basis: Letter Grade

MBAX 6570 (3) Topics in Sustainable Business

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6595 (1-3) Special Topics in Organizational Behavior

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6600 (3) Real Estate Principles

Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

Requisites: Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6610 (3) Real Estate Finance and Investment Analysis

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6620 (3) Real Estate Project Competition

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6630 (3) Real Estate Economics

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6640 (3) Real Estate Law and Practice

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6695 (1-3) Special Topics in Real Estate

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

MBAX 6700 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250

Requisites: Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6802 (3) Pricing Strategy and Tactics

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-2) Global Perspectives

Contrasting operations in US and China will study what changes US companies have made to successfully operate in the Chinese market and how US companies have influenced Chinese business operations. Reviews the history and present state of the interdependency between the US and Chinese business environments. Culminates in a 9-day trip to China.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy

The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment; key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm's broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate

Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Real Estate

MS Business Core**MSBC 5015 (1.5) Managerial Economics**

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Heavy use of R programming in course execution.

Requisites: Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5031 (3) Quantitative Methods in Finance

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5032 (3) Quantitative Methods in Real Estate

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5070 (3) Survey of Business Analytics

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors or MKAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5180 (3) Machine Learning in Python

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBC 5190 (3) Modern Artificial Intelligence: Introduction to AI for Business

Provides students with a comprehensive introduction of recent developments in AI by covering fundamental AI concepts and practical applications of these concepts in business. Will review major advances in AI subfields of Deep Learning, Reinforcement Learning, Natural Language Processing, Computer Vision, Recommender Systems, Robotics, and others. Students will learn how to apply AI-based methods to solving practical business problems, acquiring acquire knowledge and hands-on experience of modern AI tools, including the Deep Learning framework Tensorflow.

Recommended: Prerequisite Experience in Python and basic probability/statistics.

Grading Basis: Letter Grade

MSBC 5220 (3) MS Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

MSBC 5460 (3) Supply Chain Strategy

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5610 (3) MS Real Estate Finance and Investment

Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to REAL-MS students only.

Grading Basis: Letter Grade

MSBC 5680 (3) Optimization Modeling

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MS Business Electives**MSBX 5080 (3) Decision Modeling and Applications**

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

MSBX 5205 (3) Financial Strategy and Decision Modeling

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

Requisites: Restricted to Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5225 (3) Advanced Portfolio Management

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

Requisites: Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MSBX 5270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MSBX 5310 (2-3) Customer Analytics

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5311 (2) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MSBX 5405 (3) Structured Data Modeling and Analysis

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5410 (3) Fundamentals of Data Analytics

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5415 (2-3) Advanced Data Analytics

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5430 (3) Advanced Statistical Analysis

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5435 (3) Planning and Production

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5480 (3) Information Security Management

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

MSBX 5500 (3) Security Analytics with Python and Machine Learning

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

Requisites: Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

Grading Basis: Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management

Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.

Requisites: Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5680 (3) Real Estate Technology

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

MSBX 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAC 6060 (minimum grade D-).

Grading Basis: Letter Grade

Business Administration

The Leeds School of Business holds accreditation by the Association to Advance Collegiate Schools of Business (AACSB-International). The Leeds School of Business offers programs leading to the following degrees:

- Master of Business Administration (MBA)
- Master of Science (MS) in the following fields:
 - Accounting
 - Business Analytics
 - Finance
 - Real Estate
 - Supply Chain Management
 - Taxation
- Doctor of Philosophy (PhD)

The Leeds School also offers a part-time MBA program called the Evening MBA that leads to the same degree as the full-time MBA program. Dual degree options are not available in the Evening MBA program.

Dual degree options available in the MBA program include:

- MBA/JD (p. 1751)
- MBA/MD (<https://medschool.cuanschutz.edu/education/md-admissions/about-cu-school-of-medicine/joint-degree-programs/>)
- MBA/MA in anthropology (p. 1054)
- MBA/MFA in art practices (p. 1082)
- MBA/MS in computer science (p. 1522)
- MBA/MFA in dance (p. 1327)

- MBA/MS in environmental studies (p. 1167)
- MBA/MENV (<https://www.colorado.edu/menv/>)
- MBA/MA in German studies (p. 1207)
- MBA/MS in technology, cybersecurity and policy (<https://www.colorado.edu/engineering/academics/degree-programs/technology-cybersecurity-and-policy/>)
- MBA/MA in theatre (p. 1331)
- MBA/MS STEM (business analytics (<https://www.colorado.edu/business/ms-programs/masters-program-business-analytics/>) or supply chain management (<https://www.colorado.edu/business/ms-programs/masters-program-supply-chain-management/>))

These programs are open to qualified individuals who hold a bachelor's degree from a regionally accredited college or university, or a recognized international university, without regard to their undergraduate major.

Master's Degrees

- Business Administration - Master of Business Administration (MBA) (p. 1391)
- Accounting - Master of Science (MS) (p. 1399)
- Business Analytics - Master of Science (MS) (p. 1399)
- Finance - Master of Science (MS) (p. 1401)
- Real Estate - Master of Science (MS) (p. 1402)
- Supply Chain Management - Master of Science (MS) (p. 1402)
- Taxation - Master of Science (MS) (p. 1403)

Doctoral Degree

- Business Administration - Doctor of Philosophy (PhD) (p. 1398)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

ACCT 5100 (3) Oil and Gas Accounting

This course introduces students to the oil and gas industry and its unique accounting and finance issues. The course will introduce oil and gas terminology, analyze the components of an income statement, present book and tax accounting differences and enable you to prepare an economic purchase evaluation for oil and gas producing assets. We will review, discuss and debate current issues relating to the energy industry. Previously offered as a special topics course.

Recommended: ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5120 (3) Business Analytics

Teaches cutting-edge tools and approaches to the analysis of data, including "big data" for effective decision-making. Creates data connoisseurs through hands-on exposure to exploratory and predictive analytics. Application areas covered include Web Marketing, the Internet of Things, Biometric Monitoring, as well as data integration and analysis for online marketing, human resources and operations.

Requisites: Restricted to MS Accounting (ACCT-MS) and MS Taxation (ACTX-MS) students

Grading Basis: Letter Grade

ACCT 5240 (3) Advanced Financial Accounting

Examines advanced financial accounting theory and practice, emphasizing U.S. and international accounting for business combinations, consolidated financial statements, and accounting for partnerships, not-for-profits and governments.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4240

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5250 (3) Financial Statement Analysis

Focuses on the use of U.S. and international accounting information by decision-makers external to the firm. Considers judgments made by investors, security analysts, bank lending officers, and auditors. Emphasizes impact of changes to financial statement elements, equity valuation and profitability analysis.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4250

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5450 (3) Income Taxation of Business Entities

Provides an overview of the taxation of business entities. Examines the tax consequences of forming and operating regular corporations, partnerships, limited liability companies, and S corporations.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5540 (3) Accounting Information Systems

Considers the interaction of accountants with information systems and the role of accounting information systems in business processes. Focuses on the tools used by accountants and provides an understanding of accounting as an information system.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4540

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5550 (3) Data Analytics for Accounting

Exploration of key components of Data Analytics that are of particular utility to accountants. This course has 2 primary elements to it: (1) Describe the Analytics process using an established data analytics model called the IMPACT cycle, and (2) Illustrate the process in audit, managerial accounting, and financial reporting.

Requisites: Requires prerequisite or corequisite course of ACCT 4620 or ACCT 5620 (minimum grade D-). Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5620 (3) Auditing and Assurance Services

Emphasizes the value of assurance services, including the market for financial-statement audits, and the audit decision process, from obtaining a client through planning and testing, to issuance of the audit report. Focuses on making judgments and decisions under conditions of uncertainty and continually evaluating the substance of business transactions over their form.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4620

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5700 (3) International Accounting

Intensive focus on international financial statement analysis, cultural and economic differences that affect financial reporting in various countries. Examples include international financial reporting standards and accounting for foreign currency transactions.

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

ACCT 5820 (3) Topics in Business

Offered irregularly to provide opportunity for investigation of new frontiers in accounting.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 4820

Requisites: Restricted to ACCT-MS or ACTX-MS or C-FNCEACCT or C-FNCEACTX or C-ACCT or C-ACCTACTX graduate students only.

Grading Basis: Letter Grade

ACCT 5827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects. Can be taken concurrently with ACCT 3220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6827

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6000 (1-3) Academic Internship in Accounting

Offers students the opportunity to gain professional work experience in an accounting or tax position while still in school. Provides academically relevant work experience that complements students' studies and enhances their career potential. Includes lectures and a course paper. Students may not preregister for this course, and they must contact the Director of the concurrent degree program in accounting for approval. Instructor consent required.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to students with one of the following plans: ACCT-MS, ACTX-MS; or subplan: C-ACCT, C-ACCTACTX, C-FNCEACCT, C-FNCEACTX

ACCT 6220 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues. Students with credit for ACCT 3220 and 3230 or equivalents may not receive credit for ACCT 6220.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6700

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6250 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6710

Requisites: Requires prerequisite course of ACCT 5250 or MBAC 6020 (minimum grade D-).

ACCT 6260 (3) Seminar: Managerial Accounting

Explores cost management, especially as related to organizational decision making, planning, and control. Emphasizes case analysis and applications.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-).

ACCT 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting. The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: MBAX 6290

Recommended: restricted to ACCT-MS and ACTX-MS students.

Grading Basis: Letter Grade

ACCT 6350 (3) Current Issues in Professional Accounting--Accounting Ethics

Examines the nature of accounting theory and practice from perspectives of economics, law, globalization, accounting, ethics, and moral reasoning. Also explores issues including implications of institutional factors, such as Sarbanes-Oxley, SEC, FASB, IFRS, and capital markets. Counts as senior seminar for Concurrent degree students.

Requisites: Restricted to Accounting, Taxation, Finance/Accounting, or Accounting/Taxation students only.

ACCT 6420 (3) Research and Writing in Income Taxation

Provides a working knowledge of online tax research methodology. Examines the sources of tax authority in researching a tax question. Develops legal writing skills using the CREAC form of writing.

Requisites: Requires a prerequisite course of ACCT 5450 (minimum grade D-). Restricted to MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6430 (3) Taxation of Partnerships

Studies federal income taxation of pass-through entities such as those used by most small businesses in the U.S. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6167

Requisites: Requires prerequisite course of ACCT 5450 (min grade D-). Restricted to MS-ACCT or MS-ACTX or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6450 (3) Taxation of Corporations

Studies federal income taxation related to taxable corporations, the entities through which a large part of the economic activity in the U.S. is conducted. Includes creation, operation, distributions, sale of interests and liquidation.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6157

Requisites: Restricted to ACCT-MS or ACTX-MS or C-ACCTACTX or C-FNCEACTX students only.

ACCT 6620 (3) Advanced Auditing: Business Risk and Decision Analysis

Explores contemporary issues, historical developments, and selected topics pertinent to business assurance services by independent accountants. Emphasizes improving both the decision behavior of decision makers and the quality of information, or its context, for decision makers.

Requisites: Requires a prereq course of ACCT 5620 (min grade C).

Restricted to Acct, Fnce/Acct, Infor Syst/Acct, Syst/Acct Concurrent Degree students or Acct, Acct/Tax or Busn Admin (BUAD) graduate students only.

ACCT 6700 (4) Income Taxation

Emphasizes the fundamentals of the federal income tax system and examines its impact on the individual.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6007

Requisites: Restricted to Accounting, Taxation, Fin Acct Tax-Concurrent Degree or Acct Acct Tax-Concurrent Degree students only.

ACCT 6710 (3) Federal Estate and Gift Tax

Analyzes federal estate and gift taxation of inter vivos and testamentary transfers, introduces income taxation of estates and trusts and involves elementary estate planning.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7207

Requisites: Requires prerequisite course of ACCT 5440 (minimum grade D-). Requires corequisite courses of ACCT 6420 6700. Restricted to ACCT, ACIS, ACTX, MBA or BUAD graduate students only.

ACCT 6720 (2) Estate Planning

Discusses problems and solutions for owners of various-sized estates and different types of assets including jointly-held property, stock in closely-held corporations and farms, analysis of federal taxation of generation-skipping transfers in trust, postmortem estate planning and drafting of trusts and wills.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 6217 or LAWS 7217

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 6780 (3) US International Taxation

This course will provide an overview of the United States federal income taxation of persons engaged in international transactions.

Equivalent - Duplicate Degree Credit Not Granted: LAWS 7617

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

Recommended: Prerequisite ACCT 5450.

Grading Basis: Letter Grade

ACCT 6900 (1-6) Independent Study

Prior department consent required of instructor under whose direction study is taken. Departmental form required.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Accounting, Finance/Accounting, Information Systems/Accounting, Systems/Accounting Concurrent Degree students or Accounting, Accounting/Taxation or Business Administration (BUAD) graduate students only.

ACCT 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree. Departmental form required.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 6950 (1-4) Master's Thesis

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7300 (3) Doctoral Seminar: Introduction to Accounting Research

Discusses the nature of scientific investigation and how accounting theory relates to theories in economics and finance. Introduces students to major areas of accounting research and research methods. Provides students with instruction and experience in evaluating and critiquing research papers as well as generating original and viable research ideas.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7320 (3) Doctoral Seminar: Accounting and Capital Markets I

Focuses on research evaluating the usefulness of accounting information for valuing equity securities. The seminar builds a foundation for conducting accounting-related capital markets research.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7330 (3) Doctoral Seminar: Accounting and Capital Markets 2

Focuses on how managers strategically communicate with capital market participants (e.g., investors and equity analysts). Students develop an understanding of how information enhances the efficiency of stock markets, why managers voluntarily disclose information, and how market participants react to strategic disclosure.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7340 (3) Doctoral Seminar: Managerial Accounting Research

Survey of managerial accounting research, emphasizing a variety of methodologies including economics-based archival empirical and experimental approaches. Topics include: management performance measurement; management incentives; non-financial performance measures; management control systems; cost behavior and cost structure; intra-firm transfer pricing; inter-firm relations and knowledge sharing; risk preferences; risk taking and risk sharing; strategic performance measurement; agency theory; and budgetary slack and performance.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Requires prerequisite course of ACCT 6710 (minimum grade D-). Restricted to graduate students only.

ACCT 7800 (3) Doctoral Seminar: Accounting Theory

Follows the evolution of game-theoretical analytical research and application of analytical methods to topics including: accounting-based valuation, discretionary disclosure, stewardship role of accounting, insider trading and imperfect capital market models, signaling through accounting choice, deferred tax accounting, audit sampling, auditor rotation, and low balling. Describes implications of analytical results for primarily economics-based empirical research designs.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 7830 (3) Doctoral Seminar: Accounting Research

Designed to assist the doctoral student in integrating courses and fields of study in order to be able to apply knowledge and skills to problems in accounting. Special attention given to the development of thesis topics.

ACCT 8820 (1-6) Graduate Seminar

Provides opportunity for investigation of new frontiers in accounting through an experimental seminar. Department enforced prereq.: varies

Repeatable: Repeatable for up to 6.00 total credit hours.

ACCT 8900 (1-3) Independent Study

Instructor consent required and departmental form (taught as doctoral seminar).

Requisites: Restricted to Business (BUSN) graduate students only.

ACCT 8990 (1-10) Doctoral Dissertation

Requisites: Restricted to Business (BUSN) graduate students only.

BADM 6202 (1.5) Principles of Finance

Focuses on the role of finance in small and large businesses. Topics covered include financial statement analysis, time value of money, bonds and stocks (both their markets and their valuation), capital budgeting analysis, and investor expectations regarding risk and return.

Requisites: Requires prerequisite course of BADM 6702 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6302 (1.5) Marketing Principles

Course imparts the core marketing toolkit important for success as a general business manager, including an understanding of the following critical principles of marketing: market exchange, strategic planning, market research, segmentation, targeting, positioning, and the marketing mix (design of product, place, promotion, and price to create exchanges).

Grading Basis: Letter Grade

BADM 6502 (1.5) Introduction to Leadership

This course provides an opportunity to examine leadership from the executive perspective in various organizations, including private and public sector firms, and non-profits. Builds graduate students' understanding of leadership theories, concepts, processes, and behavior while also helping them identify, develop, and build their own leadership capabilities. Enables students to enhance their readiness for leadership positions in business, government, and non-profit organizations and to embark on paths of personal leadership development.

Requisites: Requires prerequisite course of BADM 6302 (minimum grade D-).

Grading Basis: Letter Grade

BADM 6702 (1.5) Introduction to Accounting

Accounting is the language of business and involves the accumulation, presentation, and analysis of relevant financial data of a company to serve the needs of creditors, investors, other external decision makers as well as internal decision makers. We will explore the judgment involved in accounting as well as the rationale behind some of the principles.

Requisites: Requires prerequisite course of BADM 6502 (minimum grade D-).

BADM 6820 (1-3) Topics in Business Administration

Offered irregularly to provide opportunity to investigate new topics in business administration.

BADM 6940 (3) Land Use Law

Examines Federal, state and local regulations governing land use in the U.S. and surveys the basic principles of urban planning and public finance. Describes basic tools governments use to control land use: Euclidean zoning, nuisance law, police power, eminent domain and takings, Planned Urban Developments, historic preservation, wetlands and flood zones, airports, endangered species, view restrictions, and environmental law.

Requisites: Restricted to Master of Business Administration (MBAD), MBA with dual degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

BSLW 5120 (3) Advanced Business Law

Covers sales and lease transactions, negotiable instruments, creditor rights and bankruptcy, secured transactions, agency, business organizations, protection of property, and other advanced topics in legal and regulatory environments. This course and BCOR 3000 cover the business law topics tested on the CPA exam.

Equivalent - Duplicate Degree Credit Not Granted: BSLW 4120

Requisites: Restricted to concurrent degree subplans of Accounting (C-ACCT), Finance and Accounting (C-FNCEACCT), Accounting and Acct Tax (C-ACCTACTX), Fin Acct Tax (C-FNCEACTX), or Accounting (ACCT) and Taxation (ACTX) graduate students only.

BSLW 6900 (1-6) Independent Study

Requisites: Restricted to Business (BUSN) graduate students only.

MBAC 6001 (1.5) Foundations of Teamwork

Focuses on teamwork effectiveness and collaboration. Students will understand what affects team outcomes, how to maximize a team's effectiveness and how to create a company environment that fosters collaboration and teamwork as they develop their own teamwork skills while learning to develop the skills of their employees' and colleagues'.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6002 (1.5-3) Social, Moral and Economic Foundations for Business

Examines historical context for the rise of modern business institutions and market economies, and interrelationships in various business objectives. Connects how different economic approaches address the allocation of existing and future scarce resources, and how individual economic freedom relates to various societal objectives. Explores concepts of core business relevance including intellectual property, the role of ethics in the production of commercial information, and the value of diverse information sets in decision-making.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6003 (1.5) Foundations of Leadership

Focuses on leadership theories and concepts, including individual and organizational elements in different leadership situations. Explores leadership principles, values, and ethical boundaries, why leaders lose their way and how to avoid derailment. Engages students in developing a leadership brand.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6010 (3) Managerial Economics

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6011 (1.5) Managerial Economics 1

Studies the elements of the business firm's fundamental problem—how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate-level microeconomics. Analyzes various applications and misapplications of the relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6012 (1.5) Managerial Economics 2

Develops a basic understanding of the macro economy and its relationship to an individual business or industry. This objective will be accomplished by understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments and integrating this information into the world economy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6020 (3) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6030 (1.5) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate-level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions, and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6031 (1.5) Quantitative Methods 1

Covers foundations for statistical reasoning and statistical applications in business. Topics include data collection, descriptive stats and data visualization, probability, discrete probability distributions, continuous probability distributions, sampling distributions and estimation.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6032 (1.5) Quantitative Methods 2

Second in a series of two courses covering foundations for statistical reasoning and statistical applications in business. Topics include hypothesis testing, one and two sample hypothesis tests, single regression analysis, multiple regression analysis.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6050 (3) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6051 (3) Operations Management

Develops an understanding of processes and the alignment of a process with the organization's operating priorities. Examines how interconnected processes relate to managing supply and demand and stakeholder incentives. Explores services, highlighting the differences and similarities between product and service businesses and considers c-suite-level challenges such as managing firm growth, alignment of the operating system with strategic priorities, and mitigating uncertainty through optionality.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6052 (3) Capstone Projects

Provides students with an opportunity to focus on a specific project which would have a positive strategic impact on the company for which they work. For those who have entrepreneurial aspirations, this project could result in a business plan for a new venture. Final deliverable should address marketing, financial, operational, and management implications and strategic impact.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management, and financial planning topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6081 (3) Data and Decisions

Employers need managers who can integrate business knowledge and insight with the vast amount of data available using modern analytical tools. Students will access data from multiple sources, manipulate the data so it is ready for analysis, perform multiple regression analyses, validate the models they develop, and use the results to inform decisions. Goes beyond Excel spreadsheets to expose students to tools such as R and Tableau.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAC 6090 (3) Marketing Management

Provides a solid foundation of marketing knowledge by focusing on principles of marketing. Introduces the role that marketing cases play in advancing understanding and skill development in the field of marketing. Case discussions illustrate concepts discussed, and case studies are used to introduce the marketing decision making process. Emphasizes the international nature of marketing, as well as the importance of analysis and the understanding of the economic, demographic, political-legal-regulatory, sociocultural, technological, and natural environments.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6096 (1.5) Managerial Communications

Tailored instruction, grounded in communication and business theory, that leads to improved business writing, public speaking, team presentations, team dynamics, interpersonal communication, and emotional intelligence with a focus on persuasion, audience analysis, and risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) majors only.

Grading Basis: Letter Grade

MBAC 6098 (1) Professional Development I

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAC 6099 (1.5) Professional Development II

Professional Development I and II will introduce students to a range of skills to help them be successful in the professional work environment, including presentation development, constructive feedback loops, and personal presentation in team-based sessions. It will also offer a survey of the career management process and provide students with the tools and life-long skills to execute a strategic career management plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Core Courses

MBAX 6000 (3) Socially Responsible Enterprise

Prepares future managers for confronting the truly difficult situations that arise when deploying economic resources, altering the physical environment, and making decisions that affect the lives of investors, employees, community members and other stakeholders. Case-based challenges will be examined in a broad range of contexts, and essential ethical concepts will be explored by drawing on theories from ethics, sociology, economics, political science and philosophy.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6051 (2) Strategy

Analyzes how firms can attain and sustain competitive advantage in today's competitive environment. Focuses on industry dynamics, competitive positioning, firm capabilities, and corporate innovation. Introduces a set of tools for assisting managers in solving complex, real-world business problems in strategy development. Integrates MBA learning in functional areas, and emphasizes the fit between competitive analysis and the role of management and organization.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6100 (3) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures. Allows students to assess their fit with entrepreneurial firms. Key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6101 (1.5) Entrepreneurship

Examines the environments of entrepreneurial firms from start-up to development of ventures; allows students to assess their "fit" with entrepreneurial firms. A key element is learning the process of determining the difference between ideas and commercializable opportunities through feasibility analysis and plans.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6105 (3) Design Thinking for National Security

Covers research topics of current interest in computer science that does not fall into a standard subarea.

MBAX 6110 (3) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6111 (2) Entrepreneurial Finance

Addresses a variety of topics including financial valuation, various sources of funds, structures and legal issues in arranging financing, the private and public venture capital markets, and preparation for, and execution of, an initial public securities offering.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6130 (3) Sustainable Venturing

Focuses on environmentally sustainable business ventures as well as issues associated with starting and operating a business that solves natural environmental challenges while achieving profitability. Includes a number of case studies, topical discussions, talks by environmental entrepreneurs, and an applied or library research project.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6140 (3) Social Entrepreneurship in Emerging Markets

Social entrepreneurs adopt business approaches to solving global, social and environmental problems that have not been effectively addressed by government, business or traditional nonprofits. The course provides a framework for student teams to assist social entrepreneurs in developing countries, helping them achieve their social mission while operating sustainably and with measurable impact.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6170.

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6160 (1.5-3) Entrepreneurship: High Growth Companies

Explores the initial decisions that set a foundation for business growth, the pros and cons of alternative growth strategies, organizational scaling tactics, and the keys to realizing value. Studying adolescent firms that are past the initial start-up stage but haven't evolved into mature businesses, we will focus on key choices founders face in scaling their businesses, investigating growth-related stumbling blocks and discussing alternative strategies that may be used to overcome these obstacles.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6170 (3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6171 (1.5-3) New Venture Creation

This course content is relevant to the student who wants the entrepreneurial toolkit, start a new venture, is interested in working in the startup world, would like to effectively evaluate the probability of success for a new venture and/or develop a methodology for entrepreneurial thinking that provides benefits for big and small ventures. The final deliverable is a professional pitch to a group of seasoned investors and the submission of a complete business plan.

Requisites: Requires prerequisite courses of MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6180 (3) New Venture Launch

Translate an existing product, service, or opportunity into a real, functioning venture. Each venture will undertake typical business functions (legal, raising money, web presence, selling, innovation, marketing, managing cash, and managing operations) with minimal resources. The course will rely heavily on outside experts and speakers who have personal experience being or working directly with entrepreneurs and/or investors. The course is a natural capstone to other courses in the entrepreneurship curriculum.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6170 is strongly recommended prior to enrolling in MBAX 6180.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6190 (3) Projects in Entrepreneurial Companies

Limited to 12 students per section, each student is matched with an entrepreneurial company to complete a project that is key to company strategy. Students experience total company environment from the top management level through attending management meetings and interacting with cross-functional managers and employees. E-mail and face-to-face meetings result in discussing opportunities and issues resulting from experiences in companies.

Requisites: Requires prerequisite course of MBAX 6100 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite completion of MBAX 6111 is strongly recommended prior to enrolling in MBAX 6190.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6195 (1-3) Special Topics in Entrepreneurship

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

MBAX 6210 (3) Applied Financial Management

Analyzes the financial condition, planning, and control of current assets, current liabilities, and long-term financial arrangements. Topics include financial planning, managing working capital, short- and long-term financing, capital budgeting, valuation, and capital structure policies. Case studies are emphasized.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6211 (3) Applied Financial Management

Focuses on how to apply key concepts in finance to real-world situations. Topics include valuation, capital structure, highly leveraged transactions, and financial distress and bankruptcy. Heavy emphasis on how to perform various kinds of valuations. Mixture of lectures and case discussions.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6220 (3) Investment Management and Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6221 (1.5-3) Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6230 (3) International Financial Management

Examines the financial procedures, policies, and risks faced by firms conducting business internationally. Topics include examining the international finance environment, managing foreign exchange risk exposure, managing international working capital, conducting analysis, and developing an understanding of international financial markets.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6240 (3) Financial Markets, Institutions and Regulations

Focuses on the legal and regulatory issues surrounding complex transactions that involve change of ownership. Topics include law/regulation issues affecting all stakeholders involved in corporate restructuring transactions, the legal aspects of the corporate bankruptcy process and the practical aspects of raising capital, such as understanding the instruments and the institutions involved in the financing activities of firms at different stages in their lifecycle, road shows and the mechanics of pursuing initial public offering.

Requisites: Requires prerequisite course of MBAC 6060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6250 (3) Derivative Securities

Derivatives, like options, futures, forwards, and swaps, encompass all aspects of finance. Topics cover the characteristics, valuation, and trading strategies associated with derivatives as well as their use in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Recommended: Prerequisite for MBAD students, prerequisite course of MBAC 6060; for FNCE-MS majors, prerequisite MSBC 5060 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MBAX 6280 (1) Entrepreneurship Valuation and Investment Seminar

First section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6281 (1-2) Entrepreneurship Valuation and Investment Seminar2

Second section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAX 6280.

MBAX 6282 (1) Entrepreneurship Valuation and Investment Seminar 3

Third section in series of three: Provides a premier experiential learning experience in early stage investing. Students will develop an understanding of the mechanics of early stage investing, will learn how to evaluate, select and recommend investments and manage the portfolio, put in practice managerial skills, negotiation, financial analysis, presentation skills, mastering/negotiating legal terms, and to incorporate uncertainty into projecting cash flows.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 and MBAX 6281 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6300 (3) Marketing Communication

Focuses on the strategic and decision making aspects of marketing communication from a managerial perspective. Increases students' understanding of specific decision elements within an integrated marketing communications framework. Topics include promotional objectives, agency relations, media selection, budgeting, and advertising research. Also explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Marketing

MBAX 6301 (2) Marketing Communications

Focuses on the strategic and decision-making aspects of marketing communication from a managerial perspective. Designed to increase students' understanding of specific decision elements within an integrated marketing communications framework. Topics covered include promotional objectives, agency relations, media selection, budgeting, and advertising research. Explores relevant advertising models and the economic and social effects of promotional activity.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6310 (3) Marketing Strategy

Marketing strategy has developed into an increasingly critical managerial activity as businesses recognize the importance of creating customer value and being customer oriented. Discusses key elements of successful marketing strategy including market/customer analysis and competitor analysis, and identifies strategic approaches managers may adopt to succeed in today's highly competitive and rapidly changing business environment.

Requisites: Requires prereq course of MBAC 6090 (min grade D-).

Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6311 (2) Marketing Strategy

Marketing strategy is a critical managerial activity that recognizes the importance of a strong market focus and the delivery of superior customer value as bases for long term financial success. This course examines key elements of successful marketing strategy including optimal market definition, strong segmentation and positioning approaches, high levels of customer satisfaction, and effective management of critical exchange relationships.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6330 (3) Market Intelligence

Market Intelligence is a decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers. Students learn how to: define the marketing problem and determine what information is needed to make the decision; acquire trustworthy and relevant data and judge its quality; analyze the data and acquire the necessary knowledge to make certain classic types of marketing decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) or Mktg Analytics cert (MKAG) students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6331 (3) Market Intelligence

Market Intelligence is a marketing decision-oriented course geared toward gathering, analyzing, and interpreting data about markets and customers for both products and services. It is for managers as users of market information across marketing management, consulting, general management, and entrepreneurship to address problems of market selection, segmentation, positioning, new products, customer value and retention, pricing, communication, channel, etc.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6340 (1.5) Marketing Field Project

Develops skills in marketing decision making. Teams design and complete a project located at a client business or other organization in the metropolitan area. Team members organize and assign responsibilities, interact with middle- and top-level managers, apply quantitative and behavioral tools presented in marketing and other courses, meet deadlines, and present results of project activities

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6350 (3) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6351 (2) Digital Marketing

Covers a variety of ways an organization uses online presence to support its goals. The main approaches covered are search engine optimization (SEO); online advertising, especially search ads (also called search engine marketing, SEM); and social media. SEO is setting up your website so that the right people can find you. Emphasis placed on selecting keywords and tracking responses to changes to a website. SEM refers to paid ("sponsored") ads on search engines. We will focus on AdWords.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6360 (3) New Product Development

Provides a better understanding of the new-product development process, highlighting the inherent risks and strategies for overcoming them. Using a combination of lectures, cases, and a project, this course examines the process of designing, testing, and launching new products. Emphasizes the interplay between creativity and analytical marketing research throughout the development process. Also covers branding issues, such as brand extensions and their impact on brand equity.

Requisites: Requires prereq course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Prog (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Finance

MBAX 6361 (3) New Product Development

Provides students with a better understanding of the new-product development process, highlighting the inherent risks and different strategies for overcoming them. Using a combination of lectures, cases, and a project, this course will examine the process of designing, testing and launching new products.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Marketing

MBAX 6365 (3) Practical Product Management

This course will give students practical experience and tools required to successfully manage a product or product line for an established company or a new business. This course will cover the role of the Product Manager, explore market research to understand unsolved market needs, and teach students how to convert market needs to specifications, develop product business cases and establish funding priorities, culminating in the completion of a full product strategy and plan.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6368 (1.5) Consumer Packaged Goods Marketing Applied to the Natural & Organic Industry

Explores the world of consumer packaged goods (CPG) and brand management skills needed to successfully launch and manage products in a retail environment, applied to the natural and organic product industry. The course will be split into three parts: 1) CPG and Brand Management principles and techniques, 2) shopper insights to manage CPG products at retail, 3) brand and retail management principles applied to the Natural & Organic industry.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6370 (2-3) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address a issue around customer acquisition, development, and retention. Students will be introduced to R programming in this course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6372 (1.5-2) Professional Selling and Sales Management

The course is designed to give graduate degree business students experience with the key skills in professional selling and an understanding of the role that professional selling plays in the success of many B2C businesses and most B2B businesses. Students will also learn about the factors that determine high performance among individual professional sellers and the organizations that employ them.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6380 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6381 (3) Consumer Decision-Making: Behavioral Economics, Psychology, and Experimental Design

Consumer behavior often defies economic rationality. Behavioral economics attempts to integrate the quirks of human psychology into economic models; judgment and decision-making investigates how people solve economic problems. This course will introduce major theories, findings and ideas from these disciplines, and foundational concepts of experiment design that provide insight into consumer decision-making, with the goal of preparing future managers, analysts, consultants, and advisors to incorporate such insights into marketing and business strategies.

Requisites: Requires prerequisite course of MBAC 6090 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6410 (3) Process Analytics

Covers the concepts and tools to design and manage business processes. Emphasizes modeling and analysis, information technology support for process activities, and management of process flows. Graphical simulation software is used to create dynamic models of business processes and predict the effect of changes. Prepares students for a strong management or consulting career path in business processes.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6420 (3) IT and Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. Combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoptions efforts to success.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6421 (1.5-3) IT & Business Strategy

Although some companies are very successful in discovering and cultivating innovative technology-enabled business strategies, many fail in the process. This course combines theories and frameworks with practical approaches to provide students with the skills required to help companies identify business opportunities, find appropriate information related technologies, and lead adoption efforts to success.

Requisites: Requires prerequisite courses MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6440 (3) Project Management

Acquaints students with multidisciplinary aspects of project management, including the relationship between schedule, cost and performance. The course uses a hands-on project where the student interacts with a real customer, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. At the conclusion of the course, the student may be eligible to apply for a project management certification from Project Management Institute based on previous work experience.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6441 (3) Project Management

Acquaints the student with multidisciplinary aspects of project management, including the relationship between scope, schedule, cost and performance. Uses a hands-on project from your own company, providing an opportunity to utilize the qualitative and quantitative tools taught in the classroom. During the course students will earn hours toward project management certification from the Project Management Institute.

Requisites: Restricted to Professional MBA Program (PMBA) majors with 12 credit hours completed.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6450 (3) International Operations Management

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including trade practices; penetration strategies; financial, marketing, services, and manufacturing operations; ethical and sustainability issues; and global competitive strategy. Compares global business practices in Asia, South America, Europe, and Africa.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6451 (3) International Business and Strategy

Takes a broad comprehensive perspective on managing and operating in a rapidly growing global economy. Explores regional and national approaches to international operations including global trade practices; legal and political issues; US trade laws; finance and accounting risks; global supply chain management, cultural challenges; global marketing, and global strategies. Upon completing of the course, you will have a broad foundational understanding of important contemporary issues and challenges of international business.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6460 (1.5-3) Supply Chain Management

Explores the key issues related to the design and management of supply chains. Covers the efficient integration of suppliers, production facilities, warehouses and stores so that the right products in the right quantity reach customers at the right time. Focuses on the minimization of the total supply chain cost subject to service requirements imposed by a variety of industries.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Recommended: Prerequisite MBAC 6080.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Systems

MBAX 6500 (3) Management of Organizational Change

Explores ways to improve organizations to meet demands of changing environments. Emphasizes theoretical framework and models of organization change, barriers to implementing change and ways to overcome them, and the roles of the change agent and/or consultant.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6530 (3) Negotiating and Conflict Management

Explores and builds skills for conflict management and negotiation problems faced by managers (e.g., dealing with subordinates, peers, superiors, or clients). Content is relevant to all MBA students, especially those interested in management, accounting, entrepreneurship, finance, and marketing.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6531 (2) Negotiations

Practice the art and science of successful negotiations. Provides students high interaction with businesses and entrepreneurs.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6540 (3) Consulting Skills

Provides an integrative, hands-on exercise in managing change. Develops skills in contracting, collecting, and analyzing data, developing action plans, and preparing reports. Teams practice these skills by conducting an organizational diagnosis, consulting project within an organization.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6550 (3) Management of Technology and Innovation

Examines a variety of issues common to management of technology, such as technology strategies, methods of technology transfer, selecting technology standards, managing the research and development process, and encouraging and rewarding innovation.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6560 (3) Executive Leadership

Examines organizational leadership from the executive perspective, including private and public sector firms, and non-profits. Studies how executives lead change and innovation, interact with the top management team, and deal with the board of directors. Topics include governance of the firm, strategies for enhancing executive influence, assessing and understanding diverse leadership styles, and the ethics and responsibilities of an executive. Formerly MBAX 6890.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6561 (2) Executive Leadership

Provides an opportunity to examine leadership from the executive perspective in organizations including private and public sector firms and non-profits. Topics covered include how executives lead change and innovation in organizations, interact with the top management team, deal with the board of directors, leadership issues involved with governance of the firm and strategies for enhancing executive influence.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6565 (1.5) Inclusive Leadership

This course focuses on how to lead to increase inclusion and maximize the benefits that diversity can bring. Women and minorities comprise only 25% and 27% of executives, respectively. Only 5% of CEOs are women. Thirteen percent of the population ; but fewer than 1% of Fortune 500 CEOs ; are Black. The data show irrefutable evidence that diversity increases innovation, market share, return on assets, and stock prices.

Grading Basis: Letter Grade

MBAX 6570 (3) Topics in Sustainable Business

Provides a comprehensive overview of the core concepts, strategies and practices of sustainable business, emphasizing innovative business practices and entrepreneurial opportunities created by the sustainability "movement". The topic of sustainability will be approached from the unique perspectives of seven core disciplines of business administration: economics, strategy, ethics, organizational behavior, operations, finance and accounting, and marketing.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Social Responsibility

MBAX 6595 (1-3) Special Topics in Organizational Behavior

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6600 (3) Real Estate Principles

Studies methods of analyzing real estate opportunities, local government controls and regulations of the development process. Majority of class material is provided via case studies and guest lecturers. Last portion of the course will be the presentation of student group projects.

Requisites: Restricted to Master of Business Admin (MBAD) students who have completed fewer than 24 credits; or MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6610 (3) Real Estate Finance and Investment Analysis

Objectives of the course are to 1) conduct income property investment analysis; 2) to develop the technical competence necessary to structure real estate transactions; and 3) to understand the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6620 (3) Real Estate Project Competition

Examines real estate market behavior beginning with an overview of residential and commercial property markets. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel and other end users. Examines how factors influencing the demand for real estate interact with the factors influencing the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of property. The course will also examine the roles that local, state and federal governments have in real estate market outcomes.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Bus Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof MBA Prog (PMBA) with prerequisite courses MBAX 6600, 6610 and 6640 (all min grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6630 (3) Real Estate Economics

Examines real estate market operations and discusses alternative methodologies for estimating real estate values. Examines various theories of land price determination and uses these models to understand how the private market allocates land to competing residential, office, retail, industrial/warehouse, hotel, and other end users. Examines how factors influencing the demand for real estate interact with the supply of real estate to determine market rents and how the flow of future expected income is capitalized to yield the market price of the asset.

Requisites: Restricted to MS Real Estate majors (REAL-MS) or restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6640 (3) Real Estate Law and Practice

Examines the legal issues associated with developing, acquiring, transferring, and leasing real property. Topics include real estate contracts, land use and development agreements, vehicles for owning real estate, real estate covenants, conditions and restrictions, loan transactions, negotiating real estate contracts, commercial leases and real estate taxation. Material for this course will consist of assigned articles and real estate cases. Formerly MBAX 6855.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6695 (1-3) Special Topics in Real Estate

Provides a vehicle for the development and presentation of new topics with the potential of being incorporated into the standard MBA curriculum.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to MBA (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA) or MS Real Estate (REAL-MS) students only.

Grading Basis: Letter Grade

MBAX 6700 (3) Corporate Financial Reporting

Provides an in-depth study of the concepts underlying contemporary financial accounting practice. Includes preparation and analysis of financial statements and the application of concepts to selected current issues.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6220

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6710 (3) Financial Statement Analysis

Focuses on the use of accounting information by decision makers external to the firm. Considers judgments made by security analysts, bank lending officers and auditors. Emphasizes impact of changes to financial statement elements, profitability analysis and equity valuation.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6250

Requisites: Requires prerequisite course of MBAC 6020 or MSBC 5020 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Additional Information: Departmental Category: MBA: Accounting

MBAX 6761 (2) Managerial Accounting, Planning and Control

Introduces managerial accounting, which includes the concepts, models, and systems that provide this information and control. The course will familiarize participants with the terminology and basic concepts of managerial accounting, touching on topics ranging from development and use of cost information for decision-making to management control systems.

Requisites: Requires prerequisite course of MBAC 6020 (minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Accounting

MBAX 6801 (3) Global Perspectives Seminar

Provides students with an in-depth perspective about a specific country or region outside the United States. The course can focus on a different region or country each time it is offered. If demand for this type of experience is strong, multiple sections of the course could be offered in a given semester.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6802 (3) Pricing Strategy and Tactics

Pricing provides the means to capture value. The course covers theories, analytical tools and conceptual frameworks needed for devising price strategy as part of the value proposition for products and services. It draws upon principles from economics, marketing and psychology. Primary and secondary data based analysis is used to understand price response and competitive pricing. Substantive topics include customized pricing, price negotiations, bidding and auctions, price discounting, trade promotion, bundling, behavioral pricing, among others.

Requisites: Requires prerequisite courses of MBAC 6011, MBAC 6020, MBAC 6031, MBAC 6060 and MBAC 6090 (all minimum grade D-).

Restricted to MBAD, DMBA, JMBA, PMBA, SCMN or BUAN majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6806 (1.5-2) Global Perspectives

Contrasting operations in US and China will study what changes US companies have made to successfully operate in the Chinese market and how US companies have influenced Chinese business operations. Reviews the history and present state of the interdependency between the US and Chinese business environments. Culminates in a 9-day trip to China.

Repeatable: Repeatable for up to 3.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to Master of Business Admin (MBAD), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors only.

Grading Basis: Letter Grade

MBAX 6815 (3) Sustainable Real Estate

Explores techniques, processes, tools, and capabilities required to manage growth and land use change in the light of shifts beginning to transform the way we approach land use and real estate development.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), or MS Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Real Estate

MBAX 6827 (3) Integrated Reporting for Socially Responsible Strategies

Explores the growing global trend of companies to measure, disclose and report for socially responsible initiatives. Integrated reporting combines financial, environmental, social and governance information into a single report. Current practices in sustainability and integrated reporting in the US and across the world will be examined through case studies, guest speakers, current literature and projects.

Equivalent - Duplicate Degree Credit Not Granted: ACCT 5827

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6841 (2) Decision Making for Managers

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Requires prerequisite courses of MBAC 6010, MBAC 6020, MBAC 6030, MBAC 6060 and MBAC 6090 (all minimum grade D-). Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Management

MBAX 6843 (3) Supply Chain and Operations Analytics

Analyzes key issues related to the design and management of operations and supply chains using quantitative tools such as linear, integer, and non-linear programming, regression, and statistical analysis. Covers important topics such as forecasting, aggregate planning, inventory theory, transportation, risk pooling, production control and scheduling, and facilities location, among others. Uses mathematical modeling, spreadsheet analysis, case studies, and pedagogical simulations to deliver material.

Requisites: Restricted to Master of Busn Admin (MBAD), MBA w Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) Prof'l MBA Prog (PMBA) or Supply Chain Mgmt (SCMN-MS) majors or SCAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Operations and Production Management

MBAX 6846 (2) Global Strategy

The ability to compete effectively globally is increasingly important for many firms. Topics such as globalization and the competitive environment; key differences in institutions around the globe and their implications; how firms can succeed internationally (e.g., different entry strategies, how to manage across country borders, the firm's broader responsibility in the global community) will be discussed.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6847 (2) Emerging Markets in Global Business

Provides tools to analyze and understand emerging markets, how to operate in these markets and how to work with the multinational enterprises present in those areas. Offers a managerial perspective based on a thorough understanding of the relevance and impact of world events on global business. Promotes understanding of how to operate in emerging markets whether in the U.S. or abroad.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MBA: Entrepreneurship

MBAX 6885 (3) Interpreting the Economic Environment

The macroeconomic environment is vitally important to business managers regardless of their area of focus. Most macroeconomic events portend future economic changes that influence business and/or industry. Develops a basic understanding of the macroeconomy and its relationship to an individual business or industry through understanding macroeconomic concepts and data sources, developing a basic model, understanding relevant policy instruments, and integrating this information into the global economy.

Requisites: Requires prerequisite courses of MBAC 6060 and 6090 (all minimum grade C). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Additional Information: Departmental Category: MBA: Finance

MBAX 6930 (3) Commercializing Sustainable Energy Technologies

Addresses the opportunities and problems of commercializing new renewable energy technologies. Focuses on energy markets, opportunity identification, life cycle analysis, policy economics, project financing and economic analysis as they relate to bringing renewable energy technologies to market.

Equivalent - Duplicate Degree Credit Not Granted: ENVM 5005

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MBAX 6966 (1-3) Independent Study-Real Estate

Independent study in the field of real estate.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), Supply Chain Management (SCMN) or Business Analytics (BUAN) majors only.

Additional Information: Departmental Category: MBA: Real Estate

MSBC 5015 (1.5) Managerial Economics

Studies the elements of the business firm's fundamental problem: how to maximize profits. Develops for each element managerial theory based upon introductory and intermediate level microeconomics. Analyzes various applications and misapplications of relevant concept, primarily through case studies. Differential calculus and statistics are used throughout the course.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5020 (1.5) Financial Accounting

Introduces the financial reporting system used by business organizations to convey information about their economic affairs. Develops an understanding of financial reports and what they tell about a business enterprise. Focuses on how alternative accounting measurement rules represent different economic events in financial reports.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5030 (3) Quantitative Methods

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing). Provides an introduction to regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods. Heavy use of R programming in course execution.

Requisites: Restricted to Supply Chain Management (SCMN-MS) or Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5031 (3) Quantitative Methods in Finance

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to the field of finance. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5032 (3) Quantitative Methods in Real Estate

Covers foundations for statistical reasoning and statistical applications in business. Topics include graduate level treatment of descriptive statistics, probability, probability distributions, sampling theory and sampling distributions and statistical inference (estimation and hypothesis testing) applied to real estate. Provides an introduction to topics such as regression analysis, analysis of variance, time series forecasting, decision analysis, index numbers, and nonparametric methods.

Grading Basis: Letter Grade

MSBC 5060 (3) Corporate Finance

Analyzes the implications of modern finance theory for the major decisions faced by corporate financial managers. Develops the basic skills necessary to apply financial concepts to the various problems faced by a firm. Includes capital budgeting, capital structure, long term financing, short term financial management and financial planning topics.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5070 (3) Survey of Business Analytics

Designed as an introduction to Business Analytics, which considers the extensive use of data, methods and fact-based management to support and improve decision making. Business intelligence focuses on data handling, queries and reports to generate information associated with products, services and customers, business analytics uses data and models to explain business performance and how it can be improved. The class will be built on heavy hands-on coding; it will introduce and subsequently involve extensive use of Python.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors or MKAG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5180 (3) Machine Learning in Python

This course exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using Python. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis. The class will focus on predictive analytics.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBC 5190 (3) Modern Artificial Intelligence: Introduction to AI for Business

Provides students with a comprehensive introduction of recent developments in AI by covering fundamental AI concepts and practical applications of these concepts in business. Will review major advances in AI subfields of Deep Learning, Reinforcement Learning, Natural Language Processing, Computer Vision, Recommender Systems, Robotics, and others. Students will learn how to apply AI-based methods to solving practical business problems, acquiring acquire knowledge and hands-on experience of modern AI tools, including the Deep Learning framework Tensorflow.

Recommended: Prerequisite Experience in Python and basic probability/statistics.

Grading Basis: Letter Grade

MSBC 5220 (3) MS Investment Management & Analysis

Covers managing investment portfolios by blending academic theories and evidence with practitioner experience. Topics include risk and return relationships, securities, value theory (capital asset, arbitrage, and option pricing), portfolios, and performance evaluations.

Requisites: Restricted to Finance (FNCE-MS) or Real Estate (REAL-MS) majors only.

Grading Basis: Letter Grade

MSBC 5460 (3) Supply Chain Strategy

Introduces students to the fundamental principles underlying supply chains, and focuses on the integration with both operations and logistics.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5480 (3) SCMN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to Supply Chain Management (SCMN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5490 (3) BUAN Experiential Projects

Provides an opportunity to execute a project for a company, integrating course work knowledge in an applied capstone experience. Allows first hand exposure to the business analytics as both an observer and creator of the business analytics process. Students work closely with an area client company to solve an important business analytics problem under the close supervision of the instructor.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Core

MSBC 5610 (3) MS Real Estate Finance and Investment

Topics include 1) conducting income property investment analysis; 2) developing the technical competence necessary to structure real estate transactions; and 3) understanding the financial assets securitized by real estate. Students will analyze income properties using Excel and ARGUS-DCR. Techniques for structuring real estate transactions examined in this course include lender participations, sale-leasebacks, joint ventures, and real estate syndications.

Requisites: Restricted to REAL-MS students only.

Grading Basis: Letter Grade

MSBC 5680 (3) Optimization Modeling

Focuses on formulating decision problems as mathematical models and employing computational tools to solve them. Microsoft Excel is used as the main modeling platform but the course will also cover advanced tools, such as modeling languages. Optimization modeling will be illustrated in problems associated with operations, marketing, management, and finance. Integrates topics from decision analysis and operations management as they relate to modeling management decisions.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

MSBX 5080 (3) Decision Modeling and Applications

Integrates topics from decision analysis and operations management as they relate to modeling management decisions. Field projects involve the university, local companies, and/or government agencies.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

MSBX 5205 (3) Financial Strategy and Decision Modeling

Develops functional frameworks for analyzing and assessing uncertainty in real and financial assets and evaluating financial decisions under diverse scenarios. This course covers various methods of mapping uncertainty including binomial decision tree models, linear programming models and Monte-Carlo simulations. Further topics include tax consequences of these decisions.

Requisites: Restricted to Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5225 (3) Advanced Portfolio Management

Covers the management and construction of investment portfolios. Topics include performance and risk measures, identification of risk factors and the use of traditional and alternative assets classes including real estate, mutual funds, ETFs, venture capital funds, private equity funds and hedge funds. Additional topics include tax consequences of investment decisions and cash management.

Requisites: Restricted to Master of Finance (FNCE-MS), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5260 (3) Fixed Income Investing

Fixed income securities are those that nominally promise a fixed stream of payments. They include government and corporate long and short term debt issues that far exceed the amount of corporate stock issues, as well as long term personal debt (i.e., home mortgages). Develops practical analytical tools for describing risk and return in fixed income securities, the markets where they are traded, and their purchase and management by financial intermediaries. This course will utilize the Bloomberg Lab to provide students with real world fixed income security analysis.

Requisites: Requires prerequisite course of MBAC 6060 or MSBC 5060 (minimum grade D-). Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MSBX 5270 (3) Applied Derivatives

Covers applications of financial derivatives and a range of topics, from market risk management to liquidity and counter party risk management in contemporary finance. Specifically, the course examines the pricing and use of financial derivatives, including options, forwards, futures, swaps and credit derivatives in risk management.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Finance (FNCE-MS) majors only.

Grading Basis: Letter Grade

MSBX 5310 (2-3) Customer Analytics

Provides a deep understanding of how to use data on customer behavior and preferences to inform managerial decision making. Introduces methods for causal inference, modeling consumer demand, and modeling firm decisions. Applications include long-run customer management decisions (customer acquisition and retention) and short-run marketing mix (product, price, promotion and distribution) decisions. The R programming language is used for course examples and assignments. Students are assumed to have a working knowledge of R and linear regression techniques.

Requisites: Restricted to MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5311 (2) Customer Analytics

Provides a deep understanding of customer centricity and its implications for the firm; state-of-the-art methods for calculating customer lifetime value and customer equity; analytical and empirical skills that are needed to judge the appropriateness, performance, and value of different statistical techniques that can be used to address an issue around customer acquisition, development, and retention. Students will use their knowledge of R programming in this course.

Requisites: Restricted to Professional MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

MSBX 5405 (3) Structured Data Modeling and Analysis

Explores both the functional and technical environment for the creation, storage and use of the most prevalent source and type of data for business analysis, ERP and related structured data. Students will learn how to access and leverage information via SQL for analysis, aggregation to visualization, create dashboards, and be source for business intelligence.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors BAMG-CERG, SCAG-CERG students only

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5410 (3) Fundamentals of Data Analytics

Exposes the students to commonly used platforms for statistical and predictive analytics. The class will go into depth of analytics using R before demonstrating the same concepts using SPSS and SAS. Students will learn to analyze large datasets, including textual analytics such as twitter-stream analysis using R.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5415 (2-3) Advanced Data Analytics

Explores the capabilities and challenges of data-driven business decision making and prepares students to lead in analytics-driven organizations. Introduces a set of common predictive and prescriptive analytics tools. Students apply the analytics tools to important decisions based on practical data sets from various companies. Analytics software packages are used extensively in the course.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA (PMBA), MS Supply Chain Management (SCMN-MS), MS Business Analytics (BUAN-MS) or (SCAG-CERG) or (BAMG-CERG) students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5420 (3) Unstructured and Distributed Data Modeling and Analysis

Moves the student beyond structured data and sources into business scenarios where data is semi-structured to unstructured such as those from social and web applications. Specific topics include introduction to SQL-on-Hadoop, NoSQL and related distributed processing technologies. Students will learn practical application and mechanisms for getting this sort of data ready for analytics.

Requisites: Requires prereq course MSBX 5405 (min grade D-). Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) Supply Chain Mgmt (SCMN) or Business Analytics (BUAN) or BAMG-CERG mjrs onl

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5430 (3) Advanced Statistical Analysis

Introduces advanced multivariate regression analysis and residual diagnostics, logistic regression, analysis of variance (ANOVA and MANOVA), time series models, and analysis of categorical variables. R, an open source programming language for statistical computing and graphics, will be used. It is assumed students have mastery of introductory statistics topics including descriptive tools, inference, and ordinary least squares regression.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5435 (3) Planning and Production

At the core of GDP and productivity is the science of planning new products of services in design, bringing them to market then producing and replicating it in reliable, dependable, scalable fashion. The course takes an in-depth look at the mechanisms for supporting new product/process design in a scaled, often world-wide supply chain. (MRP, Six Sigma, Modeling Software, Heuristic Model use).

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Additional Information: Departmental Category: MS: Business Electives

MSBX 5440 (3) Decision Analysis

Covers both behavioral/psychological aspects and analytical approaches to making decisions with multiple objectives. The focus for the course is learning to frame decisions that involve multiple stakeholders with multiple objectives and then learning the various techniques used to evaluate the choices. Influence diagrams, decision heuristics using spreadsheets, and decision trees will all be explored with user-friendly decision tree software.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA), MS Supply Chain Management (SCMN-MS) or MS Business Analytics (BUAN-MS) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5450 (3) Transportation and Logistics

Examines critical elements of distribution and logistics management, including physical distribution, supply chain echelon planning, warehouse (transportation note) selection and location, material handling, inventory quantity and location and other topics.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5470 (3) Procurement and Contracting

Examines principles and concepts of the acquisition process from commercial and governmental perspectives, focusing on the procurement process, including planning, source selection, solicitation writing, negotiations and oral discussions, contract preparation and administration.

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Professional MBA Program (PMBA) or MS Supply Chain Management (SCMN-MS) majors or SCFG-CERG students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5480 (3) Information Security Management

A broad introduction to the managerial issues of information security. Because security is multifaceted, the topics of the class range widely, including technical (e.g., cryptography), managerial (e.g., policy compliance), physical (e.g., door locks), and psychological (e.g. social engineering) issues. A key objective of the class is to develop a security mindset, in which one learns to think like an attacker for ways to exploit a system.

Requisites: Restricted to Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA), Business Analytics (BUAN) or Interdisciplinary Telecom (IPT) majors only.

MSBX 5500 (3) Security Analytics with Python and Machine Learning

Explores the application of data analytics to the domain of information security. Project-based class using python machine learning libraries to both build and deploy models for both supervised and unsupervised modeling algorithms. Business problem contexts include classifying the likelihood that a file or website is malicious based on either extracted static indicators or dynamic behavioral analysis (predictive analytics), as well as network anomaly detection on organizational network traffic data or on user account usage (unsupervised machine learning). Master of Business Admin (MBAD), MBA w/ Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA), Prof'l MBA Program (PMBA) can seek departmental approval to enroll upon demonstration of data networking and modeling capabilities.

Requisites: Restricted to Business Analytics (BUAN) or Interdisciplinary Telecom (ITP) majors only.

Grading Basis: Letter Grade

MSBX 5605 (3) Real Estate Investment and Risk Management

Examines strategies for mitigating the legal, property and portfolio risks associated with income properties. The course begins by examining risks created by leases. The course then analyzes the risks associated with a single property and examines how risk changes with portfolios containing multiple properties. Finally, the course examines how to optimally incorporate investment properties in mixed asset portfolios.

Requisites: Requires prerequisite course MBAX 6610 or MSBC 5610 (min grade D-). Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Prof'l MBA Program (PMBA) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: MS: Business Electives

MSBX 5680 (3) Real Estate Technology

Course objectives are: (1) to understand economic forces that bridge technology, entrepreneurship and real estate; (2) to investigate short-, medium-, and long-run effects of technology on residential and commercial real estate; (3) to communicate this information to Leeds School of Business students; and (4) to give current students the technology skills necessary to immediately add value for their potential employers.

Requisites: Restricted to Master's students in Real Estate (REAL), Master of Business Admin (MBAD), MBA with DUAL Degree (DMA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only, or business majors with 80 completed units.

MSBX 6290 (3) Textual Analysis in Business

This course will discuss basic ideas around natural language processing (NLP) in research in different "dismal science" disciplines, from Economics to Psychology and Political Science, with a bent/focus on financial markets and accounting statements. The course is meant for graduate students as an introductory course on textual analysis, with an emphasis on methods and applications in Finance and Accounting.

The language of choice for the course will be R. The course will be multilingual in that both the faculty and students can use other languages than R (python/perl/C).

Equivalent - Duplicate Degree Credit Not Granted: ACCT 6290

Requisites: Restricted to Master of Business Admin (MBAD), MBA with Dual Degree (DMBA), Joint Juris Doctor/MBA (JMBA) or Professional MBA Program (PMBA) majors only.

Recommended: Prerequisite MBAC 6060 (minimum grade D-).

Grading Basis: Letter Grade

Business Administration - Master of Business Administration (MBA)

The breadth of training that master of business administration graduates receive prepares them to become high-level managers and lead in a challenging and evolving business environment.

The MBA program is rigorous and comprehensive, and demands student commitment. The curriculum develops a set of broad-based, integrative skills. Core courses provide a solid foundation in both business management and analytical disciplines, a foundation that fosters continued career growth. In addition to core courses stressing key functional areas of business, students can choose electives specific to a chosen area of concentration.

The case study method and student projects are used broadly throughout all courses, and common areas of study such as ethics, technology, communications and international issues are integrated throughout much of the curriculum. Students learn about management theory and its practical applications in "real-world" situations. Lectures, seminars, team teaching, team projects and guest lectures are various approaches taken by the faculty to generate new ideas and encourage student input.

Diversity

The Leeds School of Business encourages qualified individuals to apply regardless of gender, race, religion, national origin, age, physical limitation or sexual orientation.

Requirements

Full-Time MBA

During the first semester of study, to ascertain degree requirements, MBA students should check in with a member of the student services team for the MBA program.

Students entering the MBA program take a prescribed sequence of classes before beginning elective courses. A total of 55 credit hours is needed to graduate. Students entering the MBA program are expected to complete the degree in two years. Transferred coursework is not accepted into the MBA program.

MBA students may enroll in up to 6 credit hours of elective coursework outside the Leeds School of Business with approval from the MBA Programs office, provided the remaining 18 credit hours of electives are taken within the MBA program. Coursework taken outside the Leeds School of Business must be at the graduate program level and pre-approved by the Leeds Graduate Office. Students may not take courses outside the University of Colorado Boulder and count them toward the degree. Students should contact individual departments for course listings and registration requirements for non-business courses.

All courses applied toward the 55 credit hours must be taken for a grade. Courses in which a C- or below is received are not accepted for credit toward the 55 credit hours and may have to be retaken. In this case, both grades are factored into the GPA. To withdraw from an elective course and receive a grade of W, a student must be earning a passing grade in that course. Students normally are not permitted to withdraw from courses after the sixth week of the semester. Students in the MBA program may not withdraw from specified MBAC lockstep coursework. An "I" is an incomplete grade. Use of the "I" is at the discretion of the course instructor and/or the dean. Students must ask for an incomplete grade. An "I" is given only when students, for reasons beyond their control, have been unable to complete course requirements. A substantial amount of work must have been satisfactorily completed before approval for such a grade is given.

Co-curricular activities are a critical counterpart to the classroom experience and enrich the value of the degree. Case competitions, student leadership positions, clubs, networking opportunities, guest speakers, small-group meetings with business leaders and professional mentoring all add to the immersive nature of the full-time program. Summer internship opportunities allow students to apply those core skills and develop new insights to help focus their choice of elective courses.

Full-Time Required Courses

Code	Title	Credit Hours
MBAC 6001	Foundations of Teamwork	1.5
MBAC 6002	Social, Moral and Economic Foundations for Business	1.5
MBAC 6003	Foundations of Leadership	1.5
MBAC 6011	Managerial Economics 1	1.5
MBAC 6012	Managerial Economics 2	1.5
MBAC 6020	Financial Accounting	3
MBAC 6031	Quantitative Methods 1	1.5
MBAC 6050	Strategy	3
MBAC 6051	Operations Management	3
MBAC 6060	Corporate Finance	3
MBAC 6081	Data and Decisions	3

MBAC 6090	Marketing Management	3
MBAC 6096	Managerial Communications	1.5
MBAC 6098	Professional Development I	1

Full-Time MBA Elective Courses

Students complete a total of 24 elective credits that count toward the 55 total credits needed for graduation. Electives are typically offered only once each academic year. This list is subject to change. Offerings each year will vary depending on faculty availability.

Code	Title	Credit Hours
Entrepreneurship		
MBAX 6100	Entrepreneurship	
MBAX 6110	Entrepreneurial Finance	
MBAX 6130	Sustainable Venturing

Evening/Hybrid MBA

The curriculum of the Evening MBA program and Hybrid MBA program includes the same core of required courses as the full-time MBA program, but delivered in a format that accommodates students who are fully employed. Building on foundational courses, evening MBA and Hybrid MBA students then choose 12 total credits of electives to add greater depth and specificity of knowledge.

The Evening MBA program maintains a traditional classroom format, with classes meeting twice per week (summer terms may vary). The Hybrid MBA is a combination of enhanced virtual instruction and traditional classroom format (one Saturday/month with variation during summer terms).

The Evening MBA Program and Hybrid MBA program each begin in May, with an innovative schedule that allows students to graduate in two years (six semesters). During the second year, students complete MBAC 6052 Capstone Projects. Students in the evening and hybrid programs have access to electives in both programs, including the following options. For additional information about courses by semester, see the Plan(s) of Study tab.

Evening/Hybrid MBA Required Courses

Executive MBA

The Executive MBA (EMBA) program is designed for leaders and executives with significant work experience, ideally a minimum of eight years, who are interested in increasing their leadership skills. This program is delivered in a cohort model that allows students to cultivate a professional and personal network throughout the program. Courses are delivered over two semesters each academic year for a total of four semesters. Enhanced virtual instruction provides flexibility so that students can focus on work and personal lives as well as school. During the semesters, students will continue to meet with teams and faculty periodically, leveraging technology for engagement. There are six intensive mandatory (one-week onsite) residencies throughout the program, which provide time for students to collaborate with their faculty and classmates regarding knowledge learned in respective classes. The one-week residencies are scheduled each semester of the program during the months of October, January and April. All the residencies will be in the United States except for the final residency, which will be onsite for ten days in a location outside of the United States. The EMBA program begins in August of every year with a (three-day onsite) orientation on the Boulder campus. Exact dates can be found under the Executive MBA Course Schedule (<https://www.colorado.edu/business/executive-mba-program/executive-mba-curriculum/executive-mba-course-schedule/>).

The EMBA curriculum begins with a first year of rigorous business fundamentals. Leadership is spread throughout the program with themes around inclusion, executive and ethical responsibilities, and negotiation. During the second year, students will learn advanced topics in marketing, finance and strategy as well as innovative business practices and how an entrepreneurial mindset can be leveraged. Academic enrichment opportunities will be offered throughout the program as well as access to personal executive coaching. The EMBA curriculum comprises 45 total credits. Please see Plans of Study for a detailed course list.

Dual Degree Programs

Juris Doctor/MBA

The purpose of this dual degree program is to allow students admitted to both the School of Law and the Leeds School of Business to obtain the juris doctor (JD) and the master of business administration (MBA) degrees in four (or fewer) years of full-time study. The program is designed to train students for careers in which business administration and law overlap.

Admission

To be eligible for the JD/MBA dual degree program of the School of Law and the Leeds School of Business, a student must apply separately to and be admitted by each of the two schools under their respective admission procedures and standards.

Students may elect the dual degree program at the time of initial application to both schools, or they may apply for the dual degree program during their first year of study in the degree program of either school.

Course of Study

A student enrolled in the JD/MBA program may commence studies under the program in either the School of Law or the Leeds School of Business. Dual degree students are strongly encouraged to begin their course of study at the School of Law. However, a student must take the first year of the JD curriculum as a unit exclusively in the School of Law. Likewise, a student must take the first year of the MBA curriculum as a unit exclusively in the Leeds School of Business. Students can then take additional courses necessary to meet the requirements of the degree programs of the two schools.

No student in the dual degree program shall be allowed to take fewer than 9 credit hours or more than 16 credit hours during any term (excluding summer terms) without receiving the consent of the program advisor in each school in which courses are being taken.

Credit for Law Courses in the JD/MBA Program

The Leeds School of Business grants credit toward the MBA degree for up to 12 credit hours of acceptable performance in law courses taken by a JD/MBA student at the School of Law. Core courses required in the law school program cannot be counted toward the 12 credit hours. A student must earn at least a 77 grade in a law school course to be accepted for Leeds School of Business credit. For credit to be granted, the law school courses must be approved before enrollment by an MBA advisor. Only courses taken after admission into the MBA program are credited toward the degree.

Grading in the Dual Degree Program

Leeds School of Business credit for courses completed in the School of Law as part of the joint degree program is recorded on a *pass/fail* basis and is not included in the required MBA 3.00 cumulative average.

MBA/MD

The Leeds School of Business and the University of Colorado School of Medicine offer students the ability to earn both an MBA and a Doctor of Medicine (MD) degree.

With the MD/MBA dual degree, students acquire expertise in business essentials like leadership, finance, accounting, marketing, strategy, innovation and social responsibility. As collaborative leaders, these medical professionals with business fundamentals are positively impacting patient care and healthcare delivery by leveraging their knowledge in powerful new ways. As the medical field rapidly changes and evolves—with new technologies, shifting professional roles, a dynamic public policy landscape, and new healthcare delivery models—physicians need leadership skills now more than ever to tackle complex issues and ensure high standards of care.

Admission

To ensure student success—both academically and professionally—admission to the program is competitive. Each application undergoes a holistic review, including an evaluation of academic strengths and a high-level assessment of compatibility with the Leeds MBA program. SOM students must apply to become a dual degree student one year prior to beginning the MBA curriculum. All dual degree students must fulfill all requirements for each program, as well as all applicable dual degree requirements.

Course of Study

The 5-year dual degree from CU Leeds School of Business and CU School of Medicine requires 31 credits of MBA core coursework. Dual degree students begin with the MD program. Students must complete two academic years of the MD program prior to starting the MBA experience. MBA requirements will be satisfied with successful completion of core curriculum (summer/fall/spring).

MBA/MFA

The Leeds School of Business, in conjunction with the Department of Art and Art History, offers students the ability to earn an MBA and an MA in fine arts through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in digital marketing, web design, e-commerce, gallery/museum administration and private art consulting.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in fine arts spend the first year of their dual degree program exclusively in either the business school or the fine arts program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and fine arts elective courses.

Credit for Fine Arts Courses in the MBA/MA Fine Arts Program

Dual degree students in studio arts are required to complete 43 credit hours of MBA coursework and 45 credit hours of fine arts coursework. Dual degree students in art history are required to complete 43 credit hours of MBA coursework and 30 credit hours of fine arts coursework.

MBA/MA in Anthropology

The MBA/MA in anthropology dual degree program enables students to earn an MBA and an MA in anthropology simultaneously over three or four years depending on the student's subdiscipline in anthropology. Students in this MBA/MA program pursue careers in managing the business aspects of archaeological projects, working in the growing

field of corporate cultural anthropology and ethnography or museum management.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in anthropology spend the first year of their dual degree program exclusively in either the business school or the department of anthropology. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and anthropology elective courses.

MBA/MA in German Studies

The MBA/MA in German studies dual degree program enables students to earn an MBA and an MA in German studies simultaneously over three or four years. Students in this MBA/MA program pursue careers in international business.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in German studies spend the first year of their dual degree program exclusively in either the Leeds School of Business or the Department of Germanic and Slavic Languages and Literatures. In the second year, courses are taken exclusively in the other department. The remaining year(s) offers students the opportunity to take both MBA and German studies elective courses.

MBA/MA in Theater and Dance

The Leeds School of Business, in conjunction with the Department of Theatre and Dance, offers students the ability to earn an MBA and an MA in theatre or dance through a three-year dual degree program. Students in the MBA/MA dual degree program pursue careers in a wide variety of fields and jobs in the world of the performing arts. Types of organizations include theatre companies, dance companies, opera companies, symphonies, arts councils, performing arts complexes, civic auditoriums and arts presenters.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MA in theatre and dance spend the first year of their dual degree program exclusively in either the business school or the theatre/dance program. In the second year, courses are taken exclusively in the other department. The third year offers students the opportunity to take both MBA and theatre/dance elective courses.

Credit for Courses

Dual degree students are required to complete 43 credit hours of MBA coursework and 24 credit hours of theatre/dance coursework. A minimum of 67 approved credit hours must be completed to earn both degrees.

MBA/MS in Computer Science

The MBA/MS in computer science enables students to earn an MBA and an MS in computer science over three or four years. Students in this MBA/MS program have career interests that combine corporate business and technology.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MS in computer science spend the first year of the dual degree program exclusively in either the business school or the computer science department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and computer science electives.

MBA/MENV

An MBA degree in combination with the Masters of the Environment (MENV) degree will provide a student with a powerful set of tools and knowledge to expand career options. The MBA offers a valuable business toolkit—including leadership, critical thinking and communication skills. This option allows a student to complete two specialized master's degrees in less time than it would take to earn both separately.

Admission

Students must apply to each program separately and meet the respective application requirements and admissions standards for each program. Students admitted simultaneously to both programs are advised to begin the MBA program first. A person may elect the dual degree program at the time of initial application to both schools; or a student enrolled in the applicable degree program of either school may apply for admission to the other school and elect to be enrolled under the dual degree program.

Course of Study

Dual degree students in their second year will exclusively enroll in the Masters of the Environmental Program. Students will choose a specialization and enroll in all core and required MENV courses. MENV specializations include: Environmental Policy; Public Lands and Natural Resources; Renewable and Sustainable Energy; Sustainable Food Systems; and Urban and Regional Sustainability. Both degrees must be awarded simultaneously. Dual degree students must maintain the academic and ethical standards required of both programs. Students in good standing in one school, but not the other, may be allowed to continue in the school in which they are in good standing. Students who do not complete the dual degree program requirements (i.e., who withdraw for any reason from one of the two programs) will be required to meet the full requirements of the remaining program in which they are enrolled. Dual degree students must complete a Dual Degree Curricular Program (DDCP) form for their program and present to both advisors prior to beginning the degree. This is the initial map of the course sequence to meet the dual requirements and can change over time.

Credit for Courses

The MBA/MENV dual degree program allows for 9 MBA credits to be used for MENV degree requirements, and 12 MENV credits to be used for MBA degree requirements. Dual degree students will be required to complete 43 hours of MBA coursework and 39 hours of MENV coursework, for a total of 82 hours of combined coursework.

MBA/MS in Environmental Studies

The MBA/MS in environmental studies enables students to earn an MBA and an MS in environmental studies over three or four years. Students in the MBA/MA program have career interests that combine corporate business and environmental protection, the management of renewal energy, water conservation or environmental programs.

Admission

Applicants must apply to both programs and must meet the application requirements for each program separately. Students may apply simultaneously to both programs or may apply to the second program after starting the first master's program, provided they do so during the first year of study.

Course of Study

Students in the MBA/MS in environmental studies spend the first year of the dual degree program exclusively in either the business school or the environmental studies department. In the second year, courses are taken exclusively in the other department. The remaining year(s) students may take both MBA and environmental studies electives.

MBA/MS in STEM

The purpose of this dual degree program is to allow students admitted to the Leeds School of Business as a dual degree student to obtain the master of business administration (MBA) and master of science in business analytics or supply chain management degrees in two years of full-time study. An MBA degree in combination with the MS degree will provide students with a set of business tools to develop leadership, critical thinking and communications skills as well as a specialization in one of the STEM designated areas of either Business Analytics or Supply Chain Management. The MBA/MS offers students the opportunity to earn both degrees together in less time than if the degrees were earned separately.

Admission

To be eligible for the MBA/STEM dual degree program, a student must apply directly to the Leeds School of Business choosing dual degree status. Applicants must select the MBA/MS-SCMN or the MBA/MS-BUAN dual degree option at the time of application to be evaluated for admission to both programs, simultaneously. Students may not apply to the MBA program, and subsequent to the start of classes, add the dual degree designation. Students must meet the admissions standards for each program separately. The Graduate Management Admissions Test (GMAT) or Graduate Record Examinations (GRE) will be used as the standardized examination for admissions to both the Leeds School of Business MBA and MS Supply Chain Management or Business Analytics programs.

Course of Study

Dual degree students must begin with the MBA program, and will take courses exclusively in the MBA program during the first year. The second year of the dual degree program will consist of the existing MS Supply Chain Management or MS Business Analytics curriculum, in full: 33 credits over three semesters.

Credit for Courses in the MBA/STEM Program

Students are required to complete 37 credit hours of MBA coursework and 33 credit hours of MS coursework. Certain MBA elective courses are part of the STEM curriculum and must be taken in the second year as an MS student.

MBA/MS in Technology, Cybersecurity and Policy

The Leeds School of Business, in conjunction with the College of Engineering and Applied Science, offers a dual degree program resulting in a master of business administration (MBA) and master of science in technology, cybersecurity and policy (MS/TCP). The dual degree program combines broad-based business management study with an in-depth understanding of telecommunications technology. This program prepares students to be competent, effective managers in the telecommunications industry.

Admission

An individual must apply separately and be admitted to both programs under each school's or college's admission procedures and standards. Applicants are encouraged to apply to the programs concurrently.

Course of Study

Students in the MBA/MS in technology, cybersecurity and policy spend the first year of the dual degree program exclusively in either the business school or the TCP program. In the second year, courses are taken exclusively in the other department. In the third year students will take both MBA and TCP elective courses to complete both master's degrees.

Credit for Courses

Dual degree students are required to complete 43 credit hours of MBA coursework and 36 credit hours of TCP coursework. A minimum of 79 approved credit hours must be completed to earn both degrees.

Business Administration - Doctor of Philosophy (PhD)

The Leeds School of Business provides a dynamic professional atmosphere comprised of quality diverse faculty and PhD students, framed by a thriving business community and a beautiful environment. The Leeds PhD program prepares students for research careers at leading universities and equips students with a deep understanding of the most influential research within the disciplines, as well as the tools necessary to contribute state-of-the-art research advancing these disciplines:

- accounting
- finance
- marketing
- organizational behavior and information systems
- strategy, entrepreneurship, and operations

In addition to the creation of knowledge, the program also supports the dissemination of that knowledge from classrooms to the profession at large. The program is small enough to ensure that all students can receive the mentoring needed to innovate at the frontier of their disciplines.

Dr. Edward Van Wesep chairs the PhD Curriculum and Policy Committee which oversees the Leeds PhD program.

Requirements

PhD students must complete all Graduate School, Leeds School of Business and division requirements to be conferred the PhD in business administration. All PhD students are required to complete at least 30 credit hours of coursework and at least 30 credit hours of dissertation at CU Boulder. Additional coursework may be required as determined by the academic advisor. To comply with this 30-credit-hour requirement, a course must be taught by a member of the university's graduate faculty, must be at the 5000 level or above, and the student must achieve a grade of B- or better. Most students complete 7000- and 8000-level PhD seminars.

PhD students in all program areas except for Accounting are required to maintain a minimum GPA of 3.3 or better while in residence in the program. Accounting students must maintain a minimum GPA of 3.0.

PhD students are required to assume teaching apprentice roles for three sections of any course and then independently teach two courses to achieve teaching proficiency. PhD students are also expected to attend eight (8) workshops and/or trainings while in residence.

Time Limit

PhD students have six years from the commencement of coursework to complete all requirements of the degree, but most PhD students complete their program within five years.

Comprehensive Examination

Before admission to candidacy, a PhD student must pass a comprehensive examination in the field of concentration. The examination may be oral, written or both, and will test the student's mastery of a broad field of knowledge, not merely the formal coursework completed. Each division will determine the required content, length and standards of evaluation for the exam. Check with the division as to the specific requirements for the comprehensive exam.

Admission to Candidacy

PhD students are admitted to candidacy according to Graduate School procedures and requirements. PhD students shall complete all coursework and any other requirements listed on their degree plans, earn at least four semesters of residence and successfully pass the comprehensive exams before admission to candidacy is approved by the Graduate School. In addition, requirements related to academic quality of work, graduate-level coursework, the minimum number of course credit hours, and graduate faculty membership must be met before admission to candidacy is approved.

Dissertation Proposal and Final Defense

All PhD students are required to successfully present and defend a dissertation proposal on a subject approved by the candidate's dissertation committee. The dissertation proposal must be passed before attempting to defend a final dissertation.

A final dissertation must be based upon original investigation showing mature scholarship and critical judgment, as well as competence with research tools and methods. To be acceptable, the dissertation must be a significant contribution to knowledge in the candidate's primary field and must comply with the CU Boulder Graduate School Thesis and Dissertation Specifications. All PhD students are required to present a final dissertation defense, wh

ich is open to the public.

Accounting - Master of Science (MS)

A master's degree in accounting prepares students to become financial professionals who can help a wide range of organizations thrive. Accounting is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through the program, graduates develop specific expertise in the area of accounting by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience, propels graduates to be proficient in the "language of business" that is accounting.

Typically, over 90 percent of MS accounting students have a job in accounting and financial advisory fields at graduation, and the demand for CU Boulder-educated accountants continues to soar. Many graduates begin careers with public accounting firms in audit, tax or advisory business services. Others prefer information management, tax or compliance positions within corporations. Still other opportunities exist in financial management, nonprofits and government agencies.

MS Program

Coursework in accounting conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding and use of information, which enables students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

Accounting students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses they may need to fulfill in order to obtain licensure in a particular state.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 638).

Requirements

The MS accounting degree consists of ten graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

Prerequisites

Four intermediate-level accounting courses must be completed before starting the master's-level accounting courses.

Plan(s) of Study

Students will meet with their advisors to plan out their course of study to meet degree requirements.

Business Analytics - Master of Science (MS)

The MS degree in business analytics focuses on the exciting and fast-growing field of "big data." Merging developments in marketing and customer analytics with operations research, business analytics, aspects of computer science and statistical methods, the specialization offers a technical, quantitative and statistically intensive program designed to train specialists in turning "big data" into business decisions. Analytics

may be used as input for human decisions or may drive fully automated decisions about why some data pattern is observed, what will happen next and how a firm can adapt to optimize that outcome. Students have an option to customize their curriculum by specializing in decision science, healthcare analytics, marketing analytics, research analytics or security analytics.

This 10-month program includes extensive coursework and an application of materials, preparing students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Distance Education Option

Students may enroll in the MS Business Analytics or MS Supply Chain degree program through distance education (online) and complete the same degree requirements established for each MS program. Distance education offers regularly scheduled on-campus graduate courses to remote off-campus (distance) students using advanced lecture-capture technology. Distance students participate either synchronously (real time) or asynchronously (time-shifted). Instructors, course schedules, assignments, projects, exams, and evaluation are identical for on-campus and off-campus students. Distance education simply makes regularly scheduled on-campus courses available to remote off-campus students as described above. Because distance education uses on-campus courses, courses are always term-based (i.e., follows the regular academic schedule).

Designed for working professionals, the online option allows students to enroll part-time and follows the same curriculum for the on-campus degree option. Please see degree requirements and Plan(s) of study specific to Business Analytics or Supply Chain. Based on circumstance and timeline to completion, students enroll in 1-3 courses each semester and will complete the degree in a minimum of one year and maximum of four years.

Note: Online sections of elective courses for the Decision Sciences track and the Security Analytics track in MS Business Analytics are not guaranteed. The Marketing track in MS Business Analytics delivers online sections of elective courses.

For more information, connect with the individual graduate program directly.

MSBX 5420	Unstructured and Distributed Data Modeling and Analysis	3

Electives	
Students will enroll in three of the following track-specific electives. (See track sections below.)	9
Total Credit Hours	33

Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in business analytics. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on analytics project management experience prepares graduates to make an immediate meaningful contribution in the workplace.

For additional information, please visit Leeds School Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) or email us at leedsgrad@colorado.edu.

Tracks

The MS in Business Analytics offers tracks to develop analytic skills in specific disciplines: healthcare analytics, decision science, marketing analytics, research analytics and security analytics. Learn more below and on the Plan(s) of Study tab.

Finance - Master of Science (MS)

The nine-month MS in finance provides extensive coursework and an in-depth application of materials, preparing students for a range of job opportunities. In addition to the coursework, enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support the "whole student" experience by incorporating professional development into the academic experience.

The focused finance curriculum offers students a firm grounding in general finance, and helps to develop the specific skills necessary to pursue careers in a variety of financial fields.

The MS degree in finance offers two tracks to develop skills in specific disciplines:

- The **investment management track** provides the skills necessary to pursue a career with an investment management firm and preparation to take the CFA Level I exam.
- The **corporate finance/consulting track** prepares students for a career in management consulting, investment banking, private equity and venture capital.

For additional information, please visit Leeds School Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) or email us at leedsgrad@colorado.edu.

Real Estate - Master of Science (MS)

The MS in Real Estate program is a full-time, nine-month, on campus program. The degree provides students with a comprehensive foundation in the financial, investment and operational aspects of real estate. Students develop expertise in quantitative financial analysis, essential business concepts and leadership techniques. As technology continues to redefine the real estate industry, data-driven insights on the use of commercial and residential space are critical to maximizing value and impact. With this degree, students will acquire the analytical skills and innovative thinking necessary to provide these insights. World-class faculty, along with industry influencers, draw from in-depth knowledge of the latest industry trends and business applications giving students an edge in a rapidly advancing field.

This program also incorporates optional co-curricular opportunities including market treks, case competitions, networking events and skills training like ARGUS and advanced real estate Excel modeling.

Requirements

Admission Requirements

Applicants for the real estate track must have a minimum of two years' relevant work experience.

For additional information, please visit Leeds School's Graduate Programs (<http://www.colorado.edu/business/ms-programs/>) webpage or email leedsgrad@colorado.edu.

Required Courses

Core Courses		
MSBC 5015	Managerial Economics	1.5
MSBC 5020	Financial Accounting	1.5

Supply Chain Management - Master of Science (MS)

The supply chain management master's degree provides students with the expertise needed to manage business supply chains in the global economy. This ten-month program includes extensive coursework which prepares students for a range of job opportunities. In addition to the academic coursework, four enrichment seminars in topics ranging from teamwork and leadership to ethics and corporate social responsibility support our commitment to developing the "whole student" by incorporating professional development into the academic experience.

Based on an "action learning" model, the program is designed to provide hands-on supply chain project management experience, amplified by shared experiences with other students.

Graduates will be prepared for responsible and influential jobs in a variety of organizations, including large manufacturing, retail and distribution organizations; transportation companies; supply chain software companies; and supply chain consulting firms.

Distance Education Option

Students may enroll in the MS Business Analytics or MS Supply Chain degree program through distance education (online) and complete the same degree requirements established for each MS program. Distance education offers regularly scheduled on-campus graduate courses to remote off-campus (distance) students using advanced lecture-capture technology. Distance students participate either synchronously (realtime) or asynchronously (time-shifted). Instructors, course schedules, assignments, projects, exams, and evaluation are identical for on-campus and off-campus students. Distance education simply makes regularly scheduled on-campus courses available to remote off-campus students as described above. Because distance education uses on-campus courses, courses are always term-based (i.e., follows the regular academic schedule).

Designed for working professionals, the online option allows students to enroll part-time and follows the same curriculum for the on-campus degree option. Please see degree requirements and Plan(s) of study specific to Business Analytics or Supply Chain. Based on circumstance and timeline to completion, students enroll in 1-3 courses each semester and will complete the degree in a minimum of one year and maximum of four years. For more information, connect with the individual graduate program directly.

Requirements

Admission Requirements

Admission to the program may recommend or require preparation or refresher courses in statistics, math and business.

Experiential Projects

The experiential project pairs students with clients in industry to work on important practical problems in supply chain management. Students work under the supervision of faculty and meet together weekly to discuss progress, jointly work on problems and to share experiences. This hands-on project management experiences prepares graduates to make an immediate meaningful contribution in the workplace.

Taxation - Master of Science (MS)

A master's degree in taxation prepares students to become financial professionals who can help a wide range of organizations thrive. Taxation is extremely important to any company because financial information, as analyzed and interpreted by CPAs, allows executives to make informed business decisions that help companies become more successful. Through our program, our graduates develop specific expertise in the area of taxation by strengthening and enhancing the ability to interpret and communicate information about a company's operations and finances. Academic experience, combined with a practical internship experience, propels our graduates to be proficient in the "language of business" that is taxation.

Coursework in taxation conveys a comprehensive understanding of the theory and concepts that underlie accounting practice. Emphasis is placed on logical reasoning and the development, understanding, and use of information, which enable students to solve problems in accounting and management of organizations and to make sound accounting policy decisions.

CPA Licensure

Taxation students have many career options to consider after graduation. Those who aspire to pursue careers in public accounting must become Certified Public Accountants (CPAs). The CPA designation is not as critical for other career paths in accounting, but becoming a CPA can be advantageous in any accounting career.

While the CPA requirements of most states have similar components and required courses, the specifics of those requirements differ greatly. Students interested in ultimately pursuing CPA licensure should contact the applicable state licensing board to determine any requirements, including particular courses, they may need to fulfill in order to obtain licensure in a particular state.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Business Administration - Bachelor of Science (BS) (p. 638).

Requirements

The MS taxation degree consists of 10 graduate-level courses. Students can opt to take additional courses. The degree can be completed in 9–20 months, depending on whether the student wants, and is offered, a busy-season (spring) internship.

The following suggested course pathways are recommended based on a traditional starting date (fall semester), completion date (20 months), and undertaking a busy-season internship. Students can deviate from the suggested pathways depending on their personal timeline and experiences.

Prerequisites

Four intermediate-level accounting courses must be completed before starting the master's-level accounting courses.

Plan(s) of Study

Students will meet with their advisors to plan out their course of study to meet degree requirements.

Business Analytic Methods - Graduate Certificate

The business analytic methods certificate courses comprise the foundational topics in a business analytics curriculum, providing business analytics training for mid-career professionals in a number of roles, including human resources, pricing, optimization, procurement, finance, real estate and acquisition.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

Applicants must provide:

- Statement of purpose (1–2 pages) explaining how the business analytic methods graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Course Requirements

Business analytic methods certificate courses include the courses listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBX 5410	Fundamentals of Data Analytics	3
MSBX 5405	Structured Data Modeling and Analysis	3
MSBX 5415	Advanced Data Analytics	3
MSBX 5420	Unstructured and Distributed Data Modeling and Analysis	3
Total Credit Hours		12

Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

Marketing Analytics - Graduate Certificate

The marketing analytics certificate courses comprise the major topics in an advanced business analytics curriculum, providing marketing analytics training for mid-career professionals in business analytics or marketing roles. The courses have been specifically selected in order to teach students core concepts and targeted skills in marketing analytics

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS business analytics degree.

Requirements

Admission Requirements

Applicants must provide:

- Statement of purpose (1–2 pages) explaining how the marketing analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Courses

Marketing analytics certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
APRD 6342	Digital Advertising	3
MBAX 6330	Market Intelligence	3
MSBX 5310	Customer Analytics	3
MSBC 5070	Survey of Business Analytics	3

Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

Supply Chain Analytics - Graduate Certificate

The supply chain analytics certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in the fundamentals of supply chain analytics.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

Students educated in supply chain analytics will have the knowledge to expand their careers as analysts in supply chain network design, logistics, purchasing and procurement, inventory and production control, transportation network design, facilities location planning, demand forecasting, long term aggregate planning and sub-specialties therein.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)
- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

Additional Materials

In addition, applicants must provide:

- Statement of purpose (1–2 pages) explaining how the supply chain analytics graduate certificate will further their professional and/or personal interests
- Formal transcript from an accredited institution of higher education showing proof of completion of an undergraduate degree
- Current resume
- One letter of recommendation

Courses

Supply chain analytics certificate courses are listed below. All courses must be passed with a B grade or better to count towards the certificate.

Code	Title	Credit Hours
MSBX 5410	Fundamentals of Data Analytics	3
MBAX 6410	Process Analytics	3
MSBX 5415	Advanced Data Analytics	3
MBAX 6843	Supply Chain and Operations Analytics	3

Plan(s) of Study

Some courses are only offered in specific semesters. New students will work out a plan with an advisor to meet all certificate requirements in their desired timeline.

Supply Chain Foundations - Graduate Certificate

The supply chain foundations certificate courses comprise the major foundational topics in any supply chain management curriculum, providing necessary background for further advanced study. The four courses have been specifically selected in order to teach students core concepts and targeted skills in supply chain management.

Designed for nondegree seeking students including working professionals, our online graduate certificates allow students to enroll part-time and advance at their own pace. Following the same curriculum provided to students on campus, online certificate students can choose to take courses synchronously with the live class, or asynchronously at their leisure over the course of the semester. As students progress through the certificate, they have the option to become graduate degree-seeking, applying their certificate coursework toward a formal MS supply chain degree.

Requirements

Admission Requirements

To be considered for the graduate certificate, applicants must possess an undergraduate degree. Leeds graduate students can apply through the Leeds online application (<https://leeds.apply.colorado.edu/apply/>).

Course Prerequisite

Students applying to the graduate certificate are required to complete a course prerequisite. The course prerequisite may be satisfied by *one* of the following:

- Successful completion of MSBC 5460 (or successful completion of similar coursework at another university)

- Successful completion of the non-credit Coursera course Supply Chain Management Strategy
- Relevant work experience.

Students seeking to meet the prerequisite with experience will need to demonstrate and document proficiency in the relevant topic area by submission of work history and work product. A qualifying test may also be required.

Additional Materials

In addition, applicants must provide:

Education

The School of Education offers programs that prepare individuals to lead in a wide array of educational settings, including teaching in K–12 classrooms, conducting educational research, developing evidence-informed policy and designing innovative learning environments both in schools and in community-based settings.

Graduate programs in the School of Education serve practicing teachers, higher education professionals, as well as those seeking to improve education through rigorous research and evidence-informed policy and practice. The School of Education's doctoral program is a cohort-based, full-time program that prepares individuals to lead in universities, research or policy institutes, state or government agencies and innovative non-profit organizations.

Mission

Our mission in the School of Education is grounded in a lived commitment to democracy, diversity, equity and justice. We teach and conduct research to make a positive difference with and in schools and communities. The work of our faculty, researchers, staff and students leads to evidence-based policy and practice. We aim for our graduates to be engaged and informed educators, researchers, policymakers and community leaders.

Licensure

The School of Education is authorized by the Colorado Department of Education and the Colorado Department of Higher Education to offer teacher preparation programs.

Because each state has its own laws and standards regarding teacher preparation, our teacher education programs do *not* prepare candidates for licensure in states other than Colorado. It is strongly recommended that students planning to seek professional licensure or certification in a state other than Colorado contact the appropriate licensing entity in the state in which they are, or plan to be, located in order to seek information and guidance regarding licensure or certification requirements and how a degree from CU Boulder may satiate another state's requirements for licensure in advance of program completion.

Policies & Requirements

Admission

Prospective students seeking admission to a graduate degree program should view electronic application instructions and admission information on the School of Education Graduate Program (<https://www.colorado.edu/education/academics/graduate-programs/>) webpage. GRE test scores are optional for admission to the doctoral programs.

Admission to all programs and degrees in the School of Education is selective. Master's admissions deadlines are October 1 for spring semester, January 15th for Fall and Summer for international students, and February 1st for Fall and Summer for domestic applicants. Note that our MA+ Licensure programs only accept applications for the Summer term. The admissions deadline for PhD applicants is November 15th for international applicants and December 1st for domestic applicants. The PhD program only accepts applications for the Fall semester. Students should visit the International Admissions (<http://www.colorado.edu/international/international-admissions/>) webpage for additional forms and information.

Advising

Graduate students are assigned an individual faculty advisor after admission and are required to submit a formal plan of study, approved by their advisor, before the end of the first full year of study.

Maximum Load and Part-Time Study

A maximum of 15 credit hours in any one semester may be applied toward graduate degree requirements. During the summer, 9 credit hours is the maximum that will be counted toward education graduate degrees. Within this limit, students may take up to 6 credit hours in a five-week summer term, and/or 3 credit hours in a three-week term. During the academic year for financial aid purposes, students will be regarded as having a full load if they are registered for 5 or more credit hours in courses numbered 5000 or above, or are registered in a minimum of 5 dissertation or 1 MA thesis hour. At least four semesters of residence credit hours, two of which must be consecutive in one academic year, must be earned for work taken at CU Boulder. See the Graduate School section for clarification.

Opportunities for Assistantships

The School of Education has a limited number of assistantships administered by the dean on the recommendations of faculty and the associate deans. Some assistantships involve the supervision of

student teachers; others involve helping professors in their teaching or research. Taxable stipends in amounts set by the university are paid for all assistantships. Appointments are usually made in terms of one-fourth time (10 hours a week) or one-half time (20 hours a week).

Master of Arts in Education

The master of arts degree requires one academic year or more of graduate work beyond the bachelor's degree.

The master's degree must be completed within four years of initial enrollment. The MA plan II (non-thesis) degree requires a minimum of 30 credit hours to graduate. See the *Graduate School section for discussion of plan I and plan II*. Students may transfer no more than 9 credit hours of work taken at another institution or as a non-degree student at CU Boulder.

All program areas have outlined a recommended or required program of study, and students pursuing a degree are expected to follow that program unless they have appropriate substitutions arranged in advance with their advisors and the associate dean of students.

At the beginning of the final term of study, each student must submit a "Candidacy Application for an Advanced Degree." These forms are available online through the Graduate School (<https://www.colorado.edu/graduateschool/admissions/>). If a minor is included, the form must first be signed by a representative of the student's minor department or program area. The form must first be signed by the student and the student's faculty advisor, then submitted to the School of Education Graduate Programs Coordinator for initial approval and then to the Graduate School for final approval. All students are required to pass a comprehensive-final examination or its equivalent, as determined by the program's faculty committee (For time limits and other information, see the Graduate School section under master's degree).

Doctor of Philosophy (PhD) in Education

Please see the PhD in Education (p. 1437) section of the catalog for details.

Graduation

A student must apply online through the student portal for graduation via the student portal; this is the official notification to the Graduate School of intent to graduate during a given semester. The student will be permitted to graduate during a specific semester only if you have applied by the deadline for that semester. If they do not graduate during the semester for which they applied, the student must apply online again for the new semester. Application submissions are not retained beyond the semester indicated online. The Graduate School determines all deadlines. The student is responsible for meeting all deadlines to ensure graduation during a particular semester.

Scholarships and Awards

Each year a number of merit-based Teaching Assistantships (TA), Research Assistantships (RA), Graduate Part-Time Instructors (GPTI), and fellowships are available in the School of Education to support full-time doctoral study. Half-time appointments (the maximum allowed) for 20 hours of work per week are the norm. Quarter-time RA, TA, and GPTI appointments (10 hours per week) may also be made. The monetary amount of stipends paid for assistantships are set by the university. These stipends are taxable income. Students must be considered full-time to hold an assistantship. According to university policy, full-time enrollment prior to completing the comprehensive examination

is five (5) hours of coursework per semester at the 5000 level or above or eight (8) semester hours of mixed level coursework. After passing the comprehensive examination, full-time is considered to be five (5) dissertation hours per semester.

The strongest doctoral applicants are nominated by the school for fellowships awarded by the Graduate School. Candidates apply in the spring semester for scholarships and awards for the following school year. Application procedures and deadlines are publicized by the Graduate School.

Students are eligible to apply for university-wide financial assistance through the Office of Financial Aid. The Office of Financial Aid, in conjunction with the Graduate School, awards financial aid in the form of grants and workstudy jobs on the basis of both need and merit criteria. Students must be registered for a minimum of four credits in order to be eligible for Financial Aid.

State and federal programs are available for loan cancellation or forgiveness for Colorado teachers of certain subjects or who teach in designated schools serving students from low-income families. Information about these opportunities may be found on the School of Education (<http://www.colorado.edu/education/admissions/financial-aid-scholarships/>) website.

Academic Standards

A grade average of B (3.00) or better is required for all work taken for any graduate degree. Transferred credits are not included when calculating grade averages.

A mark below B- will not be credited toward the PhD program; a mark below C is not acceptable for MA students. Students who do not maintain at least a B (3.00) average or better may be suspended by the dean of the Graduate School upon the recommendation of the School of Education. Students may also be suspended from the Graduate School for continued failure to maintain satisfactory progress toward the degree sought.

Please refer to the Graduate School (p. 1021) for details on Academic Standing.

Programs of Special Interest

Graduate Students of Color Collaborative

The Graduate Students of Color Collaborative (GSoCC) is a collective that strives to create and promote safe spaces for graduate students of color in the School of Education and across campus. In recognizing the unique challenges and isolation that students of color often face in graduate programs at CU, GSoCC aims to regularly offer social gatherings, opportunities to critically reflect and engage in discussions of race as it pertains to campus climate, as well as a formal presence representing graduate students in diversity initiatives across campus. In addition, GSoCC members seek to collaborate with other cultural, equity and diversity based organizations on campus and graduate student support structures ranging from first-year student community support to dissertation writing groups.

Programs of Study

Degree Programs

The degrees available in the various areas of graduate study are listed below.

Curriculum & Instruction

- Master of Arts

Educational Equity & Cultural Diversity

- Master of Arts

Educational Foundations, Policy & Practice

- Master of Arts
- Master of Arts in Higher Education

Learning Sciences & Human Development

- Master of Arts

Teacher Leadership

- Master of Arts

Education

- Doctor of Philosophy
The School of Education offers a PhD in Education, which has seven program areas of emphasis:
 - Educational Foundations, Policy, and Practice
 - Equity, Bilingualism, and Biliteracy
 - Learning Sciences and Human Development
 - Literacy Studies
 - Research and Evaluation Methodology
 - STEM Education
 - Teacher Learning, Research and Practice

Teaching Endorsements at the Graduate Level

Through the School of Education, CU Boulder offers advanced coursework leading to teacher added endorsements in the following areas:

- Culturally & Linguistically Diverse Education (grades K–12)
- Culturally & Linguistically Diverse Bilingual Education Specialist (grades K–12)
- Reading Teacher (grades K–12)
- Special Education Generalist (grades K–12)
- Special Education Specialist (grades K–12)

All of the above programs have degree, licensure or experience requirements that must be fulfilled before admission. Please check with the School of Education before applying.

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Anderson, Ronald
Professor Emeritus

Atteberry, Allison (https://experts.colorado.edu/display/fisid_1154598/)
Assistant Professor; PhD, Stanford University

- Baca, Leonard M.
Professor Emeritus; EdD, University of Northern Colorado
- Begley, Donna M. (https://experts.colorado.edu/display/fisid_131000/)
Senior Instructor
- Boardman, Alison Gould (https://experts.colorado.edu/display/fisid_141887/)
Assistant Research Professor; PhD, University of Texas at Austin
- Braaten, Melissa (https://experts.colorado.edu/individual/fisid_157744/)
Assistant Professor; PhD, University of Washington
- Briggs, Derek Christian Mauthner (https://experts.colorado.edu/display/fisid_129597/)
Professor; PhD, University of California, Berkeley
- Bullington, Sam N. (https://experts.colorado.edu/display/fisid_152528/)
Lecturer
- Cline, Ruth
Professor Emerita
- Cortez, Arturo (https://experts.colorado.edu/display/fisid_165977/)
Assistant Professor; PhD, University of California-Berkeley
- Dalton, Bridget Monroe (https://experts.colorado.edu/display/fisid_151711/)
Associate Professor; EdD, Harvard University
- Donato, Ruben (https://experts.colorado.edu/display/fisid_105537/)
Professor; PhD, Stanford University
- Dutro, Elizabeth (https://experts.colorado.edu/display/fisid_141157/)
Professor; PhD, University of Michigan Ann Arbor
- Dyrness, Andrea E. (https://experts.colorado.edu/display/fisid_159487/)
Associate Professor; PhD, University of California-Berkeley
- Engel, Mimi (https://experts.colorado.edu/display/fisid_159488/)
Associate Professor
- Escamilla, Kathy M. (https://experts.colorado.edu/display/fisid_109224/)
Professor; PhD, University of California, Los Angeles
- Flexer, Roberta
Professor Emerita
- Furtak, Erin M. (https://experts.colorado.edu/display/fisid_144504/)
Professor, Associate Dean; PhD, Stanford University
- Glass, Gene V. (https://experts.colorado.edu/display/fisid_149833/)
Research Professor; PhD, University of Wisconsin–Madison
- Glenn, Wendy J. (https://experts.colorado.edu/display/fisid_159489/)
Professor; PhD, Arizona State University
- Gort, Mileidis (https://experts.colorado.edu/display/fisid_157992/)
Professor, Associate Dean; EdD, Boston University
- Haas, John
Professor Emeritus
- Hand, Victoria (https://experts.colorado.edu/display/fisid_144609/)
Associate Professor; PhD, Stanford University
- Hodge, Stephen
Professor Emeritus
- Hoover, John J. (https://experts.colorado.edu/display/fisid_113520/)
Associate Research Professor; PhD, University of Colorado Boulder
- Hopewell, Susan Walsh (https://experts.colorado.edu/display/fisid_145039/)
Associate Professor; PhD, University of Colorado Boulder
- Hopkins, Kenneth
Professor Emeritus
- House, Ernie
Professor Emeritus
- Jurow, Aachey Susan (https://experts.colorado.edu/display/fisid_129478/)
Professor, Faculty Director, Associate Dean; PhD, University of California, Berkeley
- Kirshner, Benjamin R. (https://experts.colorado.edu/display/fisid_134707/)
Professor, Faculty Director; PhD, Stanford University
- Kraft, Richard
Professor Emeritus
- Lecompte, Margaret D.
Professor Emerita
- Leonardi, Bethy (https://experts.colorado.edu/display/fisid_151475/)
Assistant Professor; PhD, University of Colorado Boulder
- Linares, Rebecca (https://experts.colorado.edu/display/fisid_167227/)
Assistant Professor; PhD, University of Illinois at Urbana-Champaign
- Linn, Robert L.
Professor Emeritus
- Liston, Daniel P. (https://experts.colorado.edu/display/fisid_102033/)
Professor; PhD, University of Wisconsin–Madison
- Lizarraga, Jose (https://experts.colorado.edu/display/fisid_165966/)
Assistant Professor; PhD, University of California-Berkeley
- Lopez, Enrique J. (https://experts.colorado.edu/display/fisid_151426/)
Associate Professor, Faculty Director; PhD, Stanford University
- McGinley, William (https://experts.colorado.edu/display/fisid_102195/)
Associate Professor; PhD, University of Illinois at Urbana-Champaign
- Meens, David Eric (https://experts.colorado.edu/display/fisid_145241/)
Lecturer
- Meyer, Elizabeth Jackson (https://experts.colorado.edu/display/fisid_156354/)
Associate Professor, Associate Dean; PhD, McGill Univ (Canada)
- Molnar, Alex John (https://experts.colorado.edu/display/fisid_148836/)
Research Professor; MSW, University of Wisconsin-Milwaukee
- Moses, Michele S. (https://experts.colorado.edu/display/fisid_141025/)
Professor, Associate Dean; PhD, University of Colorado Boulder

Nogueron-Liu, Silvia (https://experts.colorado.edu/display/fisid_155783/)
Assistant Professor; PhD, Arizona State University

O'Connor, Kevin C.
Assistant Professor; PhD, Clark University

Otero, Valerie K. (https://experts.colorado.edu/display/fisid_118377/)
Professor, Faculty Director; PhD, University of California, San Diego

Pasquesi, Kira (https://experts.colorado.edu/display/fisid_158236/)
Instructor; PhD, University of Iowa

Pattisapu, Krishna Nichole (https://experts.colorado.edu/display/fisid_159863/)
Instructor, Faculty Director; PhD, University of Denver

Penuel, William Richard (https://experts.colorado.edu/display/fisid_149719/)
Distinguished Professor; PhD, Clark University

Polman, Joseph Louis (https://experts.colorado.edu/display/fisid_151296/)
Professor, Associate Dean; PhD, Northwestern University

Ramirez, Karen E. (https://experts.colorado.edu/display/fisid_116951/)
Senior Instructor; PhD, University of Illinois at Urbana–Champaign

Schultz, Kathy (https://experts.colorado.edu/individual/fisid_157988/)
Professor, Dean; MEd, University of Pennsylvania

Schwarz, Vanessa S. (https://experts.colorado.edu/display/fisid_163872/)
Instructor; PhD, University of Colorado Boulder

Shapiro, Ben (https://experts.colorado.edu/display/fisid_156418/)
Assistant Professor; PhD, Northwestern University

Shear, Benjamin R. (https://experts.colorado.edu/display/fisid_157747/)
Assistant Professor; PhD, Stanford University

Shepard, Lorrie A. (https://experts.colorado.edu/display/fisid_105949/)
Distinguished Professor; PhD, University of Colorado Boulder

Staley, Sara J. (https://experts.colorado.edu/display/fisid_155137/)
Assistant Professor; PhD, University of Colorado Boulder

Stillman, Jamy A. (https://experts.colorado.edu/display/fisid_156381/)
Associate Professor; PhD, University of California, Los Angeles

Tanksley, Tiera (https://experts.colorado.edu/display/fisid_165976/)
Assistant Professor; PhD, University of California-Los Angeles

Taylor, Edward V. (https://experts.colorado.edu/display/fisid_151510/)
Assistant Professor; PhD, University of California, Berkeley

Toliver, Stephanie (https://experts.colorado.edu/display/fisid_167065/)
Assistant Professor; MS, Florida State University

Webb, David C. (https://experts.colorado.edu/display/fisid_141204/)
Associate Professor; PhD, University of Wisconsin–Madison

Welner, Kevin G. (https://experts.colorado.edu/display/fisid_115565/)
Professor; PhD, University of California, Los Angeles

White, Terrenda Corisa (https://experts.colorado.edu/display/fisid_152828/)
Associate Professor; PhD, Teachers College at Columbia University

Willmann, Kent D. (https://experts.colorado.edu/display/fisid_148075/)
Instructor

Wilson, Terri Suzanne (https://experts.colorado.edu/display/fisid_155469/)
Associate Professor, Faculty Director; PhD, Columbia University

Zarske, Malinda Schaefer (https://experts.colorado.edu/display/fisid_120823/)
Lecturer; PhD, University of Colorado Boulder

Courses

EDUC 5001 (3) Framing Equity and Justice in the Humanities Classroom

Critically frames learning to teach for equity and justice within schools as systems. Orients students to the School of Education's mission and guiding principles of the Secondary Humanities program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 50 hours in local schools.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4001

Requisites: Restricted to Masters-level teacher licensure students with a English-Secondary Education (EDEN-LICG) or Social Studies-Secondary Educ (EDSS-LICG) plan.

Grading Basis: Letter Grade

EDUC 5002 (3) Framing Equity and Justice in the STEM Classroom

Critically frames learning to teach for equity and justice in Science, Technology, Engineering, and Mathematics [STEM] Classrooms. Orients students to the School of Education's mission and guiding principles of the CU Teach program. Provides opportunities for students to enact those principles with mentor teachers in local classrooms. Meets weekly on CU campus and involves a minimum of 40 hours in local schools.

Requisites: Restricted to Mathematics-Secondary Education (EDMA-LICG) or Science-Secondary Educ (EDSC-LICG) students only.

Grading Basis: Letter Grade

EDUC 5005 (3) Advanced Social Foundations of Education

Critically examines the intellectual and political forces that shape the aims, policies, and practices of K-12 education in the United States.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5010 (1) Race and Equity in Higher Education

This course introduces students to recent research and theory surrounding race, ethnicity, access, inclusion, and equity in higher education. It focuses on the development of knowledge, skills and awareness that is crucial in becoming an engaged scholar and practitioner in the areas of diversity, equity, and inclusion. We discuss the responsibilities, tensions, and opportunities one must have in creating and maintaining a pluralistic and inclusive campus for all. We also discuss ways in which themes of identity and diversity operate far beyond one-on-one relationships but rather extend to systems and structures that comprise a college and/or university environment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5011 (1) College Student Career Development

Explores the diverse aspects of career development for college students. Examines the different models of career services for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5012 (1) Higher Education Finance

Covers the major, basic elements of budgeting and finance in higher education. It is designed to address the budget process in colleges and universities, as well as the impact of budget activities on other areas of planning and operations within an institution. Enhances students' knowledge of both internal and external financial environments facing higher education.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5014 (1) Ethical Dilemmas in Higher Education

Examines ethical issues involved in higher education and student affairs administration. Uses real and fictional ethical cases to bring to light various moral and ethical tensions relevant for higher education and student affairs professionals.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5015 (3) International / Comparative Education

Comparatively studies education in other countries, emphasizing its role in developing nations, with an emphasis on successful models in basic literacy, primary education, secondary curriculum and teacher education. Analyzes political, social and economic policies and ideologies for their relevance to the development process, including the role of international organizations: World Bank, UNICEF, UNESCO, Peace Corps and Volunteer Agencies.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4015

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5020 (1) College Academic Advising

Explores the diverse aspects of academic advising for college students. Examines the different models of advising for students in different schools, colleges and majors.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5021 (1) College Athletic Affairs

Examines the relationship between student-athletes and the institution and explores how intercollegiate athletics fits into the academic enterprise of higher education. Key questions include: 1) what purpose does athletics serve and 2) for whose benefit? With these questions in mind, we examine the range of issues at the intersection of athletic administration, student development theory, and educational leadership and policy.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5022 (1) LGBTQ+ Topics in Higher Education

Explores the diverse aspects of college and university life for students, staff, and faculty who identify as LGBTQ+. Examines the different higher education supports and challenges for LGBTQ+ student populations.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5023 (1) College Admissions and Enrollment

Explores the diverse aspects of college and university student recruitment, outreach, admissions, and enrollment. Examines the different models of admissions processes and systems, with attention to relevant politics and professional practices.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5026 (1) Technology in Higher Education

Examines impact of technology on higher education and student affairs. Explores impact of technology on students and their development, and teaching and learning. Although technical aspects of technology are discussed in some depth, this is not designed as a 'technical' course; the content revolves around implications of technology as both a driving and a supportive element within higher education

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5027 (1) Institutional Advancement and Development in Higher Education

Examines the roles of institutional advancement, development, and fundraising in higher education and student affairs. Explores the impact of advancement on students, staff, and faculty, as well as on teaching and learning, research, campus life, and the larger community. The content will revolve around implications of development work as both a driving and a supportive element within higher education.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5028 (1) International Education in Higher Education and Student Affairs

To provide an introduction to the field of international education.

Students pursuing graduate studies in higher education administration will benefit from an overview of global student mobility trends and an exploration of career pathways within the field. In-class discussions, out-of-class readings, and guest speakers will guide student learning.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

EDUC 5030 (1) Accessibility and Students with Disabilities in Higher Education

Provides students with important knowledge about issues of accessibility and development for students with disabilities in higher education. Examines strategies to offer support and guidance to students with disabilities in order to foster a safe and engaging learning and living environment.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5031 (1) Institutional Research & Analytics in Higher Education

Examines the roles and uses of institutional research and data analytics in higher education and student affairs. Provides students with a foundational understanding of the field of institutional research and data analytics in higher education. Explores the activities in which institutional researchers engage, the tools they need to be successful in their jobs, the topics they study and issues they investigate.

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5032 (1) College Student Leadership Development

Surveys the study and practice of leadership and provides students with a variety of experiences to wrestle with large leadership questions. What is leadership? Who can be a leader? How is leadership an important aspect of understanding self and others?

Requisites: Restricted to Master's in Higher Education (MAHE) graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5035 (3) Proseminar: Parent and Community Involvement

Focuses on models and strategies for improving parent and community involvement in the schools. Discusses administrative concerns, such as parent advisory councils, and instructional concerns, such as helping children with school assignments.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5050 (3) Knowing and Learning in Mathematics and Science

The course is aimed at providing graduate students the opportunity to engage deeply with theories of mathematics and science learning for the purposes of designing engaging and affirming learning environments. The course is centered around reading deeply and critically in the literature on learning theory, coupled with a youth and community-based research project.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4050

Requisites: Restricted to graduate students only.

EDUC 5060 (3) Classroom Interactions

Students design and implement instructional activities informed by what it means to know and learn mathematics and science, and then evaluate the outcomes of those activities on the basis of classroom artifacts.

Students examine how content and pedagogy combine to make effective teaching. Students are required to work in a classroom 4 hours per week.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4060

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5065 (3) Curriculum Theories

Examines four central curricular traditions: progressive; conservative; radical; and spiritual. Highlights the strengths and weaknesses of various writers within each tradition with attention paid to the conceptual features and the practical implications of each educational view.

Encourages students to examine their own educational assumptions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5070 (3) Spirituality and Religion in Education

Examines features of religion, spirituality, and a liberal arts education, so as to further understand the constitutional, historical and cultural constraints on, and acceptable approaches to the study of religion and spirituality in American education. Specifically explores aspects of a contemplative orientation and the degree to which such an orientation should/can be pursued in K-12 public and higher education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5075 (3) Sociology in Education

In-depth analysis of theories and concepts in sociology and education. Evolution of curriculum, organization, and enrollment characteristics of American schools. Schooling, race, class, culture, gender, stratification, and educational reform in light of paradigmatic change in theories and concepts of sociology.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5085 (3) History of American Education

Highlights social and intellectual history perspectives of American educational history, major reform movements from the 19th century to Dewey, and assessment of how differences of race, class, ethnicity, religion, power, and gender affected American education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5105 (3) Teaching for Understanding and Equity

Addresses perspectives and evidence-based teaching practices that promote equity and access to conceptual understanding. Introduces the knowledge base on effective and socially just teaching practices, and the theories and research that support these practices. Explores the impact of theory and research on classroom instruction.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5112 (3) Educational Psychology and Adolescent Development

Analyzes fundamental concepts from psychology and the learning sciences to understand how educators can support youth development in and out of school. Includes service learning requirement. This course is not appropriate for in-service teachers.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4112

Requisites: Restricted to graduate students only.

EDUC 5115 (3) Issues in School Change and Reform

Examines recent developments in teaching, and trends in the philosophy and practice of education. Focuses special attention on a variety of issues central to school reform.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5135 (3) Story and Memoir

Explores narrative theory and the epistemological/stylistic commitments of stories as the basis for writing memoir, as well as for studying the written and spoken memoirs of others. We use the word memoir to mean a story of "how one remembers one's own life." Introduces and discusses narrative theory and selected memoirs. Students engage in reflection on their own narrative-making processes and evaluate their practical and analytic understanding of daily narrative practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4135

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5145 (3) Gender, Literacy, and the K-12 Classroom

Explores and critiques various conceptions of gender within popular and scholarly publications that have influenced how gender and sexual diversity is approached in classrooms. Builds a theoretical stance toward gender and sexual diversity that supports equity, engagement and achievement for all children and youth. Discusses teaching strategies that thoughtfully take into account gender identities and equity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5150 (3) Introduction to Qualitative Research Methods

Introduces students to qualitative research in education. Examines the foundations, design, methods and analysis of qualitative research methods. Readings include texts about the foundations and purposes of qualitative inquiry, and methodological readings about the application of research techniques. Students will complete a variety of small, hands-on projects that introduce major dimensions of qualitative research including observation, interviewing, and document analysis.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4150

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: General Education

EDUC 5165 (3) Children's Literature

Involves reading and evaluation of picture books, and emphasizes children's interests, authors and illustrators, multicultural literature, the components of narrative, and the features of illustrations. Examines connections between children's literature and children's development as writers.

Additional Information: Departmental Category: Graduate Education

EDUC 5179 (3) Seminar on Teaching and Teacher Education in Math and Science Education

This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

Recommended: Prerequisites EDUC 5060 and EDUC 6318.

Grading Basis: Letter Grade

EDUC 5205 (3) Elementary Mathematics Theory and Methods

Provides pre-service teachers opportunities to explore contemporary theories of learning, curriculum development, and pedagogical strategies pertaining to teaching elementary-level mathematics. Blends exploration in mathematical content with development of sophisticated mathematical models for teaching.

Requisites: Requires corequisite course of EDUC 4351. Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5215 (3) Elementary Science Theory and Methods

Provides pre-service elementary teachers opportunities to explore contemporary theories of learning, curriculum development, pedagogical strategies, and assessment. Blends scientific content, pedagogy, and practical applications.

Requisites: Requires corequisite courses of EDUC 4331 and 4341.

Restricted to Elementary Education (EDEL) majors only.

Additional Information: Departmental Category: Elementary Education

EDUC 5222 (3) Language Study for Educators

Focuses on the nature of linguistic development and performance. Examines works that reflect a range of scholarly approaches to language study, explores language use both in and out of school, takes up the relationships between language practices and power and considers implications for classroom teaching.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4222

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5235 (3) Language and Literacy Across the Curriculum

Explores the relationship between language and learning in math and science classrooms with the goal of developing teaching practices that engage students in using language as a tool for understanding and constructing meaning across the curriculum. Explores how language/literacy take on different forms and functions in different social contexts and academic disciplines.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4232

Requisites: Restricted to EDCl, EECD, EFPP, EPSY or REME graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5245 (3) Foundations of Reading Instruction K-12

Comparatively analyzes current and emerging philosophies and programs in K-12 with focus on teaching reading and thinking skills.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5255 (3) Digital Literacies and New Media

Engage in digital reading and writing experiences using tools for communication, collaboration, design and research. Students will discuss and critically reflect on the role of technology in literacy instruction, grounded on learning and literacy theories. Connections to English language arts include genre study of literary and nonfiction texts and using quality children's literature as mentor texts for multimodal craft.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5265 (3) Processes in Writing

Examines processes writers use from early ages to maturity by investigating current research related to writing curriculum, instruction, and policy. Includes opportunities for students to engage in inquiry related to writing curriculum and instruction in K-12 classrooms.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5275 (3) Assessment in Literacy

Assumes an interactive model of reading and supports the perspective of assessment as interrelated with curriculum and instruction; examines principles that guide the selection and interpretation of assessment strategies and tools, with a focus on students who are experiencing difficulties with literacy.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5285 (3) Reading Clinic Procedures K-12

Focuses learning on a select group of K-12 students to assess reading proficiency, develop appropriate instructional goals, and provide instruction that addresses these goals. Emphasis on interpreting assessment data, extending a repertoire of instructional strategies, and developing and implementing a strong instructional plan.

Requisites: Requires a prerequisite course of EDUC 5275 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5295 (3) Narrative and Story in the Humanities

Explores a wide variety of texts that might be used in secondary English and Social Studies classrooms. Examines philosophies and instructional approaches to the teaching of reading and literature. Considers the influence of story and storytelling in the construction of personal and societal meaning.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4295

Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) or Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5301 (3) Queer(ing) Topics in Education

Bring critical and queer theoretical perspectives to bear on an inquiry into what's counted as "normal" in social, historical, and political contexts of education in the United States. We'll explore queerness, queer theory, and queer pedagogy, in an effort to examine schooling as a heteronormative institution that has tended toward (re)producing heterosexism, homophobia, and violence against queer bodies and identities.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4301

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5310 (3) Social and Emotional Learning in Schools

Explore the ways SEL benefits students through investigating its purposes and goals, the competencies it seeks to promote, the characteristics of effective programs, and the range of program formats. We frame these topics through examining ongoing dilemmas in the field. We also conduct in-depth reviews of several programs and the research that supports them.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4310

Requisites: Restricted to graduate students only.

EDUC 5315 (3) Perspectives on Science

Explores contemporary ideas and issues in the history, philosophy and sociology of science education and science, science as a social and cultural activity and how contemporary issues in science relate to and impact educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4315

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5316 (3) Nature of Social Studies and Social Studies Education

Prepares teacher education candidates for teaching social studies in a social context. Participants will understand theoretical and developmental processes associated with social studies learning, methods for teaching social studies in a diverse society, and the integration of classroom instruction with the Colorado Academic Content Standards that foster such processes.

Requisites: Restricted to Educ-Curriculum Instruction (EDCI), Social Studies-Secondary Educ. (EDSS), Anthropology (ANTH), Economics (ECON), Geography (GEOG), History (HIST) or International Affairs (IAFS) majors only.

Additional Information: Departmental Category: Graduate Education

EDUC 5317 (3) Perspectives on Mathematics

Explores the historical development of mathematics as a human construct, and the relationship between the discipline and the contemporary school mathematics curriculum. Focuses on the sociology of mathematics education and how cultural traditions and societal needs influence the school mathematics curriculum and educational practice.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4317

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5325 (3) Queering Literacy in Secondary Classrooms

Engages theories and practices of literacy teaching and learning that challenge multiple forms of oppression. Using the tools of queer pedagogy, students will learn, develop, and enact strategies for planning and implementing literacy instruction that moves beyond inclusion of differences in the English/language arts and social studies curriculum.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4325

Requisites: Restricted to Master's teacher licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5330 (3) Secondary Social Studies Methods I

Explores effective social studies teaching techniques used to prepare secondary students for success in college, career, and civic life. An emphasis is placed on interpreting sources, understanding multiple perspectives, and employing critical thinking with diverse students.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4330

Requisites: Requires prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C-). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

EDUC 5345 (3) Secondary English Methods I

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of language, writing, and speaking and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4345

Requisites: Requires a prerequisite of EDUC 4001 or EDUC 5001 (both minimum grade C-). Requires corequisite of EDUC 4901. Restricted to teacher licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5355 (3) Secondary Social Studies Methods II

Explores effective techniques associated with reading, processing and assessing social studies subject area content with an emphasis on developing critical thinking skills and meeting the needs of diverse students.

Requisites: Requires prerequisite course of EDUC 4330 or EDUC 5330 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902.

Restricted to teacher licensure students in Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5365 (3) Secondary English Methods II

Explores the underlying principles and philosophies of several approaches to the teaching of English in the areas of reading, thinking, and viewing and the practical application of these methods in the secondary classroom. Provides support in constructing activities, assignments, assessments, and units that meet the differentiated needs of students given their diverse identities, lives, interests, and needs.

Requisites: Requires prerequisite course of EDUC 4342 or EDUC 5345 and EDUC 4901 (all minimum grade C-). Requires corequisite of EDUC 4902.

Restricted to teach licensure students in English (EDEN-LICG).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5375 (3-4) Problem-Based Math Instruction

Focuses on curriculum, materials, methods and assessment, and related aspects of instruction. Introduces best practices in teaching mathematics in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4375

Requisites: Restricted to EDCl, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5385 (4) Problem-Based Science Instruction

Focuses on curriculum, materials, methods, assessment, and related aspects of instruction. Introduces best practices in teaching science in middle and high schools. Students are required to work in a classroom 4 hours per week. Examines the Colorado Academic Content Standards.

Requisites: Restricted to EDCl, EDSC, or EDMA majors only.

Recommended: Corequisite EDUC 4023.

Additional Information: Departmental Category: Graduate Education

EDUC 5390 (3) Professional Teaching for Equity and Justice

Explores what it means to be a professional educator for equity and justice. Examines how such educators might best work to sustain their commitments through advocacy and care and how they might extend their role through involvement in the professional community and conversation at local, state, and national levels.

Requisites: Requires prerequisite of EDUC 5365 or EDUC 5355 (both minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICG) of Social Studies (EDSS-LICG).

Grading Basis: Letter Grade

EDUC 5425 (3) Introduction to Bilingual/Multicultural Education

Provides an introduction for currently practicing K-12 teachers and non-specialists to bilingual and multicultural education programs for emergent bilingual students. Includes an overview of the history and legislation related to the education of emergent bilingual students, identification and placement, as well as the various models, theoretical and philosophical underpinnings, and pedagogical practices that constitute sound educational practices for emergent bilingual students.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4425

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5435 (3) Materials and Methods in Bilingual/ Multicultural Education

Provides an in-depth study of the curriculum options available for bilingual and ESL programs. Presents, reviews, and critiques specific methods and strategies for teaching language to minority students. Gives the opportunity to develop and present teaching units in Spanish or in ESL methodology, as appropriate.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5445 (3) Curriculum for Multicultural Education

Analyzes curriculum programs and examines principles that inform innovation for education of diverse students at all school levels. Includes topics of ethnic, racial, socio-economic, linguistic, and gender diversity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5455 (3) Literacy for Linguistically Different Learners

Presents current and emerging philosophies and methods on teaching reading to culturally diverse second-language learners. Includes review of materials, strategies for teaching reading and writing skills, and important considerations for transference from L1 to L2 reading.

Requisites: Requires a prerequisite course of EDUC 5425 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5460 (3) Teaching and Learning Physics

Learn how people understand key concepts in physics. Through examination of physics content, pedagogy and problems, through teaching, and through research in physics education, students will explore the meaning and means of teaching physics. Students will gain a deeper understanding of how education research is done and how people learn. Useful for all students, especially for those interested in physics, teaching, and education research.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4460 and PHYS 4460 and PHYS 5460

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5465 (3) Introduction to ESL/Bilingual and Special Education

Provides students with the fundamental information of ESL, bilingual and special education, including theories, assumptions, philosophies, and paradigms of bilingual and special education. Discusses successful teaching techniques and instructional approaches, including individualization, least restrictive environment, transition, and career education.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5485 (3) Differentiation in the Classroom

Focuses on teaching culturally and linguistically diverse students, special education students, and differentiation in the classroom. Emphasizes evidence-based teaching practices, programmatic interventions that support student learning and using research to inform practice. Includes practicum. Department enforced prerequisite: restricted to MA+ students.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5490 (3) Blurring Disciplinary Lines in the Humanities

Explores theories, methods, and materials for building interdisciplinary connections within and across secondary English and Social Studies classrooms. Provides opportunities for collaborative work in building lessons and unit plans that challenge disciplinary boundaries and advocate for complex problem solving.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4490

Requisites: Requires prerequisite of EDUC 4342 or EDUC 5342 or EDUC 4330 or EDUC 5330 (all minimum grade C-). Restricted to teacher licensure students in English (EDEN-LICU or EDEN-LICG) or Social Studies (EDSS-LICU or EDSS_LICG).

Grading Basis: Letter Grade

EDUC 5505 (3) Education of Students with Learning and Behavior Disorders

Discusses unique learning needs of students with learning and behavior disorders. Emphasizes development of a systems model for diagnosis, programming, and remediation. Stresses data-based individualization of instruction, with emphasis on intervention in inclusive learning environments and developing a culturally responsive system.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5515 (3) Curriculum and Assessment for Special Learners

Emphasizes assessment of special education students from pre-referral through staffing and placement, including response to intervention, research-based assessment practices, analytic teaching and assessment, curriculum-based assessment and measurement. Selection, administration, and interpretation of formal and informal assessment devices are studied, with particular emphasis on cultural relevance and equity in assessment for special learners with mild to severe needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5525 (3) Research Issues in Special Education

Provides practical experience in the review, critique, conceptualization, and writing of research studies in special education. Also offers experience in design of evaluation systems for classroom practice.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5535 (3) Diagnostic Testing in ESL and Bilingual Education

Promotes critical uses of assessment instruments and information.

Provides methods for educators to incorporate assessment as a meaningful activity in the classroom intended to support learning among bilingual students. Examines effectiveness, validity, and fairness in the testing of linguistically diverse populations. Provides first-hand experiences developing, selecting, reviewing, and adapting test materials as critical to making informed teaching decisions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5545 (3) Strategies for Teaching Students with Special Needs

Provides teachers with specific evidence-based methods and techniques for teaching students with a wide variety of high and low disabilities including learning and language disabilities, hearing and visual impairments, physical disabilities, and health impairments. Emphasizes different teaching methods, instructional materials, and learning strategies that have proven effective working students with cognitive learning needs.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5555 (3-4) Practicum in Bilingual/Special Education

Offers supervised field experience in elementary and secondary special education class settings. Each credit hour requires 50 contact hours.

Requisites: Requires prerequisite courses of EDUC 5465 and EDUC 5505 and EDUC 5515 or EDUC 5545 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5575 (1-4) Workshop in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 5580 (3) Physics and Everyday Thinking

Engages non-physics majors in hands-on, minds-on activities and labs to investigate the physical world, the nature of science, and how science knowledge is constructed. This introductory course is especially relevant for future elementary and middle school teachers although it will meet the needs of most non-physics and non-science majors. Physics content focuses on interactions and energy.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5595 (1-4) Practicum in Linguistically Different: English as a Second Language

University supervised, school-based field experience teaching linguistically different students, as well as assistance in the completion of EECED portfolio.

Requisites: Requires prerequisite courses of EDUC 5425 and EDUC 5435 and EDUC 5535 (all minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5605 (3) Research Issues in Bilingual Education

Offers practical experience in the review, critique, conceptualization, and writing of research studies in bilingual/ESL education. Provides experience in the design of classroom evaluation systems.

Requisites: Requires a prerequisite course of EDUC 5245 (minimum grade C-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5610 (1-3) Math and Science Education

Introduces learning theory and teaching practices for mathematics and science learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, cooperative learning, nature of math/science, and argumentation in mathematics and science.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5615 (3) Second Language Acquisition

Presents a broad survey of second-language acquisition research. Stresses theoretical concerns and research findings and practical applications to teaching second languages. Gives special emphasis to second-language acquisition.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5625 (3) Methods of Teaching English as a Second Language

Exposes students to strategies used to teach English as a second or foreign language. Covers both theoretical and applied aspects of language learning and teaching. Exposes students to techniques, activities, strategies and resources to plan instruction for students learning English as a second language. Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 5615.

Additional Information: Departmental Category: Graduate Education

EDUC 5635 (3) Education and Sociolinguistics

Explores the discipline of sociolinguistics, the study of language variation and use, and its application within education settings. Not designed as an advanced sociology or linguistics course. Areas of study include language variation, speech communities, the ethnography of communication, speech and social identities, and sociolinguistic research related to teaching and learning.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5706 (3) Assessment in Mathematics and Science Education

Examines purposes and practices of assessment in mathematics and science education. Particular attention is given to application of theoretical foundations and contemporary research in the design and use of assessment techniques and tools to support teaching for student understanding. Addresses the role of effective formative assessment in teaching and learning.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4706

Additional Information: Departmental Category: Graduate Education

EDUC 5716 (3) Basic Statistical Methods

Introduces descriptive statistics including graphic presentation of data, measures of central tendency and variability, correlation and prediction, and basic inferential statistics, including the t-test.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5726 (3) Introduction to Disciplined Inquiry

Considers various research approaches and methodologies included in education including experimental and quasi-experimental methods; anthropological and case study methods; evaluative research and field studies; correlational; and sociological, historical, and philosophical research. Topics include library research, research criticism, research design, and proposal writing.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5800 (1-9) Master's Special Topics

Designed to meet needs of students with topics of pertinent interest. 00 total credit hours. Allows multiple enrollment in term.

Repeatable: Repeatable for up to 18.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5815 (3) Teaching K-12 Mathematics: Number Sense

Provides teachers opportunity to explore fundamental mathematical theories and pedagogical perspectives pertaining to the teaching and learning of number and operation. Engages students in explorations of mathematical content underlying number and operations, while highlighting relevant problem solving, reasoning and proof, and mathematical connections. Explores implications of teachers' mathematical learning on their classroom teaching. Develops practices supporting learner's number sense development. Formerly EDUC 5810.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4815

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 5821 (3) Teaching K-12 Mathematics: Algebraic Thinking

Uses reform-based mathematics curricula to engage participants in algebraic thinking, to reflect on their own knowledge of algebraic concepts, and to examine pedagogical ideas that can foster K-12 students' algebraic thinking and learning. Algebraic topics include patterning, variable, functions, multiple representations, equality, and solving linear and systems of equations.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4821

Additional Information: Departmental Category: Graduate Education

EDUC 5822 (3) Teaching and Learning Chemistry

Explores issues related to how people learn and teach chemistry. Reviews high school and early college chemistry concepts both from the content and pedagogical perspectives. Delves into the chemistry education research, education, psychology and cognitive science literature. Provides an opportunity to observe and/or teach K-12 or college chemistry classes.

Requisites: Requires prerequisite course of CHEM 1021 or CHEM 1113 or CHEM 1400 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 5833 (3) Teaching and Learning Earth Systems

Learn and develop pedagogically effective strategies for teaching and understanding Earth Science concepts. Particular emphasis is placed on understanding the importance of geoscience habits of mind (i.e. spatial/temporal reasoning, multiple working hypotheses, geographic context). The course focuses upon inquiry and evaluation of evidence, the importance of background knowledge and misconceptions and developing effective discourse within and outside the classroom.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 5835 (3) Teaching K-12 Mathematics: Geometry & Measurement

Provides an opportunity to explore how to foster geometric thinking while examining fundamental mathematical theory underlying the content area of geometry and measurement. Emphasizes investigative approach involving problem solving, reasoning, connections, and communication as well as learning mathematics content in a flexible and conceptual way. Challenges participants to apply their understanding to teaching practices that foster geometric thinking in K-12 learners. Formerly EDUC 5830.

Additional Information: Departmental Category: Graduate Education

EDUC 5850 (3) Teaching K-12 Mathematics: Probability & Statistics

Focuses on teaching probability, data analysis, and statistics in K-12 classrooms. Explores curriculum and assessment strategies in the areas of probability and statistics. Examines research on students' thinking on stochastic tasks and how this research informs teaching practice. Emphasizes deepening of one's conceptual understanding of probability and statistics and their importance in the current information age.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4850

Additional Information: Departmental Category: Graduate Education

EDUC 6110 (3) Student Affairs in Higher Education

Provides students with a thorough introduction to the field of student affairs administration in higher education. Explores diverse facets of college student affairs administration and its role within US higher education. The course will help students develop a broad foundation for subsequent Higher Education study and practice. Focuses on philosophies, complexities, and futures of the student affairs profession.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6210 (3) Education Policy and the Law

Approaches education policy issues through the rich history of litigation and current legal challenges facing American K-12 schooling. Builds an understanding of the legal and policy development of the American schooling system, particularly in the 20th century. Laws and legal cases will be used as jumping-off points for broader discussions.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6211 (3) Education Law and Litigation Workshop

The students in this workshop course will learn through a project-oriented, constructive conversation between legal experts and education policy experts. With elements of community-engaged learning, as well as clinical and street law, the course creates a forum for an iterative process whereby education students, attorneys (adjunct professors) and law students will work together on legal projects of their own choosing. The attorneys and law students will inform the education researchers about how claims for relief or legislation (or a legal argument used in another context) might be shaped, while the researchers would inform the lawyers and law students about whether and how the research supports a potential claim or approach, and about the sorts of remedial orders or interventions that might be beneficial.

Requisites: Restricted to graduate students only.

EDUC 6220 (3) Gender Issues in Education

Provides a strong foundation in the various issues of gender and sexual diversity in education. Stimulates explorations into the ways the construct of "gender" affects and is affected by the educational system and process. Presents theory and research about contemporary educational issues related to sexism and homophobia. Encourages development of well-considered views about the various issues, research, and theories.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6230 (3) Ethics in Education

Investigates controversies in education from a self-consciously ethical perspective, drawing as appropriate from moral and political theory as well as law. Focuses on public education's role in fostering democratic citizenship and providing equal educational opportunity. Critically evaluates various education reform policies and curriculum policies. Applies method commonly used in medical ethics to make decisions regarding concrete ethically problematic cases.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6240 (3) African American Education in the United States

Explores development of schooling for African Americans in the U.S.. Emphasizes historical and contemporary struggles of this group in their quest to access meaningful educational opportunities. Examines how social, economic, political, and judicial action defined and organized policy and practice for this group. Degree credit not granted for EDUC 4240 and 6240.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: General Education

EDUC 6245 (3) Latinx Education Across the Americas

Examines Latinx education across the Americas in comparative perspective, exploring critical issues, themes, and cross-border movements that link Latinx education in the United States and Latin American education. Considers the socio-historical, cultural, and political contexts that shape the education of Latinx communities, with special attention to issues of race, cultural and national identity, and representation as these are negotiated in schools.

Requisites: Restricted to graduate students only.

EDUC 6250 (3) Higher Education in the United States

Examines major issues in higher education focusing on the sociopolitical contexts in which US universities operate as gatekeepers to opportunities. Topics include the purposes and history of higher education in the United States, college teaching and learning, finance and governance, issues of access and equity related to race, gender, sexual orientation, gender identity, immigration status and class, and student life.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 6260 (3) Transnational Migration, Education, and Citizenship

Examines the education of transnational migrant youth and families in comparative perspective, with a focus on citizenship formation. Compares state-led responses to diversity through education and integration policies with the transnational practices of distinct migrant and diaspora communities in both the United States and Europe. Considers the educational experiences of distinct types of migrants, including undocumented immigrant students and their families and university students studying abroad, and implications for citizenship.

Requisites: Restricted to graduate students only.

EDUC 6318 (3) Psychological Foundations of Education

Introduces students to theoretical and empirical contributions of educational and developmental psychology and the learning sciences emphasizing applications to educational practices. Topics include learning, development, cognitive processes, social and cultural context, motivation, assessment and individual differences.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6325 (3) Anthropology of Education

Applies anthropological perspectives to research in educational settings. Focuses on theories of culture, cultural transmission and acquisition, and cultural reproduction and production for understanding schooling and its outcomes.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6328 (3) Advanced Child Growth and Educational Development

Introduces students to recent theoretical and research advances in the study of children and adolescent's cognitive, social and emotional development, with an emphasis on implications for learning in and out of school.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6368 (3) Adolescent Psychology and Development for Teachers

Examines current theory and research on adolescent development, learning, motivation, and academic achievement. Emphasizes how theory and research can inform instructional decisions in the secondary classroom.

Requisites: Restricted to English-Secondary Education (EDEN), Social Studies-Secondary Educ (EDSS), Mathematics-Secondary Educ (EDMA) or Science-Secondary Educ (EDSC) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6405 (3) College Student Development and Counseling Theories

Covers theories of student development in higher education as they apply to the growth of students and the influence of the college environment on growth and development. Examines selected approaches to counseling theory and practice. Theoretical formulations basic to human development and the counseling process are presented including historical and philosophical background. This course explores themes of human development, self-evolution, meaning making, separation and connection, and moral meaning making, and how college students are other adults construct themselves and the meaning they make of their experience.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6504 (3) Issues and Methods in Cognitive Science

Interdisciplinary introduction to cognitive science, examining ideas from cognitive psychology, philosophy, education, and linguistics via computational modeling and psychological experimentation. Department enforced prerequisite: graduate standing or at least one upper-division course in computer science, linguistics, philosophy, or psychology.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 6402 and LING 6200 and PHIL 6310 and PSYC 6200 and SLHS 6402

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6505 (1-2) Readings and Research in Cognitive Science

Interdisciplinary reading of innovative theories and methodologies of cognitive science. Share interdisciplinary perspectives through in-class and online discussion and analysis of controversial texts and of their own research in cognitive science. Required for joint PhD in cognitive science.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6506 (2) Cognitive Science Research Practicum

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7412 and LING 7415 and PHIL 7415 and PSYC 7415 and SLHS 7418

Requisites: Requires prerequisite course of CSCI 6402 or EDUC 6504 or LING 6200 or PHIL 6310 or PSYC 6200 (minimum grade D-). Restricted to graduate students only.

Recommended: Prerequisite EDUC 6505.

Additional Information: Departmental Category: Graduate Education

EDUC 6516 (2) Cognitive Science Research Practicum 2

Independent, interdisciplinary research project in cognitive science for advanced graduate students pursuing a joint PhD in an approved core discipline and cognitive science. Research projects integrate at least two areas within the cognitive sciences: psychology, computer science, linguistics, education, philosophy. Students need commitments from two mentors for their project.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7422 and LING 7425 and PHIL 7425 and PSYC 7425 and SLHS 7428

Requisites: Requires prerequisite course of LING 7415 or PSYC 7415 or CSCI 7412 or EDUC 6506 (minimum grade D-). Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6705 (3) Leadership in Higher Education

Examines theory and research on leadership and management in higher education, and the structure and governance of colleges and universities. Explores the internal organization and culture of institutions, as well as external and related bodies that affect higher education such as the federal and state governments, accrediting agencies, associations and foundations.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6804 (1-4) Special Topics

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6811 (3) Teaching and Learning Biology

Provides an introduction to recent research into student learning on the conceptual foundations of modern biology, together with pedagogical methods associated with effective instruction and its evaluation. Students will be involved in active research into conceptual and practical issues involved in biology education, methods to discover student preconceptions, and the design, testing and evaluation of various instructional interventions.

Equivalent - Duplicate Degree Credit Not Granted: EDUC 4811 and MCDB 4811 and MCDB 5811

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 6844 (1-4) Master's Independent Study

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6855 (1-4) Independent Study in Curriculum and Instruction---Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6877 (1-4) Independent Study in Educational Equity & Cultural Diversity: Master's Level

An independent study may be established between a student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6888 (1-4) Independent Study in Educational and Psychological Studies---Master's Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6899 (1-4) Independent Study in Educational Foundations Policy & Practice--Master's Level

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6915 (1-4) Practicum in Curriculum and Instruction

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6916 (1-4) Practicum in Research and Evaluation Methodology

Additional Information: Departmental Category: Graduate Education

EDUC 6917 (1-4) Practicum in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6918 (1-4) Practicum in Educational and Psychological Studies

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6919 (1-4) Practicum in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 4.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6925 (1-4) Readings in Curriculum and Instruction

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6926 (1-4) Readings in Research and Evaluation Methodology

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6927 (1-4) Readings in Equity, Bilingualism and Biliteracy

Explores topics that are relevant to becoming a scholar and researcher in our field.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6928 (1-4) Readings in Learning Sciences and Human Development

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6929 (1-4) Readings in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 6944 (1-3) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6945 (3) MA Capstone Seminar in Foundations of Education

Supports students completing a summative writing assignment for their Masters degree requirements. Writing assignments will be designed around the professional and academic goals of each student, in collaboration with the student's academic advisor. Students will analyze research studies across different disciplinary and methodological approaches. Through instructor coaching and peer review exercises, students will draft and refine a final assignment.

Requisites: Restricted to MA students in Education (EPSY-MA, EFPP-MA, HEDU-MA).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Graduate Education

EDUC 6954 (1-6) Master's Thesis

Repeatable: Repeatable for up to 6.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 6964 (3) Capstone: Inquiry in the Content Areas

Supports students in using and building on the ideas and content encountered in previous coursework. Requires students to conceptualize, design and implement an original research project that will serve as exit requirement for the degree. Reads and engages in research and theory associated with Teacher Research (i.e. research conducted by teachers for professional purposes).

Requisites: Restricted to Educ-Curriculum Instruction (EDCI) graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7015 (3) Teaching Internship in Teacher Education

One-semester teaching internship in an undergraduate or graduate foundations course.

Additional Information: Departmental Category: Graduate Education

EDUC 7055 (3) Philosophy of Education

Examines exemplars of educational philosophy from ancient times to the present day, emphasizing their relevance and application to current controversies in education (e.g., free speech, multiculturalism, and affirmative action). Formerly EDUC 5055.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7105 (3) Collaboration to Meet Special Needs

Covers effective collaboration practices involving the special education teacher, other educational personnel, students, and parents. Bilingual special education considerations in collaboration will be described. Issues regarding inclusion will be explored. Practical application to teaching and learning will be made. Strategies for disseminating information and collaborative activities will be discussed.

Additional Information: Departmental Category: Graduate Education

EDUC 7115 (3) Critical Inquiry into Becoming a Teacher Educator

Designed to support doctoral students' development as university level instructors/teacher educators, particularly in relation to undergraduate courses that center equity and justice as central topics, this course will draw on critical perspectives and pedagogies to shape course goals, material/content and pedagogical approach. This will be done in two primary ways: a) through the use of pedagogies adapted from Freirean Culture Circles and Boalian Theater, and b) through the application of practitioner inquiry approaches designed to develop critical, reflective practices/habits of mind among teachers and teacher educators.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 7316 (3) Intermediate Statistical Methods

Studies sampling theory and inferential statistics; advanced applications for testing of hypotheses regarding central tendency, variability, proportion, correlation, and normality; chi-square and the analysis of frequency data; multiple regression and prediction; introduction to the analysis of variance; and related computer programs for statistical analysis.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7326 (3) Quasi-Experimental Design in Causal Inference in Social Sciences

Focuses on experimental and quasi-experimental designs in educational research; applications of the general linear model; power and statistical efficiency; randomization and control; multiple comparisons; factorial experiments and interaction with fixed-factor and mixed design; analysis of covariance; effects of assumption violations; and related computer programs for statistical analysis.

Additional Information: Departmental Category: Graduate Education

EDUC 7336 (3) Methods of Survey Research and Assessments

Examines theory and techniques involved in each stage of survey research, including problem formulation, questionnaire development, interview and mailed surveys, assessing reliability and validity, sampling plans, data reduction (e.g., factor analysis), and analysis of continuous and categorical data.

Requisites: Requires prerequisite courses of EDUC 5726 and EDUC 7316 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7346 (3) Ethnographic Methods in Educational Research

Explores the history of ethnography and its translation into educational research. Students practice participant observation, interviewing, journal writing, artifact searches, qualitative analysis and interpretation, and styles of reporting.

Requisites: Requires a prerequisite course of EDUC 6325 (minimum grade C-).

Additional Information: Departmental Category: Graduate Education

EDUC 7376 (3) Theory and Practice of Educational and Psychological Measurement

Introduces theories of measurement and applications, and presents classical test theory. Includes quantitative concepts, methods, and computational techniques for the development, application, and evaluation of measurement instruments in social/ behavioral science and education.

Requisites: Requires prerequisite course of EDUC 5716 (minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7386 (3) Educational Evaluation

Builds an understanding of the range of approaches taken by educational evaluators, focusing particularly on the evaluation of programs. Explores the nature of different evaluation perspectives and how these disparate views translate into methodological and conceptual models. Students develop a familiarity with the most common and influential approaches to evaluation.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7396 (3) Categorical Data Analysis

Introduces contemporary advanced multivariate techniques and their application in social science research. Methods include multivariate regression and analysis of variance, structural equation models, and factor analysis. Prior experience with Anova and multiple regression is assumed.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7416 (3) Seminar: Research Methodology

Presents selected topics for advanced study in educational research, statistics, measurement, and evaluation.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 7436 (3) Item Response Theory

Includes one-, two-, and three-parameter logistic models for dichotomously-scored items and partial credit models for polytomously-scored items; applications of the models to problems such as equating of test forms, test design, computerized adaptive testing, and the detection of item bias.

Requisites: Requires prerequisite courses of EDUC 7316 and EDUC 7376 (all minimum grade D-).

Additional Information: Departmental Category: Graduate Education

EDUC 7446 (3) Seminar: Policy Issues in Education

Explores major policy issues confronting U.S. education and examines the nature and undertaking of educational policy studies. Learn to approach policy issues from a contextual perspective that highlights systemic forces and analyzes and applies differing policy instruments. While a wide variety of policies are covered in the course, it particularly emphasizes issues of educational equity.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 7456 (3) Multilevel Modeling

Covers in depth two advanced multivariate models common to social science research: latent variable (structural equation) models and multi-level (hierarchical) models. Topics may be taught with a particular analytic context, such as measurement of change (longitudinal analysis) or experimental design.

Additional Information: Departmental Category: Graduate Education

EDUC 7775 (1) Topics in Cognitive Science

Reading of interdisciplinary innovative theories and methodologies of cognitive science. Students participate in the ICS Distinguished Speakers series that hosts internationally recognized cognitive scientists who share and discuss their current research. Session discussions include analysis of leading edge and controversial new approaches in cognitive science.

Equivalent - Duplicate Degree Credit Not Granted: CSCI 7772 and LING 7775 and PHIL 7810 and PSYC 7775 and SLHS 7775

Repeatable: Repeatable for up to 4.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8014 (3) Advanced Seminar in Democracy, Diversity and Social Justice

Addresses the sociopolitical context of multiculturalism and education, and the sociocultural context of learning. Examines critical issues involved in making schooling responsive to an increasingly multicultural and multilingual society.

Repeatable: Repeatable for up to 9.00 total credit hours.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8025 (3) Seminar: Curriculum Theories

Examines in depth recent developments in curriculum theory highlighting conceptual, contextual, and normative issues. Substantially explores distinct curricular traditions, corresponding conceptions of the good life along with related approaches to reason and emotion. Focuses on the works of prominent curriculum theorists.

Additional Information: Departmental Category: Graduate Education

EDUC 8045 (3) Philosophical Issues in Educational Research

Familiarizes students with important concepts and issues from the philosophy of science and, to a lesser extent, political theory and ethics; grounds such concepts and issues in the literature (often in terms of primary philosophical sources); and stimulates students to apply this material to the field of educational research in an informed way.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8055 (3) Theoretical Issues in Education Policy

Provides students with an examination of the theories behind education policy analysis. Takes a thematic approach to the study of policy in order to understand how policy agendas are set; how democratic deliberation should be linked with research and policy; and the relationship between politics, media, social structures, research and policies.

Requisites: Restricted to PhD students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8100 (3) Historical and Contemporary Issues in Literacy Research

In this seminar, students read about, discuss, and respond to issues and debates that have shaped and continue to shape literacy research. The course addresses debates in response to research reports, policy and standards in the past 20 years (beginning in the mid 1990s), as well as the emergence of sociocultural and critical approaches to literacy research. The course traces how scholarly debates and reviews of research represent shifts in the field, and help researchers and educators move towards approaches and methods framing social-justice oriented literacy projects.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 8101 (3) Theories of Literacy Research and Practice

This graduate seminar will examine the foundations and central tenets of influential theories that undergird scholarship in literacy studies.

The theories explored will include Critical Race Theory (CRT), critical poststructuralist, feminist, queer, literary, affect, and sociocultural theories. Theoretical traditions will be examined through their historical and social movement roots through their current applications, debates, research techniques, and criticisms, always with particular attention to how they have been taken up in literacy research. A key focus of this course is to examine the utility and limitations of frameworks and consider their possible applications to students' own research.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 8102 (3) Literacy Research Methods

This graduate seminar focuses on some of the central research methods and methodologies employed by literacy researchers. The course will examine methodologies such as ethnography, practitioner research, participatory research, reciprocal partnerships, discourse analysis, literary and textual analysis, design research, and case study, along with specific methods of data collection and analysis commensurate with study designs. Students will read articles focused on methodology specifically, as well as have opportunities to discuss research articles through a focus on the methods scholars describe and enact. The course includes attention to humanizing research practices and issues of relationship, responsibility, and ethics in literacy research. In addition, the course will engage discussions and support for IRB proposals, generative writing practices and processes, as well as dissemination of research through various genres and in academic, practice focused, and publicly accessible venues. May be repeated up

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 8103 (3) Special Topics in Literacy Research

This course provides students an opportunity for deep engagement with important topics and specialty areas in the field of literacy studies. Focused on topics of current interest in the field, the course supports students to examine issues of research and practice, which may include historical and current trajectories of an area of research, theories that animate an area of research and practice, and the methods through which researchers investigate questions related to the topic. In addition to readings and discussion, students complete writing and multimodal projects that allow students to engage with content and process related to the topic to demonstrate and share their learning.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Grading Basis: Letter Grade

EDUC 8115 (3) History and Policy Issues in Teaching and Teacher Education

Examine how issues and dilemmas in teacher education are grounded in historical and political contexts. Analyze patterns in preparation of new teachers, in mechanisms used to govern entry into teaching and make determinations of quality of teachers and teaching, and in efforts to professionalize and de-professionalize teachers and teaching. Investigate contemporary teacher education debates to better understand potential research-policy-practice connections.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 8125 (3) Seminar: Radical Education Theories

Examines radical analyses of schooling, based on class, gender, sexual identity and race, through which U.S. public schooling is said to maintain dynamics of oppression and domination that undermines the schools' democratic premise. Scrutinizes the conceptual framework, interpretive and explanatory adequacy, and ethical justification of radical claims.

Additional Information: Departmental Category: Graduate Education

EDUC 8135 (3) Theories and Methodologies for Examining Teacher Learning

Examines the potential range and roles of theory in analyzing prospective and practicing teachers' learning (experiences). Explores various conceptions of teacher learning, including, but not limited to: teacher learning as a knowledge-centric phenomenon; teacher learning as a process of assembling a repertoire of practice; teacher learning as an identity-work phenomenon; and teacher learning as an activist/action-in-the-world phenomenon.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8145 (3) Designing for Teacher Learning and Teacher Education

Examines questions and issues related to the design of preservice teacher education programs and practicing teachers' professional development/learning opportunities. Analyzes the program and/or learning opportunity conditions, features and approaches that potentially support and/or constrain prospective and practicing teachers' learning, particularly in relation to their development and as asset-oriented teachers.

Additional Information: Departmental Category: Graduate Education

EDUC 8155 (3) Advanced Topics in Literacy Education

Examines special topics in theory and research related to literacy and literacy education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8165 (3) Advanced Topics in Mathematics Education

Examines special topics in theory and research related to mathematics education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8175 (3) Advanced Topics in Science Education

Engages participants in the process of curriculum development. Principles that guide the development of curricula and learning environments are discussed as they integrate with learning theory. Participants develop and/or test specific activities in the classroom and modify them as a result. There is a particular focus on incorporating the practices of the discipline into each content-based activity.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8177 (3) Advanced Seminar in Curriculum and Policy in Mathematics & Science Education

This course explores the changing curriculum in school mathematics and science. It will examine the history and evolution of K-20 math and science curricula from the late 1890s to current times. It will examine motivations and political forces that have help shape and change math and science curricula.

Grading Basis: Letter Grade

EDUC 8178 (3) Advanced Seminar on Learning in Math & Science Education

This course focuses on research on the learning of mathematics and science in the K-12 schooling environment. It serves to introduce students to seminal learning theories that have guided and shaped mathematics & science education over the past thirty years (e.g., constructivist, cognitive, situative/sociocultural and critical perspectives). Core ideas within each of these theoretical perspectives will be explored such as knowledge construction and conceptual change, argumentation and reasoning, classroom discourse processes, participation and identity, and access and power. Pragmatic implications of these different theoretical perspectives will also be examined. For example, questions such as the following are considered: What is the purpose of a theory of learning (e.g., for research, for practice)? What constitutes learning within each perspective? What are the implications of a particular theoretical perspective for organizing and analyzing learning environments? What are the implications for differences

Grading Basis: Letter Grade

EDUC 8179 (3) Advanced Seminar in Mathematics and Science Teaching & Teacher Education

This course examines how scholarship on teaching and teacher learning has been evolving in mathematics and science educational research since the 1980s and 1990s. Students will explore theories of teacher learning and how they relate to designs for teacher preparation and professional development. We will also study common designs and design principles for conducting research to study teaching and teacher learning.

Grading Basis: Letter Grade

EDUC 8210 (3) Perspectives on Classroom Teaching and Learning

Introduces students to various theoretical perspectives informing educational research and how they are employed to study teaching, learning, and policy in K-12 classrooms. Includes reading and discussion related to the assumptions, questions, methods, and findings associated with theoretical traditions within and across disciplines.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8220 (3) Introduction to Educational Research and Policy

Introduces conceptual and empirical issues and controversies in educational research and policy. Complements other EDUC doctoral courses in quantitative and qualitative methodology.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8230 (3) Quantitative Methods I

Explores the use of statistics to formalize research design in educational research. Introduces descriptive statistics, linear regression, probability, and the basics of statistical inference. Includes instruction in the use of statistical software, (e.g., SPSS.).

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8240 (3) Quantitative Methods II

Continues the exploration of research design in the social sciences, especially the evaluation of the quantitative research reported in professional journals. Introduces instances of the general linear model (both multiple regression and ANOVA) and its application to educational research.

Requisites: Requires prerequisite course of EDUC 8230 (minimum grade D-). Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8250 (3) Qualitative Methods I

Introduces students to the theory and practice of qualitative research in education. First of a two-course sequence covering research design, theoretical perspectives, and methods. Preference given to first-year doctoral students in education.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8260 (3) Qualitative Methods II

Builds on EDUC 8250 to develop knowledge and skills in ethnographic and case study research. Second of a two-course sequence covering qualitative research design, theoretical perspectives, and methods.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8270 (3) Intermediate and Advanced Application of Quantitative Methods for Behavioral Sciences

This course helps students develop the pragmatic skills needed to conduct quantitative analyses in their own research, in which they must apply concepts with novel data and in novel settings. It also provides a formal introduction to a variety of interstitial topics in quantitative analysis that may be assumed knowledge in more advanced methods courses. In addition, students will learn how to teach themselves new quantitative methods as they need them in their future careers.

Requisites: Requires prerequisite courses of EDUC 8230 and EDUC 8240 (all minimum grade B-).

EDUC 8310 (3) Design of Learning Environments for Radical Possibilities

Design is a tool for imagining radical new possibilities for living together. We will discuss how we can work with community and school partners to leverage cultural and historical resources in design. This course will introduce students to models of design and tools for participatory design used across the Global North and South that can promote individual, social, and institutional change. It will include attention to political, affective, and ethical dimensions of design, as well as explore dilemmas presented by faculty and students engaged in ongoing design projects.

Requisites: Restricted to graduate students only.

EDUC 8348 (3) Human Development in Cultural, Historical, and Sociopolitical Contexts

This course takes a critical approach to exploring the moral, sociopolitical, and bio-psychosocial dimensions of human development. It will introduce students to different theories and methods for studying human development across the lifespan. Many traditional approaches to developmental research treat development in Western Educated Industrialized Rich and Democratic (WEIRD) contexts as normative for all populations. This course will focus on approaches that reject the notion that processes of human development are universal, examining the ways that social, cultural and geographic environments and histories shape development and life trajectories.

Requisites: Restricted to graduate students only.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8358 (3) Seminar: Human Learning

Intensive study of selected topics in human learning. The focus of the seminar will vary depending on the instructor's expertise and students' interest. Recent topics include sociocultural and social practice theories, STEM learning in and out of school. Repeatable for credit up to 6 total credit hours.

Repeatable: Repeatable for up to 6.00 total credit hours.

Recommended: Prerequisite EDUC 6318 or EDUC 8210 or instructor consent.

Additional Information: Departmental Category: Graduate Education

EDUC 8359 (3) Critical Introduction to Learning Theory and Practice, Part 2

This course builds on content central to Part 1 of Critical Introduction to Learning Theory and Practice, which explores historical and contemporary perspectives in the learning sciences. Special attention is paid to theory and practice which is currently at the leading edge of research and development in the learning sciences, while attending to their roots. This course addresses multiple epistemologies and ways of knowing, including global perspectives and critical theories such as feminist, indigenous, and queer approaches. The course also examines how learning theories can inform transformation of practice toward justice and equity.

Requisites: Requires prerequisite course of EDUC 8358 (minimum grade D-).

EDUC 8605 (3) Research and Professional Ethics for Educational Researchers

Examines the central issues and venerable theories of philosophical ethics that have historically framed research ethics. Also examines contemporary ethical theory that emphasizes a greater attention to the social sciences. Focuses on research ethics (both research of human subjects and research misconduct), various issues of professional academic ethics, and the AERA ethical code.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8610 (3) Advanced Topics in Educational Equity and Cultural Diversity

Examines special topics in theory and research related to educational equity and cultural diversity in education. Topics vary each semester.

Repeatable: Repeatable for up to 12.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8615 (3) Language Issues in Education Research

Examines ways in which issues of language can affect the validity of educational research. Discusses how language can be properly addressed with a multidisciplinary perspective through different stages in the process of an investigation, including design, sampling, data collection, and data analysis. Provides the conceptual basis for addressing linguistic diversity from a multidisciplinary perspective.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8620 (3) Language and Power

Through language we enact positionality and identity. Language has the power to shape our assumptions and beliefs. This course explores the relationship between linguistic nationalism and xenophobia, bilingual education and accent discrimination, multilingualism and youth culture, code-switching and translanguaging, etc. Participants will analyze domestic policies and current events to understand how language serves to maintain or disrupt the status quo.

EDUC 8630 (3) Bilingual and Biliterate Development in Children and Adolescents

This advanced doctoral seminar introduces doctoral students to key theories and empirical research on bilingual and biliterate development in school age children (preK ÷ 12). Participants will explore sociolinguistic, sociocultural, and psycholinguistic perspectives of the language and literacy development of children growing up with two or more languages, and critically examine how varying educational contexts and policies impact the schooling experiences of bilingual learners from early childhood to late adolescence.

Recommended: Doctoral students only.

Grading Basis: Letter Grade

EDUC 8640 (3) Rethinking Disability

Students explore the foundations, trends and future directions of disability in education. Disability is socially, historically, and culturally constructed. It is one of multiple identities that make us human, rather than a problem in need of a cure. This course investigates and disrupts disparities in education that relate to the intersections of disability, culture, race, language, and other identities and explores models for success.

Requisites: Restricted to doctoral students.

EDUC 8710 (3) Measurement in Survey Research

Introduces students to classical test theory and item response theory. Emphasizes the process of developing, analyzing and validating a survey instrument. Focuses on developing a survey instrument with items that derive from a clearly delineated theory for the construct to be measured. Analyzes item responses and put together a validity argument to support the proposed uses of the survey.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8720 (3) Advanced Topics in Measurement

Focuses on psychometric models for measurement and their applications in educational and psychological research. Emphasizes understanding and evaluating the utility of models from item response theory (IRT). Applies and compares measurement models in the context of simulated or empirical data sets.

Recommended: Prerequisite EDUC 8710.

Additional Information: Departmental Category: Graduate Education

EDUC 8730 (3) Advanced Qualitative Data Analysis

Requires students begin semester with qualitative data already collected (from class project, pilot study, dissertation). Instructors present diverse methods of analyzing data and writing about interpretations. Instructors customize part of course to address specific topic of expertise, e.g., discourse analysis, video analysis, textual analysis, ethnographic analysis.

Repeatable: Repeatable for up to 12.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

EDUC 8740 (3) Advances in the Assessment of Student Learning

Focuses on theories underlying traditional and contemporary proposals for assessment of student learning, and design and research of large-scale and classroom-based methods to assess student learning. Explores intersections between large-scale and classroom assessment, although greater attention is given to issues related to classroom assessment.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8750 (3) Research in Teaching and Teacher Education

Invites students to acquire a deeper understanding of the history of and challenges in teacher education research, strengthen their knowledge of theoretical and methodological approaches to the study of teacher education, and discuss their own potential contributions to the field.

Requisites: Restricted to EDUC PhD students with plan codes EECD-PHD, EFPP-PHD, EDCI-PHD, EPSY-PHD or REME-PHD.

EDUC 8804 (3) Special Topics

Designed to meet needs of graduate students with topics of pertinent interest.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Graduate Education

EDUC 8844 (1-4) Doctoral Independent Study

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8855 (1-4) Independent Study in Curriculum and Instruction: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8866 (1-4) Independent Study in Research and Evaluation Methodology: Doctoral Level

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8877 (1-4) Independent Study in Educational Equity and Cultural Diversity: Doctoral Level

An independent study may be established between a doctoral student and a tenure track faculty member if both parties are amenable. The topics, readings and assignments will vary based upon mutually agreed upon goals. The student will be responsible for obtaining and submitting the necessary paperwork from/to the Office of Student Services in the School of Education. This is a variable credit course that ranges from 1 to 4 credits. The number of credits will be determined by the professor based on the workload.

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8888 (1-4) Independent Study in Learning and Human Development: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8899 (1-4) Independent Study in Educational Foundations Policy and Practice: Doctoral Level

Repeatable: Repeatable for up to 8.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8935 (1-6) Internship in Curriculum and Instruction

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8936 (1-6) Internship in Research and Evaluation Methodology

Repeatable: Repeatable for up to 36.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8937 (1-6) Internship in Educational Equity and Cultural Diversity

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8938 (1-6) Internship in Learning Sciences and Human Development

Repeatable: Repeatable for up to 24.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8939 (1-6) Internship in Educational Foundations Policy and Practice

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Graduate Education

EDUC 8940 (3) Scholarly Writing for Graduate Students

Provides graduate students an opportunity to reflect on their current writing process, on their identity as an academic writer, and how their writing is shaping and being shaped by their emerging scholarship. Explores genres of academic writing, processes of peer review, and publication as students engage in weekly writing assignments that build toward a complete manuscript. Students should enter the class with a draft of an existing paper that they intend to work on.

EDUC 8950 (3) Proposal and Dissertation Writing

Provides students with ongoing opportunities to write social science research in the context of the design, analysis and data representation, development, and write-up of students' dissertation proposals and dissertations. Students will learn to expand how they think about and use evidence, clarify their ideas and arguments, and improve their writing. Students working on proposals and dissertations should enroll.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to EDUC-PHD students.

Additional Information: Departmental Category: Graduate Education

EDUC 8994 (1-10) Doctoral Dissertation

Repeatable: Repeatable for up to 60.00 total credit hours.

Additional Information: Departmental Category: Graduate Education

Curriculum and Instruction

Curriculum and Instruction (C&I) graduate programs focus on teaching and learning in the following curricular areas: Literacy Studies (PhD, master's), STEM Education (PhD, master's), and Humanities (master's). Additionally, the MA+ teacher licensure program leads to a Colorado initial teaching license plus a master's degree in C&I. Coursework focuses on foundations of learning, foundations of education and subject matter knowledge and pedagogy. The programs prepare students to understand the complexities of classroom contexts and teaching practice in relation to education goals of equity, democracy and justice.

Master's Degree

- Curriculum and Instruction - Master of Arts (MA) (p. 1426)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1437)

Education - Curriculum and Instruction - Master of Arts (MA)

The Curriculum & Instruction (C&I) master's degree requires one academic year or more of graduate work beyond the bachelor's degree.

Program Tracks

Humanities Education Track

This track is designed to support teachers and other education professionals who are interested in developing greater understanding and expertise in the teaching and learning of the humanities. Courses within this concentration provide opportunities for graduate students to strengthen discipline-specific content knowledge, knowledge for teaching

humanities and a multidisciplinary understanding of how content, pedagogy and practice that supports teaching and inquiry focused on humans' social and cultural experience as they navigate institutional, social and political systems, including education. In consultation with the advisor, this degree can be tailored toward students' goals, interests and desired timeline to degree (typically ranging from 1–2 years)

The program serves practicing teachers, educators working with youth in informal and out-of-school settings, as well as individuals with backgrounds in the humanities wishing to learn more about teaching and learning. This track is only offered as a master's degree. Prospective doctoral students interested in the humanities are encouraged to consider the Literacy Studies, or the Educational Foundations, Policy, and Practice emphasis of the Education PhD (p. 1437) program.

Literacy Education Track

This track is designed to support teachers who are interested in developing greater understanding and expertise in the teaching and learning of literacy. Students completing this program track may be eligible for a Reading Teacher K–12 endorsement from the state of Colorado. The MA includes all coursework required for the state endorsement. However, the endorsement is an advanced and specialty certification, all candidates must also have a minimum of two years K-12 teaching experience.

Typical students in the program are practicing teachers who want to strengthen their literacy instruction and earn a Reading Teacher K–12 endorsement from the state of Colorado.

STEM Education Track

The CU Boulder School of Education offers this program to support educators and other education professionals who are interested in developing greater understanding of and expertise in education related to STEM (particularly science and mathematics). The program enables teachers, educational designers and scholars to explore and critically analyze educational, pedagogical, and curricular strategies designed to support students' STEM learning and identities. Disciplinary connections to critical issues in STEM are strengthened through lesson design and analysis, fieldwork, coursework and research activities. Throughout these experiences, we center equity, democracy, and justice as core concerns in STEM education.

The program serves practicing teachers, educational leaders, designers of informal educational settings, as well as individuals with backgrounds in STEM wishing to learn more about teaching and learning. Graduates of our MA program go on to become teacher leaders, instructional designers, curriculum specialists, district administrators and educational consultants.

MA+ Teacher Licensure

The MA+ teacher licensure program (p. 1446) leads to a Colorado initial teaching license in Secondary Math, Science, English or Social Studies plus a master's degree in C&I. This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and who want to elaborate and deepen the close connections between fieldwork and coursework to become a teacher. For more information, contact the School of Education.

Requirements

General Requirements

Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year time limit.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Master's degree students who began CU's Teacher Education Program as undergraduates or as post-baccalaureate students have the following transfer credit options:

- If the student took the courses as an undergraduate, they may be eligible to transfer up to two of their track's eligible transfer courses, depending on when those courses were taken and if the credits did not count towards the degree. Contact the School of Education for more information.
- If the student took the courses as a post-baccalaureate student, they may transfer up to two of their track's eligible transfer courses as electives, as long as the courses were taken within the past five years. Note: Students transferring from secondary programs will transfer seven credits; therefore, they will complete a 31-credit master's degree.

Time Limit

The master's degree must be completed within four years.

Program Tracks

Humanities Education Track

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
Learning and Development		
Choose at least 3 credit hours of learning and development courses. Examples of eligible courses include:		3
EDUC 6318	Psychological Foundations of Education	

EDUC 6328	Advanced Child Growth and Educational Development	
EDUC 5105	Teaching for Understanding and Equity	
Foundations of Education Curriculum		
Choose at least 3 credit hours of foundations of education curriculum courses. Examples of eligible courses include:		3
EDUC 5065	Curriculum Theories	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
Curriculum and Instruction in Humanities		
Choose at least 12 credit hours of curriculum and instruction in humanities courses. Courses that meet students' goals and interests are chosen in consultation with the advisor. ¹		12
Electives		
Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with an advisor. ^{1,2,3}		9
Capstone Course		
EDUC 6964	Capstone: Inquiry in the Content Areas	3
Total Credit Hours		30

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

³ Students may deepen their content knowledge in the humanities disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1427) section for details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5365	Secondary English Methods II	3

Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6964 Capstone: Inquiry in the Content Areas. This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

Literacy Education Track with CO Reading Teacher Endorsement Track-Specific Courses

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
EDUC 5245	Foundations of Reading Instruction K-12	3
EDUC 5255	Digital Literacies and New Media	3
EDUC 5265	Processes in Writing	3
EDUC 5275	Assessment in Literacy (prerequisite EDUC 5255)	3
EDUC 5285	Reading Clinic Procedures K-12 (prerequisite EDUC 5275)	3
Total Credit Hours		15

Electives

An additional 15 credit hours of electives and the Capstone Course are required. Courses that meet students' goals and interests are chosen in consultation with the advisor. Education courses must be at the 5000 level or above^{1,2,3}.

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

³ Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1427) section for full details.

Code	Title	Credit Hours
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5316	Nature of Social Studies and Social Studies Education	3
EDUC 5317	Perspectives on Mathematics	3
EDUC 5355	Secondary Social Studies Methods II	3
EDUC 5365	Secondary English Methods II	3
EDUC 5375	Problem-Based Math Instruction	4
EDUC 5385	Problem-Based Science Instruction	4

Comprehensive Exam/Capstone Course

During the final Spring semester prior to graduation, students must enroll in the capstone course Reading Clinic Procedures K-12 (EDUC 5285). This course is only offered once a year. The Capstone course is a graduation requirement and requires the submission of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

STEM Education Track

In addition to the required core courses, students must complete the following track-specific course requirements.

Code	Title	Credit Hours
Learning and Development		
Choose at least 3 credit hours of learning and development courses. Examples of eligible courses include:		3
EDUC 5050	Knowing and Learning in Mathematics and Science	
EDUC 5105	Teaching for Understanding and Equity	
EDUC 6318	Psychological Foundations of Education	
EDUC 6328	Advanced Child Growth and Educational Development	
Foundations of Education Curriculum		
Choose at least 3 credit hours of foundations of education curriculum courses. Examples of eligible courses include:		3
EDUC 5005	Advanced Social Foundations of Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 6325	Anthropology of Education	
Curriculum and Instruction in Mathematics and Science		
Choose at least 12 credit hours of curriculum and instruction in mathematics and science courses. Eligible courses include: ¹		12
EDUC 5317	Perspectives on Mathematics	
EDUC 5460	Teaching and Learning Physics	
EDUC 5706	Assessment in Mathematics and Science Education	
EDUC 5815	Teaching K-12 Mathematics: Number Sense	
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking	
EDUC 5822	Teaching and Learning Chemistry	
EDUC 5833	Teaching and Learning Earth Systems	
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement	
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics	
EDUC 6811	Teaching & Learning Biology In the Classroom	
Electives		
Choose at least 9 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen in consultation with your advisor. ^{1,2,3}		9
Capstone Course		3
EDUC 6964	Capstone: Inquiry in the Content Areas	
Total Credit Hours		30

¹ See also "Eligible Transfer Courses" below.

² GRTE courses may not count toward a master's degree.

³ Students may deepen their content knowledge in the mathematics or science disciplines by taking a maximum of 6 credit hours of courses in the College of Arts & Sciences at the 3000 level or above that are taught by graduate faculty.

Eligible Transfer Courses

See the Transfer Credit (p. 1427) section for full details.

Code	Title	Credit Hours
EDUC 5050	Knowing and Learning in Mathematics and Science	3
EDUC 5205	Elementary Mathematics Theory and Methods	3
EDUC 5215	Elementary Science Theory and Methods	3
EDUC 5317	Perspectives on Mathematics	3
EDUC 5375	Problem-Based Math Instruction	4
EDUC 5385	Problem-Based Science Instruction	4

Comprehensive Exam

During the final Spring semester prior to graduation, students must enroll in the capstone course EDUC 6964. This course is offered only once a year. The capstone course is a graduation requirement and requires the of a paper or project reviewed by faculty to successfully complete graduation and course requirements.

Learning Outcomes

MA students in Curriculum & Instruction will:

- Develop greater understanding and expertise in teaching and learning within and/or across content domains (e.g., Humanities, Literacy, STEM Education).
- Demonstrate professional integrity through ethical conduct, reflection and leadership.
- Collect and analyze information from research and practice to inform decisions and enhance equitable teaching and learning for all students.
- Make educational decisions based on deep engagement with educational scholarship, perspectives and data.
- Understand the importance of partnering with and centering the knowledge of families and communities, particularly those that have experienced histories of marginalization, to work toward social change and educational justice.
- Draw on disciplinary knowledge, perspectives and practices to broaden opportunities personal and social transformation

Education - Learning Sciences and Human Development

The Learning Sciences & Human Development (LSHD) program takes an interdisciplinary approach to understanding learning, teaching and the design of learning ecologies. The program is particularly concerned with examining learning and development as it happens in and across a range of settings, including schools, community organizations, families and peer groups. In their research and courses, faculty engage with pressing questions of policy and practice. To this end, program faculty enact innovative teaching practices that are attuned to our current technological and socio-political climate. Our interdisciplinary approach encourages students in the program to cultivate a strong commitment to

and develop a strong record of working in partnership with schools and communities to organize innovative practices that open up opportunities for transformative learning.

The LSHD program is on the leading edge of the field in its theoretical and practical explorations of social and spatial justice, technology and design, and culture and diversity in learning. LSHD faculty and students are also leaders in theorizing and building partnerships with schools, districts and state agencies, as well as youth and community organizations.

Master's Degree

- Learning Sciences and Human Development - Master of Arts (MA) (p. 1429)

Learning Sciences and Human Development - Master of Arts (MA)

The Learning Sciences & Human Development (LSHD) master's program focuses on research, theory and professional knowledge about learning environments. Areas of study include K–12 schools, community settings, museums and the variety of contexts that young people navigate in their everyday lives, including digital media and gaming. Although we have a primary focus on children and youth, several faculty members also study processes of teacher learning.

The program is structured in ways that emphasize the bridging of theory and practice, lending primary emphasis to academic study and research. The program is designed to provide an academic and practical foundation that prepares students for a variety of career pathways. These include, but are not limited to, work in K–12 education, youth-serving community organizations, educational research firms or in the private sector. Faculty advisors and students build programs of study that meet program goals and the student's interests.

Prior Experience

To make the most of the LSHD MA program, it is helpful—though not required—for students to have taken coursework focused on learning and human development. For example, courses that address topics such as how people learn, cognition and the social and cultural contexts of development, including the study of culture, race, ethnicity, gender or linguistics would be relevant. Commensurate professional or paraprofessional experience in educational settings—in and out of school and with youth and adults—is also a valued prior experience.

Requirements

Required Courses and Credits

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours
Core Requirements		
EDUC 5716	Basic Statistical Methods	3

EDUC 5726	Introduction to Disciplined Inquiry	3
EDUC 6318	Psychological Foundations of Education	3
EDUC 6328	Advanced Child Growth and Educational Development	3
Core Electives		
Choose at least 6 additional credit hours of courses at the 5000 level or above from within the School of Education, to be chosen from the following categories in consultation with your advisor. (Suggested options below.) ¹		6
<i>Learning and Development</i>		
EDUC 8358	Critical Introduction to Learning Theory and Practice, Part 1	
EDUC 8348	Human Development in Cultural, Historical, and Sociopolitical Contexts	
<i>Curriculum and Instruction</i>		
EDUC 5105	Teaching for Understanding and Equity	
<i>Learning and Technology</i>		
See special topics courses.		
<i>Foundations</i>		
EDUC 7055	Philosophy of Education	
Area of Specialization		
Students will develop their Area of Specialization in close dialogue with their advisor. Courses for the Area of Specialization may be taken outside or inside of the School of Education.		6
Capstone Project		6
Total Credit Hours		30

¹ GRTE courses may not count toward a master's degree.

Capstone Project

The capstone project is the culminating academic experience for students in the MA program. The capstone project is meant to provide a context in which students can use the conceptual and methodological tools, along with their grounded professional experiences to develop a project designed to integrate their lived experiences with the knowledge they have gained through coursework.

Students will be supported to develop their capstone project through three phases.

Phase 1: In EDUC 5726 Introduction to Disciplined Inquiry, students will develop a literature review focused on a topic of interest connected to the study of learning sciences and human development.

Phase 2: In EDUC 5XXX Critical Design for Learning and Development, students will develop their proposal for their capstone project. This will involve building on the literature review they developed in EDUC 5726 and then identifying, with the course instructor, how they could ground their understandings in a real world setting. The proposed project will be an empirical investigation; it could take multiple forms such as an observational study or an intervention study or a process of improvement developed in collaboration with an external organization. Students can take EDUC 5XXX Critical Design for Learning and Development, contact their faculty advisor to make appropriate arrangements to support the capstone work.

Phase 3: In EDUC 6945 MA Capstone Seminar in Foundations of Education, students will complete their proposed study and write a report

of their findings. Students are expected to draw on their coursework and independent research to develop their capstone project. The students will share their written proposal with the instructor of EDUC 5726, their advisor, and (as appropriate) the external organization with whom they are collaborating to get feedback on their plans. Although students are not required to implement their intervention, they need to discuss the research that supports their logic, methods, and claims.

Time Limit

The master's degree must be completed within four years.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system. Students who have transfer credits must complete the transfer of credit paperwork.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours, and is accepted only after approval of the department chair/program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Educational Equity and Cultural Diversity

Educational Equity and Cultural Diversity (EECD) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis, including:

- The education of culturally and linguistically diverse students
- The education of exceptional children

The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Program faculty offer courses in first and second language acquisition theory, program development for bilingual education and English language development and methodologies appropriate for such programs. Faculty also offer courses in special education methodologies, assessment and program implementation. Additional related courses are available in other programs of the School of Education and in other departments of the university.

The program is designed to train scholars, teachers, resource specialists and administrators for careers in academic institutions, public schools and federal and state agencies. Doctoral level preparation is research-oriented and qualifies graduates to be curriculum specialists in school districts or faculty in university positions.

Master's Degree

- Educational Equity and Cultural Diversity - Master of Arts (MA) (p. 1431)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1437)

Educational Equity and Cultural Diversity - Master of Arts (MA)

Educational Equity & Cultural Diversity (EECD) offers a course of study devoted to the critical examination of theory, practice and policy in two major areas of emphasis: the education of culturally and linguistically diverse students and the education of students with disabilities. The program stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

Areas of Emphasis

Culturally & Linguistically Diverse Education Emphasis

The School of Education offers the master's degree in EECD with an emphasis in Culturally & Linguistically Diverse Education. Completion of this program qualifies one for a Colorado endorsement in the area of Culturally & Linguistically Diverse education (K-12). Some candidates may also be eligible for the Culturally & Linguistically Diverse Education Specialist: Bilingual Education endorsement. Please contact the School of Education for details.

The program provides a range of direct experiences in bilingual/multicultural/ELD education with the opportunity to develop skills and expertise essential to the work of educators of the bilingual/emerging bilingual learner. The overall purpose of the program is to develop sound bilingual/multicultural/ELD competencies in teachers and school leaders. Program coursework includes foundations of bilingual/multicultural education, assessment practices and issues, methods in bilingual and ELD, biliteracy, family/community engagement, and a field-based practicum. Participation in the program may be on a part-time basis. International students seeking participation in this program should consult with a faculty advisor before applying for admission and must complete a practicum in a U.S. K-12 public school. This program is not appropriate for individuals wishing to teach English as a foreign language in other countries

Culturally & Linguistically Diverse Ed/Special Ed Generalist Emphasis

The School of Education offers the master's degree in EECD with an emphasis in bilingual/ELD special education. Completion of this program qualifies one for teacher license endorsements in two areas of Special Education Generalist (K-12) and Culturally & Linguistically Diverse education (K-12). Program graduates are employed in both general and special education programs. The program offers courses in foundations in special and ESL/bilingual/multicultural education; assessment issues and practices in bilingual/ELD special education; methods of bilingual, ELD and special education; biliteracy; family and community engagement; and a field-based practicum. This program is not suitable for international students seeking preparation in Teaching English as

a Foreign Language (TEFL). This is a part-time program for practicing educators with courses offered evenings and summers. This program is designed to be completed over a three-year period.

Social/Multicultural/Bilingual Education Emphasis

This program is a non-endorsement degree with an interdisciplinary focus. The program offers courses in foundations of bilingual/multicultural education, curriculum and methods in multicultural education, and curriculum theory. Participation in the program may be on a part-time or full-time basis.

Requirements

Social/Multicultural/Bilingual Education (Non-Endorsement) Plan

Program Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master's degree within four years. This program does *not* lead to an added endorsement in Culturally and Linguistically Diverse Education.

Required Courses and Credits

The program requires 15 credit hours in bilingual, ESL and multicultural education. The remaining 15 credit hours are electives that may be taken either in the School of Education or in other CU departments, but should be discussed with and approved by an advisor. Education courses must be at the 5000 level or above. GRTE courses may not count toward a master's degree. A maximum of 6 credit hours may be completed in Arts & Sciences courses taken at the 3000 or 4000 level. The frequency of individual course offerings varies; therefore candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit.

Code	Title	Credit Hours
Core Requirements		
EDUC 5525/5605	Research Issues in Special Education	3
Suggested bilingual, ELD and multicultural education courses include the following:		12
EDUC 5035	Proseminar: Parent and Community Involvement	
EDUC 5425	Introduction to Bilingual/Multicultural Education	
EDUC 5445	Curriculum for Multicultural Education	
EDUC 5455	Literacy for Linguistically Different Learners	
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	
EDUC 5615	Second Language Acquisition	
EDUC 5625	Methods of Teaching English Language Development	
Electives		15
Total Credit Hours		30

Comprehensive Exam

A written comprehensive examination must be completed during the student's last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework

from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder. Students must be enrolled in a course in the same semester they are taking comps.

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Culturally & Linguistically Diverse Education (CO CLD Endorsement) Plan

Program Requirements

Student must successfully complete 31 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master’s degree within four years.

Required Courses and Credits

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 31 credit hours are completed within the four-year limit.

Approved coursework meets the following course requirements:

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
<i>Course or Requirement:</i>		
EDUC 5425/5465	Introduction to Bilingual/Multicultural Education	3
EDUC 5445	Curriculum for Multicultural Education	3
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5435	Materials and Methods in Bilingual/Multicultural Education	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	3
EDUC 5605	Research Issues in Bilingual Education	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English Language Development	3
Comprehensive Exam/Capstone Course		4

EDUC 5595	Practicum in Linguistically Different: English Language Development
-----------	---

Total Credit Hours **31**

Comprehensive Exam

A written comprehensive examination must be completed during the student’s last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- EDUC 5595 Practicum in Linguistically Different: English Language Development (1-4): (4 credit hours) Practicum includes 200 hours of in-school work (can be taken over two semester blocks)

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer-of-credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Special Education Generalist and Culturally & Linguistically Diverse Education (CO Dual Endorsement) Plan

Program Requirements

Students must successfully complete 36–37 credit hours of approved coursework while maintaining at least a B (3.0) average in all work attempted while enrolled. Students must also successfully pass their Comprehensive Exam and complete the master’s degree within four years.

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 36–37 credit hours are completed within the four-year limit.

Approved coursework meets the following distribution requirements:

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
<i>Course or Requirement:</i>		
EDUC 5035	Proseminar: Parent and Community Involvement	3
EDUC 5455	Literacy for Linguistically Different Learners	3
EDUC 5465	Introduction to ELD/Bilingual and Special Education	3

EDUC 5505	Education of Students with Learning and Behavior Disorders	3
EDUC 5515	Curriculum and Assessment for Special Learners	3
EDUC 5525	Research Issues in Special Education	3
EDUC 5535	Diagnostic Testing in ELD and Bilingual Education	3
EDUC 5545	Strategies for Teaching Students with Special Needs	3
EDUC 5615	Second Language Acquisition	3
EDUC 5625	Methods of Teaching English Language Development	3
EDUC 7105	Collaboration to Meet Special Needs	3
Comprehensive Exam/Capstone Course		3-4
EDUC 5555	Practicum in Bilingual/Special Education	
Total Credit Hours		36-37

Comprehensive Exam

A written comprehensive examination must be completed during the student’s last term of study for the MA degree. The examination will cover the content of all work in the program. Students transferring coursework from other institutions to this program (up to 9 credit hours may be taken at other approved institutions) are responsible for the same knowledge as those whose work has been taken entirely at CU Boulder.

- Practicum in Bilingual/Special Education (EDUC 5555): 3-4 credit hours

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours and is accepted only after approval of the program director and under the special conditions outlines in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA.

Learning Outcomes

Students in the Educational Equity and Cultural Diversity MA program will:

- Develop pedagogical expertise in planning for instruction and effectively teaching bi/multilingual students and/or students with identified special needs in PK-12th grade settings.
- Understand the complex interaction of language, culture, identity and learning in and out of schools.
- Develop the knowledge and skills to advocate on behalf of culturally and linguistically diverse learners in schools.
- Build effective partnerships with communities and families in the pursuit of educational equity and opportunity.

- Embrace a holistic/dynamic bilingual lens and an anti-racist stance in making decisions regarding policy, programs, assessment, curriculum and instruction.
- For CLD and Dual Endorsement Programs: Meet requirements for the State of Colorado Endorsement in Cultural and Linguistic Diversity in Education.
- For Double Endorsement Program: Meet requirements for the State of Colorado Endorsement in Special Education.

Educational Foundations, Policy and Practice

Educational Foundations, Policy & Practice (EFPP) graduate programs focus on policy analysis and the application of academic disciplines— anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The master’s program prepares students for a variety of pathways, including policy analyst careers for state and local organizations, and further study at the PhD level. The PhD program prepares students for university faculty positions and other careers requiring deep knowledge of research.

Master's Degrees

- Educational Foundations, Policy and Practice - Master of Arts (MA) (p. 1433)
- Higher Education - Master of Arts (MA) (p. 1435)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1437)

Educational Foundations, Policy and Practice - Master of Arts (MA)

The master’s program in Educational Foundations, Policy & Practice (EFPP) includes two possible concentrations, each with a different focus: *community-based change*, and *evaluation and policy analysis*. Both concentrations engage students in a critical examination of the relations among education, society, culture and government, with special emphases on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The program stresses analysis of educational theory, policy, and practice by drawing on the humanities and the social sciences. Its foundation is critical scholarship, which examines educational institutions within broad social, political, cultural, legal, and economic contexts in the United States. Program faculty members offer courses in social, cultural, historical, legal and philosophical foundations of education; in policy analysis; and in evaluation. Additional related courses are available in other programs within the School of Education and in other departments of the university.

EFPP has designed its master’s program as a flexible program with a relatively small size to encourage strong and enduring relationships among students and faculty. All master’s program concentrations are designed to prepare graduates for diverse roles as educators, advocates or policy analysts in schools, government agencies, think tanks, policy

organizations, community organizations or institutions of higher education. This program also prepares graduates to pursue doctoral work.

The following two are possible concentrations, but students are also welcome to design an individualized concentration that reflects their academic interests and professional goals.

Community-Based Change Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as contemporary school reforms and partnerships between schools and communities. This strand of the EFPP MA program is specifically geared toward educators, non-profit leaders, parents, and other community members who wish to gain skills and knowledge that will assist them in becoming powerful advocates for high-quality, equitable education.

Key foundations courses in this concentration include but are not limited to: policy issues in education, philosophy of education, anthropology of education, sociology in education, history of American education, education policy and the law, international and comparative education, queer(ing) topics in education, and issues in African-American education. Students will create a specific course plan around their interests in consultation with their advisor.

Evaluation and Policy Analysis Concentration

Students will pursue a course of study to develop expertise in policy analysis, research methods, and program evaluation, as well as specific areas of inquiry such as the process of school reform and the development of more equitable education policies. The program is designed to prepare evaluators and policy analysts for careers in academic institutions and agencies at the state and federal levels. Graduates will be able to analyze, recommend, and evaluate public policies.

Key courses in this concentration include but are not limited to: education evaluation, policy issues in education, philosophy of education, education policy and the law, and theoretical issues in education policy. Students will create a specific course plan around their interests in consultation with their advisor.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Ethnic Studies - Bachelor of Arts (BA) (p. 291).

Completing the BAM degree program efficiently requires early and careful planning. Interested students can contact education advisors at edadvise@colorado.edu or 303-492-6555, and Ethnic Studies advisors at ethnicst@colorado.edu or 303-492-8852 at any time.

Requirements

Students must successfully complete 30 credit hours of approved coursework while maintaining at least a B (3.0) average in *all* work attempted while enrolled. Students must also successfully pass their Capstone Course. The master's degree must be completed within four years.

For more information on requirements for the master's degree, visit the Educational Foundations, Policy and Practice (<http://www.colorado.edu/education/graduate-programs/educational-foundations-policy-practice-efpp/ma-efpp/degree-requirements/>) page on the School of Education website.

Degree Requirements

Students develop a degree plan in consultation with their faculty advisor, typically in their first semester. The frequency of individual course offerings varies; therefore, candidates should plan ahead so that the required 30 credit hours are completed within the four-year limit set forth below.

Students select the remaining 6 credit hours in consultation with their advisors, depending on the credit distribution in the above categories.

Required Courses and Credits

Code	Title	Credit Hours
Foundations		15
Choose at least 15 credit hours in educational foundations.		
Suggested courses:		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6211	Education Law and Litigation Workshop	
EDUC 6220	Gender Issues in Education	
EDUC 6240	African American Education in the United States	
EDUC 6245	Latinx Education Across the Americas	
EDUC 6250	Higher Education in the United States	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
EDUC 8055	Theoretical Issues in Education Policy	
Education Research		6
Ordinarily, entering master's-level students will take the following two courses to meet this requirement:		
EDUC 5716	Basic Statistical Methods	
EDUC 5726	Introduction to Disciplined Inquiry	
Those who have already taken one or more comparable courses can adjust their course of study accordingly.		
Electives		6
Students may select 6 credits of coursework in consultation with their advisor.		
Capstone Course		3
Total Credit Hours		30

Capstone Course

During the final spring semester prior to graduation, students must enroll in the capstone course, EDUC 6945 MA Capstone Seminar in Foundations of Education. This course is only offered in the spring semester. The capstone course requires the submission of a paper or project reviewed by faculty to successfully complete both course and graduation requirements.

Transfer of Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system including the Boulder campus. Students who have transfer credits must complete the transfer of credit paperwork approval process.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 9 credit hours. These transfer credits are accepted only after approval of the department chair or program director and under the special conditions outlined in the Graduate School Rules. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer. Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed six credits of graduate-level coursework, with a 3.0 GPA, as a degree-seeking student on the CU Boulder campus.

Learning Outcomes

MA students in Educational Foundations, Policy and Practice will:

- Understand and apply various disciplinary perspectives and critical theoretical lenses to analyze educational policy and practice.
- Analyze the relationship between schools and various social, political and economic forces that structure educational aims, institutions and practices.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the ability to evaluate how (and to what extent) various educational policies and practices advance or undermine such aims.
- Develop and practice strategies and skills of policy analysis and program evaluation, in order to effectively analyze, recommend and evaluate public policies and to advocate for high-quality, equitable education.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning.

Higher Education - Master of Arts (MA)

The MA in Higher Education (MAHE) is a professional degree program designed to prepare students for careers in higher education. The MAHE program is designed to help students broaden their knowledge of higher education policy, research and practice, especially in the areas of student affairs, academic affairs, diversity and community engagement.

The professional MA program offers a supportive community and flexible coursework designed to accommodate busy professionals' schedules. An innovative collaborative effort between the School of Education and

various administrative departments on campus, the program offers a dynamic combination of academic knowledge and experiential education.

Requirements

The MA in Higher Education (MAHE) program aims to develop knowledgeable, ethical, and diverse leaders in higher education. Students will broaden their knowledge of higher education in three key areas: the foundations of higher education; research and evaluation; and higher education and student affairs practice. Students complete two professional practicum experiences in higher education as well as a research-based Capstone project, a summative writing project designed around the professional and academic goals of each student, with feedback from their advisor.

Students must successfully complete 36 credit hours of approved coursework while maintaining at least a B (3.0) grade point average, and must pass their capstone course. Additionally, the master's degree must be completed within four years.

Required Courses and Credits

Code	Title	Credit Hours
Foundations of Higher Education (9 credits)		9
EDUC 6250	Higher Education in the United States (Required Course)	
<i>Select 6 credits from a menu of "foundations" courses, including the following:</i>		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology of Education	
EDUC 5085	History of American Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6245	Latinx Education Across the Americas	
EDUC 6260	Transnational Migration, Education, and Citizenship	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Policy Issues in Education	
Or other appropriate Foundations courses approved by faculty advisor.		
Research and Evaluation (6 credits)		6
<i>Select 6 credits from the following:</i>		
EDUC 5716	Basic Statistical Methods	
EDUC 5726	Introduction to Disciplined Inquiry	
EDUC 7386	Educational Evaluation	
Or other appropriate courses approved by faculty advisor.		
Higher Education Practice		6
<i>Select 6 credits from the following:</i>		
EDUC 5010	Race and Equity in Higher Education	
EDUC 6110	Student Affairs in Higher Education	
EDUC 6405	College Student Development and Counseling Theories	
EDUC 6705	Leadership in Higher Education	
Required Practicum (6 Credits)		6

EDUC 6919	Practicum in Educational Foundations Policy and Practice (Course taken as 2 credits per semester)	
Electives (6 Credits)		6
<i>Select six credits from the following 1 cr. courses:</i>		
EDUC 5011	College Student Career Development	
EDUC 5012	Higher Education Finance	
EDUC 5014	Ethical Dilemmas in Higher Education	
EDUC 5020	College Academic Advising	
EDUC 5021	College Athletic Affairs	
EDUC 5022	LGBTQ+ Topics in Higher Education	
EDUC 5023	College Admissions and Enrollment	
EDUC 5026	Technology in Higher Education	
EDUC 5027	Institutional Advancement and Development in Higher Education	
EDUC 5028	International Education in Higher Education and Student Affairs	
EDUC 5030	Accessibility and Students with Disabilities in Higher Education	
EDUC 5031	Institutional Research & Analytics in Higher Education	
EDUC 5032	College Student Leadership Development	
Or other appropriate courses approved by faculty advisor.		
Required Capstone Course (3 Credits)		3
EDUC 6945	MA Capstone Seminar in Foundations of Education	
Total Credit Hours		36

Learning Outcomes

Students in the MAHE program will:

- Understand the mission, roles, and functions of higher education in the United States, including the history and philosophy of higher education; college student development; and key factors that influence student and organizational behavior.
- Translate theoretical knowledge into meaningful practices in the profession, including in areas such as advising, instruction, supervision, program design, administration and research.
- Develop nuanced and sophisticated understandings of equity and justice, as well as the competencies necessary to engage with diverse students and staff with sensitivity, effectiveness and confidence.
- Practice skills of program assessment, design, implementation, and evaluation, as appropriate for various divisions and offices in higher education. Develop professional relationships with peers and team members in a university setting.
- Design a high-quality, research-based project that demonstrates academic skills of argument, evidence and reasoning. Students will be able to offer (and receive) critical and supportive peer feedback, and gain experience presenting work to external audiences.

Research and Evaluation Methodology

The Research & Evaluation Methodology (REM) program offers the opportunity to combine substantive interests in education with advanced

training in research methods. The program's central mission is to provide students with the training they need to use sophisticated methods that shed light on policies, programs and practices that have been enacted to facilitate student learning and to mitigate inequality in educational opportunities and outcomes. Students will learn both how to apply a variety of methodological approaches, and, of equal or greater importance, to think deeply about when and why the approach is sensible given the real-world contexts in which these research designs and methods are applied.

A spirit of critical inquiry and intellectual curiosity is a defining feature of the REM community. When claims are made—by students or faculty—it is expected that those claims will be supported by an adequate warrant, drawing on empirical evidence when appropriate.

Within this framing, learning goals for REM students include that they:

- Develop knowledge and skills for applying appropriate research methods and study designs to answer substantive questions about educational policies, programs, and practices aimed at promoting equitable opportunities and outcomes for historically underserved and marginalized populations.
- Learn to communicate relevant findings and insights to a broad audience of stakeholders including the public, policymakers and academic peers.
- Find fulfilling careers in a context that is the best fit for each individual student's research (and teaching) interests. These careers may be in university teaching and research, research and evaluation in state departments of education, large school districts, think tanks or research firms, federally funded regional research and development laboratories; assessment and testing organizations; and consultation for government and education agencies.

REM faculty strive to foster an environment for students that is both challenging and supportive. During the weekly "REM seminar," students have the opportunity to interact with invited speakers, discuss timely research topics and studies, brainstorm ideas for publishable papers, and practice giving oral presentations. Regular interactions among students and faculty is the norm, not the exception. REM faculty teach courses and mentor students with the same commitment and dedication that is evident in our scholarly research. Students will have ongoing support as they embark on a path that begins with coursework, transitions to dissertation prospectus and defense, and culminates in a job that aligns with their particular career aspirations in educational research.

Students participate in graduate research assistantships each semester and most can expect to work with faculty on research projects as part of CADRE at some point during their doctoral studies.

The Center for Assessment, Design, Research and Evaluation (CADRE (<https://www.colorado.edu/cadre/>))

REM students can explore opportunities to be involved in CADRE research. The mission of CADRE is to produce generalizable knowledge that improves the ability to assess student learning and to evaluate programs and methods that may have an effect on this learning. CADRE projects represent a collaboration with the ongoing activities in the School of Education, the university, and the broader national and international community of scholars and stakeholders involved in educational assessment and evaluation. Visit the center's CADRE

Projects and Resources (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>) website for examples.

Other CU Boulder Center-Based Opportunities

REM faculty are affiliates of various centers at CU Boulder. REM students may have opportunities to gain research experience via faculty collaborations within these centers, which include:

- The Institute of Behavioral Science (<https://behavioralscience.colorado.edu/>)
- Renée Crown Wellness Institute (<https://www.colorado.edu/crowninstitute/>)

Career Opportunities

Opportunities for students with a PhD with an area of emphasis in REM include:

- University teaching and research
- Research, evaluation and testing in state departments of education and large school districts
- Research and policy analysis for think tanks like the RAND Corporation, SRI International, and federally funded regional research and development laboratories
- Measurement or statistical analysis for assessment and testing organizations such as the Educational Testing Service
- Consultation for government and education agencies

Examples of our REM graduates' careers over the past ten years:

- National Center for the Improvement of Educational Assessment (Senior Associate)
- Educational Testing Service (Research Scientist)
- Center for Assessment, Design, Research and Evaluation (Associate Director)
- SRI International (Principal Research Scientist)
- Stanford University (Assistant Professor)

Doctoral Degree

- Education - Doctor of Philosophy (PhD) (p. 1437)

Education - Doctor of Philosophy (PhD)

Overview

The School of Education offers a single major in Education. The major has seven program areas of emphasis, from which a student chooses:

- Educational Foundations, Policy and Practice
- Equity, Bilingualism and Biliteracy
- Learning Sciences and Human Development
- Literacy Studies
- Research and Evaluation Methodology
- STEM Education
- Teacher Learning, Research and Practice

Requirements

Required Courses and Credits

Students must successfully complete 56 credit hours of approved coursework, with 23 credit hours of core courses (see below) taken as a doctoral cohort during the first two years of study. Students must maintain at least a B (3.0) average with no grade lower than a B- while enrolled.

Students must complete 30 hours of dissertation credit. Students must be registered for a minimum of 5 dissertation hours per semester after successful completion of their comprehensive exam.

All PhD students are required to take the following seven courses in their first and second years:

Code	Title	Credit Hours
EDUC 8210	Perspectives on Classroom Teaching and Learning	3
EDUC 8220	Introduction to Educational Research and Policy	3
Research Methods Sequence ¹		
EDUC 8230 & EDUC 8240	Quantitative Methods I and Quantitative Methods II	6
EDUC 8250 & EDUC 8260	Qualitative Methods I and Qualitative Methods II	6
Advanced Seminar in Democracy, Diversity & Social Justice		3
Choose from the following courses in consultation with faculty advisor:		
EDUC 5015	International / Comparative Education	
EDUC 5301	Queer(ing) Topics in Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6240	African American Education in the United States	
EDUC 6245	Latinx Education Across the Americas	
EDUC 8014	Advanced Seminar in Democracy, Diversity and Social Justice	
EDUC 8125	Seminar: Radical Education Theories	
EDUC 8615	Language Issues in Education Research	
EDUC 8620	Language and Power	
EDUC 8165	Advanced Topics in Mathematics Education ²	
EDUC 8175	Advanced Topics in Science Education ²	
EDUC 8358	Critical Introduction to Learning Theory and Practice, Part 1 ²	
Total Credit Hours		21

¹ Students may take one or both sequences in the first year, or take one sequence each year in first or second years.

² In some instances, particular sessions of the "special topics" courses have been accepted for this requirement; check with the Associate Dean of Students or the School of Education handbook for the most recent list of approved courses.

Area of Emphasis Course Requirements

Code	Title	Credit Hours
Educational Foundations, Policy, and Practice		
<i>Specialty Seminar</i> ¹		2
EDUC 6929	Readings in Educational Foundations Policy and Practice	
<i>Educational Foundations</i>		18
Course options (examples):		
EDUC 5015	International / Comparative Education	
EDUC 5075	Sociology in Education	
EDUC 5085	History of American Education	
EDUC 6210	Education Policy and the Law	
EDUC 6220	Gender Issues in Education	
EDUC 6230	Ethics in Education	
EDUC 6240	African American Education in the United States	
EDUC 6250	Higher Education in the United States	
EDUC 6260	Transnational Migration, Education, and Citizenship	
EDUC 6325	Anthropology of Education	
EDUC 7055	Philosophy of Education	
EDUC 7446	Seminar: Policy Issues in Education	
EDUC 8025	Seminar: Curriculum Theories	
EDUC 8045	Philosophical Issues in Educational Research	
EDUC 8055	Theoretical Issues in Education Policy	
<i>Research Methods</i>		9
Minimum nine hours of advanced research methods courses; these courses may be in advanced qualitative or advanced quantitative methods and may be taken in the School of Education or in other departments of the University. Students concentrating in History of Education or Philosophy of Education may choose to fulfill this requirement with courses in historiography or philosophical inquiry, respectively. These must be chosen in consultation with the faculty advisor.		
COMM 6410	Discourse Analysis	
EDUC 7386	Educational Evaluation	
EDUC 7396	Categorical Data Analysis	
EDUC 7456	Multilevel Modeling	
EDUC 7456	Multilevel Modeling	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
EDUC 8730	Advanced Qualitative Data Analysis	
SOCY 7026	Feminist Research Methods	
SOCY 7121	Qualitative Analysis	
<i>Electives</i> ³		6
<i>Total Credits</i>		35
Equity, Bilingualism, and Bilitery		
<i>Specialty Seminar</i> ¹		2
EDUC 6927	Readings in Equity, Bilingualism and Bilitery	
<i>Studies in Equity, Bilingualism, and Bilitery</i>		15

EDUC 5615	Second Language Acquisition ²	
EDUC 5635	Education and Sociolinguistics ²	
EDUC 8615	Language Issues in Education Research	
EDUC 8620	Language and Power	
EDUC 8630	Bilingual and Biliterate Development in Children and Adolescents	
EDUC 8640	Rethinking Disability	
<i>Research and Statistics</i>		6
Minimum nine hours in advanced methodology, preferably aligned with the methods to be used during dissertation research.		
<i>Choose from:</i>		
EDUC 6504	Issues and Methods in Cognitive Science	
EDUC 7336	Methods of Survey Research and Assessments	
EDUC 7346	Ethnographic Methods in Educational Research	
EDUC 7386	Educational Evaluation	
EDUC 7396	Categorical Data Analysis	
EDUC 7456	Multilevel Modeling	
EDUC 8710	Measurement in Survey Research	
EDUC 8720	Advanced Topics in Measurement	
EDUC 8730	Advanced Qualitative Data Analysis	
COMM 6410	Discourse Analysis	
<i>Non-Education Courses</i>		3-6
Three to six credit hours must be taken outside of the School of Education. These courses must be selected in consultation with the faculty advisor and are typically at the 6000-level or higher.		
<i>Electives</i> ³		6-9
<i>Total Credits</i>		35
Learning Sciences and Human Development		
<i>Specialty Seminar</i> ¹		2
EDUC 6928	Readings in Learning Sciences and Human Development	1-4
<i>Advanced Topics in Learning Sciences and Human Development</i>		12
Twelve hours selected with the faculty advisor's approval from 8000-level.		
<i>Electives</i> ³		21
Minimum six elective hours must be outside Learning Sciences and Human Development, and must be courses other than those used to satisfy the core requirements and the advance topics requirements. These electives may be used to satisfy requirements toward the Institute for Cognitive Sciences certificate.		
<i>Total Credits</i>		35
Literacy Studies		
<i>Specialty Seminar</i> ¹		2
EDUC 6925	Readings in Curriculum and Instruction	
<i>Literacy Doctoral Seminars</i>		12

Minimum twelve semester hours of the advanced doctoral courses in literacy studies are required to be taken within the first four years. Depending on the content focus of the course offerings, a course number may be taken more than once with approval of literacy studies faculty. These seminars will be offered minimum of once per academic year. Please plan for these courses in consultation with the faculty advisor.

Advanced Methods 3-6

Minimum six semester hours of coursework in qualitative, quantitative, and/or mixed methodologies. Courses must be graduate level and may be taken within or outside of the School of Education. For those also pursuing the Teacher Learning, Research and Practice area of emphasis, one advanced methods requirements can be met through either EDUC 8135 or EDUC 7115. Note that one of these two courses could be fulfilled in conjunction with the Cognate Requirement.

Writing Course 3

EDUC 8950 Proposal and Dissertation Writing
or EDUC 8940 Scholarly Writing for Graduate Students

Cognate Requirement 3-6

Minimum six semester hours taken outside of the School of Education. Choose a minimum of two courses in an area of specialization to be taken outside of the School of Education. The courses related to a student's specialty area may be defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical theories of race; Latinx studies; queer studies; poetry; digital humanities). Note that one of these two courses could be fulfilled in conjunction with the Advanced Methods Requirement.

*Electives*³ 9

Minimum nine semester hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

Total Credits 35

Research and Evaluation Methodology

*Specialty Seminar*¹ 2

EDUC 6926 Readings in Research and Evaluation Methodology

Research and Evaluation Methodology Required Courses 18

EDUC 7326 Quasi-Experimental Design in Causal Inference in Social Sciences

EDUC 7386 Educational Evaluation

EDUC 7396 Categorical Data Analysis

EDUC 7456 Multilevel Modeling

EDUC 8710 Measurement in Survey Research

EDUC 8720 Advanced Topics in Measurement

*Electives*³ 15

Minimum 15 semester hours within the School of Education to be chosen in consultation with advisor and in context of interests and developing expertise.

Total Credits 35

STEM Education

*Specialty Seminar*¹ 2

EDUC 6925 Readings in Curriculum and Instruction

STEM Doctoral Seminars 9

EDUC 8177 Advanced Seminar in Curriculum and Policy in Mathematics & Science Education

EDUC 8178 Advanced Seminar on Learning in Math & Science Education

EDUC 8179 Advanced Seminar in Mathematics and Science Teaching & Teacher Education

Advanced Methods 6

Minimum six hours in either qualitative or quantitative methods. Options within and outside of the School of Education may be chosen in consultation with advisor.

EDUC 8710 Measurement in Survey Research

EDUC 8720 Advanced Topics in Measurement

EDUC 8730 Advanced Qualitative Data Analysis

COMM 6410 Discourse Analysis

Writing Seminar 3

EDUC 8950 Proposal and Dissertation Writing

*Electives*³ 15

A minimum six credits within the School of Education. Additional electives may be completed outside the School of Education in consultation with advisor.

Total Credits 35

Teacher Learning, Research and Practice

*Specialty Seminar*¹ 2

EDUC 6925 Readings in Curriculum and Instruction

TLRP Seminar Courses 12

EDUC 7115 Critical Inquiry into Becoming a Teacher Educator

EDUC 8115 History and Policy Issues in Teaching and Teacher Education

EDUC 8135 Theories and Methodologies for Examining Teacher Learning

EDUC 8145 Designing for Teacher Learning and Teacher Education

Advanced Methods 3

In addition to EDUC 7115 and EDUC 8135, three hours of advanced methods (qualitative or quantitative) are required. The three remaining credit hours are met through a course selected from within or outside the School of Education in consultation with the faculty advisor. Although there are several courses that might fulfill this requirement, examples might include but are not limited to those noted below.

Course options (examples):

ANTH 7300 Seminar: Research Methods in Cultural Anthropology

COMM 6410 Discourse Analysis

EDUC 8710 Measurement in Survey Research

EDUC 8730 Advanced Qualitative Data Analysis

LING 6310 Sociolinguistic Analysis

LING 7800 Open Topics in Linguistics

SOCY 6121 Qualitative Methods

SOCY 7026 Feminist Research Methods

SOCY 7171 Special Topics

WGST 6190 Feminist Methodology

Writing Seminar 3

EDUC 8950 Proposal and Dissertation Writing
or EDUC 8940 Scholarly Writing for Graduate Students

Cognate Requirement 12

Students design a pathway that best aligns with their goals. Students might, for example, select a complementary program area of study within the CU Boulder School of Education and complete the twelve (12) hours of Graduate Seminar coursework housed in that program. Or, students might select a cognate area that allows them to explore a specialty area defined by discipline (e.g., linguistics, anthropology, English literature) or by focus (e.g., critical approaches to race, class and gender; urban studies). For either of these pathways, the remaining hours might serve as Elective credits chosen in consultation with the advisor and in the context of students' interests and developing expertise. Regardless of how the student chooses to design this element of the program, we strongly recommend that at least one course be taken outside of the School of Education. Note, too, that these credits may potentially overlap with Advanced Methods.

Electives 3

Total Credits 35

- ¹ Each program area of emphasis requires a one-credit, specialty seminar course to be taken both fall and spring semesters of the first year. Additionally, first year PhD students participate in a "Professional Seminar" that meets five times each semester. This course is required to fulfill the credits earned in the fall and spring "Readings" (specialty seminar) course.
- ² (Studies in Equity, Bilingualism, and Biliteracy) These courses are required if not already taken prior to entering PhD program.
- ³ For students also pursuing the Teacher Learning, Research and Practice area of emphasis, all elective requirements will be met through the Teacher Learning, Research and Practice required seminars.

Dissertation Credit

All doctoral students must take a minimum of 30 dissertation hours (EDUC 8994 Doctoral Dissertation).

Students are allowed to take up to 10 hours prior to passing their comprehensive exam. Once students pass their comprehensive exam, they must be registered for a minimum of 5 dissertation hours every semester. Students may be registered for 3 hours if they are "off-campus" status, meaning they are not on appointment and are not taking any coursework hours.

Students must be registered for a minimum of 5 dissertation hours during the semester they defend.

Language Requirement

The faculty in the School of Education (SOE) recognize and value the wide range of linguistic backgrounds and experiences with which students come to our PhD program. Given our shared commitment of partnering with diverse communities – including those where a variety of different [spoken and/or signed] languages are used – we view the doctoral program's language requirement as a way to engage with and demonstrate this commitment to linguistically diverse, multilingual communities. We also view this requirement as a means to understand the role of language in research design and practice, and to enact the experience of communicating about our research in languages other than

English with members of linguistically diverse, multilingual communities. All doctoral students in the SOE are required to complete the Language Requirement by May of their third year in the program.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information on this requirement.

Publishable Paper Requirement

In addition to coursework requirements, doctoral students should be immersed in ongoing research with faculty as early in their program as possible. All doctoral students in the SOE are required to complete, at a minimum, one "publishable paper" by May of their third year in the program.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information on this requirement.

Comprehensive Examination

Students must schedule comprehensive examinations or "comps" with the SOE by completing an application for candidacy form and emailing soe.gradvise@colorado.edu with the names of their committee members and the date of their exam at the beginning of the semester they plan to take their comprehensive exams. Students should also request a room booking at this time. For remote examinations, the chair must set up the Zoom room for the event. The examining committee is comprised of three faculty members. The chair of the examining committee must hold a current, regular membership on the graduate faculty and is typically the student's advisor or someone appointed in their absence in the case of sabbatical. The other two members must hold regular or special memberships on the graduate faculty. The student must be registered during the semester that the comprehensive examination is taken..

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information on this requirement.

Proposal Committee

Once students have successfully passed their comprehensive exam, they should consult their faculty advisor to propose their dissertation proposal committee.

Consistent with the Graduate's School's requirements for the final PhD examination, the committee must include at least five faculty: at least three faculty must be Boulder campus resident faculty and at least one of these three must be from outside the student's department. The outside, or "external" member may be from another department at CU Boulder or from another institution. The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student's SOE program area. Special membership, which includes faculty from other institutions, requires the approval of the Associate Dean of Students. The entire list of prospective committee members must be submitted to the Graduate Program Coordinator at soe.gradvise@colorado.edu and approved by the Associate Dean of Students at the start of the semester during which the proposal will be defended, and then re-approved at the start of the semester during which the dissertation will be defended.

Committee members must receive approval from the School of Education prior to the final examination/defense. Please check the deadlines sheet for dates.

Please see the School of Education Student Handbook (<https://www.colorado.edu/education/student-handbook/>) for more information.

Dissertation Committee and Final Defense

The dissertation committee must include at least five faculty: at least three faculty must be Boulder campus resident faculty and at least one of these three must be from outside the student's department. The outside, or "external" member may be from another department at CU Boulder or from another institution. The Chair must have regular membership on the graduate faculty. The other members must have regular or special memberships on the graduate faculty. Note that if a student is pursuing a joint or dual-degree, at least two of the faculty must hold graduate appointments in the student's SOE program area. Special membership, which includes faculty from other institutions, requires the approval of the Associate Dean of Students. The entire list of prospective committee members must be submitted to the Graduate Program Coordinator at soe.gradvise@colorado.edu and (re)approved by the Associate Dean of Students at the start of the semester during which the dissertation will be defended.

Please check the deadlines sheet for dates, and the School of Education Student Handbook for more information.

After successful completion of dissertation defense, the completed dissertation must be uploaded to the Graduate School according to Graduate School procedures and deadlines. Please see the Graduate School website for deadlines details.

Transfer Credit

Transfer credit is defined as any credit earned at another accredited institution, credits earned on another campus of the CU system, or credits earned as a nondegree student within the CU system.

The maximum amount of work that may be transferred from another accredited institution to CU Boulder is 21 credit hours, and is accepted only after approval of the faculty advisor and the Graduate Programs Coordinator, in consultation with the Associate Dean of Students. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

Transfer coursework must have been completed in the five years prior to acceptance to the program. Credit may not be transferred until the student has completed 6 credits of graduate-level coursework as a degree-seeking student on the CU Boulder campus with a 3.0 GPA. Students who have applicable credits to transfer to their PhD degree program must complete the transfer of credit paperwork.

Time Limit

The doctoral degree must be completed within six years, including defending the dissertation and submitting it to the Graduate School. A one-year extension may be granted if formally requested in writing, recommended by the student's faculty advisor, and approved by the Associate Dean of Students and the Dean of the Graduate School. The extension request must show valid reasons as to why an extension is needed. If an extension is granted, all degree requirements must be completed within the extended time period.

Establishing State Residency

PhD students who move to Colorado from another state need to petition for Colorado in-state tuition classification within one year so they are eligible for in-state tuition during second year of graduate study. Proof of residency includes a Colorado driver's license and vehicle registration, voter registration, filing Colorado income taxes and proof of employment. Students should save a signed copy of their Graduate Student Assistantship offer letter to serve as proof of employment.

Detailed instructions on how to apply for Colorado residency (also called domicile) can be found on the registrar's website: <http://www.colorado.edu/registrar/students/state-residency> (<http://www.colorado.edu/registrar/students/state-residency/>)

Areas of Emphasis

Educational Foundations, Policy, and Practice

The Educational Foundations, Policy, and Practice (EFPP) program area of emphasis focuses on policy analysis and the application of academic disciplines—anthropology, history, law, philosophy and sociology—to the analysis of education. Programs are devoted to the critical examination of the relations among education, society, culture and government, with special emphasis on issues of equity along lines of race, ethnicity, social class, gender, sexual diversity, (dis)ability, and intersections of these.

The EFPP program area of emphasis prepares students for university faculty positions and other careers requiring deep knowledge of research.

Equity, Bilingualism, and Biliteracy

The Equity, Bilingualism, and Biliteracy (EBB) program area of emphasis stresses analysis, evaluation and implementation of educational programs for students who represent diverse learning needs within the public school system. School culture, language policies and the social and political context of schooling are examined across emphases. Policies that affect the assessment, placement and services provided for exceptional children also are examined.

EBB is specifically geared to preparing researchers and leadership personnel in the field of bilingual multicultural education. Program graduates are typically employed in schools of education as faculty and/or researchers. Other graduates also serve in professional positions with state and federal education agencies, as well as local school districts.

Learning Sciences and Human Development

Faculty and students in the Learning Sciences & Human Development (LSHD) program area of emphasis study how people learn in the context of organizing for more equitable, sustainable social futures. Researchers consider how the practice of research can inform social change that can improve learning and teaching for K–12 students and their teachers, for undergraduates and the organization of higher education pathways, and in community contexts. Working in partnership with school and community partners is a key component of the approach taken to understanding educational problems and their possible solutions.

The LSHD program prepares graduate students to research and inform collective efforts to improve conditions of learning, particularly for young people from non-dominant communities and the adults (including teachers, community organizers and community members) who work with them. The program emphasizes:

- How a strong foundation in psychological perspectives on education and human development can inform efforts to improve conditions for learning in school and out of school contexts.

- The need to go beyond psychological perspectives to interpret learning and development in social, cultural and historical contexts.
- Social justice as a central concern in studying and informing efforts to improve conditions of learning.
- Humanistic approaches to research that draw on interpretive, phenomenological and social practice theories of human action.

Students work with faculty members who conduct research in a range of settings, including schools, preservice teacher education programs, after-school programs, museums, community organizations, workplaces and grassroots social movements.

Literacy Studies

Faculty and graduate students in the Literacy Studies program study and design literacies in print and multimodal modes and in varied contexts. Literacies are framed as central to envisioning and enacting expansive and justice-centered theories and practices for teaching, learning, imagination, and self-expression in K-12 schools, informal learning spaces, and communities. Grounded in critical, social and interpretive conceptions of literacy, our program highlights the interrelations among theory, research, practice, policy and the potential for equitable social change.

Through multiple methodologies, research in the program occurs in partnership with children, youth, families and teachers in ways that honor and attend to experiences and identities at the intersections of race, language, gender, sexuality, ability and economic opportunity. Doctoral students collaborate with faculty on a range of research projects, engage in community outreach, and work in teacher education programs emphasizing social justice and humanizing approaches to curriculum and instruction that center and address the interests and needs of all learners. The program prepares graduate students for careers in research and teaching in university settings, educational leadership in schools and community organizations, and research and development in the private or nonprofit sector.

Students will have the opportunity to:

- Develop an expansive understanding of literacy and its implications for children, youth, and their families and communities.
- Understand the theoretical perspectives informing literacy research currently and historically.
- Critically examine and apply research methodologies to questions of significance to them and to the field of literacy studies.
- Collaborate with faculty, peers, youth, communities and other educators to pursue research and pedagogical goals.
- Deepen their understanding of theories and practices that situate literacy as essential for dismantling systems of oppression and building toward anti-racist, anti-oppressive, and affirming futures for children and youth, teachers, teacher educators, schools and communities.

Research and Evaluation Methodology

The Research and Evaluation Methodology (REM) program is a place for intellectually curious and motivated students who want to learn about deep research methodology with an eye toward influencing education policy and practice. The most common methodological specializations are:

- Psychometrics and educational assessment
- Applied statistics

The program is a full-time commitment, and all admitted students are supported with five years of funding, including tuition remission and a stipend for living expenses. Students participate in graduate research assistant-ships each semester and can expect to work with faculty on research projects as part of CADRE (<http://www.colorado.edu/cadre/cadre-projects-and-resources/>), the Center for Assessment, Design, Research and Evaluation.

STEM Education

The STEM Education program offers students an opportunity to build their understanding and expertise in STEM (predominantly science and mathematics) topics, with a special focus on diversity and justice in STEM education. The program helps teachers develop their content knowledge, as well as greater understanding of how learning environments can be designed to foster students' understanding of and participation in mathematics and science. Our faculty work in deep partnership with STEM faculty in other departments at CU Boulder, as well as with teachers, schools, districts, and community members. The PhD prepares students for careers in research and teaching in university settings, educational and public leadership and services to schools, or research and development in the private or nonprofit sectors.

The STEM Education program is centered on and takes an interdisciplinary stance to:

- Learning beyond cognitive change towards participation in sociopolitical learning environments that involve issues of identity and power.
- Collaboration with teachers and public schools as partners in broadening and re-envisioning STEM education to include more humanizing experiences and outcomes.
- Recognition that current values and traditions of STEM disciplines need to be de-settled to expand what counts as knowing and to be a knower.
- Exploration of the generation of knowledge among learning communities of all types and the negotiation of shared visions and integrity among their members.
- Building and studying programs that engage and sustain learners and their communities through engagement in meaningful and relevant STEM questions.
- Youth empowerment and agency by drawing on scientific knowledge and practices to explore meaningful questions in their communities.

Teacher Learning, Research and Practice

The Teacher Learning, Research & Practice (TLRP) program offers a rigorous pathway for those interested in becoming teacher educators who conduct research and support the practice of teaching and teacher education. The TLRP program takes seriously this hybrid role of teacher educator as both researcher and practitioner, as well as the historical legacy of inequalities perpetuated by teacher education. This program prepares graduate students for careers as researchers and teachers in university settings with a particular emphasis on equity and justice, as educational leaders in schools and community organizations, and as researchers and developers in private and nonprofit sectors.

The TLRP program is grounded in a commitment to the practice, study, and transformation of teacher education in ways that forward and honor humanizing thinking and action. Doctoral students enjoy opportunities to work in and with the school's multiple teacher education programs and to collaborate with faculty, doctoral students, and other stakeholders (e.g., school partners; community organizations) in the critical design and study of these programs. Conducting research with members of this

community provides additional opportunities to deepen understandings from coursework and to pose and pursue questions using innovative research methodologies and methods.

Teacher Leadership - Master of Arts (MA)

To help teachers make a difference in their districts and communities, our innovative online Teacher Leadership program offers graduate certificates that can lead to a master's degree. Our coursework threads reflective practices, content mastery and skill development throughout so that students can practice leadership skills as they engage with the curriculum. This program is offered *entirely online* and is organized around asynchronous (course work completed at separate times) as well as synchronous formats (meeting virtually at the same time).

Teacher Leadership - Master of Arts (MA)

To earn the master's degree, students will complete three graduate certificates. Each certificate blends together on-demand, self-paced online courses with a synchronous capstone course held in the summer. These affordable certificates have been designed for educators looking to enhance their skills and capacities as classroom teachers and leaders and to make a difference in their schools and local communities. Students can choose to take classes and separately complete certificates without enrolling in the full MA program.

Graduate Certificates in Teacher Leadership

The Teacher and Social and Emotional Learning - Graduate Certificate

The certificate in Social and Emotional Learning provides practicing teachers with requisite background knowledge, understanding, and preparation so as to engage students in social and emotional learning. In order for teachers to enable students to become more aware and understanding of their own and others' emotions, teachers need to understand their own emotions as well.

The arena of social and emotional learning is a new, growing, and much needed public school curricular domain. During the last three decades, public schools have focused almost exclusively on cognitive academic outcomes. While some progress has been achieved, the consensus seems to be that a renewed emphasis on the whole student needs to be restored. At the same time teachers' professional work conditions have deteriorated. Teachers new to the field are leaving the profession at greater rates than in the past. Teacher "burnout" is a recognized and acknowledged public education phenomenon.

Teaching Culturally and Linguistically Diverse Students - Graduate Certificate

The certificate in Culturally and Linguistically Diverse Education will offer teachers an introduction to the history and current policy and laws that relate to emerging bilingual learners in Colorado public schools. Teachers will learn about the process of language acquisition, develop skills and strategies to teach English and adapt their curriculum and instruction to the developing needs of emerging bilingual learners, and learn key strategies for engaging diverse families in their school and classroom communities.

Leading for Change in Science Assessment Practice - Graduate Certificate

In this certificate, teachers learn how to adapt, develop and pilot assessments that elicit students' integrated understanding of disciplinary core ideas and crosscutting concepts and that connect to students' interests and identities. This certificate supports the needs of partnerships in Colorado and beyond in to develop assessment systems aligned to new science standards.

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The four-course certificate explores the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools. The certificate will prepare educators to lead efforts to promote compassion and dignity in schools. The certificate provides educators with supports and resources for caring for themselves and for cultivating and sustaining compassion for students, families, their school community and colleagues. The courses prioritize ways in which educators can see and feel their own daily teaching practices, struggles, constraints and joys reflected in the curriculum as well as the ways in which educators might become more compassionate teacher leaders. The compassion practices and skills embedded in the courses support district-level equity goals of creating safe and inclusive schools that challenge racism and promote justice. The certificate draws upon rigorous research, contemplative wisdom and deeply embedded lived experience of educators. The certificate was co-designed by the Crown Institute and the Compassion Institute working in collaboration with teachers, counselors and administrators.

Rethinking Inclusive and Special Education - Graduate Certificate

This certificate prepares educators to be leaders in Rethinking Inclusive and Special Education in their schools and districts by humanizing students with dis/abilities and the systems designed to support them, by gaining valuable knowledge about legal, historical and social precedents in special education, and by expanding their instructional toolkit. Educators will examine federal, state, and local policies and they will also learn practical strategies they can use to plan instruction and to support students in general education and intervention settings. Each course will draw upon culturally and linguistically appropriate practices that attend to the needs and strengths of all students, with an emphasis on creating equitable learning environments. Course content and assignments consider dis/ability to be one of multiple identities that makes each of us human, rather than a defect or problem in need of a cure. We use the term dis/ability, choosing purposefully to place a slash between dis and ability.

Designing for Learning: Inquiry-Based Pedagogy for K-12 Educators - Graduate Certificate

Dr. Gloria Ladson-Billings argues that instead of organizing curriculum and instruction around the question, "What do you want to be when you grow up?," we can go further in supporting young people in meaningful, culturally relevant and sustaining ways if we instead ask: "What problems do you want to solve?" This certificate focuses on how to follow Ladson-Billings' suggestion and re-organize our pedagogies around the questions and problems that youth and their communities want to pursue. Rather than approaching teaching as a process of transmitting information and skills to youth, this certificate helps teachers position youth as people whose questions, problems, and problem-solutions are inquiry-worthy. The certificate offers coursework that introduces teachers to research

and theorizing about how people learn through inquiry, how communities engage in knowledge-building and inquiry within and across subject areas, and how teachers can organize curriculum and pedagogy to create inquiry-based learning experiences with young people in schools. The certificate culminates in a capstone experience positioning teachers as pedagogical leaders who can organize and sustain professional learning among peers and colleagues through practitioner inquiry into how young people learn when given the opportunity to pursue questions and problems that they want to solve.

Teachers Leading Change - Graduate Certificate

This certificate focuses on understanding and developing leadership skills that enable teachers to engage effectively in shared leadership and proactively expand their sphere of influence in meaningful ways. A core tenet of the courses is that teachers start to or continue to see themselves as leaders, to effectively take on a leadership stance, and to do so in a way that feels authentic and builds on each teacher's own histories and priorities for growth. The courses provide students with ideas and tools for leading change in a variety of educational spaces, including within district workshops and community networks.

Program Policies

This specialized program does not align with standard campus policies. Please refer to the Specialized Programs (p. 1771) section of the catalog for more information.

Program Requirements

Teacher Leadership - Master of Arts (MA)

The MA in Teacher Leadership degree requires completion of any three teacher leadership certificates (a minimum of 30 credit hours of approved, graduate-level coursework) and a minimum cumulative grade-point average (GPA) of 3.00.

Once a student has completed three of the 10-credit online certificates that prepare them for leadership in their teaching career, they will be awarded the MA in Teacher Leadership. A comprehensive final examination is not required.

People who enroll in the MA in Teacher Leadership must currently be a practicing educator with an established education site. This program does not offer endorsements or licensure.

Graduate Certificates in Teacher Leadership

Social and Emotional Learning - Graduate Certificate

Code	Title	Credit Hours
EDUA 5004	The Teacher in SEL - Powerful Personal and Professional Emotions (asynchronous)	2
EDUA 5005	SEL for Students: A Path to Social and Emotional Well-Being (asynchronous)	2
EDUA 5006	Expanding SEL (asynchronous)	2
EDUA 5007	Social and Emotional Learning Capstone (synchronous)	4
Total Credit Hours		10

Teaching Culturally/Linguistically Diverse Students - Graduate Certificate

Code	Title	Credit Hours
EDUA 5000	Introduction to History, Policy and Advocacy for CLD Educators (asynchronous)	2
EDUA 5001	Intro to Designing Culturally Sustaining Pedagogy (asynchronous)	2
EDUA 5002	Introduction to Teaching Culturally and Linguistically Diverse Learners (asynchronous)	2
EDUA 5003	Teaching Culturally/Linguistically Diverse Learners: Capstone (synchronous)	4

EDUA 5032	Instructional Coaching in Schools and Districts	2
EDUA 5033	Teacher Led-Networks: Teacher Leaders within Networks of Advocacy	2
EDUA 5034 : Capstone	Teachers Leading Change in Action	4
Total Credit Hours		10

Plan(s) of Study

Students must complete three of the 10-credit online certificates to be awarded the MA in Teacher Leadership. Each graduate certificate in teacher leadership requires 10 completed credits, as follows:

- Three two-credit asynchronous classes, taken in sequence. The two-credit asynchronous course sessions are self-paced and must be completed within a six-month period. These classes must be completed two weeks before beginning a synchronous capstone in the summer.
- One four-credit synchronous class, taken in the summer. The last course for all certificates is a synchronous capstone course that brings together all the content and curriculum. This course runs as a 3-week intensive after academic school years end in May/June.

Learning Outcomes

Teacher Leadership - Master of Arts (MA)

Knowledge outcomes:

- Teachers will examine and understand the central knowledge claims within each certificate domain.
- Teachers will examine and understand the distinct instructional strategies within each certificate domain.
- Teachers will examine and understand the particular K-12 curricular content for their students' development.

- Teachers will utilize this certificate domain knowledge in the creation of a classroom, school or community implementation plan.

Skill outcomes:

- Teachers will become acquainted with and able to convey the relevant domain's content knowledge to students, other teachers and community members.
- Teachers will become acquainted with and able to convey the distinct instructional strategies within each certificate domain to students, other teachers and community members.
- Teachers will be able to convey the relevant K-12 curricular content to their students.
- Teachers will be able to engage other teachers and community members so as to further their understanding of and see the value of their chosen certificate domain.

Graduate Certificates in Teacher Leadership Social and Emotional Learning - Graduate Certificate

Knowledge outcomes:

This certificate will prepare teacher leaders to:

- Examine and reflect on the role of emotions in teaching and learning.
- Know the important distinct features and curricular approaches utilized in K-12 SEL curricula; consider alternative approaches to student well-being.
- Choose and justify the appropriate K-12 or teacher SEL programming for their setting.

Skill outcomes:

This certificate will prepare teacher leaders to:

- Know the ways in which their emotions affect their classroom interactions and educational contexts.
- Implement an existing or develop an alternative SEL curriculum for their setting.
- Identify or develop a teacher SEL approach for their setting.

Culturally and Linguistically Diverse Education - Graduate Certificate

This certificate will prepare teacher leaders to:

- Recognize and understand the cultural and linguistic differences within their classroom, school and communities.
- Analyze their own classroom as a site for second language acquisition and make appropriate adjustments.
- Use knowledge of factors affecting second language acquisition to modify instruction for multilingual students.
- Capably address the linguistic and cultural differences in classrooms in ways that build on students' linguistic and cultural diversity.
- Can assess content learning of students who are at different levels of English proficiency.

Leading for Change in Science Assessment Practice - Graduate Certificate

The certificate will prepare teacher leaders to:

- Explain the key assumptions of the vision for equitable teaching and learning in *A Framework for K-12 Science Education* to teachers and other leaders.

- Identify supports needed to help teachers make shifts to teaching and assessment to address new science standards.
- Design tasks that invite students to explain phenomena and solve problems that connect to their interests, experiences and identities

Cultivating Compassion and Dignity in Ourselves and Our Schools - Graduate Certificate

The certificate will prepare teacher leaders to:

- Consider the ways in which practices of compassion and a focus on the essential dignity of educators and students can contribute to the wellness of educators and schools.
- Explore supports and resources for caring for themselves.
- Identify and practice skills to cultivate and sustain compassion for students, families, their school community and colleagues.
- Apply compassion tools and resources to serve as compassionate leaders in school and community settings and to address the many challenges they face in today's increasingly precarious climate.

Teacher Licensure Program

The MA+ Teacher Licensure program leads to a Colorado initial teaching license in secondary (grades 7–12) math, science, English, or social studies, plus a master's degree in curriculum & instruction. This offers an efficient and experiential route to earning a master's degree with teaching licensure.

This program is for candidates who have earned a bachelor's degree from an accredited institution of higher education and want to elaborate upon and deepen the close connections between fieldwork and coursework to become a teacher. Graduate students follow a planned sequence of core courses that meet state content preparation standards, complete a master's degree, and satisfy professional education requirements concurrently. The program involves a combination of courses at the university and 7–12 school placements.

Students who successfully complete all School of Education requirements will be recommended for a Colorado initial teaching license.

The teacher education programs at the University of Colorado Boulder do not prepare candidates for teacher licensure exams in states other than Colorado. For students planning to seek professional licensure or certification in a state other than Colorado, it is strongly recommended that you contact the appropriate licensing entity in the state in which you are, or plan to be, located to seek information and guidance regarding licensure or certification requirements and how the Colorado license may transfer in advance of program completion. If you will have to take an additional course or pass a different licensure exam to transfer your license, your contact person at the correct state agency will help you plan for that and avoid surprises.

Program Mission & Commitments

The School of Education prepares educators who are able to enact commitments to social justice and equitable access to deep content learning in school, family and community contexts.

The following principles guide our work in preparing the next generation of educators:

- Teachers must position students as sense-makers and knowledge-generators who desire to invest and succeed in school. This involves noticing youth; building relationships with them; valuing

their perspectives; and attending to their thinking, curiosities and capabilities.

- Teaching is both intellectual work and a craft. Deep knowledge of content and pedagogy, creativity and passion, fuel both learning and teaching.
- Teachers must design equitable learning environments in which all youth are engaged in robust and consequential learning.
- Teachers' instruction and student learning are always conducted within the context of larger social systems, structures and hierarchies.
- What we do and say matter and must be analyzed. Our language and action construct or constrain opportunities for youth to build meaningful, positive and sustained relationships to learning and one another.

Colorado Teacher Quality Standards

Teacher education candidates engage in a planned sequence of courses and accompanying clinical experiences in local community and school sites. Courses and assessments ensure candidates have demonstrated appropriate mastery of (1) content taught in the Colorado Academic Standards and (2) professional practices and dispositions associated with the Colorado Teacher Quality Standards listed below:

1. Teachers demonstrate mastery of and pedagogical expertise in the content they teach. The secondary teacher has knowledge of literacy and mathematics and is an expert in his, her, or their content endorsement area(s).
2. Teachers establish a safe, inclusive and respectful learning environment for a diverse population of students.
3. Teachers plan and deliver effective instruction and create an environment that facilitates learning for their students.
4. Teachers demonstrate professionalism through ethical conduct, reflection and leadership.

Admission Requirements

To be eligible for admission to the MA+ program, applicants must meet all of the requirements below. Please note, satisfying the minimum criteria does not guarantee acceptance.

Secondary Mathematics and Secondary Science

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE, or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. Applicants must complete all content coursework for their teaching area *prior* to the beginning of the fall semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
- Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the beginning of the fall semester in the program.

Any candidate that has not passed the licensure exam by the time their program this time will be dismissed from the program or may be given the option to defer admission one year.

- Praxis Mathematics: Content Knowledge (test code 5161)
- Praxis General Science: Content Knowledge (test code 5435)

Secondary English Language Arts and Secondary Social Studies

To be considered for admission, applicants must meet the following:

- Hold a bachelor's degree from an accredited institution of higher education. English Language Arts applicants must have a degree in English Literature, Ethnic Studies, Spanish Literature, or Humanities with a literature emphasis.
- Earn a minimum 3.00 GPA cumulatively among all institutions attended. Applicants must also have a 3.0 GPA in all content area coursework. Please note, GRE Scores are not required for the MA+ program.
- Meet the basic skills requirement: Complete appropriate, college-level Math and Composition courses with a "B-" or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.
- Complete content coursework. Applicants must complete all content coursework for their teaching area *prior* to the beginning of the spring semester in the program. Any candidate who has not completed their content coursework by that time will be dismissed from the program or may be given the option to defer admission one year.
- Complete the appropriate, state-approved licensure exam (currently the Praxis Subject Assessments exams) for their content area prior to the beginning of the beginning of the spring semester in the program. Any candidate that has not passed the licensure exam by the time their program this time will be dismissed from the program or may be given the option to defer admission one year.
 - Praxis English Language Arts: Content Knowledge (test code 5038)
 - Praxis Social Studies: Content Knowledge (test code 5081)

MA+ Secondary English Language Arts (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirement

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Mathematics: College-level mathematics.	3
	Natural Science	3
	Social Science	3
	Advanced Writing: Critical or creative writing beyond the lower-division/introductory composition level.	3
	Visual or Digital Communication: Includes theatre, film, or other digital media courses.	3
	Literature: Must include a component of American literature, British literature, World literature (non-American/non-British literature), and Multicultural literature.	12
	English and English Language Arts-related courses	30

Acceptable course work may be in communication/speech, composition, drama/ theatre, humanities, journalism, and/or literature. (May include courses from the content requirements above.)

Education Course Requirements

Code	Title	Credit Hours
First Semester (Summer)		
EDUC 5001	Framing Equity and Justice in the Humanities Classroom	3
EDUC 5112	Educational Psychology and Adolescent Development	
Second Semester (Fall)		
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5295	Narrative and Story in the Humanities	3
EDUC 5325	Queering Literacy in Secondary Classrooms	3
EDUC 5345	Secondary English Methods I	3
EDUC 5485	Differentiation in the Classroom	3
EDUC 4901	Student Teaching I	3
Third Semester (Spring)		
EDUC 5365	Secondary English Methods II	3
EDUC 5490	Blurring Disciplinary Lines in the Humanities	3
EDUC 4902	Student Teaching II	4
Fourth Semester (Summer)		
EDUC 5390	Professional Teaching for Equity and Justice	3
Total Credit Hours		34

Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring semesters of the program. Student teaching coursework does not count towards the Master's degree.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Spring Semester of Program

Pass the state-approved licensure exam, PRAXIS English Language Arts: Content Knowledge (test code 5038).

MA+ Secondary Mathematics (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Literature & Arts	3
	Natural Science	3
	Social Science	3
	Written Communication: College-level composition or writing	3
	Calculus 1	4-5
	Calculus 2	4-5
	Linear Algebra	3
	Functions & Modeling/Analysis/Abstract Mathematics: One course in functions and modeling, analysis or topology.	3
	Geometry: One course in modern geometry.	3
	Probability & Statistics: One course in probability theory and mathematical statistics.	3
	Math or applied math coursework. Eighteen of the required 24 credit hours above must be completed at the sophomore level or higher. (May include requirements above.)	24
	Recent mathematics coursework in the past 5 years. (May include EDUC 5317.)	6

Education Course Requirements

Code	Title	Credit Hours
First Semester (Summer)		
EDUC 5002	Framing Equity and Justice in the STEM Classroom	3
EDUC 5112	Educational Psychology and Adolescent Development	3
EDUC 5235	Language and Literacy Across the Curriculum	3
Second Semester (Fall)		
EDUC 4901	Student Teaching I	3
EDUC 5005	Advanced Social Foundations of Education	3
EDUC 5060	Classroom Interactions	3
EDUC 5317	Perspectives on Mathematics	3
Third Semester (Spring)		
EDUC 4902	Student Teaching II	4
EDUC 5375	Problem-Based Math Instruction	4
EDUC 5485	Differentiation in the Classroom	3
Teaching & Learning Mathematics. Course options (examples):		
EDUC 5815	Teaching K-12 Mathematics: Number Sense	3
EDUC 5821	Teaching K-12 Mathematics: Algebraic Thinking	3
EDUC 5835	Teaching K-12 Mathematics: Geometry & Measurement	3
EDUC 5850	Teaching K-12 Mathematics: Probability & Statistics	3

Fourth Semester (Summer)

EDUC 5706	Assessment in Mathematics and Science Education	3
Total Credit Hours		38

Student Teaching

Candidates will complete an intensive academic year of field experiences while taking courses. Candidates will not be able to take other coursework in the Fall and Spring Semesters of the program. Student teaching coursework does not count towards the Master's degree.

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Fall Semester

Pass the state-approved licensure exam, PRAXIS Mathematics: Content Knowledge (test code 5161).

Teacher Performance Assessment

Pass a performance-based, subject-specific assessment designed by program faculty.

MA+ Secondary Science (7–12) Teacher Licensure Program

Teacher licensure candidates must maintain a 3.0 cumulative GPA in their content area and Education coursework. All grades must be a B- or better to satisfy a degree requirement. All grades must be a C- or better to satisfy a content coursework requirement.

Content Coursework Requirements

Code	Title	Credit Hours
Courses and Minimum Required Credit Hours		
	Literature & Arts	3
	Social Science	3
	Written Communication: College-level composition or writing.	3
	Calculus I	4-5
	Two biology courses.	
	Two chemistry courses.	
	Two earth/space science courses.	
	Two physics courses.	
Complete three of the following four content-area lab courses:		
	Biology lab	
	Earth/space science lab	
	Chemistry lab	
	Physics lab	
	Recent science coursework in the past 5 years	6
Students must complete 24 credit hours in one of the sections below:		24

Biology (may include courses from biology area above). Coursework must include the study of general biology, matter & energy in living systems, ecology, evolution, genetics, molecular biology, human anatomy, environmental biology and biotechnology.

Chemistry (may include courses from chemistry area above). Coursework must include the study of analytical, inorganic, organic and physical chemistry.

Earth/space science (may include courses from Earth/Space Science area above). Coursework must include the study of environmental science, astronomy, historical & physical geology, meteorology, oceanography, and geomorphology & earth systems.

Environmental science. Coursework must include the study of ecology and astronomy, and 17 credit hours in biology.

Physics (may include courses from Physics area above). Coursework must include the study of mathematics through differential equations, astronomy, atomic & nuclear, classical mechanics, electricity & magnetism, heat & thermodynamics, optics & sound, quantum mechanics, radiation & radioactivity, relativity and waves.

Education Course Requirements

Code	Title	Credit Hours

Required Tests and Assessments

Basic Skills: Prior to Student Teaching

Complete an appropriate, college-level math *and* composition course with a B- or better. Acceptable scores on the ACT, SAT, GRE or Praxis CORE exam will also satisfy the requirement.

Licensure Exam: Prior to Spring Semester in Program

Pass the state-approved licensure exam, PRAXIS Social Studies: Content Knowledge (test code 5081).

Engineering & Applied Science

The College of Engineering and Applied Science has a tradition of excellence in engineering education dating back to 1893, and we continually update and improve our programs to reflect the highest standards in teaching and learning, discovery, innovation, community and culture. We are the top-ranked engineering school in the Rocky Mountain region with 17 baccalaureate programs and 16 graduate programs offering more than 40 degrees. Via our partnership program with Colorado Mesa University, we also offer students on the Western Slope the opportunity to earn degrees in mechanical engineering and civil engineering.

Mission & Vision

The College of Engineering & Applied Science's mission is to generate new knowledge in engineering and related fields, and to equip students from diverse backgrounds to become leaders and citizens responsible for the betterment of individuals and society. Our vision is to be a recognized world leader for excellence and innovation in engineering research and education, with an emphasis on inclusive excellence, active learning and global society.

Degree Programs

Graduate degrees are offered in the following areas:

- Aerospace engineering sciences (p. 1451)
- Architectural engineering (p. 1472)
- Biomedical engineering (p. 1479)
- Biological engineering (p. 1487)
- Chemical engineering (p. 1482)
- Civil engineering (p. 1488)
- Computer science (p. 1504)
- Creative technology and design (p. 1533)
- Electrical engineering (p. 1540)
- Engineering management (p. 1564)
- Environmental engineering (p. 1572)
- Materials science and engineering (p. 1578)
- Mechanical engineering (p. 1582)
- Technology, cybersecurity and policy (p. 1504)

Policies & Requirements

Academic Excellence

Graduate study in engineering at the University of Colorado Boulder offers a challenging, collaborative environment with exceptional possibilities. Graduate education at the College of Engineering & Applied Science involves the creation and dissemination of knowledge in many forms.

Academic Standards

Academic Policies

College of Engineering and Applied Science graduate students must abide by policies within their programs of study, college and the Graduate School policies. Students should refer to these websites often; policies, procedures and forms may be updated throughout the academic year.

Academic Integrity

Graduate students in the College of Engineering and Applied Science may be required to pass an academic integrity quiz.

See also the campuswide Academic Integrity (p. 1023) and Student Conduct (p. 1038) sections and the Honor Code (<http://honorcode.colorado.edu/>) website.

Academic Standing

Refer to the Graduate School (p. 1021) for details.

Credit and Enrollment

Attendance and Full-Time Enrollment

While the majority of our students attend classes on the Boulder campus, many of the college's graduate degrees and certificates are available online through Boulder Connect (<http://www.colorado.edu/connect/>). Attendance and enrollment requirements are governed by Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs may have requirements that are more stringent than the Graduate School.

Credit Policies

Final Grade Appeal

Visit the college's Grade Appeal Policy (<http://www.colorado.edu/engineering-facultystaff/college-rules-policies/grade-appeal-policy/>) webpage.

Transfer Credit

Transfer credit requirements are governed by the Graduate School policies (<http://www.colorado.edu/graduateschool/policies/>). However, the college's individual graduate programs must approve the transfer credits and may have transfer credit requirements that are more stringent than the Graduate School. Refer to the individual graduate programs for specific transfer credit requirements.

Petition Policy

A student desiring a waiver of departmental and/or Graduate School policies must request and secure approval for this waiver through a petition procedure. Petitions are first presented to the student's individual graduate program for review, followed by review at the Graduate School.

Requirements

Prerequisites

To enroll for an advanced degree in any department or program in the College of Engineering and Applied Science, candidates either must have previously earned a bachelor's degree in a curriculum that includes the necessary prerequisites for that branch of engineering or must qualify for the concurrent BS and MS program. If the candidate's preliminary education was taken at another institution, the degree of qualification for advanced work is determined by the department concerned and by the dean of the Graduate School.

Graduates of engineering technology programs should note that the equivalent of a BS degree in an appropriate engineering field is required for entry into the Graduate School. Because the goals and orientation of engineering programs differ from those of technology programs, technology graduates should expect to make up deficiencies before being admitted to graduate study in engineering. Students may not be admitted to the Graduate School while making up deficiencies, but can enroll as nondegree students.

Coursework

Graduate work in each department of the College of Engineering and Applied Science falls into two classes:

1. courses that are offered for candidates who have chosen to major in the particular department, and
2. courses that are offered for candidates who have chosen their major in some other department, but who are pursuing a certificate or other complementary coursework.

Availability of Courses

All courses are not necessarily offered every year. They may only be available if there is sufficient demand.

Qualifying or Preliminary Examinations

Graduate students who plan to become candidates for the MS or PhD degree may be required to take a qualifying or preliminary examination. Individual departments should be consulted concerning the timing or requirement of this examination.

Teaching and Research Assistantships

The College of Engineering and Applied Science requires that all graduate teaching assistants and research assistants be proficient and intelligible in spoken English. In order to ensure that this is the case, all prospective teaching assistants and research assistants whose native language is not English, or others for whom the department graduate program coordinator believes that spoken language intelligibility is a concern, regardless of native language, will be tested for spoken language intelligibility prior to or at the beginning of the semester in which the teaching or research assistantship is awarded. In the event that a prospective teaching or research assistant does not demonstrate a satisfactory level of proficiency, as determined by campus assessment, that student will be required to participate in training designed to improve intelligibility.

Programs of Study

Aerospace Engineering Sciences

The aerospace program is organized around focus areas in astrodynamics and satellite navigation systems, bioastronautics, remote sensing, Earth and space sciences and aerospace engineering systems, including fluid dynamics and propulsion, automatic control, structures and mechanics of materials.

The Ann and HJ Smead Department of Aerospace Engineering Sciences (<http://www.colorado.edu/aerospace/>) at the University of Colorado Boulder is one of the top aerospace engineering departments in the nation. Aerospace engineers work on Earth and in space not only to extend frontiers, but also to better understand and preserve our terrestrial environment. Few fields offer as many exciting and diverse career opportunities: becoming an astronaut (15 graduates to date have become astronauts), designing the next generation of aircraft and spacecraft, monitoring our global habitat via remote sensing from space, *in situ* sensing with unmanned vehicles and helping to develop environmentally clean energy and transportation systems.

Aerospace graduate students often formulate degree plans on the basis of their interests and needs. Portions of the program are designed to promote our students' engineering and professional development.

Graduate students are admitted into a specific focus area that provides research advising and financial support, and sets specialized admission and program requirements with recommendations for coursework within and outside the department.

The five focus areas are:

- Astrodynamics and Satellite Navigation Systems
- Autonomous Systems
- Bioastronautics
- Fluids, Structures and Materials
- Remote Sensing, Earth and Space Sciences

Each focus area has defined the required characteristics of its successful graduates at the MS and PhD level, and defined the required and elective courses that support its educational program.

Aerospace-related research centers in the College include the Colorado Center for Astrodynamics Research, Aerospace Mechanics Research Center, the Research and Engineering Center for Unmanned Vehicles, and BioServe Space Technologies. Other research centers and institutes

within the University that are involved in aerospace-related research activities are the Center for Astrophysics and Space Astronomy (CASA), the Cooperative Institute for Research in Environmental Sciences (CIRES), the Earth Science & Observation Center (ESOC), JILA, and the Laboratory for Atmospheric and Space Physics (LASP).

Course code for this program is ASEN.

Master's Degrees

- Aerospace Engineering Sciences - Master of Science (MS) (p. 1463)
- Aerospace Engineering Sciences - Professional Master of Science (MSAES) (p. 1467)

Doctoral Degree

- Aerospace Engineering Sciences - Doctor of Philosophy (PhD) (p. 1468)

Certificates

- Astrodynamics and Satellite Navigation Systems - Graduate Certificate (p. 1469)
- Engineering Management in the Aerospace Industry - Graduate Certificate (p. 1571)
- Hypersonics - Graduate Certificate (p. 1469)
- Radio Frequency Engineering for Aerospace - Graduate Certificate (p. 1470)
- Remote Sensing - Graduate Certificate (p. 1471)
- Satellite Systems Design - Graduate Certificate (p. 1610)
- Space Weather and Applications - Graduate Certificate (p. 1611)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Ahmed, Nisar R. (https://experts.colorado.edu/display/fisid_153237/) Associate Professor; PhD, Cornell University

Akos, Dennis M. (https://experts.colorado.edu/display/fisid_131119/) Professor; PhD, Ohio University

Ali, Hisham
Assistant Professor; PhD, Georgia Institute of Technology

Anderson, Allison P. (https://experts.colorado.edu/display/fisid_156275/) Assistant Professor; PhD, Massachusetts Institute of Technology

Argrow, Brian M. (https://experts.colorado.edu/display/fisid_102860/) Professor; PhD, University of Oklahoma

Axelrad, Penina (https://experts.colorado.edu/display/fisid_100792/) Distinguished Professor, Endowed/Named Professor; PhD, Stanford University

Sunberg, Zachary (https://experts.colorado.edu/individual/fisid_165833/)
Assistant Professor; PhD, Stanford University

Thayer, Jeffrey P. (https://experts.colorado.edu/display/fisid_134469/)
Professor, Endowed/Named Professor; PhD, University of Michigan Ann Arbor

Thomas, Evan (https://experts.colorado.edu/display/fisid_163895/)
Associate Professor; PhD, University of Colorado Boulder

Voss, James S. (https://experts.colorado.edu/display/fisid_140891/)
Scholar in Residence; MS, University of Colorado Boulder

Williams, Christopher (https://experts.colorado.edu/display/fisid_105765/)
Research Professor; PhD, University of Colorado Boulder

Zea, Luis P. (https://experts.colorado.edu/display/fisid_156131/)
Assistant Research Professor; PhD, University of Colorado Boulder

Courses

ASEN 5007 (3) Introduction to Finite Elements

Introduces finite element methods used for solving linear problems in structural and continuum mechanics. Covers modeling, mathematical formulation, and computer implementation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite matrix algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5010 (3) Spacecraft Attitude Dynamics and Control

Includes rigid body kinematics and spacecraft attitude descriptions, torque-free attitude dynamics, static attitude determination, motion and stability due to gravity gradient torque and spinning craft, passive and active methods of attitude control, nonlinear regulator and attitude tracking feedback control laws.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 3200 or equivalent and good knowledge of linear algebra, vector calculus, basics of ordinary differential equations.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5012 (3) Mechanics of Aerospace Structures

Applies fundamental concepts of continuum mechanics, theory of elasticity and energy methods to the analysis of structures.

Equivalent - Duplicate Degree Credit Not Granted: MCEN 5023

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 2360 and ASEN 2001 and ASEN 2003 and ASEN 3112 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5014 (3) Linear Control Systems

Introduces the theory of linear systems, including vector spaces, linear equations, structure of linear operators, state space descriptions of dynamic systems, and state feedback control methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Systems and Control

ASEN 5016 (3) Space Life Sciences

Familiarizes students with factors affecting living organisms in the reduced-gravity environment of space flight. Covers basic life support requirements, human physiological adaptations, and cellular-level gravity dependent processes with emphasis on technical writing and research proposal preparation.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5018 (3) Graduate Projects I

Exposes MS and PhD students to project management and systems engineering disciplines while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this first semester of the two-semester course sequence: requirements, definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5158 or instructor consent required.

ASEN 5022 (3) Dynamics of Aerospace Structures

Applies concepts covered in undergraduate dynamics, structures and mathematics to the dynamics of aerospace structural components, including methods of dynamic analysis, vibrational characteristics, vibration measurements and dynamic stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 5012 or ASEN 5227 or MATH 2130 or APPM 3310 or equivalent or instructor consent required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5034 (3) Stochastic Methods for Systems Engineering

Development of stochastic models used in aerospace and other systems engineering and optimization problems. Review of probability theory, stochastic models used in decision theory, random processes, queuing theory, information theory, reliability and quality control. Computer solutions required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5044 (3) Statistical Estimation for Dynamical Systems

Introduces theory and methods of statistical estimation for general linear and nonlinear dynamical systems, with emphasis on aerospace engineering applications. Major topics include: review of applied probability and statistics; optimal parameter and dynamic state estimation; theory and design of Kalman filters for linear systems; extended/unscented Kalman filters and general Bayesian filters for nonlinear systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 5047 (3) Probability and Statistics for Aerospace Engineering Sciences

Considers probability concepts and theory for better design and control of aerospace engineering systems. Includes descriptive and inferential statistical methods for experimental analysis. Covers discrete and continuous random variable distributions, estimators, confidence intervals, regression, analysis of variance, hypothesis testing, nonparametric statistics, random processes and quality control, including software models of same.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5050 (3) Space Flight Dynamics

Includes celestial mechanics, space navigation, and orbit determination; trajectory design and mission analysis trajectory requirements; and orbital transfer and rendezvous.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5052

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 5051 (3) Fundamentals of Fluid Dynamics

Highlights physical properties of gases and liquids; kinematics of flow fields; and equations describing viscous, heat-conducting Newtonian fluids. Emphasizes exact solutions and rational approximations for low and high speed dissipative flows, surface and internal waves, acoustics, stability, and potential flows.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5052 (3) Analytical Astrodynamics

Introduction to astrodynamics with an emphasis on analytical approaches. The primary subjects covered are the general solution of the 2-body problem; orbital trajectories, transfers, targeting, and time of flight; orbit perturbations and averaging analysis; and the restricted 3-body problem. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 5050

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

ASEN 5053 (3) Rocket and Spacecraft Propulsion

An in depth presentation of the theory, analysis, and design of modern rocket and spacecraft propulsion systems. Liquid and solid propellant systems are emphasized with an introduction to advanced propulsion concepts. Nozzle and fluid flow relationships are reviewed for background.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5063 (3) Aircraft Propulsion

Designed to teach the theory, analysis and design of engines used for aircraft propulsion. Will deal with engine selection, engine performance, analysis and design of various components of modern aircraft engines, with emphasis on recent developments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 5067 (3) Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems

Provide students an introduction into embedded systems that teaches a basic understanding about the fundamental architecture of a microcontroller and how it operates and interfaces with both sensors and actuators applicable to aerospace engineering. The goal of this course is to learn how to interface sensors to a PIC microcontroller, collect input, make decisions and take an action in real-time. To gain a full appreciation about how microcontrollers work, students develop their own software code using MPLAB X to program the development board hardware, which uses the Microchip PIC18F87K22 microcontroller as the foundation of the course. Students "learn by doing" through lab assignments and a semester final project. This includes programming in assembly language and then C, to collect data from external sources such as a serial terminal, temperature and rotary sensors, etc. and outputting results to a liquid crystal display (LCD), and sending commands to an actuator such as a servo. Previously offered as a s

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

ASEN 5090 (3) Introduction to Global Navigation Satellite Systems

Global Navigation Satellite Systems (GNSS) are important tools for navigation, science, and engineering. Introduces GNSS hardware, signal structure, algorithms, error sources, and modeling techniques. Programming experience is required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 5098 (3) System Engr and Design

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5111 (3) Introduction to Aeroelasticity

Introduces static and dynamic aeroelasticity of airfoils and wings. Covers the classical aeroelasticity theory and introduces computational methods for aeroelastic problems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3111 or MATH 2130 or APPM 3310 and MATH 3430 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5114 (3) Automatic Control Systems

Methods of analysis and design of feedback control for dynamic systems. Covers nyquist, bode and linear quadratic methods based on frequency domain and state space models. Laboratory experiments provide exposure to computation for simulation and real time control, and typical control system sensors and actuators.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4114

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites Undergraduate systems or control course or instructor consent (ASEN 3128 or ASEN 3200).

Additional Information: Departmental Category: Systems and Control

ASEN 5121 (3) Boundary Layers and Convection

This course presents an introduction to the principles of viscous fluid flow and methods for performing engineering calculations of quantities such as skin friction and heat transfer rates in boundary layers. The first portion of the course material will focus on basic principles of fluid mechanics. We will derive the Navier-Stokes equations and discuss some simple solutions to these equations. The second portion of the course will concentrate on the application of these principles to boundary layers. We will derive the boundary layer equations and discuss their approximate and almost exact solutions. Formerly offered as a special topics course.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 3111 and/or ASEN 5051.

Grading Basis: Letter Grade

ASEN 5122 (3) Control of Aerospace Structures 1

Introduces the basic problems in dynamic modeling and active control of large spacecraft and satellites. Includes system descriptions, model reduction, controller design, and closed-loop stability analysis.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5148 (3) Spacecraft Design

Integrates the design elements and fundamental analyses necessary to complete the conceptual (Phase A) design of an unmanned spacecraft. Lecture and discussion explore mission design, propulsion, power, structure, thermal, attitude control, communication, command, and data handling and attitude control systems. The role of project management and systems engineering are examined. Resource estimating and lessons learned in satellite programs are reviewed.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5151 (3) Fundamentals of Gas Dynamics

Presents the fundamental topics of gas dynamics, focusing on compressible flows but providing connections to incompressible topics. Topics include analysis of quasi-one-dimensional flow, the partial differential equations governing inviscid compressible flows, linearized flow theory, supersonic flow around cones, and the method of characteristics applied to both steady two-dimensional supersonic flows, and unsteady one-dimensional flows.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 3111 or equivalent.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5158 (3) Space Habitat Design

Utilizes systems engineering methods for designing a spacecraft intended for human occupancy and provides a working knowledge of the technologies used to sustain life. Emphasis is placed on deriving functional requirements from stated mission objectives, developing integrated vehicle schematics, and comparing design options by trade study.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5168 (3) Remote Sensing Instrumentation Design

Reviews and makes a detailed analysis of satellite instrumentation techniques and systems to understand the components, limitations, and overall capabilities. Emphasis on optical systems with in-depth treatment of conventional radiometry. Introduces both passive and microwave methods.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5188 (3) Fundamentals of Systems Engineering

Examines the disciplined processes of designing and managing complex systems over their life cycle. Requirements engineering, reliability, logistics, team leadership, testing and evaluation, maintainability and other disciplines are examined with focus on the system engineering of small spacecraft.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5210 (1) Remote Sensing Seminar

Covers subjects pertinent to remote sensing of the Earth and space, including oceanography, meteorology, vegetation monitoring, geology, geodesy and space science, with emphasis on techniques for extracting geophysical information from data from airborne and spaceborne platforms. Course requirement for Remote Sensing Certificate. Formerly ASEN 6210.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 5212 (3) Composite Structures and Materials

Develops the macromechanical and micromechanical theory of the elastic behavior and failure of composite laminates. Applies basic theory to a broad range of practical problems including the buckling and vibration of composite plates, columns, and shells.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5218 (3) Large Space Structures Design

Develops the necessary structural analysis skills for conducting conceptual and preliminary designs of large space structures with a practical emphasis on structures considered by NASA over the past 20 years. Applies analysis skills to a broad range of space missions requiring large space structures, emphasizing low cost and practical design.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4218

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5222 (3) Materials Science for Composite Manufacturing

Studies common matrix materials and the modifications and improvements of properties which can be achieved by adding second phase reinforcements. Properties will be significantly affected by the design approach and by requirements, and by the procedure of adding reinforcements. Investigates polymer, ceramic and metallic materials. Explores manufacturing, fabrication and processing techniques. Evaluates future developments.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4222

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 3112 and ASEN 4012 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5227 (3) Mathematics for Aerospace Engineering Sciences 1

Provides an introduction to the methods and mathematics of advanced engineering analysis tailored to aerospace engineering applications. Topics include vector and tensor calculus, ordinary differential equations, and an introduction to the calculus of variations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5235 (3) Introduction to Atmospheric Radiative Transfer and Remote Sensing

Examines fundamentals of radiative transfer and remote sensing with primary emphasis on the Earth's atmosphere; emission, absorption and scattering by molecules and particles; multiple scattering; polarization; radiometry and photometry; principles of inversion theory; extinction- and emission-based passive remote sensing; principles of active remote sensing; lidar and radar; additional applications such as the greenhouse effect and Earth's radiative energy budget.

Equivalent - Duplicate Degree Credit Not Granted: ATOC 5235

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite one year of calculus-based physics and math up through differential equations.

Additional Information: Departmental Category: Remote Sensing

ASEN 5245 (3) Radar and Remote Sensing

Examines active techniques of remote sensing, with emphasis on radar fundamentals, radar wave propagation, scattering processes, and radar measurement techniques and design. Examines specific radar systems and applications, such as synthetic aperture radar phased arrays for atmosphere, space, land, and sea applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Remote Sensing

ASEN 5254 (3) Algorithmic Motion Planning

Overview of the *“lessons”* learned by the robot motion planning community in the recent years. Examines approaches based on potential functions, graphs, sampling methods, task and motion planning, and basic approaches to planning under uncertainty. Provides a set of tools to tackle new problems and enables the pursuit of complex research questions such as planning for autonomous systems.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

Recommended: Prerequisites or corequisites: ASEN 5014 or equivalent, knowledge of how to plot 2-D/3-D functions, arrays and other data structures, standard constructs (loops, functions, etc), C++, Python or MATLAB, and knowledge of differential equations and linear algebra.

ASEN 5264 (3) Decision Making under Uncertainty

Covers algorithms for optimal sequential decision making in the presence of uncertainty. Mathematical formalisms include the Markov decision process (MDP), partially observable Markov decision process (POMDP), and Games. Solution techniques include exact dynamic programming, Monte Carlo tree search, deep reinforcement learning, and alpha vector value approximation for POMDPs. Assignments require programming in a high level language (Julia as of 2023). Previously offered as a special topics course.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite fluency in a high-level programming language, willingness to learn another language if required for homework assignments and basic understanding of probability.

Grading Basis: Letter Grade

ASEN 5307 (3) Engineering Data Analysis Methods

Gives students broad exposure to a variety of traditional and modern statistical methods for filtering and analyzing data. Topics include estimation methods, principal component analyses and spectral analyses. Introduces these methods and provides practical experience with their use. Students carry out problem assignments.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5321 (3) Computational Fluid Dynamics Structured Grid

Introduction to advanced computational methods for the solution of fluid mechanics problems on the computer with emphasis on nonlinear flow phenomena. Formerly ASEN 6327.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 5325 (3) Small Scale Processes in Geophysical Fluids

Provides an overview of mixing and wave processes in the oceans and the atmosphere. Topics include turbulent boundary layers in the lower atmosphere and the upper ocean, air-sea interactions, and surface and internal waves.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5335 (3) Aerospace Environment

Examines the components of the solar-terrestrial system and their interactions to provide an understanding of the re-entry and orbital environments within which aerospace vehicles operate. Includes the sun, solar wind, magnetosphere, ionosphere, thermosphere, radiation belts, energetic particles, comparative environments (Mars, Venus, etc.), orbital debris, spacecraft charging, particle effects on systems, shielding, and satellite drag.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite Senior or graduate standing in engineering or related physical sciences.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Atmospheric, Oceanic, and Space Sciences

ASEN 5347 (3) Math Methods in Dynamics

Two-part graduate-level course on dynamics. Covers both flexible and rigid multibody analytical dynamics and finite element method for dynamics. Emphasizes formulations that naturally lead to easy computer implementation and stability, linearization, and modern rotational kinematics. Department consent required.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 5417 (3) Numerical Methods in Engineering and Science

Provides computational skills and basic knowledge of numerical methods for advanced courses in engineering/scientific computation using Fortran, C, or Matlab.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite APPM 2360 or equivalent or instructor consent required.

Additional Information: Departmental Category: Computational and Analytic Methods

ASEN 5426 (3) Neural Systems and Physiological Control

A biophysical exploration of human physiology from the standpoints of control systems and neural information processing. Topics include: neural control of movement and cardiovascular performance, tissue growth and repair, carcinogenesis, and physiological responses to microgravity.

Equivalent - Duplicate Degree Credit Not Granted: ASEN 4426 and ECEN 4821 and ECEN 5821

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5440 (3) Mission Design and Development for Space Sciences

Brings science and engineering students together to develop the multidisciplinary skills required to create a successful proposal to develop a NASA-funded small space mission. Goals: 1) develop the proposal science objectives based on scientific community priorities and NASA Announcement of Opportunity. 2) Understand how science requirements lead to the design of instrumentation. 3) Understand practical aspects of mission development.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 5780

Requisites: Restricted to College of Engineering (ENGR) graduate students, Department of Astrophysical and Planetary Sciences graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 5506 (1-2) Bioastronautics Seminar

Focuses on current topics related to space habitat systems design and research aimed at understanding the effects of spaceflight on living organisms ranging from humans down to microbes. Literature analysis and scientific presentations are expected. Emphasis is on biophysical mechanisms, comprehensive models, and related technology development.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 5519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Class Search.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 5550 (3) Designing for Defense

Designing for Defense/Hacking for Defense is a national service program running at leading research universities across the country. Interdisciplinary teams chosen by competitive selection work on real-world national security challenges, in close contact with national security agencies. Teams employ the Lean Launchpad entrepreneurship methodology to develop engineering and business concepts to solve real world challenges for special operations forces, the intelligence community, and other government agencies. Winning teams are eligible for real-world capital investment.

Equivalent - Duplicate Degree Credit Not Granted: CYBR 5550 and CSCI 5550

Grading Basis: Letter Grade

ASEN 5849 (1-6) Independent Study

Study of special projects.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 5940 (1-3) Engineering Research Internship

Grants credit to foreign visiting graduate students for conducting research within the Aerospace Engineering Sciences department. Credits can be transferred to the student's home institution. CU-Boulder students may also receive credit for conducting research outside of the university, either overseas or in the US.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6008 (3) Interplanetary Mission Design

Exploration of principles and methods related to the design and construction of trajectories for interplanetary mission design. Some topics covered include: two- and three-body motion, gravity assists, maneuver computation, navigation, numerical integration, and construction of orbits. The main focus is on simple ballistic mission designs, such as Galileo or Cassini, however, libration point trajectories will also be covered.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Recommended: Prerequisite ASEN 5050 or ASEN 5052.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6009 (1-2) Special Topics Seminar

Presents research and developments in each department's focus areas.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6010 (3) Advanced Spacecraft Dynamics and Control

Studies the dynamic modeling and control of spacecraft containing multiple momentum exchange devices, and/or flexible spacecraft components. Will develop nonlinear feedback control algorithms, explore singularity avoidance strategies. The second half of the course derives analytical methods (D'Alembert's equations, Lagrange's equations, Boltzmann-Hamel equations) to model a hybrid rigid/flexible spacecraft system.

Requisites: Requires prerequisite course of ASEN 5010 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6011 (3) Experimental Fluid Mechanics

This course presents an intermediate level introduction into the theory and practice of performing experimental measurements in fluid mechanics. The fundamental principles and definitions associated with instrumentation, measurement procedures, data analysis, and uncertainty quantification will be discussed. A specific focus will be placed on the application of a variety of measurement techniques in low-speed aerodynamic environments. A selection of measurement techniques will be extensively studied and applied including: classical pressure and temperature measurements, thermal (hot-wire) anemometry, laser doppler anemometry, particle image velocimetry, surface and field flow visualization techniques, schlieren and shadowgraph photography techniques. Undergraduates may enroll with instructor permission. Previously offered as a special topics course.

Requisites: Requires prerequisite or corequisite course of ASEN 5051 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors.

ASEN 6013 (3) High Speed Propulsion

Covers air-breathing and rocket propulsion cycles, their relative performance trade-offs, and how they fit within the context of a vehicle system. Specific emphasis will be placed on fundamental cycle analyses, component level design, and propulsion/airframe integration for rockets, turbojets, ramjets, scramjets, combined cycles, and other advanced propulsion concepts.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4013 or equivalent or instructor consent required.

Additional Information: Departmental Category: Thermodynamics and Propulsion

ASEN 6014 (3) Spacecraft Formation Flying

Studies the dynamic modeling and control of spacecraft formations orbiting about a planet. Investigate linear and nonlinear relative motion descriptions, rectilinear and curvilinear coordinates, orbit element difference based descriptions, J2-invariant relative orbits, as well as Lyapunov-based relative motion control strategies.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Systems and Control

ASEN 6015 (3) Space Vehicle Guidance and Control

The course gives a comprehensive view of guidance systems used in space vehicles, and methods for analyzing the performance of these systems. The types of guidance systems that will be covered are launch vehicle ascent, intercept/rendezvous, interplanetary, orbit station-keeping, atmospheric re-entry, lander, and low-thrust. The mathematical foundation of these systems will be derived and discussed. Real world applications will be presented by reviewing selections from published literature. Course work will emphasize the analysis of the guidance system performance to achieve stated goals. Previously offered as a special topics course.

Requisites: Requires prerequisite courses of ASEN 5014 and ASEN 5050 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

ASEN 6020 (3) Optimal Trajectories

Introduces the theory and practice of trajectory optimization. The general theory behind optimization and optimal control will be introduced with an emphasis on the properties of optimal trajectories. The main application will be to space trajectories, but other applications will also be considered.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites ASEN 5050 and ASEN 5014 or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6021 (3) Viscous Flow

Studies low Reynolds number flows, including incompressible and compressible laminar boundary layer theory; similarity theory; and separation, transition, and turbulent boundary layers.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6024 (3) Nonlinear Control Systems

Introduces the analysis and control design methods for nonlinear systems, including Lyapunov, Describing Function, and Feedback Linearization methods.

Requisites: Requires prerequisite course of ASEN 5014 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Systems and Control

ASEN 6028 (3) Graduate Projects II

Exposes MS and PhD students to leadership positions in project management and systems engineering while working a complex aerospace engineering project as part of a project team. The project team may perform some or all of the following project activities during this second semester of the two-semester course sequence: requirements definition, design and design review, build, test, and verification.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 4138 or ASEN 5148 or ASEN 5018 or ASEN 5158 or instructor consent required.

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6037 (3) Turbulent Flows

Studies turbulent closure methods and computational procedures used to solve practical turbulent flows. Emphasizes multi-equation models used with time-averaged equations to calculate free-turbulent shear-flows and turbulent boundary layers. Employs spectral methods in direct and large-eddy simulation of turbulence. Formerly ASEN 5037.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5051 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6050 (3) Space Instrumentation

Provides an overview of the relevant space environment and process, the types of instruments flown on recent mission and the science background of the measurement principles.

Equivalent - Duplicate Degree Credit Not Granted: ASTR 6050 and GEOL 6050

Requisites: Requires prerequisite course of ASEN 5335 (minimum grade D-).

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6055 (3) Data Assimilation & Inverse Methods for Earth & Geospace Observations

Covers a selection of topics in probability theory, spatial statistics, estimation theory, numeric optimization, and geophysical nonlinear dynamics that form the foundation of commonly used data assimilation and inverse methods in the Earth and Space Sciences. Hands-on computational homework and projects provide opportunities to apply classroom curricula to realistic examples in the context of data assimilation.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade B-). Restricted to graduate students.

Grading Basis: Letter Grade

ASEN 6060 (3) Advanced Astrodynamics

Covers Lagrangian and Hamiltonian formalisms for astrodynamics problems, the computation and characterization of space trajectories in highly dynamic environments, computation of periodic orbits, stability analysis of orbital motion, and development of analytical theories for dynamics.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5050 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6061 (3) Molecular Gas Dynamics and DSMC

Describes the composition and flow of gases on a microscopic level to examine the behavior of the molecules that make up a macroscopic flow system. Thermodynamic properties, transport phenomena, and the governing Boltzmann Equation are derived from molecular collision dynamics and the kinetic theory. The Direct Simulation Monte Carlo method is introduced with applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6070 (3) Satellite Geodesy

Focuses on the measurement of the Earth's gravitational field, rotational characteristics, and shape using Earth and space-based tracking of artificial satellites. Particular emphasis on satellite altimetry and satellite gravity measurements.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 3200 or equivalent or instructor consent required.

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6080 (3) Statistical Orbit Determination

Course on orbit and advanced estimation techniques. Emphasizes orthogonal transformation techniques such as Givens and Householder, square root filtering and smoothing and considers covariance analysis. Also nonlinear filters and dynamic model compensation techniques. Requires term project that involves the application of many of the techniques required for precise orbit determination.

Requisites: Requires prerequisite course of ASEN 5044 (minimum grade D-). Restricted to Aerospace Engineering (ASEN) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) majors and Aerospace graduate certificate students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Astrodynamics and Orbital Mechanics

ASEN 6084 (3) Optical Multi-Target Tracking

This course focuses on exploiting sensor information to detect, track, and characterize unresolved objects using optical sensors. This course will cover phenomenological modeling, error statistics, image processing, detection methods, and several multi-object tracking frameworks. Assignments and projects will incorporate both simulated and empirical data generation / collection and reduction.

Requisites: Requires prerequisite course ASEN 5044 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.

ASEN 6090 (3) Advanced Global Navigation Satellite Systems: Software and Applications

Focuses on high-precision applications of Global Navigation Satellite Systems (GNSS) and the software tools that are needed to achieve these precisions. Topics include precise orbital determination, reference frames, atmospheric delays, relativity, clock models, ambiguity resolution, and scientific applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090 or instructor consent required.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6091 (3) Global Navigation Satellite System (GNSS) Receiver Architecture

Investigates the overall architecture of satellite navigation receivers: including both the analog radio frequency conditioning (antenna to the analog-to-digital converter) and the various signal processing algorithms. Such treatment of the operation of the receiver will provide insight into the trade-offs that go into GNSS as well as the more broad generic spread spectrum receiver design.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5090.

Additional Information: Departmental Category: Global Positioning Systems

ASEN 6107 (3) Nonlinear Finite Element Methods

Continuation of ASEN 5007. Covers the formulation and numerical solution of nonlinear static structural problems by finite element methods. Emphasizes the treatment of geometric nonlinearities and structural stability.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5007 or equivalent or instructor consent required.

Additional Information: Departmental Category: Specialized Courses

ASEN 6116 (3) Spacecraft Life Support Systems

Study the environmental control and the life support systems and technologies that keep people alive and healthy in spacecraft and habitats. Students will learn about thermal control systems, air revitalization processes, water reclamation and treatment, waste handling and the reuse of materials, and food and nutrition. Expect to develop analytical models from first principles and perform hands-on laboratory experiments. Formerly ASEN 5116.

Requisites: Requires prerequisite course of ASEN 5158 (minimum grade D-). Requires corequisite course of ASEN 5016. Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Bioastronautics and Microgravity Science

ASEN 6216 (3) Human Operation of Aerospace Vehicles

Examines the role, capabilities, and limitations of human operators in aerospace vehicles. Topics include theoretical models of human information processing and decision-making, physiological limitations of the human (particularly spatial orientation illusions), the design of display and control interfaces, and the evaluation of those interfaces for human interaction with complex aerospace systems.

Requisites: Requires prerequisite or corequisite course of ASEN 5158 (minimum grade D-). Restricted to College of Engineering (ENGR) graduate students.

Recommended: for aerospace and biomedical engineering students.

ASEN 6265 (3) Fundamentals of Spectroscopy for Optical Remote Sensing

Provides a comprehensive overview of the fundamentals of quantum physics, atomic spectroscopy, molecular spectroscopy and laser spectroscopy. Exposes students to the spectroscopy applications in modern optical and laser remote sensing. Assists students to develop the fundamental knowledge and skills for independent learning.

Requisites: Restricted to Engineering (ENGR) graduate students or Aerospace Engineering-Concurrent Degree (C-ASEN) students.

ASEN 6331 (3) Computational Fluid Dynamics

Focuses on computational approaches to solve the Navier-Stokes equations. Assumes a basic knowledge of the solution of partial differential equations with numerical methods with focus finite element/volume methods (FEM/FVM but primarily FEM). These issues include: the discrete formulation, non-linear equation iterator, linear equation formation, boundary condition prescription and linear equation solution.

Requisites: Requires prerequisite or corequisite courses of ASEN 5007 and ASEN 5051 (minimum grade C). Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: instructor permission required if pre/co requisite of ASEN 5007 and ASEN 5051 haven't been met.

ASEN 6337 (3) Remote Sensing Data Analysis

Covers some of the most commonly used machine learning techniques in remote sensing data analysis, specifically for clustering, classification, feature extraction and dimensionality reduction, and inverse methods used to retrieve geophysical information from remote sensing data. Hands-on computational homework and group and individual projects provide opportunities to apply classroom curricula to real remote sensing data.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Additional Information: Departmental Category: Remote Sensing

ASEN 6365 (3) Lidar Remote Sensing

Provides a comprehensive, yet easily understandable, up-to-date understanding of lidar principles, technologies and applications. Contains approaches for quantitative lidar simulation, lidar sensitivity and error analysis, lidar data retrieval, lidar system design and performance analysis. Gives students opportunities to see and operate real state-of-the-art lidar systems and make connections to lidar experts in the nation and world.

Requisites: Restricted to College of Engineering (ENGR) graduate students, Aerospace Engineering Concurrent Degree (C-ASEN) majors, and Aerospace graduate certificate students.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Aerospace Design and System Engineering

ASEN 6367 (3) Advanced Finite Element Methods for Plates, Shells, and Solids

Continues ASEN 5007. Covers more advanced FEM applications to linear static problems in structural and continuum mechanics. Focuses on modeling, formulation and numerical solutions of problems modeled as plates, shells and solids. Includes an overview of advanced variational formulations.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite introductory graduate level course in FEM and familiarity with linear algebra.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6412 (3) Uncertainty Quantification

This advanced topics course provides an exploration of techniques for representation and propagation of uncertainty in PDE/ODE-based systems.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisites APPM 5570 and ECEN 5612 (all minimum grade B) or equivalent courses with instructor consent.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6427 (3) Advanced Computational Fluid Dynamics

Introduces computational techniques particularly applicable to high-speed gas flows that contain shocks. Complicated numerical methods are developed from relatively simple numerical modules.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5417 or equivalent or instructor consent required.

Additional Information: Departmental Category: Aerodynamics and Fluid Mechanics

ASEN 6517 (3) Computational Methods In Dynamics

Covers modeling, computational algorithms and their computer implementation for both linear and nonlinear dynamical systems. Topics covered include transient analysis, wave propagation, multiphysics analysis, and their significant engineering applications.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite ASEN 5022 or equivalent or instructor consent required.

Additional Information: Departmental Category: Structures, Materials, and Structural Dynamics

ASEN 6519 (1-3) Special Topics

Reflects upon specialized aspects of aerospace engineering sciences. Course content is indicated in the online Schedule Planner.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to College of Engineering (ENGR) graduate students or Aerospace Engineering Concurrent Degree (C-ASEN) majors only.

Recommended: Prerequisite varies.

Additional Information: Departmental Category: Specialized Courses

ASEN 6800 (3) Master of Engr Project

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

Additional Information: Departmental Category: Specialized Courses

ASEN 6849 (1-6) Independent Study

Studies special projects agreed upon by student and instructor.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Additional Information: Departmental Category: Specialized Courses

ASEN 6949 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Additional Information: Departmental Category: Specialized Courses

ASEN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Specialized Courses

ASEN 8990 (1-10) Doctoral Dissertation

Additional Information: Departmental Category: Specialized Courses

Aerospace Engineering Sciences - Master of Science (MS)

CU Boulder's Department of Aerospace Engineering Sciences (AES) is internationally recognized for its research and education leadership in aerospace engineering, Earth and space sciences. Its world-renowned engineers and scientists tackle challenges in aerospace technology and science, focusing on Astrodynamics and Satellite Navigation Systems (ASN); Autonomous Systems (AUT); Bioastronautics (BIO), Fluids, Structures and Materials (FSM); and Remote Sensing, Earth and Space Science (RSESS).

With more than 50 faculty members and over 550 MS and PhD students, our graduate programs prepare aerospace engineering students to meet the needs of our 21st-century society through the understanding, conception, design and application of aerial and spacecraft systems.

In the MS program we focus on hands-on, experiential learning, technical and organizational expertise, and end-to-end mission and systems perspectives via course-based degree options.

Research opportunities for MS students are very limited and are not funded. Students interested in completing an MS thesis are encouraged to take a few of our courses before deciding to pursue that route.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage and our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>).

Requirements

Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an

ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, APPM, MATH, STAT, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Focus Area-Defined Courses

Some focus areas offer the option to take additional courses to satisfy the non-thesis option. This will represent at least an additional six credit hours with respect to the minimum requirement to obtain a MS with that focus area.

Code	Title	Credit Hours
Required Math Course:		
<i>Choose one:</i>		
ASEN 5044	Statistical Estimation for Dynamical Systems ¹	3
ASEN 5227	Mathematics for Aerospace Engineering Sciences 1	
ASEN 5307	Engineering Data Analysis Methods	
ASEN 5417	Numerical Methods in Engineering and Science	
ASEN 5519	Special Topics (Multi-Object Filtering Theory)	
ASEN 5519	Special Topics (Experimental Design and Statistical Methods)	
ASEN 6412	Uncertainty Quantification	
EMEN 5005	Introduction to Applied Statistical Methods	
ECEN 5612	Random Processes for Engineers	
ECEN 5632	Theory and Application of Digital Filtering	
ECEN 5652	Detection and Extraction of Signals from Noise	
4000, 5000, 6000, or 7000 level APPM course		
4000, 5000, 6000, or 7000 level MATH course		
4000, 5000, 6000, or 7000 level STAT course		

Choose one of the following:

Thesis Option

The MS thesis must consist of original and independent research conducted by the graduate student under the supervision of the faculty advisor. The thesis topic must be related to the major field.

ASEN 6950	Master's Thesis	
-----------	-----------------	--

Non-Thesis Option (Select One)

ASEN 5018 & ASEN 6028	Graduate Projects I and Graduate Projects II (6 credits)	
Required courses leading to an approved certificate (or completion of the dual ASEN/EMP degree)		
Course-only option (FSM and AUT)		

¹ Can be used to meet only one ASEN curriculum-specific requirement, i.e. math or ASN core. This restriction does not apply to certificate requirements.

Please visit our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>) for focus area requirements and coursework offerings. Also, visit our website (<https://www.colorado.edu/aerospace/>) for syllabi and tentative future schedules.

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework. Most students complete the degree in one to two years.

Aerodynamics and Satellite Navigation Systems (ASN) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/aerodynamics-satellite-navigation-systems/>)

Requirements of the MS degree in the Aerodynamics and Satellite Navigation Systems focus area are:

- Three ASN Core Classes
- One ASEN MS Course or Required course from an outside (non-ASN) AES focus area

Code	Title	Credit Hours
Core Courses		
<i>Choose three:</i>		
ASEN 5010	Spacecraft Attitude Dynamics and Control	3
ASEN 5044	Statistical Estimation for Dynamical Systems	
ASEN 5050 or ASEN 5052	Space Flight Dynamics or Analytical Astrodynamics	
ASEN 5090	Introduction to Global Navigation Satellite Systems	

Additional Course

Choose one ASEN MS Course or Required course from an outside (non-ASN) AES focus area

Elective Courses Offered by ASN Focus Area

ASEN 6008	Interplanetary Mission Design	
ASEN 6010	Advanced Spacecraft Dynamics and Control	
ASEN 6014	Spacecraft Formation Flying	
ASEN 6015	Space Vehicle Guidance and Control	
ASEN 6020	Optimal Trajectories	
ASEN 6060	Advanced Astrodynamics	
ASEN 6070	Satellite Geodesy	
ASEN 6080	Statistical Orbit Determination	
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications	
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	
ASEN 6519	Special Topics (GNSS for Remote Sensing)	
ASEN 6519	Special Topics (Celestial Mechanics & Advanced Astrodynamics)	
ASEN 6519	Special Topics (Multi-Object Detection, Tracking, and Characterization)	

Autonomous Systems (AUT) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/autonomous-systems/>)

Students are required to take one course from three of the following topic areas:

Code	Title	Credit Hours
Control Theory		
ASEN 5014	Linear Control Systems	
ASEN 6024	Nonlinear Control Systems	
Estimation and Sensor Fusion		
ASEN 5044	Statistical Estimation for Dynamical Systems	
Dynamics and Modelling of Vehicles		
ASEN 5519	Special Topics (Small UAS Dynamics and Control)	
ASEN 6519	Special Topics (System Identification for Control)	
Autonomous Decision-Making		
ASEN 5519	Special Topics (Decision-Making Under Uncertainty)	
ASEN 5519	Special Topics (Algorithmic Motion Planning)	

Programming for Embedded Systems

ASEN 5067	Microavionics: Introduction to PIC Microcontrollers for Aerospace Systems	
MCEN 5115	Mechatronics and Robotics I	
ECEN 5613	Embedded System Design	
ECEN 5813	Principles of Embedded Software	
CSCI 5302	Advanced Robotics	

Elective Courses Offered by AUT Focus Area

ASEN 5114	Automatic Control Systems	
ASEN 5519	Special Topics (Machine Learning for Aerospace)	
ASEN 5519	Special Topics (Aerobotics)	
ASEN 6519	Special Topics (Cooperative Control)	
ASEN 6519	Special Topics (Stochastic Verification and Synthesis)	
ASEN 6519	Special Topics (Hybrid Control Systems)	

Bioastronautics (BIO) (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/bioastronautics/>)

Students are required to take two Core courses and one course from each of the following areas:

Code	Title	Credit Hours
Core Courses		
ASEN 5016	Space Life Sciences	3
ASEN 5158	Space Habitat Design	3
<i>Choose one:</i>		
ASEN 5226	Medicine in Space and Surface Environments	3
ASEN 6116	Spacecraft Life Support Systems	
ASEN 6216	Human Operation of Aerospace Vehicles	
ASEN 6519	Special Topics (Extravehicular Activity)	

Choose one: 3

ASEN 5335	Aerospace Environment	
ASEN 5050	Space Flight Dynamics	
or ASEN 5052	Analytical Astrodynamics	
ASEN 5053	Rocket and Spacecraft Propulsion	

Elective Courses Offered by BIO Focus Area

ASEN 5519	Special Topics (Experimental Design and Statistical Methods)	
ASEN 6116	Spacecraft Life Support Systems	
ASEN 6519	Special Topics (Extravehicular Activity)	
ASEN 6216	Human Operation of Aerospace Vehicles	
ASEN 5226	Medicine in Space and Surface Environments	
ASEN 5849	Independent Study (for MS students)	
ASEN 6849	Independent Study (for PhD 'pre/non-thesis' topic)	

Fluids, Structures and Materials (FSM) (<https://www.colorado.edu/aerospace/academics/graduates/curriculum/fluids-structures-and-materials/>)

Requirements of the MS degree in the Fluids, Structures and Materials (FSM) focus area are:

- Two Core Classes in your chosen track, and one Core course in the other FSM track.
- Two electives from the FSM focus area, with at least one in your chosen track. (See Graduate Handbook for detailed listing.)
- Attending 50% of the “Fluid, Structures and Materials” seminars each semester.

Code	Title	Credit Hours
------	-------	--------------

Core Courses

Fluids Sub-Track

ASEN 5051	Fundamentals of Fluid Dynamics	
ASEN 5151	Fundamentals of Gas Dynamics	
ASEN 5519	Special Topics (Molecular Thermodynamics and Kinetics)	

Structures and Materials Sub-Track

ASEN 5007	Introduction to Finite Elements	
ASEN 5012	Mechanics of Aerospace Structures	
ASEN 5022	Dynamics of Aerospace Structures	

Elective Courses Approved by FSM Focus Area

Fluids

Dual Degree Program

MS in Aerospace Engineering Sciences and ME in Engineering Management

Students may complement their aerospace engineering master's degree with a Master of Engineering (ME) in Engineering Management. To complete the Aerospace Engineering and Engineering Management dual degree program, students must be admitted to Aerospace Engineering first, and apply to Engineering Management afterwards.

Requirements

The dual degree consists of 45 credits: 24 credits based on Aerospace Engineering requirements and 21 based on Engineering Management requirements, as detailed below.

For more information, visit the Engineering Management Program's MS Aerospace Engineering Sciences & ME Engineering Management (<http://www.colorado.edu/emp/programs/graduate-program/dual-degree-program/ms-aerospace-engineering-sciences-me-engineering/>) webpage.

Aerospace Engineering

At least 24 credits at the 5000 level or above:

- At least 18 credits in Aerospace Engineering (ASEN) courses. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class).
- One approved math course (3 credits)
- Professional MS students do not follow focus area-specific requirements and do not require the completion of a certificate, graduate projects or MS thesis
- Traditional MS students:
 - Completion of an approved certificate, graduate projects (6 credits) or MS thesis (6 MS thesis credits)
 - Fulfill focus area-specific requirements

Review our Graduate Student Handbook (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/graduate-student-handbooks/>) for details on focus area requirements, GPA and grade minimums, and other information.

Engineering Management

Students must complete at least 21 credits. Visit the Engineering Management website (<https://www.colorado.edu/emp/current-students/graduate-programs/dual-graduate-degree/>) for details.

Aerospace Engineering Sciences - Professional Master of Science (MSAES)

A professional master's degree (MSAES) in aerospace engineering sciences from CU Boulder is designed for working engineers and people planning to pursue a career in industry. We designed the program with industry partners to meet your needs, further your career and with your location in mind—the degree can be earned on campus or 100 percent online.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

Requirements

Program Requirements

Students must complete a total of 30 credit hours, equivalent to 10 classes, with a grade of B- or better and a cumulative GPA of at least 3.00. Of these 30 credits, at least 24 credit hours must be completed at the 5000 level or above, and at least 18 of those credits must be in Aerospace Engineering (ASEN) courses, and one approved math course. (Note: EMEN 5405 Fundamentals of Systems Engineering counts as an ASEN class. Seminar credits, even those earned in other disciplines, do not count toward the MS degree.)

Up to 6 credits can be taken at the 4000 level in approved engineering, math and science departments (ECEN, CVEN, MCEN, CHEN, CSCI, ATOC, ASTR, PHYS, MCDB, APPM, MATH, STAT, CHEM, IPHY, GEOL, ENVD). ASEN courses level 4000 or below do not count towards AES graduate degrees.

Code	Title	Credit Hours
ASEN Courses		18
Choose from the list below (subject to change)		
ASEN 5007	Introduction to Finite Elements

4000, 5000, 6000, or 7000 level STAT course	
Additional Coursework	9
Total Credit Hours	30

Time Limit

All degree requirements must be completed within four years of the date of commencing coursework.

Aerospace Engineering Sciences - Doctor of Philosophy (PhD)

Students typically complete their PhD in aerospace engineering sciences within 4 to 6 years, depending on whether they enter the program with a master's degree. It is possible for highly qualified students to enter the PhD program without a master's degree.

The primary focus of a PhD student is to perform novel research guided by their faculty advisor. At the time of admission, PhD students must have a faculty advisor who agrees to accept the student into their research program and mentor their academic progress. PhD students are supported through research and teaching assistantships and are also encouraged to apply for their own source of funding.

For more information, visit the department's Prospective Graduate Students (<https://www.colorado.edu/aerospace/prospective-students/graduates/>) webpage.

Requirements

Course Requirements

- A minimum of 30 credit hours of courses numbered 5000 or above (at least 15 of these must be in ASEN) with a minimum of 3.25 GPA.
- 30 credit hours of dissertation credit are required for the degree.
- A maximum of 21 credit hours may be transferred from another accredited institution and applied toward a PhD degree if approved by the graduate committee of the department and the Graduate School.
- All courses taken for the master's degree at the 5000 level or above at the University of Colorado may be applied toward the doctoral degree at the university.
- The formal coursework must include a minimum of 15 credit hours of courses or their equivalent in aerospace engineering sciences.

Preliminary Examination

Students must pass a preliminary examination by no later than the end of the third semester if the student already has an aerospace master's degree upon entry to the program, or the fifth semester if the student does not have an aerospace master's degree. The preliminary exam is composed of an oral exam in front of a committee of three graduate teaching faculty members that focuses upon both research preparation and fundamental knowledge in key subject areas.

The oral exam will be composed of three components:

1. A presentation summarizing the literature review conducted by the student followed by an examination of the presented concepts
2. Two subject area exams based on approved courses

Comprehensive Examination

By no later than the fifth or seventh semester, students must also pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This should be preceded by individual examinations or interviews, either written or oral or both, by every committee member. The oral examination before the committee is based primarily on a written proposal for the thesis research provided by the student to committee members in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Astrodynamics and Satellite Navigation Systems - Graduate Certificate

The Astrodynamics and Satellite Navigation Systems Certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in Astrodynamics and Satellite Navigation (ASN). It is essentially a specialization of the AES MS degree in the ASN focus area, with additional requirements for breadth and depth. The certificate will make students more desirable to future employers looking for astrodynamics and satellite navigation specialists.

This certificate is available to degree-seeking and non-matriculated students. For the latter, please visit Continuing Education (<https://ce.colorado.edu/programs/access/>) to learn more about enrollment and costs. Additional certificate information can be found in the department's Astrodynamics and Satellite Navigation Systems Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/asn-certificate/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by and agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details.
- For Continuing Education (non-matriculated) students, enrollment permission from teaching faculty for each course to take.

Certificate Requirements

Complete all four core area subjects in ASN, plus two advanced ASN courses of the student's choosing (18 credit hours)

Code	Title	Credit Hours
Core Requirements ¹		
ASEN 5010	Spacecraft Attitude Dynamics and Control	3
ASEN 5050	Space Flight Dynamics ²	3
ASEN 5044	Statistical Estimation for Dynamical Systems ³	3
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
Advanced Requirements		
Select any two 6000-level ASN courses, including but not limited to:		6
ASEN 6008	Interplanetary Mission Design	
ASEN 6010	Advanced Spacecraft Dynamics and Control	
ASEN 6014	Spacecraft Formation Flying	
ASEN 6020	Optimal Trajectories	
ASEN 6060	Advanced Astrodynamics	
ASEN 6070	Satellite Geodesy	
ASEN 6080	Statistical Orbit Determination	
ASEN 6090	Advanced Global Navigation Satellite Systems: Software and Applications	
ASEN 6091	Global Navigation Satellite System (GNSS) Receiver Architecture	
ASEN 6519	Special Topics ⁴	
Total Credit Hours		18

¹ Any core requirement can be satisfied by taking an additional 6000-level course which has the corresponding core requirement as a prerequisite. *This substitution does not require a petition.*

² This requirement can be satisfied by taking ASEN 5055 Analytical Astrodynamics or an additional 6000-level course that has ASEN 5050 as a prerequisite.

³ Taking ASEN 5044 as part of the certificate requirement does not preclude it counting as a math course to satisfy the MS or PhD requirement.

⁴ Topics include GNSS for Remote Sensing, Celestial Mechanics & Advanced Astrodynamics, and Multi-Object Detection, Tracking, and Characterization.

Hypersonics - Graduate Certificate

This certificate recognizes student accomplishments at the graduate level in successfully completing a specialized program of study in the cross-disciplinary field of hypersonics. It is sponsored by the Ann and H. J. Smead Department of Aerospace Engineering Sciences (AES) and the Paul M. Rady Department of Mechanical Engineering (ME) and involves courses from AES and ME.

The purpose of the certificate is to develop interdisciplinary skills in the field of hypersonics, which requires knowledge about fundamental areas such as gas dynamics, materials, controls, and how their inter-relationships determine hypersonic vehicle performance.

Requirements

Admission Requirements

The certificate is available to both current graduate students and nondegree students.

- Degree-seeking students: For enrollment, complete the Certificate Enrollment and Award Request Form (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/certificate-enrollment-and-award-request/>)
- Nondegree students (Continuing Education): Visit the Certificates and Continuing Education page (<https://www.colorado.edu/aerospace/prospective-students/graduates/academics/certificates-continuing-education/>) for enrollment details.

Required Courses and Credits

The standard requirements of this certificate program are the completion of twelve (12) hours of graduate-level coursework (typically four 3-credit courses) with grades of B or better in each course. There is one required course, ASEN 5519 Special Topics (Introduction to Hypersonics). Each student is free to choose the other three courses from the elective list below.

Students also pursuing other graduate certificates cannot use the same courses to count for both certificates.

Code	Title	Credit Hours
Course Requirements		
ASEN 5519	Special Topics (Introduction to Hypersonic Aerothermodynamics)	3
Electives		
Choose three:		9
ASEN 5151	Fundamentals of Gas Dynamics	
MCEN 5042	Heat Transfer	
MCEN 6001	Reacting Flows	
MCEN 5228	Special Topics in Mechanical Engineering (High Temperature Materials)	
MCEN 5022	Classical Thermodynamics	
ASEN 5053	Rocket and Spacecraft Propulsion	
ASEN 5331	Computational Fluid Dynamics Unstructured Grid	
ASEN 6061	Molecular Gas Dynamics and DSMC	
ASEN 6037	Turbulent Flows	
MCEN 5024	Materials Chemistry and Structures	
ASEN 6015	Space Vehicle Guidance and Control	
MCEN 5152	Introduction to Combustion	
ASEN 6519	Special Topics (Hypersonic Vehicle Design Project)	
ASEN 5018	Graduate Projects I (Specifically focused on hypersonics, approved by certificate coordinator)	
Total Credit Hours		12

Radio Frequency Engineering for Aerospace - Graduate Certificate

A joint certificate program between Smead Aerospace and the Department of Electrical, Computer & Energy Engineering. This certificate fills an industry need in Colorado and beyond for cross disciplinary graduate level education in aerospace and electrical engineering.

The program is open to new and current degree-seeking Aerospace Engineering Sciences (AES) and Electrical, Computer and Energy Engineering (ECEE) students. This certificate is not available to non-matriculated students.

Additional certificate information can be found in the department's Radio Frequency Engineering for Aerospace Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificate-programs/radio-frequency-engineering-aerospace/>) page.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Be a matriculated graduate student in the AES or ECEE departments
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details

This certificate is co-managed by AES and ECEE. Students must follow the rules and policies of each department. Courses from already awarded degrees cannot be used to fulfill certificate requirements.

Certificate Requirements

Code	Title	Credit Hours
Required Courses		
ECEN 5134	Electromagnetic Radiation and Antennas ¹	3
or ECEN 5104	Passive Microwave Circuits	
ECEN 5634	Microwave and RF Laboratory	3
ASEN 5090	Introduction to Global Navigation Satellite Systems	3
Choose one of the courses below, depending on major:		3
ASEN 5148	Spacecraft Design (required for ECEE majors)	
ECEN 3410	Electromagnetic Waves and Transmission (required for AES majors)	
Elective Courses		
Choose two:		6
ECEN 5134	Electromagnetic Radiation and Antennas ²	
or ECEN 5104	Passive Microwave Circuits	
ECEN 5114	Electromagnetic Theory	
ECEN 5154	Computational Electromagnetics	
ASEN 5245	Radar and Remote Sensing	

AES Grad Projects³**Total Credit Hours** 18

- ¹ For students interested in taking both courses, one course can count as a requirement and one course can count as an elective. A single course cannot count as both a required course and an elective course, simultaneously.
- ² As an elective, choose whichever course *not* taken as a requirement.
- ³ Approved radio frequency project; can only count for one elective.

Remote Sensing - Graduate Certificate

Remote sensing (satellite and ground-based) is increasingly being used as a technique to probe the Earth's atmosphere, ocean, and land surfaces. Probing of other planets is accomplished largely by satellite remote sensing. Given national priorities in such areas as climate and global change, the interest in remote sensing will only increase with time. Graduate students, research staff and faculty work on a wide variety of topics ranging from the theory of remote sensing, to instrument development and application.

This certificate is available to degree-seeking and non-matriculated students. For the latter, please visit Continuing Education (<https://ce.colorado.edu/programs/access/>) to learn more about enrollment and costs. Additional certificate information can be found in the department's Remote Sensing Certificate (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/remote-sensing-certificate/>) webpage.

Distance Education Option

Students can take individual courses toward a master's degree or graduate certificate through distance education (online). For more information, connect with the individual graduate program directly.

Requirements

Admissions Requirements

- Completed undergraduate degree from an institution accredited by and agency recognized by the U.S. Department of Education, or its equivalent.
- Undergraduate courses in calculus, linear algebra, and differential equations, two semesters of undergraduate calculus-based physics, and at least two semesters of upper-division undergraduate courses in engineering or physics.
- Submission of application form. Please visit the AES Certificates Page (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>) for more details.
- For Continuing Education (non-matriculated) students, enrollment permission from teaching faculty for each course to take.

Certificate Requirements

The Remote Sensing Certificate (<http://www.colorado.edu/aerospace/current-students/graduates/curriculum/remote-sensing-earth-space-science/remote-sensing-certificate/>) will be awarded based on a written request by the student to the Remote Sensing Earth Space Science Focus Lead or Graduate Chair, provided that the following requirements have been met:

- Four courses are required totaling at least 12 credits, with grades of B or better.
- Two courses from one of the following topical areas:
 - Data Analysis
 - Instrumentation and Measurement Techniques
 - Remote Sensing Theory
- One course in each of the two remaining topical areas.
- At least one semester of Remote Sensing Seminar (currently listed as ASEN 5210 and ATOC 7500), offered each year in the fall semester.

For more information about the certificate, please contact the aerospace engineering sciences graduate advisor at aerograd@colorado.edu, or visit the certificate webpage (<https://www.colorado.edu/aerospace/current-students/graduates/curriculum/certificates/>).

Architectural Engineering

Architectural engineering focuses on the design, construction and operation of buildings and the integration of their systems. The department offers Master of Science (MS) and Doctor of Philosophy (PhD) degrees in architectural engineering with a study emphasis (i.e., focus area) in (1) building energy, (2) illumination, (3) materials and resources, and (4) construction engineering and management.

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>). The Graduate Record Examination (GRE), consisting of the aptitude tests and advanced test in engineering, is used to evaluate MS and PhD candidates. Candidates who submit GRE scores are more likely considered for financial assistance.

Course code for this program is **AREN**.

Research Interests and Facilities

The Larson HVAC Laboratory has been a staple of the University of Colorado's building energy research activities and AREN program education. The laboratory has been the stepping stone for fundamental and applied research in building energy efficiency, energy controls, thermal comfort and indoor air quality. The newly renovated Larson HVAC Laboratory provides a unique facility that permits the evaluation of entire systems in a controlled dynamic environment, providing repeatable test conditions. The laboratory has been recently redesigned to allow maximum flexibility in conducting a wide variety of research and testing procedures. In particular, both the HVAC and control systems in the laboratory are reconfigurable in that components, subsystems or entire systems can be readily installed and tested. For instance, the performance of air handling units, displacement ventilation units, chilled beams and variable refrigerant flow units can be tested. In addition, coils, air mixers, dampers, filters and variable frequency drives can be evaluated. Moreover, the laboratory offers the possibility to test standalone HVAC and refrigeration systems including water heaters, boilers, thermal energy storage tanks and chillers.

The Lighting Laboratory is a learning and research space for lighting students in the AREN program. The lab has a dynamic ceiling with adjustable height to allow a wide range of academic and research exploration. Although the lab has a full-wall, with north-facing windows, there are blackout curtains installed to eliminate any undesirable external light. In addition, this lab houses a goniophotometer used to measure the intensity of light leaving a luminaire at various vertical and horizontal angles. The measured data allow establishing photometric light distribution of the luminaire and metrics such as total lumen output, luminaire luminance and zonal lumen summary. The lab also houses a small lighting sphere, which allows testing of lumen output of LED luminaires and LED chips. In addition, the lighting lab includes a studio space used primarily for lighting research. The lab has an extensive aluminum open ceiling grid that allows for quick electrical and physical connection of light sources and luminaires for research. For lighting

design-oriented classes, students have access to theatrical-type and programmable color-changing luminaires to do mock-ups and study lighting effects.

The AREN laboratories offer state-of-the-art facilities to test a wide range of operational and control strategies for lighting and HVAC systems and subsystems. Indeed, several control projects have been carried out in the Larson HVAC laboratory including demand-ventilation controls, optimal chiller and thermal energy storage controls, outdoor air intake controls, and optimal operation of evaporative systems. In addition, fault diagnostic algorithms have been tested in the laboratory for specific HVAC equipment including for heating and cooling coils, chillers and outdoor air intake dampers.

Master's Degrees

- Architectural Engineering - Master of Science (MS) (p. 1477)

Doctoral Degree

- Architectural Engineering - Doctor of Philosophy (PhD) (p. 1478)

Certificate

Associate Professor, Faculty Fellow, Faculty Director; PhD, Purdue University

Courses

AREN 5001 (3) Building Energy Systems: Thermal, Electrical & Lighting Sys

Prepares graduate students with general knowledge and skills that are required by advanced AREN technical courses. Covers three parts of materials: 1) building thermal systems, 2) building lighting systems, 3) building electrical systems.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5010 (3) Energy System Modeling and Control

Engineering course devoted to building automation and control systems. Topics include HVAC control technology and strategies, measurement and device technologies, analysis and modeling of dynamic systems, simulation of conventional and advanced control approaches, assessment of control loop performance and hands-on direct digital control (DDC) programming exercises as used in current building control practice.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4010

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Recommended: Prerequisite AREN 4140.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5020 (3) Building Energy Audits

Analyzes and measures performance of HVAC systems, envelopes, lighting and hot water systems, and modifications to reduce energy use. Emphasizes existing buildings.

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5030 (3) Data Science for Energy and Buildings

Establishing hands-on skills along with understanding of underlying mathematical concepts of current machine learning approaches including: ordinary least squares, quantile, logistic, and local regression; unsupervised methods including principal component analysis and clustering; tree-based models such as regression trees and random forests; kernel-based methods such as support vector and Gaussian process regression; Bayesian inference; as well as shallow and deep neural networks. Numerous examples and case studies applicable to thermal/building/renewable/district energy systems will be used. Undergraduate seniors will be allowed with instructor consent.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN).

AREN 5050 (3) Advanced Solar Design

Predicts performance and analyzes economics of low-temperature, high-temperature, photovoltaic, and other innovative solar systems. Also includes performance prediction methods for solar processes. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5060 (3) Distributed Electricity Generation

Introduces basic distributed generation (DG) technologies including fuel-based systems and renewable energy technologies and overview approaches to conduct energy, economical, and environmental analysis of selected DG technologies using state-of-the-art analysis tools to evaluate optimal hybrid distributed generation systems to meet required electrical loads specific to urban centers, campuses, and residential communities.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Grading Basis: Letter Grade

Additional Information: Departmental Category: Building Systems Engineering

AREN 5070 (3) Thermal Analysis of Buildings

Examines response factors, conduction transfer functions and weighting factors for dynamic analysis of building envelopes. Also studies radiative and convective exchange in buildings, internal gains and infiltration analysis as modeled in hourly simulations. Taught intermittently.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5080 (3) Computer Simulation of Building Energy Systems

Introduces major simulation programs for analysis of building energy loads and system performance. Focuses on one hourly simulation program to develop capability for analysis of multizone structure.

Requisites: Requires prerequisite course of AREN 4110 or AREN 5110 (minimum grade C-). Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5090 (3) Optimizing Grid Connected Systems

Address the challenges that the electric power grid is facing from a technical perspective, using grid modeling, mathematics (optimization and linear algebra) and programming (Python). The course will also touch on a variety of topics such as electricity markets, renewable energy integration, and distributed energy resources, including how buildings can help the broader electrical grid. Students will gain skills that will help them prepare for careers in building controls, renewable energy, energy policy, and more. Do not take this class if you have already taken a power systems optimization course.

Recommended: Prerequisites students should have prior experience/coursework in programming (beyond Excel) and linear algebra before taking this course.

Grading Basis: Letter Grade

AREN 5110 (3-4) HVAC System Design

Applies engineering principles to the design of heating, ventilating and air conditioning (HVAC) systems for buildings. Covers HVAC systems description, load estimation, psychometrics, coils and heat exchangers, air and water distribution systems and primary equipment and systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4110

Requisites: Restricted to graduate students or concurrent degree students with sub-plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5130 (3) Optical Design for Illumination and Solid State Lighting

Covers the optical design process for illumination-based optics, emphasis on applications in architectural lighting. In-depth coverage of luminaire photometry, lamps, materials, manufacturing methods, product performance requirements. Projects utilize optical design software and include a variety of lamp types including LEDs using both reflector/lens optics.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4130

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Recommended: Prerequisite AREN 3540.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5510 (3) Architectural Lighting I

Teaches the fundamentals of architectural lighting systems and the human responses to those systems. Describes the properties of light sources, how light interacts with architectural elements, and how light affects human visual and non-visual responses. Provides a broad overview of the holistic effects of light on building occupants, as well as the implications for building energy use and sustainability. Previously offered as a special topics course.

Requisites: Restricted to non-degree (NDGR) graduate students only.

AREN 5520 (3) Architectural Lighting II

Builds on the fundamentals taught in AREN 5500 with a detailed look at how technical information about lighting systems can be used for design concepts and analyses. Provides an examination of daylighting in buildings. Describes the latest research and design standards for color rendering, glare, flicker, circadian rhythms, and alerting effects. Concludes by considering case studies of various project types.

Requisites: Open to Non-degree, Non sponsored Students only.

AREN 5530 (3) Architectural Lighting Capstone

Concludes the nine-credit Professional Graduate Certificate in Architectural Lighting with an immersive hands-on experience. Concepts learned in the two prior online courses will be demonstrated and experienced using facilities and equipment available on the CU Boulder campus. A culminating, comprehensive project submittal that includes content developed during the entire three-course sequence will be submitted following the on-campus experience.

Requisites: Requires prerequisite courses of AREN 5510 and AREN 5520 (all minimum grade C-). Restricted to non-degree (NDGR) graduate students only.

AREN 5540 (3) Exterior Lighting Systems

Engages students in exploring and solving lighting problems for exterior environments. Provides an understanding of the design criteria and lighting equipment used in three primary exterior applications: parking lots and roadways, floodlighting of buildings, and sports facilities. Taught intermittently.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4540

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Recommended: Prerequisites AREN 3540 and AREN 4550.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5570 (3) Building Electrical Systems Design 1

Introduces the generation and distribution of electrical power. Focuses on understanding the loads, control, and protection of secondary electrical distribution systems in building. Applies the national electric code to residential and commercial buildings. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4570

Requisites: Requires prerequisite course of AREN 5001 (minimum grade D-).

Recommended: Prerequisite AREN 3030.

AREN 5580 (3) Daylighting

Applies the fundamental principles of illumination engineering to architectural daylighting design, exploring the quantitative methods and tools used to develop daylighting designs and evaluate their performance. Topics include solar resource models, energy transfer models, design methods, and controls for integration with electric lighting systems.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4580

Requisites: Requires prerequisite course of AREN 3540 (minimum grade C-).

AREN 5620 (3) Adaptive Lighting Systems

Builds on architectural lighting principles studied in Illumination 1 and 2. Explores quantitative methods and the design process to develop architectural lighting control solutions. Topics include adaptive lighting applications such as daylight integration and occupant well-being, as well as control system architecture and components, codes and standards, and design implementation. Previously offered as a special topics course.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4620

Requisites: Requires prerequisite courses of AREN 3540 and AREN 4550 (minimum grade D-).

Recommended: Prerequisite AREN 4130.

AREN 5650 (3) Forensic Engineering

Identify and explore the physical, chemical, mechanical, and biological deterioration mechanisms in the most common construction materials; concrete, masonry, metals, wood, polymers, and fiber-reinforced composites. Course topics include an introduction to failure analysis; materials science; ion diffusion; electrochemistry (corrosion); fracture, fatigue, and creep; and diagnostic, retrofit, and rehabilitation strategies for extended service life.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

AREN 5660 (3) Embodied Carbon in Buildings

Introduces students to whole building life cycle assessment (LCA) and embodied carbon in buildings. Topics include LCA methodologies, whole-building LCA tools, materials science of low-carbon and carbon-storing building materials, and strategies for reducing embodied carbon.

Requisites: Restricted to graduate students only, or BAM students with C-AREN, C-CVEN, or C-ARENCVEN subplan.

AREN 5830 (1-3) Architectural Engineering Special Topic

Supervised study of special topics of interest to students under instructor guidance.

Repeatable: Repeatable for up to 9.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, or C-EVENCVEN) only.

AREN 5849 (1-3) Independent Study in Architectural Engineering

The topics and the goals of this course are tailored to fit the needs of the student in various areas related to the Architectural Engineering program. These topics and goals, documented in the course agreement form at the start of the semester, include but are not limited to areas of building energy engineering, building illumination systems, construction engineering and management, building materials and resources, and building electrical systems.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Grading Basis: Letter Grade

AREN 5890 (3) Sustainable Building Design

Introduces green building design procedure/approach and provides insight into evolving design principles; explores aspects of building thermal/energy performance, indoor/outdoor environmental quality, occupant comfort and climate relevant to building design (structures not covered); emphasizes both comprehensive understanding and practical applications of sustainable building design strategies; applies prevailing simulation tools to assist green building design.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4890

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Recommended: Prerequisite AREN 3010.

Additional Information: Departmental Category: Building Systems Engineering

AREN 5990 (3) Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts

Explores the fundamentals of simulating/analyzing civil and architectural environments with Computational Fluid Dynamics (CFD) method. Run with two parallel sessions: fundamentals and applications, with fundamental lectures presenting the principles of CFD technologies, and application sessions demonstrating the application of CFD for resolving building and environmental engineering problems (different than MCEN/ASEN) with hands-on exercises.

Equivalent - Duplicate Degree Credit Not Granted: AREN 4990

Requisites: Restricted to graduate students or concurrent degree sub plans (C-AREN, C-CVEN, C-ARENCVEN, C-EVENCVEN or C-EVEN) only.

Recommended: Prerequisites AREN 2120 and APPM 2360.

Additional Information: Departmental Category: Building Systems Engineering

AREN 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

Additional Information: Departmental Category: Building Systems Engineering

AREN 6950 (1-6) Master's Thesis

Additional Information: Departmental Category: Building Systems Engineering

AREN 6960 (1-3) Master's Report

Repeatable: Repeatable for up to 3.00 total credit hours.

Additional Information: Departmental Category: Building Systems Engineering

AREN 8990 (1-10) Doctoral Dissertation

A minimum of 30 credit hours is required.

Additional Information: Departmental Category: Building Systems Engineering

Architectural Engineering - Master of Science (MS)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a Master of Science degree with study emphases in several major areas:

- building systems engineering
- construction engineering and management
- global engineering

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Architectural Engineering - Bachelor of Science (BS) (p. 760)

Requirements

For a Master of Science (MS) degree in architectural engineering, students may undertake Plan I (with a thesis) or Plan II (with a project).

Up to 6 credits of independent study may be taken, where an individual course of study is worked out between the student and a faculty member. Up to 9 credits of graduate courses can be transferred from another institution. Students are allowed up to 6 credits in total of non-technical coursework for the MS/PhD degree.

Degree Plans

Plan I: Thesis Option

Plan I requires 24 credits of coursework, plus 6 credits of thesis work. The thesis is a formal research report that discusses an organized research topic. Experience has shown that it takes a student from 24 to 30 months to complete this plan. Financial support is generally limited to exceptionally well-qualified students selecting Plan I.

Plan II: Non-Thesis Option

Plan II requires 27 credits of coursework, plus 3 credits of MS project work. The 3-credit Master's Report (AREN 6960) is related to an applied research AREN topic. It can be successfully completed in 18–24 months by a diligent student. Note that one-half of the coursework must be taken in the CEAE Department (an exception may be made if the relevant courses were taken as part of an undergraduate degree).

With the approval of the advisor, non-CEAE courses at the 4000 level may be used for graduate credit up to a maximum of 6 credits.

Course Requirements

Courses offered in the architectural engineering graduate program may be separated into four tracks, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these track areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific track under the general track option.

Code	Title	Credit Hours
Required Core Courses		
AREN 5001	Building Energy Systems: Thermal, Electrical & Lighting Sys	
Electives (Varies by Plan)		6-9
<i>Building Energy Engineering Focus Area</i>		
Select 15 credits from the following:		15
AREN 5010	Energy System Modeling and Control

AREN 5060	Distributed Electricity Generation	
AREN 5080	Computer Simulation of Building Energy Systems	
AREN 5110	HVAC System Design	
AREN 5570	Building Electrical Systems Design 1	
AREN 5830	Architectural Engineering Special Topic (Modeling and Simulation of Community Energy Systems)	
AREN 5890	Sustainable Building Design	
AREN 5990	Compu Fluid Dynamics (CFD) Analysis for Built/Natural Envmnts	

CVEN 5830 Special Topics for Seniors/Grads (Data Science for Energy and Building)

CVEN 5830 Special Topics for Seniors/Grads (Grid Connected Systems)

Illumination Engineering Focus Area

Select 15 credits from the following: 15

AREN 5130 Optical Design for Illumination and Solid State Lighting

AREN 5560 Luminous Radiative Transfer

AREN 5580 Daylighting

AREN 5620 Adaptive Lighting Systems

AREN 5830 Architectural Engineering Special Topic (Illumination 2)

Materials and Resources Focus Area

Select 15 credits from the following: 15

AREN 5650 Forensic Engineering

AREN 5660 Embodied Carbon in Buildings

CVEN 5565 Life-Cycle Engineering of Civil Infrastructure Systems

CVEN 5831 Special Topics (Construction Materials)

CVEN 5835 Special Topics for Seniors/Grads (Design of Wood Structures)

CVEN 5835 Special Topics for Seniors/Grads (Design of Masonry Structures)

Construction Engineering & Management Focus Area

Select 15 credits from the following: 15

CVEN 5226 Construction Safety

CVEN 5246 Legal Aspects of Construction

CVEN 5276 Engineering Risk and Decision Analysis

CVEN 5286 Design Construction Operations

CVEN 5346 Managing Construction and Engineering Projects and Organizations

CVEN 5836 Special Topics for Seniors/Grads (Infrastructure Asset Management)

CVEN 5836 Special Topics for Seniors/Grads (Construction Engineering and Management Fundamentals)

Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering program (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/>) must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

Architectural Engineering - Doctor of Philosophy (PhD)

Graduate studies in architectural engineering are offered through the Department of Civil, Environmental and Architectural Engineering. The department offers a PhD degree with study emphases in several major areas:

- building systems engineering
- construction engineering and management
- engineering for developing communities

For more information, visit the department's Graduate Studies (<http://www.colorado.edu/ceae/prospective-students/graduate-studies/>) webpage.

Requirements

Course Requirements

For a Doctor of Philosophy degree (PhD) in architectural engineering, students need at least 30 hours of graduate-level coursework plus a dissertation.

Courses offered in the architectural engineering graduate program may be separated into four tracks, one specific to the Construction Engineering & Management discipline and three related to the Building Systems Engineering discipline. Students may decide to concentrate in one of these track areas, or they may wish to take a broad selection from the courses; there is no requirement for picking any specific track under the general track option.

CVEN 5836	Special Topics for Seniors/Grads (Construction Engineering and Management Fundamentals)

Residency Requirements

For an entrant from another university, up to 21 hours of acceptable graduate courses may be transferred, leaving at least 9 hours of coursework to be completed at the University of Colorado upon the approval of their advisors. The transfer credits are transferable at the discretion of the research advisor, and students may be asked to take additional courses toward the completion of their degree. Work already applied toward a graduate degree received from the University of Colorado or another institution cannot be accepted for transfer toward another graduate degree of the same level at the University of Colorado. All courses accepted for transfer must be graduate-level courses. A course in which a grade of B- or lower was received will not be accepted for transfer.

For students already in the MS program in the CEAE department, 30 hours of graduate coursework performed at CU is applicable towards the PhD degree upon the approval of their advisors. The PhD also requires that 30 hours of dissertation credit be taken, with a minimum residency of 2 years. After passing the comprehensive exam, PhD candidates are required to maintain continuous registration. Candidates must register for at least 5 hours of dissertation credits each semester.

Preliminary Examination

Each doctoral student shall take a preliminary examination as determined by the faculty of the specialty area in which the student is enrolled, normally not later than 12 months from the time the student is first enrolled in the doctoral program. Each CEAE group has a designated time for PhD students to take the exam. Students should discuss the schedule, date and format of the exam with their academic adviser.

Comprehensive Examination

Before admission to candidacy for the doctoral degree, students must pass a comprehensive examination, which shall consist of a written and an oral examination in the field of concentration and related fields. At the comprehensive examination, the student shall present a plan for the dissertation research to the Advisory Committee for approval.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Graduate Certificate in Global Engineering

Students admitted to the Graduate Certificate in Global Engineering (<https://catalog.colorado.edu/graduate/colleges-schools/engineering-applied-science/programs-study/civil-engineering/engineering-developing-communities-graduate-certificate/>) program must fulfill the coursework and practicum requirements of that program. For AREN students, up to 6 credits of the required certificate coursework can count as coursework needed for the PhD degree.

Biomedical Engineering

CU Boulder's Biomedical Engineering program offers students a flexible degree program to achieve their degree and research goals. Biomedical engineering is an exciting, multidisciplinary field that lies at the intersection of medicine, biology, and engineering.

With a cross-listed curriculum and an interdisciplinary faculty roster, the BME program delivers a multi-faceted and rigorous education in biomedical engineering. Our department consists of 32 faculty members from multiple backgrounds and disciplines. They conduct research in the areas of biomechanics, tissue engineering, biomaterials, drug delivery, molecular imaging, image-guided therapy, point-of-care diagnostics, biosensors, prosthetics, bioastronautics, systems biology, and many more.

Our program offers students the opportunity to take courses in any of the following areas:

- Biomechanics
- Imaging and Diagnostics
- Medical Devices
- Therapeutics

The BME program is directed by Professor Mark Borden. For more information, visit the Biomedical Engineering Program (<https://www.colorado.edu/bme/>) website.

Course code for this program is BMEN.

Master's Degree

- Biomedical Engineering - Master of Science (MS) (p. 1481)

Doctoral Degree

- Biomedical Engineering - Doctor of Philosophy (PhD) (p. 1481)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Associate Professor; PhD, Massachusetts Institute of Technology

Courses

BMEN 5117 (3) Anatomy and Physiology for Biomedical Engineering

The main objective of this multidisciplinary course is to explore human physiological function from the viewpoint of an engineer. It provides an introduction to human anatomy and physiology with a focus on learning anatomical structures, biological signaling, physiological and pathological conditions, as well as fundamental biomedical engineering concepts that apply quantitative analyses (mass transfer, fluid dynamics, mechanics, modeling) and engineering concepts (e.g., device design to restore defective physiological functions) to understand physiology and pathology.

Equivalent - Duplicate Degree Credit Not Granted: BMEN 4117

Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5840 (1-6) Independent Study

Provides opportunities for independent study at the graduate level.

Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

Repeatable: Repeatable for up to 30.00 total credit hours.

Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 5939 (1-6) Biomedical Engineering Internship

Grants credit to international graduate students for conducting research via professional research opportunities in the biomedical engineering field. Students are responsible for securing their own internships.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate students only.

BMEN 6519 (1-3) Special Topics

Credit hours and subject matter to be arranged.

Repeatable: Repeatable for up to 12.00 total credit hours. Allows multiple enrollment in term.

BMEN 6949 (1) Master's Candidate for Degree

Credit hours and subject matter to be arranged.

BMEN 6950 (1-6) Master's Thesis

Work with a faculty advisor on a masters thesis.

Repeatable: Repeatable for up to 6.00 total credit hours.

Requisites: Restricted to graduate Biomedical Engineering students only.

BMEN 7840 (1-6) Independent Study

Provides opportunities for independent study at the graduate (PhD) level.

Subject and/or project agreed upon by the student and instructor to fit the needs of the student.

Requisites: Restricted to Biomedical Engineering BMEN-PhD students only.

BMEN 8990 (1-10) Doctoral Dissertation

Work with a faculty advisor on a doctoral dissertation.

Repeatable: Repeatable for up to 60.00 total credit hours.

Requisites: Restricted to Biomedical Engineering (BMEN) Ph.D. graduate students only.

Biomedical Engineering - Master of Science (MS)

The Biomedical Engineering Master of Science (MS) degree program is designed to be flexible to meet the individual student's needs. Students will collaborate with faculty and other advisors to create a tailored degree plan based on their career interests and goals.

Students may choose either a coursework- or thesis-based MS. The thesis option requires completion of a research project with a faculty

mentor, a written thesis that describes the research in detail, and an oral defense in front of a committee of program faculty.

For more information, visit the Biomedical Engineering MS Program (<https://www.colorado.edu/bme/masters-program/>) page.

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s):

- Biomedical Engineering - Bachelor of Science (BSBM) (p. 731)

Requirements

Biomedical Engineering MS students must complete 30 credit hours at the 5000 level or higher and obtain a minimum of grade of C (2.0) in each class to count towards the degree. Of these 30 credit hours, at least 18 credit hours will be specifically in designated biomedical engineering courses, with the remaining credit hours obtained, as needed, from other fields (e.g., business, other engineering electives). Of the 18 credit hours of biomedical engineering coursework, one core course is required: BMEN 5117 Anatomy and Physiology for Biomedical Engineering (3 credits), which provides a foundation for advanced study. PhD students must receive a grade of B- (2.7) or higher in each course. Students must also maintain a 3.0 cumulative GPA or higher to be in good standing with the Graduate School.

For more information, visit the Biomedical Engineering MS Program (https://www.colorado.edu/bme/masters-program/#coursework_requirements-127) page.

Required Courses

- BMEN 5117 Anatomy and Physiology for Biomedical Engineering (offered starting Fall 2021)
- Up to 9 credit hours (3 courses) can be taken outside the College of Engineering, with the remainder in biomedical engineering or related fields.
- Thesis students must use 6 credit hours toward their thesis.

Biomedical Engineering - Doctor of Philosophy (PhD)

Biomedical Engineering PhD students have the opportunity to participate in cutting-edge research with engineering faculty in many different biomedical fields. Our program provides the scientific foundation to prepare students for careers in academia, healthcare, industry and government labs.

The PhD program is open to both first-time graduate students as well as those who hold master's degrees.

For more information, visit the Biomedical Engineering PhD Program (<https://www.colorado.edu/bme/academics/phd-program/>) page.

Requirements

All Biomedical Engineering PhD student must complete a minimum of 30 credit hours at the 5000 level or higher, plus 30 credit hours of dissertation credits. Some research advisors will require that their students complete more than 30 course credits, and the department recommends that specific course decisions should be agreed upon through individual faculty/student discussions.

Required Courses and Credits

BMEN 5117 – Anatomy & Physiology for Biomedical Engineers (offered starting Fall 2021)

Preliminary Examination

Biomedical Engineering PhD students are required to pass a preliminary examination. It consists of a comprehensive review of primary literature that supports the current and future research directions of the student. This must be completed within the first three semesters after matriculation into the program.

Comprehensive Examination

The Comprehensive Examination is an important second evaluation step required to advance the student to candidacy for the PhD degree, which is typically completed within the first three years after matriculation to the program and greater than one year prior to graduation. It consists of an NIH R21-style research proposal in addition to an oral exam with a selected committee of faculty advisors, both focusing on the proposed course of research. Students will also likely have completed on chapter of their dissertation for submission to a peer-reviewed journal before taking the Comprehensive Exam.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements for the Biomedical Engineering PhD must be completed within six years of the date commencing coursework.

Plan(s) of Study

In order to graduate with a PhD in Biomedical Engineering, students must take 30 coursework credits and 30 dissertation credits.

Of the 30 credit hours of coursework required at the 5000 level or above, at least 18 credit hours will be specifically in designated biomedical engineering courses, with the remaining credit hours obtained, as needed, from other fields (e.g. business, other engineering electives).

Of the 18 credit hours of biomedical engineering coursework, one core course will be required: BMEN 5117 Anatomy and Physiology for Biomedical Engineering (3 credits), which provides a foundation for advanced study.

Chemical Engineering

The Department of Chemical and Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) (ChBE) offers an innovative graduate program and emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration

and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within the Department of Chemical and Biological Engineering include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science; energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials, and renewable energy.

Biological engineering research includes a broad collection of focal areas spanning from the molecular scale (metabolites, genes, proteins) to the cellular and multicellular scales. Biological engineering projects account for a significant portion of the research activity within the ChBE Department. This research is supported in a variety of manners: federal grants (NIH, NSF, DOD, etc.), national foundations (Howard Hughes, Cystic Fibrosis, etc.), and industrial collaborators.

Functional Materials research in the ChBE Department is concentrated in a diverse group of research areas including polymers, nanostructured materials, photovoltaic materials, ultrathin films, catalytic materials, computational materials science, self-assembled monolayers, and liquid crystalline materials. The department has strength in studying materials problems at the nanometer and sub-nanometer length scales. Such fundamental investigations are directed toward technological applications.

Finally, the ChBE Department has an active program in renewable energy research. Studies range from the production and utilization of hydrogen to materials for photovoltaics to biorefining and biofuels research. A number of efforts focus on developing catalysts for converting water to hydrogen and CO₂ into fuels such as CO and methanol. Another area of focus is the study of novel photovoltaic materials and structures involving organic, inorganic, and hybrid structures for efficient solar energy harvesting.

Course code for this program is CHEN.

Master's Degree

- Chemical Engineering - Master of Science (MS) (p. 1486)

Doctoral Degree

- Chemical Engineering - Doctor of Philosophy (PhD) (p. 1487)
- Biological Engineering - Doctor of Philosophy (PhD) (p. 1487)

Faculty

While many faculty teach both undergraduate and graduate students, some instruct students at the undergraduate level only. For more information, contact the faculty member's home department.

Courses

CHEN 5090 (1) Seminar in Chemical Engineering

Required of all chemical engineering graduate students. Includes reports on research activities and on special current topics.

Requisites: Restricted to graduate students only.

CHEN 5128 (3) Applied Statistics In Research and Development

Students learn current and emerging statistical methods that are appropriate to experimentation in research and development activities. Statistical design of experiments and model fitting is emphasized. Department enforced prereq.: one introductory probability/statistics course.

CHEN 5150 (3) Biomolecular Kinetics, Transport, and Thermodynamics

Required for the Biological Engineering PhD. This course covers aspects of kinetics, transport, and thermodynamics as they relate to interactions between biomolecules and cells. These core subjects will be introduced within concepts common to cell biology, protein/genetic engineering, and signaling, among others. Undergraduate enrollment with instructor consent only.

Recommended: Prerequisites Introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, organic chemistry.

CHEN 5160 (3) Systems Analysis of Cells and Tissues

Required for the Biological Engineering PhD. This course explores how to describe signaling and regulation networks present at the cell and tissue level. Topics include gene expression, stem cell differentiation, homeostasis, and others.

Recommended: Prerequisite prior experience in introductory biology and/or biochemistry, linear algebra, differential equations, thermodynamics, and organic chemistry.

CHEN 5210 (3) Transport Phenomena

Considers continuum mechanics, emphasizing fundamental relationships for fluid mechanics and heat and mass transfer and their applications to engineering problems. Department enforced prerequisites: undergraduate courses in fluid mechanics, heat transfer, and differential equations.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5360 (3) Catalysis and Kinetics

Studies principles of chemical kinetics and catalytic reactions, emphasizing heterogeneous catalysis.

Requisites: Requires corequisite course of CHEN 4330. Restricted to Chemistry (CHEM) or Chemical Engineering (CHEN) graduate students only.

CHEN 5370 (3) Intermediate Chemical Engineering Thermodynamics

Reviews fundamentals of thermodynamics, application to pure fluids and mixtures, and physical equilibrium and changes of state. Examines the equation of state and computation of fluid properties for pure fluids, mixtures and solutions. Also looks at relations between thermodynamics and statistical mechanics. Department enforced prerequisite: an undergraduate course in chemical thermodynamics.

Requisites: Restricted to graduate students only.

CHEN 5390 (3) Chemical Reactor Engineering

Studies ideal and nonideal chemical reactors, including unsteady state behavior, mixing effects, reactor stability, residence time distribution and diffusion effects. Department enforced prerequisite: undergraduate course in chemical reactor design/kinetics.

Requisites: Restricted to graduate students only.

CHEN 5420 (3) Physical Chemistry and Fluid Mechanics of Interfaces

Covers thermodynamics of interfaces and surface tension measurement; adsorption at liquid-gas, liquid-liquid, and solid-gas interfaces; monolayers; conservation equations for a fluid interface; rheology of interfaces; surface tension driven flows; contact angle and wettability; and double layer phenomena.

Requisites: Requires prerequisite course of CHEN 3200 (minimum grade D-).

CHEN 5440 (3-4) Design of Materials

The course content includes introduction and study of important concepts in solid state physics (particularly those relevant for design of materials); origin, characterization and design of mechanical, electronic, optical, magnetic, thermal and electrochemical properties of materials; design of bulk and nanostructured composites; introduction to polymers and soft materials; fundamentals of colloids and interfaces; and nanoscale chemistry and physics for design or desired material properties.

Grading Basis: Letter Grade

CHEN 5450 (3) Polymer Chemistry

Introduces polymer science with a focus on polymer chemistry and polymerization reactions. Focuses on polymerization reaction engineering and how polymer properties depend on structure.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4450

Requisites: Restricted to graduate students only.

CHEN 5460 (3) Polymer Engineering

Introductory polymer engineering course reviewing basic terminology and definitions; the properties and synthetic routes of important industrial polymers; and processing of polymers and their applications.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4460

Requisites: Restricted to graduate students only.

CHEN 5470 (3) Functional Materials Chemistry

The synthesis, organization, and processing of materials can enable functional performance. Curriculum will overview the synthesis and design of functional organic and inorganic materials. A particular emphasis will be placed on structure-performance correlations between chemistry and materials organization. Topical foci will include polymers, biomaterials, and materials for energy.

Recommended: Prerequisite Introductory course(s) in materials or organic chemistry.

CHEN 5480 (3) Solar Cells and Optical Devices for Sustainable Buildings

This course assumes no background in electronic materials and explains how silicon and cutting-edge metal halide perovskite solar cells are designed, fabricated and characterized. Topics will include optics, band diagrams, wafer fabrication, most thin film deposition techniques, module design and economics. Other optical devices that can help the world rapidly reduce its carbon emissions, such as light-emitting diodes and energy saving windows with dynamic tinting, will also be covered.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4480

Recommended: Prerequisite a course in materials science (for example CHEN 4440), the physics of electromagnetism and optics at a very basic level.

CHEN 5490 (3) Electrochemical Engineering

This course discusses fundamentals and applications of electrochemical systems from an engineering perspective. Aspects of thermodynamics, reaction kinetics, and transport phenomena relevant to the description of electrode/electrolyte interfaces and charge transfer reactions are covered. Topics include cell equilibrium (Nernst equation), reactions rates within Butler-Volmer and Marcus theory, electrochemical double layer structure, ion transport (Poisson-Nernst-Planck equation), potential and current distributions in electrochemical cells, and experimental electroanalytical techniques. Applications include fuel cells, electrolyzers, batteries, sensors, and corrosion.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4490

Requisites: Requires prerequisite courses of (CHEN 4330 or CHEN 4830) and PHYS 1120 (minimum grade D-). Restricted to graduate students only.

Grading Basis: Letter Grade

CHEN 5630 (1) Intellectual Property Law and Engineering

Learn the fundamentals of the various types of intellectual property, obtain the ability to search the USPTO database for patents, learn the difference between provisional patents, utility patents and foreign patents and learn the timing requirements related to the filing of patents and public disclosure, use, and/or sale of an invention.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4630

Requisites: Restricted to graduate students only.

CHEN 5650 (3) Particle Technology

Aims to identify the important physical mechanisms occurring in processes involving particles, formulate and solve mathematical descriptions of such processes, and analyze experimental and theoretical results in both a qualitative and quantitative manner. Teaches students to apply this knowledge to the design of particulate systems. Conveys the breadth and depth of natural and industrial applications involving particulates. Extra work required for graduate course.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4650

Requisites: Restricted to graduate students only.

CHEN 5670 (3) Environmental Separations

Lect. Covers traditional, as well as new, chemical separations processes that have environmental applications. Includes chemically benign processing (pollution prevention) as well as approaches to address existing pollution problems.

CHEN 5730 (1) Mathematical Methods Short Course for Chemical Engineers

Determine and apply appropriate analytical methods, which may include linear and nonlinear algebraic equations, ordinary differential equations and partial differential equations, to solve an array of chemical engineering problems. Identify and interpret the differences between model predictions and experimental results.

Grading Basis: Letter Grade

CHEN 5740 (3) Analytical Methods in Chemical Engineering

Presents applied analytical and numerical mathematical methods in the context of chemical engineering problems. Topics include modeling techniques, algebraic equations, and ordinary and partial differential equations. Department enforced requisite: working knowledge of computing, calculus, differential equations, linear algebra, and vector operations; and undergraduate courses in physics, fluid mechanics, heat transfer, and reaction engineering.

Requisites: Restricted to students with 87-180 credits (Seniors) or graduate students only.

CHEN 5750 (3) Numerical Methods in Chemical Engineering

Covers numerical methods for solving ordinary differential, partial differential, and integral equations. These principles are employed to develop, test, and assess computer programs for solving problems of interest to chemical engineers.

Requisites: Restricted to graduate students only.

CHEN 5800 (3) Bioprocess Engineering

Reviews the recent developments in the fields of microbiology, molecular genetics, and genetic engineering that are of commercial value and benefit to mankind. Covers engineering implementation of such biological processes.

CHEN 5803 (3) Metabolic Engineering

Introduces basic concepts in metabolic engineering and explores modern approaches in metabolic and strain engineering. Application areas that will be discussed will include the use of metabolic engineering approaches in biofuels and biorefining as well as biopharmaceutical production.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4803

Requisites: Requires prerequisite courses of APPM 2360 and BCHM 4611 (all minimum grade C-). Restricted to graduate students only.

CHEN 5804 (3) Protein and Enzyme Engineering

This course reviews various applications of protein and enzyme engineering and covers key concepts in protein and enzyme design, including protein structure-function relationships; rational and evolutionary engineering approaches; genetic code expansion; cell-free protein synthesis; computational design; and biophysical methods for protein characterization. Additionally, students gain valuable experience reading, analyzing, and interpreting research results from scientific literature, as well as drafting an original research proposal.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4804

Requisites: Requires prerequisite courses of CHEN 3320 and CHEN 2810 and BCHM 4611 (minimum grade D-). Restricted to graduate students only.

Grading Basis: Letter Grade

CHEN 5805 (3) Biological Interactions to Biomaterials

Covers major classes of materials used in medical applications. Provide an in-depth view of advanced biomaterial concepts with a focus on biological interactions with materials that relate to protein and cell interactions, the innate and acquired immune response, blood interactions and infection.

Requisites: Restricted to graduate students only.

CHEN 5830 (1) Introduction to Modern Biotechnology

Introduces students to the biotechnology enterprise. Topics include the biotechnology industry and profession, the various academic disciplines of biotechnology, intellectual property, financing, and ethics.

CHEN 5831 (2) Biotechnology Case Studies

Capstone course required of all graduate students in the interdisciplinary graduate biotechnology certificate program. Reviews molecular genetics, product synthesis and purification, economics, intellectual property, and business planning. Working in teams, students present a biotechnology product plan.

Requisites: Requires prerequisite course of CHEN 5830 (minimum grade D-).

CHEN 5835 (3) Colloids and Interfaces

Provides a deep exploration of the fundamental principles of colloid and interface science and of related applications. Core topics include fundamental equations of interfacial science, capillary phenomena, interfacial thermodynamics interfaces, molecular monolayers, electrical surface properties, and interfacial forces. Advanced topics include wetting phenomena, adsorption isotherms, dynamic interfacial behavior, surface modification, tribology, surfactant self-assembly, and foams/emulsions among others.

Requisites: Requires prerequisite course of CHEN 3320 (minimum grade C-).

CHEN 5836 (3) Nanomaterials

Presents fundamental chemical and physical concepts that give rise to the unique optical, electronic and magnetic properties of nanoscale materials. Introduces important synthetic routes for producing nanomaterials, and interparticle forces governing colloidal behavior and self-assembly. Discusses current and potential applications in catalysis, biomedicine, renewable energy, and other fields.

Equivalent - Duplicate Degree Credit Not Granted: CHEN 4836

Requisites: Restricted to graduate students only.

CHEN 5838 (1-3) Special Topics in Chemical Engineering

Graduate-selected topics courses offered upon demand.

Repeatable: Repeatable for up to 6.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5840 (1-4) Independent Study

Allows multiple enrollment in term.

Repeatable: Repeatable for up to 7.00 total credit hours. Allows multiple enrollment in term.

Requisites: Restricted to graduate students only.

CHEN 5900 (3) Pharmaceutical Biotechnology

Incorporates biochemistry, pharmaceutical science, and engineering for application in the pharmaceutical industry. Emphasizes microscale mechanisms affecting drug delivery, bioavailability, and stability. Specific topics include thermodynamics of macromolecular conformational stability, crystallization kinetics, interfacial phenomena, and industrial protein folding.

Requisites: Restricted to graduate students only.

CHEN 5919 (1-5) Special Topics in CHBE

Repeatable: Repeatable for up to 5.00 total credit hours.

Requisites: Restricted to graduate students only.

CHEN 6210 (3) Microhydrodynamics of Suspensions and Colloids

Focuses on fluid mechanics and colloid science of suspensions of particles, cells, and drops. Covers fundamentals, applications, and research frontiers.

Requisites: Requires prerequisite course of CHEN 5210 (minimum grade D-).

CHEN 6820 (3) Biochemical Engineering Fundamentals

Covers design and operation of fermentation processes, microbial and enzyme kinetics, multiple substrate and multiple species of fermentation, regulation of enzyme activity, energetics of cellular growth, immobilized enzyme and cell reactors, and transport phenomena in microbial systems and downstream processing.

Requisites: Restricted to Chemistry (CHEM), Chemical Engineering (CHEN), Biological Engineering (BIEN), or Biological Sciences (MCDB) graduate students only.

CHEN 6940 (1) Master's Candidate for Degree

Registration intended for students preparing for a thesis defense, final examination, culminating activity, or completion of degree.

CHEN 6950 (1-6) Master's Thesis**CHEN 8990 (1-10) Doctoral Dissertation**

Chemical Engineering - Master of Science (MS)

The Master of Science degree in chemical engineering requires 30 hours of approved credit hours and successful completion of a comprehensive final exam or thesis defense.

For more information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

Note: The department does not accept students interested in a terminal master's degree except under special circumstances. Students generally obtain a master's degree in the course of fulfilling the requirements for the Chemical Engineering - Doctor of Philosophy (PhD) (p. 1487) or the Biological Engineering - Doctor of Philosophy (PhD) (p. 1487).

Bachelor's–Accelerated Master's Degree Program

Students may earn this degree as part of the Bachelor's–Accelerated Master's (BAM) degree program, which allows currently enrolled CU Boulder undergraduate students the opportunity to earn a bachelor's and master's degree in a shorter period of time.

For more information, see the Accelerated Master's tab for the associated bachelor's degree(s): Chemical Engineering - Bachelor of Science (BS) (<https://catalog.colorado.edu/undergraduate/colleges-schools/engineering-applied-science/programs-study/chemical-biological-engineering/chemical-engineering-bachelor-science-bs/#acceleratedmasterstext>).

Requirements

Admission Requirements

General criteria for regular admission to the master's program include a bachelor's degree with a 3.25/4.00 or better overall GPA from a college or university of recognized standing, equivalent to the degree given at this university (or college work equivalent to that required for such a degree, at least 96 credit hours of which must be acceptable toward a degree at this university)# promise of ability to pursue advanced study and research, as judged by previous scholastic record or otherwise# and adequate preparation to begin graduate study in the chosen field.

Degree Requirements

The following course requirements are subject to change; for the most current information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

A candidate for the Master of Science degree in chemical engineering must complete at least 30 credits, including at least 24 credits of coursework and 4–6 credits of MS thesis credit (CHEN 6950).

Only courses 5000-level and above may be applied towards the MS degree. Moreover, only courses at the 5000-level and above in any

department count toward the PhD degree. An advisor must approve all courses.

Only those courses for which the student receives a grade of B- or better will count toward the MS degree. The overall grade point average must be 3.00 or better.

A successful oral defense of the MS thesis is required.

Required Courses and Credits

Code	Title	Credit Hours
Required Courses		
CHEN 5210	Transport Phenomena	3
CHEN 5370	Intermediate Chemical Engineering Thermodynamics	3
CHEN 5390	Chemical Reactor Engineering	3
Total Credit Hours		9

Additionally, 15 of the total required credits must be chemical and biological engineering courses, and pass/fail courses do not count toward the degree.

A degree plan must be prepared at the beginning of the academic program in consultation with an advisory committee. The student is urged to maintain close contact with this advisory committee during the entire course of study.

Residency and Time Limit

It is expected that a qualified student can complete the MS degree in two years or less. All work, including the thesis defense and filing of the thesis with the Graduate School, must be completed in the two-year requirement.

Biological Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

For additional information, visit the department's Biological Engineering (<https://www.colorado.edu/chbe/graduate-program/biological-engineering-phd-program/>) and Prospective Graduate Students (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

Requirements

Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 semester hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits. Biological Engineering PhD students are required to complete two core courses: CHEN 5150 Biomolecular Kinetics, Transport, and Thermodynamics and CHEN 5160 Systems Analysis of Cells and Tissues.

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass Transfer, Thermodynamics, Kinetics, or the equivalent courses). The graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.

Comprehensive Examination

Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

Time Limit

All degree requirements must be completed within six years of the date of commencing coursework.

Chemical Engineering - Doctor of Philosophy (PhD)

The Department of Chemical and Biological Engineering (ChBE) offers an innovative graduate program that emphasizes the doctoral degree. ChBE's outstanding national and international students take advantage of the high level of faculty-student collaboration and benefit from access to three interdisciplinary research centers. Department faculty and students have won numerous awards both nationally and internationally.

General research areas within ChBE include: biomaterials, biopharmaceutical engineering, catalysis, surface science and reaction engineering, complex fluids and microfluidic devices, computational science, energy and environmental applications, membranes and separations, metabolic engineering and directed evolution, nanostructured films and devices, polymer chemistry and engineering, and tissue engineering.

ChBE is one of the top research departments in the nation and maintains sophisticated facilities to support research endeavors. Although research in the department spans many diverse fields, there is a particular emphasis on research in biological engineering, functional materials and renewable energy.

For more information, visit the department's Prospective Graduate Student (<https://www.colorado.edu/chbe/graduate-program/prospective-graduate-students/>) webpage.

Requirements

Course Requirements

The student must work out an informal degree plan early in the PhD program with the aid of a research committee. This degree plan must include a total of at least 30 course credit hours of 5000-level or above courses and at least 30 semester hours of Doctor Thesis credits.

Students are required to complete three core courses:

- CHEN 5370 Intermediate Chemical Engineering Thermodynamics
- CHEN 5390 Chemical Reactor Engineering
- CHEN 5210 Transport Phenomena

Students are expected to complete with distinction all work in the formal courses that apply toward the degree, and achieve an overall grade-point average of 3.00 or better. A course grade below B- will not be counted toward the minimum requirements for the PhD degree, but it will be considered in the overall grade-point average.

Preliminary Examination

A preliminary examination is required of all PhD candidates. This examination consists of an oral and written component to be completed in the third semester. In addition, all students entering the program without a degree closely related to chemical engineering must either take the FE exam or have completed four chemical engineering core undergraduate courses with a grade of B or better (Fluids/Heat, Mass Transfer, Thermodynamics, Kinetics, or the equivalent courses). The graduate director or department chair will make assessments as to whether a degree is closely related to the chemical engineering degree.

Comprehensive Examination

Students must complete and pass an oral examination before the student's doctoral committee of five or more graduate faculty members chosen by the student and approved by the department and the Graduate School. This is followed by a group question-and-answer period with all committee members. The oral examination before the committee is based primarily on a written report the student provides to committee members two weeks in advance.

PhD Dissertation

Students must write a dissertation based on original research conducted under the supervision of a graduate faculty member. The dissertation must fulfill all Graduate School requirements. After the dissertation is

completed, an oral final examination on the dissertation and related topics is conducted by the student's doctoral committee.

All degree requirements must be completed within six years of the date of commencing coursework.

Civil Engineering

Graduate studies in civil engineering are offered up to the doctoral level through the Department of Civil, Environmental and Architectural Engineering (<http://www.colorado.edu/ceae/>). Fundamental and applied research areas pursued in the civil engineering program include geotechnical engineering and geomechanics, structural mechanics and engineering, construction management and engineering, environmental and geoenvironmental engineering, hydrology, environmental fluid mechanics, civil engineering systems, and engineering science. Together with relevant advanced coursework, graduates possess high competence and versatility to pursue a wide variety of careers in both engineering and non-engineering fields.

Course code for this program is CVEN.

Research Interests and Facilities

The Department has a variety of computational and experimental research facilities. It has multiple disciplinary computer labs as well as the CEAE Bechtel lab which houses dozens of workstations with a wide range of professional engineering analysis software for teaching and research, and owns time and ready access to the university's supercomputer system. Physical experimental facilities for geotechnical engineering and geomechanics research include 3 geotechnical centrifuges, with one being a world-class 440g-ton centrifuge with a servo-controlled shake table for advanced physical simulations and soil model testing. For soil and rock mechanics research, analytical research can be conducted in the M.Y. Leung Computational Lab for Soils and Structures and its graduate experimental soil mechanics lab which houses multiple triaxial and cubical cells for simulating complicated 3D ascending and cyclic stress paths on geomaterials, consolidation devices with load-, deformation- and seepage-control, and special test cells for unsaturated soil mechanics testing. For structural mechanics and material engineering research, sophisticated testing for static and dynamic response of structures and their components is available by means of multiple high-speed high-force actuators, a large strong floor and a hydraulic shake table. Four uniaxial loading frames and MTS equipment for studies of mechanical and durability properties of structural and construction materials under combined load and environmental conditions are in use. Sophisticated real-time hybrid experimental-computational pseudo-dynamic testing of large-scale structures whose critical part is tested physically as a substructure with its measured response serving as input to a computer model of the rest of the structure which in turn computes the next load increment to be applied experimentally to the former in a coupled manner can also be set up.
